33 Ways to Help with Numeracy Brian Sharp 2008-10-08 Thirty Three Ways to Help with Numeracy equips teachers and teaching assistants with a wide range of practical resources to help children who are having difficulties learning the basic skills of numeracy. By providing a range of activities and games which engage children and encourage motivation in the classroom, the book provides ready-to-use exercises that don't need lengthy forward preparation. Any materials needed are readily available in the classroom or are provided here to photocopy. The activities are designed using a range of different learning styles to: build learners' confidence and self esteem develop reasoning and thinking about

physical number situations encourage discussions explore numbers by doing The activities can be used with individual children, groups or the whole class. The introduction at the head of each activity describes precisely what it aims to teach the child, followed by clear, concise instructions on how to play each game. Teachers, SENCos and Teaching Assistants will welcome this helpful resource, which complements *Thirty Three Ways to Help with Reading* also available from Routledge.

Heidegger on Concepts, Freedom and Normativity Sacha Golob 2014-01-16 This book offers a fundamentally new account of the arguments and concepts which define Heidegger's early philosophy, and locates them in relation to both contemporary analytic philosophy and the history of philosophy. Drawing on recent work in the philosophy of mind and on Heidegger's lectures on Plato and Kant, Sacha Golob argues against existing treatments of Heidegger on intentionality and suggests that Heidegger endorses a unique position with respect to conceptual and representational content; he also examines the implications of this for Heidegger's views on truth, realism and 'being'. He goes on to explore Heidegger's work on the underlying issue of normativity, and focuses on his theory of freedom, arguing that it is freedom that links the existential concerns of *Being and Time* to concepts such as reason, perfection and obligation. His book offers a distinctive new perspective for students of Heidegger and the history of twentieth-century philosophy.

Fat Land Greg Critser 2004-01-05 "An in-depth, well-researched, and thoughtful exploration of the 'fat boom' in America." —*The Boston Globe* Low carb, high protein, raw foods . . . despite our seemingly endless obsession with fad diets, the startling truth is that six out of ten Americans are overweight or obese. In *Fat Land*, award-winning nutrition and health journalist Greg Critser examines the facts and societal factors behind the sensational headlines, taking on everything from supersize to Super Mario, high-fructose corn syrup to the high costs of physical education. With a sharp eye and even sharper tongue, Critser examines why pediatricians are now treating conditions rarely seen in children before; why type 2 diabetes is on the rise; the personal struggles of those with weight problems—especially among the poor—and how agribusiness has altered our waistlines. Praised by the *New York Times* as "absorbing" and by *Newsday* as "riveting," this disarmingly funny, yet truly alarming, exposé stands as an important examination of one of the most pressing medical and social issues in the United States. "One scary book and a good companion to Eric Schlosser's *Fast Food Nation*." —*Seattle Post-Intelligencer*

Applications of Gene-Based Technologies for Improving Animal Production and Health in Developing Countries Harinder P.S. Makkar 2005-08-12 Modern Biotechnology has potential for solving many problems associated with animal productivity and health and offers exciting opportunities for enhancing agricultural productivity. At present the focus is, however, on the issues and problems of significance for livestock producers in the developed world. In order to fully realize the benefits of this technology in developing countries, there is a need to identify, characterize and apply appropriate gene-based technologies for these regions. These proceedings present peer reviewed state-of-the-art papers

describing the achievements in the areas of animal breeding and genetics, animal nutrition, animal health, and environment, ethics, safety, and regulatory aspects of gene-based technologies; achievements which could be realized using these modern scientific tools to maximise the benefits from the 'livestock revolution' that is taking place; and the constraints in the use of gene-based technologies and their specific research needs. This book will help in bridging the wide gap between developed and developing countries, in the development and use of gene-based technologies, and to elucidate the current and future roles of such technologies in the developing world. It is a good reference source for researchers, students and policy-makers alike.

Shamed Sarbjit Kaur Athwal 2013-06-20 In 1998, Sarbjit Athwal was called by her husband to attend a family meeting. It looked like just another family gathering. An attractive house in west London, a large dining room, two brothers, their mother, one wife. But the subject they were discussing was anything but ordinary. At the head of the group sat the elderly mother. She stared proudly around, smiling at her children, then raised her hand for silence. 'It's decided then,' the old lady announced. 'We have to get rid of her.' 'Her' was Surjit Athwal, Sarbjit's sister-in-law. Within three weeks of that meeting, Surjit was dead: lured from London to India, drugged, strangled, and her body dumped in the Ravi River, never to be seen again. After the killing, risking her own life, Sarbjit fought secretly for justice for nine long, scared years. Eventually, with immense bravery, she became the first person within a murderer's family ever to go into open court in an honour killing trial as the Prosecution's key witness, and the first to waive her anonymity in such a trial. As a result of her testimony, the trial led to the first successful prosecution of an honour killing without the body ever being found. But her story doesn't end there. Since the trial, her life has been threatened; her own husband arrested after an allegation of intimidation. *Shamed* is a story of fear and of horror - but also of immense courage, and a woman who risked everything to see that justice was done.

