The text draws on recent research in anthropology, psychology, and management, to explain the cultural and psychological underpinnings that shape managerial attitudes and behaviours, whilst introducing a learning model to guide in the intellectual and practical development of managers seeking enhanced global expertise. Cross-Cultural Business Communication Sven Rosenhauer 2008-12-02 Inhaltsangabe: Introduction: The transfer of business activities across nations is growing at a rapid rate. The emergence of market economies in Latin America and Asia, the collapse of communism in the Soviet Union and Eastern Europe, and the emerging democracy in Africa have led, among other things, not only to increased global trade, international, multinational and transnational business, but also to an increased demand for international workforce since firms must employ people who possess international business skills in order to remain competitive in the global marketplace. How often does it happen that we meet someone doing business in the United States after representing his/her company in Asia, Middle East or Europe? How often do we meet someone obtaining an international degree abroad before doing business in China, France or Scandinavia? How often do companies require international experiences, mobility, and flexibility? The soft skills of intercultural competence and open-mindedness to cultural diversity are taught by universities around the world. But what happens with our own cultural identity while doing business worldwide? What happens if we conduct business in Japan but with an Italian colleague who lived in São Paulo for many years? Are we just applying intercultural competence or are we developing a universal business culture - apart from our own national culture? How does an international workforce communicate; is it adapting the communication style of the host-country, of a majority culture; or is it developing a communication style which is unique in international business? Are we speaking the same language at the end? Is the understanding of cultural diversity becoming less substantial and more implicit? If companies and organizations require the indispensable and vague defined soft skills of intercultural competence, could these skills be seen as an approach towards a universal business culture, likewise a universal business communication? Purpose of the Present Thesis: The purpose of the present thesis is to examine if and to which extent cultures converge in an international business environment and if intercultural competence has a bearing on it. Therefore, theoretical and practical insights in the subject of culture, its implicit and explicit differences, as well as its measurements will be provided. Due to the fact that communication - as a major cultural attribute - is the most obvious level on which cultural [...]

Educating Globally Competent Citizens Scott Aughenbaugh 2010 It is increasingly difficult for leaders to act in the short term in ways that will yield positive, long-term results. Instant information flows are bringing planning horizons closer and closer to the present; pressures from multiple stakeholders are eroding prospects for consensus. Are we preparing our students, the next generation of leaders, for this kind of flat world? In exploring the world of 2025, the Seven Revolutions project identified seven areas of change expected to be most "revolutionary": population resource management and environmental stewardship technological innovation and diffusion the development and dissemination of information and knowledge economic integration the nature and mode of conflict the challenge of governance Each of these seven forces embodies both opportunity and risk in the years ahead. Together, they will transform the way we live and interact with one another. That is why we call them the "Seven Revolutions." This Tool Kit, a part of the Seven Revolutions (7 Revs) initiative to educate globally competent citizens, is the product of a collaboration among the American Association of State Colleges and Universities (AASCU), the Center for Strategic and International Studies (CSIS), and the New York Times. The Tool Kit provides background and content on the 7 Revs from CSIS, case studies on how seven AASCU campuses have used 7 Revs in their curricula, and

teaching materials and resources that can be used to educate globally competent citizens using the 7 Revisions framework.
