Readings on the Ultimate Questions Nils Ch Rauhut 2005 Helps readers understand the issues and problems in philosophy by reading original materials that demonstrate that philosophy is not about remote questions, but rather issues that lie deep within ourselves. With a blend of classic and contemporary readings, this anthology covers the major topics in philosophy, includes readings by outstanding contemporary philosophers that are enjoyable to read, encourage philosophical thought, and show readers how contemporary philosophers approach philosophical problems, and presents historical readings that show the work of figures in the history of philosophy. For anyone interested in understanding philosophical issues and how they relate to our lives.

History of Vocational Education and Training in Europe Esther Berner 2016-08-29 Understanding today's Vocational Education and Training (VET) systems requires a comprehension of the rise and development, i.e. of the foundations of topical VET. This book provides a comparative view of its development in Europe. The contributions of renowned authors give insight into conceptual questions, cases and challenges in this field. "

Handbook of Technical and Vocational Education and Training Research Felix Rauner

2008-12-16 Technical and vocational education and training (TVET) research has become a recognized and well-defined area of interdisciplinary research. This is the first handbook of its kind that specifically concentrates on research and research methods in TVET. The book's sections focus on particular aspects of the field, starting with a presentation of the genesis of TVET research. They further feature research in relation to policy, planning and practice. Various areas of TVET research are covered, including on the vocational disciplines and on TVET systems. Case studies illustrate different approaches to TVET research, and the final section of the book presents research methods, including interview and observation methods, as well as of experimentation and development. This handbook provides a comprehensive coverage of TVET research in an international context, and, with special focus on research and research methods, it is a cutting-edge resource and reference.

Private Technical and Vocational Education in Sub-Saharan Africa David Atchoarena 2002 The private provision trend in technical and vocational education (TVE) in sub-Saharan Africa occurred as the deterioration of state-run TVE systems in the region created a market niche for private providers. While advocates of deregulation believe the adoption of market principles in TVE will lead to greater efficiency and effectiveness, private providers have emerged in an uncoordinated and unmonitored fashion. A literature review and case studies of two countries Senegal and Mali led to some of the following key findings: (1) in some countries the majority of TVE students are enrolled in private institutions; (2) a large number of private TVE institutions operate illegally; (3) private provision concentrates on the service and commercial trades; and (4) the private sector may operate with lower costs and be more responsive to the labor market, but they do not provide much job-related training or include work-experience programs. Some of the policy issues are as follows: (1) simplifying procedures for establishing private TVE institutions facilitates their growth but is not sufficient to prevent the growth of an illegal sector; (2) the lack of regulation for private TVE institutions raises complex issues regarding the mechanisms required to ensure quality and protect consumers against abuses; and (3) for private TVE to succeed, students and the programs themselves must receive some public funding and develop relationships with industry. Clash of the Financial Pundits: How the Media Influences Your Investment Decisions for Better or Worse Joshua M. Brown 2014-05-23 HOW TO SEPARATE THE NEWS FROM THE NOISE: WHAT EVERY INVESTOR NEEDS TO KNOW There is no shortage of financial advice these days. From cocky cable pundits to nattering news columnists to off-grid online bloggers, there are more so-called experts than ever before--and the noise can be downright deafening. This no-bull, bottom-line guide from "The Reformed Broker" Josh Brown and Yahoo Finance's Jeff Macke will help you cut through the cacophony and make the most of today's media news. It's an eye-opening crash course in separating financial facts from fiction—featuring interviews with some of the world's most influential investors, including: JIM CRAMER (Mad Money) takes you behind the scenes of his polarizing TV program--and talks about his clash with Jon Stewart on The Daily Show. HENRY BLODGET (Business Insider) shares anecdotes about tangling with Eliot Spitzer, covering the Martha Stewart trial, and launching his Business Insider site as a "marked man." BEN STEIN (Win Ben Stein's Money) reveals how he really feels about Bernanke, Bogle, Buffett, and bailouts. KAREN FINERMAN (CNBC's Fast Money) exposes

the hype behind the headlines—and the "show biz" demands on television news pundits. HERB GREENBERG (TheStreet.com) explains why investors need to follow social media, where the "real" news is disseminated. BARRY RITHOLTZ (Bailout Nation) reveals his secret for "watching" financial TV. You'll also find invaluable insights from the original father of financial TV, Jim Rogers, and from James Altucher, the most shockingly honest commentator in the history of the medium. And you'll get a front-row seat for the processing and packaging of the news and learn everything you need to know about the talking heads who shape each day's narrative. Up-close. In-depth. All-true. Clash of the Financial Pundits is the one guide that will change the way you look at markets and investing forever. PRAISE FOR JOSH BROWN'S BACKSTAGE WALL STREET "Much like Michael Lewis's Liar's Poker captured the essence of 1980s institutional Wall Street, Brown's Backstage Wall Street re-creates the boiler room retail brokerage culture of the 1990s and early 2000s in vivid color." -- FORBES "Joshua Brown may be the funniest writer on finance today, but Backstage Wall Street could make you cry more than laugh. The buffoons, manipulators, and incompetents Brown parades before us are the stewards of our retirement accounts." -- BARRON'S "Run don't walk to read Brown's chronicles of deception [perpetrated by] those wonderful folks on Wall Street, who nearly bankrupted the world's financial system a few short years ago." -- DOUGLAS A. The Loyalists Thomas Fleming 2018-01-24 They called themselves Loyalists. The rebels called them Tories. This derogatory term had previously been reserved for the supporters of the predominantly Catholic line of Stuart kings, whose reign ended in England's bloodless revolution of 1688. For well over 100 years, it was the fashion among American historians to accept Thomas Paine's 1776 declaration that "Every Tory is a coward . . . fear is the foundation of Toryism." But more recent historical research has revealed many New England Loyalists acted on their political convictions with impressive courage during the American Revolution. Here, in this short-form book by New York Times bestselling historian Thomas Fleming, is their story.

Oracle 10g Developer Joan Casteel 2007 Learn how to use the PL/SQL programming language effectively, using one of the most popular and widely-used software programs in large companies today. Oracle 10g Developer: PL/SQL Programming uses Oracle 10g to provide an overview of the PL/SQL programming language, beginning with fundamental PL/SQL concepts and progressing to the writing and testing of PL/SQL code. The book then progresses to more advanced topics, such as Dynamic SQL and code tuning. Updated to the latest release, Oracle 10g, it uses the developer's perspective to focus on the PL/SQL component of the software. With real-world examples and a straightforward writing style, this is a valuable resource for anyone preparing for the new Oracle Certification exam, or simply looking to master the PL/SQL programming language with Oracle.

Mechanical and Metal Trades Handbook Roland Gomeringer 2018-05

Knowledge, Skill and Artificial Intelligence Bo Göranson 2012-12-06 Issues raised by the Theory of Knowledge, a central theme in the development of Artificial Intelligence, are the main topic of this book. The major questions are: How is the expert's knowledge to be elicited, what are the limits and possibilities? How can skill be developed and maintained in a more and more computerized and abstract working life? This last question is also closely related to the discussion on programs for education and training in society and working life. Long term effects on skill formation in working life in relation to new technology are a very important area of research. Case studies form the basis for philosophical reflections with the main concept of tacit knowledge as the central issue of skill and new technology. To a great extent the discussion is based on current case studies of professional groups with experience in advanced computer technology. The contributions of this book demonstrate the complicated nature of human knowledge. They introduce different theoretical perspectives on the issue of knowledge acquisition and elicitation.