Game Over? Christophe Chalamet 2017-09-11 Modern science informs us about the end of the universe: "game over" is the message which lies ahead of our world. Christian theology, on the other hand, sees in the end not the cessation of all life, but rather an invitation to play again, in God's presence. Is there a way to articulate together such vastly different claims? Eschatology is a theological topic which merits being considered from several different angles. This book seeks to do this by gathering contributions from esteemed and fresh voices from the fields of biblical exegesis, history, systematic theology, philosophy, and ethics. How can we make sense, today, of Jesus' (and the New Testament's) eschatological message? How did he, his early disciples, and the Christian tradition, envision the "end" of the world? Is there a way for us to articulate together what modern science tells us about the end of the universe with the biblical and Christian claims about God who judges and who will wipe every tear? Eschatology has been at the heart of Christian theology for 100 years in the West. What should we do with this legacy? Are there ways to move our reflection forward, in our century? Scholars and other interested readers will find here a wealth of insights.

Sewing Machine Basics Jane Bolsover 2010-10-14 In the climate of "make do and mend," sales of sewing machines have soared, but many are only accompanied by a difficult-to-understand technical manual. Here, Jane Bolsover provides a comprehensive guide for beginners. Starting with an essential overview of the sewing machine, learn how to thread it and wind bobbins, why tension is important, and which needles to choose. There's information on the basic sewing kit you will need, plus advice on which fabrics to choose and how to cut out. The chapters then build into a complete sewing course, and at the end of each chapter is a simple project to consolidate the skills you have just mastered. The projects include items for the home, including a cushion cover and a lampshade, stylish accessories, such as bags and scarves, plus great clothing basics, such as an A-line skirt and a simple shift dress. Also included at the

back of the book are two full-size pull-out paper pattern sections.

DARING TO SAY "I WILL." MARCUS. GRAULICH 2016

Uncovering the Theme of Revelation in Romans 1:16-3:26 Marcus A. Mininger 2017-09-19 "Past study of Rom 1:16-3:26 focuses on individual salvation or on social relations and also produces a host of interpretative quandaries. Marcus A. Mininger develops a new approach, which includes but goes beyond these foci, by unearthing the theme of revelation that runs throughout Paul's argument largely unnoticed. More than a proof of sin or of social equality, Paul provides a survey of numerous visible revelations, in which otherwise invisible realities like God's wrath, the power of sin, and God's righteousness are seen through the observable effects they produce in different people. Read this way, the rationale of Paul's argument becomes quite clear, including for "problem texts" like Rom 2 and 3:1-8, as Paul proves that the gospel, not the law, overcomes sin's power and that God's righteousness always exists in contrast to the human condition in this age."--! The Children's House of Belsen Hetty E. Verolme 2013 During the Holocaust the young Hetty was rounded up by the Nazis and sent for 14 long months to Belsen Concentration Camp. Hetty and her two little brothers were forcefully separated from their parents. This is her story; how she as one of the eldest children had to become the 'Little Mother' not only taking care of her two brothers but also forty young children living in Barrack 211 known as 'The Children's House of Belsen'. At fourteen-years-old, an unimaginable task amidst the inhumane conditions of hunger, cold, sickness death and despair, she kept up her spirits. A truly remarkable story of a young girl's determination.

The German Navy Cajus Bekker 1997 This volume covers not only the wartime story of the German Navy, but also shows how it stealthily built up in the 20s and 30s, in defiance of the treaty of Versailles. The famous pocket battleships are examined, as well as U-boats, minesweepers and one-man torpedoes.

Utopias and Dystopias in the Fiction of H. G. Wells and William Morris Emelyne Godfrey 2016-12-08 This book is about the fiercely contrasting visions of two of the nineteenth century's greatest utopian writers. A wide-ranging, interdisciplinary study, it emphasizes that space is a key factor in utopian fiction, often a barometer of mankind's successful relationship with nature, or an indicator of danger. Emerging and critically acclaimed scholars consider the legacy of two great utopian writers, exploring their use of space and time in the creation of sites in which contemporary social concerns are investigated and reordered. A variety of locations is featured, including Morris's quasi-fourteenth century London, the lush and corrupted island, a routed and massacred English countryside, the high-rises of the future and the vertiginous landscape of another Earth beyond the stars.

Urban Transformations in the U.S.A. Julia Sattler 2016-01-31 How did American cities change throughout the 20th and early 21st century? This timely publication integrates research from American Literary and Cultural Studies, Urban Studies and History. The essays range from negotiations of the »ethnic city« in US literature and media, to studies of recent urban phenomena and their representations: gentrification, re-appropriation and conversion of urban spaces in the USA. These interdisciplinary and intercultural perspectives on American cities provide unique points of access for studying the complex narratives of urban transformation.

