*Vocabulary and English for Specific Purposes Research* Averil Coxhead 2017-09-18 This volume provides an important contribution to the study of vocabulary and its relationship to English for Specific Purposes (ESP) research and teaching. Focussing on quantitative and qualitative approaches, this book draws on a wide range of literature to explores key issues that include: how to identify and categorise specialised vocabulary; and the role and value of word list research in English for Academic Purposes (EAP) and ESP. This book features: An analysis of material in a range of different contexts that include secondary school education, pre-university and university-based education, professional and occupational ESP, and the trades. inclusion of many examples of specialised vocabulary from research in Aotearoa/New Zealand and from many other areas in the world. a review of the application of vocabulary research to professional and pedagogical practice suggestions for future directions for research. Written by a leading researcher, *Vocabulary and English for Specific Purposes Research* provides key reading for those working in this area.

**Learning the Language of Dentistry** Peter Crosthwaite 2019-08-20 This book explores the affordances of disciplinary corpora for the teaching and learning of the language of dentistry, within the field of English for Specific Academic Purposes (ESAP). We extract disciplinary register features and vocabulary from three key genres of the dentistry discipline (published experimental research articles, case reports, and novice/professional research reports within the Dental Public Health domain), before integrating these features into ESAP pedagogy in the form of corpus-based ESAP materials that promote student-led direct engagement with disciplinary corpora – an approach known as 'data-driven learning'. This book is a timely and relevant addition to the field of corpus linguistics and ESAP, and is especially targeted at ESAP professionals who are required to teach disciplinary discourses but who may struggle to know what to teach as non-experts of the target discipline.

*Key Issues in English for Specific Purposes in Higher Education* Yasemin Kırkgöz 2018-01-08 This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies, the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.

**Text Typology and Translation** Anna Trosborg 1997-11-27 This book breaks new ground in translation theory and practice. The central question is: In what ways are translations affected by text types? The two main areas of investigation are: A. What are the advantages of focusing on text types when trying to understand the process of translation? How do translators tackle different text types in their daily practice? B. To what extent and in what areas are text types identical across languages and cultures? What similarities and dissimilarities can be observed in text types of original and translated texts? Part I deals with methodological aspects and offers a typology of translations both as product and as process. Part II is devoted to domain-specific texts in a cross-cultural perspective, while Part III is concerned with terminology and lexicon as well as the constraints of mode and medium involving dubbing and subtitling as translation methods. Sonnets, sagas, fairy tales, novels and feature films, sermons, political speeches, international treaties, instruction leaflets, business letters, academic lectures, academic articles, medical research articles, technical brochures and legal documents are but some of the texts under investigation. In sum, this volume provides a theoretical overview of major problems and possibilities as well as investigations into a variety of text types with practical suggestions that deserve to be weighted by anyone considering the relation between text typology and translation. The volume is indispensable for the translator in his/her efforts to become a “competent text-aware professional”.

**The Changing Landscape of Spanish Language Curricula** Alan V. Brown 2018-07-01 Spanish remains a large and constant fixture in the foreign language learning landscape in the United States. As Spanish language study has grown, so too has the diversity of students and contexts of use, placing the field in the midst of a curricular identity crisis. Spanish has become a second, rather than a foreign, language in the US, which leads to unique opportunities and challenges for curriculum and syllabus design, materials development, individual and program assessment, and classroom pedagogy. In their book, Brown and Thompson address these challenges and provide a vision of Spanish language education for the twenty-first century. Using data from the College Board, ETS, and the authors' own institutions, as well as responses to their national survey of almost seven hundred Spanish language educators, the authors argue that the field needs to evolve to reflect changes in the sociocultural, socioeducational, and sociopolitical landscape of the US. The authors provide coherent and compelling discussion of the most pressing issues facing Spanish post-secondary education and strategies for converting these challenges into opportunities. Topics that are addressed in the book include: Heritage learners, service learning in Spanish-speaking communities, Spanish for specific purposes, assessment, unique needs for Spanish teacher training, online and hybrid teaching, and the relevance of ACTFL's national standards for Spanish post-secondary education. An essential read for Spanish language scholars, especially those interested in curriculum design and pedagogy, that includes supporting reflection questions and pedagogical activities for use in upper-level undergraduate and graduate-level courses.

**The Routledge Handbook of Corpus Linguistics** Anne O'Keeffe 2022-02-08 The Routledge Handbook of Corpus Linguistics 2e provides an updated overview of a dynamic and rapidly growing area with a widely applied methodology. Over a decade on from the first edition of the Handbook, this collection of 47 chapters from experts in key areas offers a comprehensive introduction to both the development and use of corpora as well as their ever-evolving applications to other areas, such as digital humanities, sociolinguistics, stylistics, translation studies, materials design, language teaching and teacher development, media discourse, discourse analysis, forensic linguistics, second language acquisition and testing. The new edition updates all core chapters and includes new chapters on corpus linguistics and statistics, digital humanities, translation, phonetics and phonology, second language acquisition, social media and theoretical perspectives. Chapters provide annotated further reading lists and step-by-step guides as well as detailed overviews across a wide range of themes. The Handbook also includes a

wealth of case studies that draw on some of the many new corpora and corpus tools that have emerged in the last decade. Organised across four themes, moving from the basic start-up topics such as corpus building and design to analysis, application and reflection, this second edition remains a crucial point of reference for advanced undergraduates, postgraduates and scholars in applied linguistics.

*Audiovisual translation in the foreign language classroom: applications in the teaching of English and other foreign languages* Jennifer Lertola 2019-02-28 The aim of this book is to systematically review studies on the applications of captioning (subtitling) and revoicing (dubbing, audio description, and voice-over) in the foreign language classroom, in order to offer an overview of the state of the art and encourage further research. The literature review presents research on the topic, paying particular attention to relevant experimental studies (i.e. empirical research that involves data collection, and not just a mere description of the experience or the learners' outcomes), examined in terms of research focus, target languages, participants, learning settings, audiovisual materials, captioning/revoicing software, and type of analysis (i.e. qualitative and/or quantitative).

Corpora in ESP/EAP Writing Instruction Maggie Charles 2021-03-30 This collection showcases the latest innovations in research on the application of corpora and corpus-based methods in ESP/EAP writing instruction and the many ways in which corpora can be successfully and practically integrated in ESP/EAP programmes. While previous work has discussed the successful use of corpora in teaching writing in the areas of ESP/EAP, this book is the first of its kind to bring the most up-to-date research on the topic together in one place. The volume's unique structure mirrors the key stages of the writing instruction process, from preparation to exploitation to analysis. The book begins by showing how corpora can be used to prepare materials, moving into an exploration of how students in ESP/EAP programmes use corpora in practice, before bringing the discussion full circle to the ways in which corpus-based approaches might be implemented to analyse ESP/EAP student writing. This approach presents readers with insights into how corpora can be effectively integrated into ESP/EAP writing instruction at every step of the process and opens the way for future areas of study. This book will be of particular interest to students and researchers in applied corpus linguistics, English for Specific Purposes, and English for Academic Purposes, as well as active practitioners in ESP/EAP writing instruction.
