Inclusive Businesses in Agriculture Wytse Chamberlain 2017-03-30 Inclusive business is hailed as a win-win scenario for the development of poor communities; yet there is little insight into how these inclusive businesses work and, more importantly, for whom. This book aims for a thorough understanding of the range of inclusive businesses in agriculture by examining: the structures they implement, the actors involved, and whether they are effectively inclusive of smallholders. It presents a range of case studies and is therefore empirically based and practically oriented. By offering a critical assessment of inclusive businesses overall, it allows for a better perception of what works where, and under which conditions. It provides useful insights that will benefit smallholders, agri-businesses, support groups, policy makers and investors who are willing to promote more inclusive businesses, that foster a better integration of smallholders into commercial value-chains and a more equitable and sustainable agricultural sector.

Disarmament, Demobilization and Reintegration in Southern Africa Gwinyayi Albert Dzinesa 2017-08-24 This book is a critical comparative reflection of the post-colonial conflict Disarmament, Demobilization and Reintegration (DDR) of ex-combatants in Zimbabwe, Namibia and South Africa. It offers an up-to-date comparative analysis of how specific analytical elements that transcend state boundaries shaped DDR in the three southern African countries. The author explores structural and organizational frameworks, target groups, state leadership in DDR, linkages between DDR and SSR in nation and state building, and types of post-conflict violence. The volume draws on fieldwork including interviews with policy makers and government officials as well as ex-combatants and experts to provide valuable insights

into how post-colonial conflict DDR can provide knowledge crucial to understanding and addressing the problems of post-conflict peace building in Africa. The book is aimed at academics, researchers and students working on Southern Africa; African and Western policymakers concerned with problematic post-conflict situations on the continent, where improvising DDR processes will be vital to success; as well as the general reader interested in political, security and other developments in the region. It will be of use in postgraduate courses in the inter-related fields of international relations, comparative government, conflict resolution and peacebuilding.

Using Evidence in Policy and Practice Ian Goldman 2020-06-10 This book asks how governments in Africa can use evidence to improve their policies and programmes, and ultimately, to achieve positive change for their citizens. Looking at different evidence sources across a range of contexts, the book brings policy makers and researchers together to uncover what does and doesn't work and why. Case studies are drawn from five countries and the ECOWAS (west African) region, and a range of sectors from education, wildlife, sanitation, through to government procurement processes. The book is supported by a range of policy briefs and videos intended to be both practical and critically rigorous. It uses evidence sources such as evaluations, research synthesis and citizen engagement to show how these cases succeeded in informing policy and practice. The voices of policy makers are key to the book, ensuring that the examples deployed are useful to practitioners and researchers alike. This innovative book will be perfect for policy makers, practitioners in government and civil society, and researchers and academics with an interest in how evidence can be used to support policy making in Africa. the 1950s were dominated by political decolonization and the emergence of the Cold War system, and newly independent countries were able to utilize the transformed balance of power for their own economic development through economic and strategic aid programmes. This book examines the interconnections between the transfer of power and state governance in Asia, the emergence of the Cold War, and the transfer of hegemony from the UK to the US, by focusing specifically on the historical roles of international economic aid and the autonomous response from Asian nation states in the immediate post-war context. The Transformation of the International Order of Asia offers closely interwoven perspectives on international economic and political relations from the 1950s to the 1960s, with specific focus on the Colombo Plan and related aid policies of the time. It shows how the plan served different purposes: Britain's aim to reduce India's wartime sterling balances in London; the quest for India's economic independence under Jawaharlal Nehru; Japan's regional economic assertion and its endeavour to improve its international status; Britain's publicity policy during the reorganization of British aid policies at a time of economic crisis; and more broadly, the West's desire to counter Soviet influence in Asia. In doing so, the chapters explore how international economic aid relations became reorganized in relation to the independent development of states in Asia during the period, and crucially, the role this transformation played in the emergence of a new international order in Asia. Drawing on a wide range of international contemporary and archival source materials, this book will be welcomed by students and scholars interested in Asian, international, and economic history, politics and development studies.

What Works in Girls' Education Gene B Sperling 2015-09-29 Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.