China's Contingencies and Globalization Changgang Guo 2018-10-11 How have Chinese views on globalization developed over time? How is China managing the new normal of slower growth? Is China creating an alternative modernity? Is China a status quo power or a reform power? Can China manage its growing international role in international institutions and in the New Development Bank, the Asian Infrastructure Investment Bank, along with infrastructure projects in the region such as One Belt One Road and the Maritime Silk Road? Can China achieve balanced interactions with ASEAN and with developing countries in the region and worldwide? How is governance in China evolving in relation to social movements, protests, labour struggles and migrant workers? Do Chinese policies in relation to religious diversity contribute to social harmony or to friction? This timely volume by Chinese and international scholars offers diverse perspectives on these questions. This book was originally published as a special issue of Third World Quarterly.

Making Tea, Making Japan Kristin Surak 2012-11-28 The tea ceremony persists as one of the most evocative symbols of Japan. Originally a pastime of elite warriors in premodern society, it was later recast as an emblem of the modern Japanese state, only to be transformed again into its current incarnation, largely the hobby of middle-class housewives. How does the cultural practice of a few come to represent a nation as a whole? Although few non-Japanese scholars have peered behind the walls of a tea room, sociologist Kristin Surak came to know the inner workings of the tea world over the course of ten years of tea training. Here she offers the first comprehensive analysis of the practice that includes new material on its historical changes, a detailed excavation of its institutional organization, and a careful examination of what she terms "nation-work"—the labor that connects the national meanings of a cultural practice and the actual experience and enactment of it. She concludes by placing tea ceremony in comparative perspective, drawing on other expressions of nation-work, such as gymnastics and music, in Europe and Asia. Taking readers on a rare journey into the elusive world of tea ceremony, Surak offers an insightful account of the fundamental processes of modernity—the work of making nations.

Erasmus of Rotterdam Christine Christ-von-Wedel 2020-09 Erasmus of Rotterdam (1466/67-1536)

remains, for good reason, the best-known humanist of his time. He influenced reformers, philosophers, politicians, literati, legal scholars, educators, artists and musicians in his own as well as in later centuries and covered an astonishingly broad range of topics: war and peace, politics and human dignity, jurisdiction and philosophy of law, church music and homiletics, piety and common wisdom, style and manners, as well as questions of matrimony, gender and education. Indeed, Erasmus' thought continues to influence European intellectual history to this day. Christine Christ-von Wedel introduces Erasmus as a personality but also expands on his rich and multi-layered thinking and the struggles and longings in the age of Reformation characterised by his clashes with both Martin Luther and the Catholic establishment.

Working with A Secular Age Florian Zemmin 2016-03-21 Charles Taylor's monumental book *A Secular Age* has been extensively discussed, criticized, and worked on. This volume, by contrast, explores ways of working with Taylor's book, especially its potentials and limits for individual research projects. Due to its wide reception, it has initiated a truly interdisciplinary object of study; with essays drawn from various research fields, this volume fosters substantial conversation across disciplines.

Wehrmacht Priests Lauren Faulkner Rossi 2015 Lauren Faulkner Rossi plumbs the moral justifications of Catholic priests who served willingly and faithfully in the German army in World War II. She probes the Church's accommodations with Hitler's regime, its fierce but often futile attempts to preserve independence, and the shortcomings of Church doctrine in the face of total war and genocide.

The Professionalization of Coaching Astrid Schreyögg 2017-05-05 This book features papers of prominent representatives of the German coaching scene on the professional development of this counseling format. The book thereby offers guidelines for practicing professionals and for scientists as well as for potential users of coaching. Coaching is, after all, developing rapidly. The number and the variety of offers, fields of application, concepts and issues have become hard to keep track of. Efforts to establish coaching professionally are becoming all the more necessary. – In light of the growing internationalization of the coaching market, the translation of this book, which was published in German in 2015, aims at networking the debates and contributing to the global development of professional coaching.

Fidel Castro Volker Skierka 2014-09-04 Fidel Castro is one of the most interesting and controversial personalities of our time – he has become a myth and an icon. He was the first Cuban Caudillo – the man who freed his country from dependence on the USA and who led his people to rediscover their national identity and pride. Castro has outlived generations of American presidents and Soviet leaders. He has survived countless assassination attempts by the CIA, the Mafia, and Cubans living in exile. He has become one of the greatest politicians of the 20th Century. His biography, and the history of his country exemplify the tensions between East and West, North and South, rich and poor. As Castro's life draws to a close, the question as to what will become of Cuba is more important than ever. Will Castro open Cuba to economic reform and democratization, or stick to his old slogan socialism or death? In this remarkable, up-to-date reconstruction of Castro's life, Volker Skierka addresses these questions and provides an account of the economic, social, and political history of Cuba since Castro's childhood. He draws on a number of little-known sources, including material from the East German communist archives on Cuba, which were until recently inaccessible. This is an exciting, painstakingly researched, and authoritative account of the life of one of the most extraordinary political figures of our time.

