Elektro- und Verbrenner-RC-Cars Gernot Greiner Echte Rennatmosphäre, Siegerehrung, Fachsimpeln im Fahrerlager - der RC-Car-Sport macht es für jedermann möglich, und den Weg zur Teilnahme an diesem faszinierenden Hobby zeigt dieses Buch. Ganz systematisch erklärt der Autor am Beispiel eines Elektro- und eines Verbrennerfahrzeugs, wie ein perfektes Modell aus den vielen Einzelteilen des Baukastens entsteht, und gibt die wichtigsten Tipps, die man in den Bauanleitungen vergeblich sucht. Hier erfährt man dabei alles über Material und Funktion, erhält Entscheidungshilfen für die Wahl der Fernsteuerungskomponenten und Anregungen für die Verbesserung des Modells, und das alles ist selbstverständlich auf dem neuesten Stand der Technik. Ausführliche Kapitel behandeln die wichtige Abstimmung von Fahrwerk und Antrieb, den Fernsteuerbetrieb, den Umgang mit den Motoren, alle Aspekte der Stromversorgung, die Tuningmöglichkeiten sowie die erfolgreiche Fahrpraxis. Dabei wird der leichtverständliche Text von zahlreichen Fotos und Zeichnungen unterstützt, und darüber hinaus findet man noch ein komplettes Lexikon des RC-Car-Sports. Mit diesem Buch bleibt keine Frage offen - Start frei zu den vorderen Plätzen!

Mini-RC-Cars Hans-Peter Sollik In 1987, the first Mini-Z models came onto the market, small remote-controlled car models for racing fun (not only) in your own living room. Since then, the mini-RC cars in 1:24 scale and smaller, especially as ready-to-run models, have offered an inexpensive entry into sophisticated car modelling. In this book, Hans-Peter Sollik presents five selected models, from monster trucks to Formula 1 racers, showing the construction and

possible uses of these smart RC cars. What is included in the usual scope of delivery, which motor, and chassis equipment can be considered, which battery technology and which remote control components, are described by the author as well as the wide range of optical and technical improvements: tuning. Anyone who wants to get to know RC car modelling and gain initial experience with miniature models, perhaps in order to switch to larger scales later, will find the right instructions in this book.

Computers Helping People with Special Needs Klaus Miesenberger 2014-06-26 The two-volume set LNCS 8547 and 8548 constitutes the refereed proceedings of the 14th International Conference on Computers Helping People with Special Needs, ICCHP 2014, held in Paris, France, in July 2014. The 132 revised full papers and 55 short papers presented were carefully reviewed and selected from 362 submissions. The papers included in the second volume are organized in the following topical sections: tactile graphics and models for blind people and recognition of shapes by touch; mobility support and accessible tourism; smart and assistive environments: ambient assisted living (AAL); text entry for accessible computing; people with motor and mobility disabilities: AT and accessibility; assistive technology: service and practice; ICT-based learning technologies for disabled and non-disabled people; universal learning design: methodology; universal learning design: hearing impaired and deaf people; universal learning design: sign language in education; sign language transcription, recognition and generation; universal learning design: accessibility and AT; differentiation, individualisation and influencing factors in ICT-assisted learning for people with special needs; developing accessible teaching and learning materials within a user centred design framework and using mobile technologies to support individuals with special needs in educational environments.