Glossing the Psalms Alderik H. Blom 2017-05-08 This study proposes a new view of glossing as a universal phenomenon. Starting from the Psalter, a centrepiece of devotion and education in early medieval Europe, it combines historical sociolinguistics, comparative philology, manuscript studies and

cultural history in order to assess and compare the interface of Latin with Old Irish, Old English, Old Frisian, Old Saxon and Old High German within the context of its multilingual and textual culture. The close study of thirteen glossed manuscripts, such as the Anglo-Saxon Vespasian Psalter and the Old Irish Milan Glosses, reveals when and why scribes switched from Latin into the vernacular, how the vernacular was used in studying Latin, how glosses interact with construe marks and punctuation, and how such manuscripts were intended to be read in a period covering the seventh to the twelfth centuries and in an area stretching from Ireland to Central Europe. The book is an essential textbook for specialists in the growing field of glossing, and also reaches out to scholars of early medieval liturgy, education, palaeography and Christian literature.

Women Praying and Prophecy in Corinth Jill E. Marshall 2017-09-15 In First Corinthians, Paul makes two conflicting statements about women's speech: He crafts a difficult argument about whether men and women should cover their heads while praying or prophesying (11:2-16) and instructs women to be silent in the assembly (14:34-35). These two statements bracket an extended discussion about inspired modes of speech - prophecy and prayer in tongues. From these exegetical observations, Jill E. Marshall argues that gender is a central issue throughout 1 Corinthians 11-14 and the religious speaking practices that prompted Paul's response. She situates Paul's arguments about prayer and prophecy within their ancient Mediterranean cultural context, using literary and archaeological evidence, and examines the differences in how ancient writers described prophetic speech when voiced by a man or a woman.

High Speed Off-Road Vehicles Bruce Maclaurin 2018-09-17 A concise reference that provides an overview of the design of high speed off-road vehicles High Speed Off-Road Vehicles is an excellent, in-depth review of vehicle performance in off-road conditions with a focus on key elements of the running gear systems of vehicles. In particular, elements such as suspension systems, wheels, tyres, and tracks are addressed in-depth. It is a well-written text that provides a pragmatic discussion of off-road vehicles from both a historical and analytical perspective. Some of the unique topics addressed in this book include link and flexible tracks, ride performance of tracked vehicles, and active and semi-active suspension systems for both armoured and unarmoured vehicles. The book provides spreadsheet-based analytic approaches to model these topic areas giving insight into steering, handling, and overall performance of both tracked and wheeled systems. The author further extends these analyses to soft soil scenarios and thoroughly addresses rollover situations. The text also provides some insight into more advanced articulated systems. High Speed Off-Road Vehicles: Suspensions, Tracks, Wheels and Dynamics provides valuable coverage of: Tracked and wheeled vehicles Suspension component design and characteristics, vehicle ride performance, link track component design and characteristics, flexible track, and testing of active suspension test vehicles General vehicle configurations for combat and logistic vehicles, suspension performance modelling and measurement, steering performance, and the effects of limited slip differentials on the soft soil traction and steering behavior of vehicles Written from a very practical perspective, and based on the author's extensive experience, High Speed Off-Road Vehicles provides an excellent introduction to off-road vehicles and will be a helpful reference text for those practicing design and analysis of such systems.

Refocusing School Leadership Robert J. Starratt 2010-09-13 Refocusing School Leadership departs from the more traditional conceptualization of leadership, looking behind the daily routines of human

resource leaders to highlight the assumptions and values and beliefs they bring to their work as well as the values and meanings embedded in the various contexts of school life. Starratt explores how educational leadership is grounded in one's own humanity as well as in a deep appreciation of the richness, complexity, and enormous potential of people, and he attempts to restore the centrality of human development in the work of educating the young—education is not simply about educating minds, but about developing whole persons. Starratt argues for a refocusing of educational leadership on affirming and enabling those talents, dispositions, interests, life experiences, and cultural proficiencies that comprise their humanity to enrich the work of learning. The vision of the school should speak of the extraordinary possibilities for human achievement in our young people, as well as the talents of their teachers to nurture those possibilities. Starratt's focus on leadership as human resource development will energize the efforts of faculty, staff, and students to improve the quality of learning—the primary work of schools. This book is a valuable resource to prepare aspiring leaders, whether administrators or teachers, to deal with the way schools are currently run and to imagine and create better ways to promote quality learning for all.
