Canonization and Decanonization A Van Debeek 1998 This volume is the most wide-ranging religio-historical study on (de)canonization ever published. It contains significant contributions to the study of canonization in different religions in ancient times as well as in modern societies. An Annotated Bibliography adds greatly to its value.

Regulæ ad Directionem Ingenii René Descartes 2012-12-06 L'idée d'entreprendre une édition critique des *Regulæ ad directionem ingenii* s'est imposée à nous pendant que nous préparions un commentaire de ce traité inachevé de Descartes. Le texte établi par Ch. Adam nous a, plus d'une fois, inspiré certains doutes, qui nous invitaient à vérifier les sources. C'est ainsi que nous avons été amenés à prendre en considération la version hollandaise du XVII^e siècle, que l'éditeur de Descartes avait complètement négligée. La collation du manuscrit de Hanovre avec l'édition princeps d'Amsterdam et l'examen de la version hollandaise nous ont permis de faire des retouches, quelquefois importantes, à l'édition Adam. Nous tenons à remercier de leurs précieux conseils les Professeurs Dr. E.W. Beth, Dr. E. Garin, Dr. F.L.R. Sassen, le Dr. F. Veenstra, et tout particulièrement le Prof. Dr. P. Dibon, dont l'infatigable assistance nous a été très précieuse surtout dans la dernière phase de nos travaux. Nous sommes, en outre, très reconnaissant à M. le Directeur de la Niedersächsische Landesbibliothek de Hanovre pour le manuscrit qu'il a mis à notre disposition, et à M. le Directeur de l'Universiteitsbibliotheek d'Amsterdam pour l'exemplaire de la version hollandaise dont il nous a permis de publier le texte. Nous devons à Madame F. van Rossum-Guyon d'avoir rendu possible la traduction en français.

Sixty-Five Papyrological Texts F.A.J. Hoogendijk 2008-12-31 This volume contains editions of sixty-five Greek, Demotic, Coptic and Arabic papyri and ostraca from Egypt. These include both literary and documentary texts, and date from the third century BC to the eleventh century AD.

The Mathematical Heritage of Henri Poincaré Felix E. Browder 1983-12-31 On April 7-10, 1980, the American Mathematical Society sponsored a Symposium on the Mathematical Heritage of Henri Poincaré, held at Indiana University, Bloomington, Indiana. This volume presents the written versions of all but three of the invited talks presented at this Symposium (those by W. Browder, A. Jaffe, and J. Mather were not written up for publication). In addition, it contains two papers by invited speakers who were not able to attend, S. S. Chern and L. Nirenberg. If one traces the influence of Poincaré through the major mathematical figures of the early and midtwentieth century, it is through American mathematicians as well as French that this influence flows, through G. D. Birkhoff, Solomon Lefschetz, and Marston Morse. This continuing tradition represents one of the major strands of American as well as world mathematics, and it is as a testimony to this tradition as an opening to the future creativity of mathematics that this volume is dedicated. This part contains sections on topological methods in nonlinear problems, mechanics and dynamical systems, ergodic theory and recurrence, and historical material.

Manichaeism and Early Christianity 2020-12-07 Manichaeism and Early Christianity discusses where and how Gnostic Manichaeism interfered not only with other forms of Gnosticism, but above all with a number of writings and representatives of mainstream Christianity during the early centuries of our era.

Women in Western and Eastern Manichaeism 2022-07-18 These papers examine the unique place women held in Manichaeism, both in myth and in everyday life – in marked difference with other religions. The reader is invited to a journey from 4th century Roman Empire and Iran to Central Asia and China

Seneca the Elder and His Rediscovered >Historiae ab initio bellorum civilium< Maria Chiara Scappaticcio 2020-06-08 The refreshed insights into early-imperial Roman historiography this book offers are linked to a recent discovery. In the spring of 2014, the binders of the archive of Robert Marichal were dusted off by the ERC funded project PLATINUM (ERC-StG 2014 n°636983) in response to Tiziano Dorandi's recollections of a series of unpublished notes on Latin texts on papyrus. Among these was an in-progress edition of the Latin rolls from Herculaneum, together with Marichal's intuition that one of them had to be

ascribed to a certain 'Annaeus Seneca'. PLATINUM followed the unpublished intuition by Robert Marichal as one path of investigation in its own research and work. Working on the Latin P.Herc. 1067 led to confirm Marichal's intuitions and to go beyond it: P.Herc. 1067 is the only extant direct witness to Seneca the Elder's *Historiae*. Bringing a new and important chapter of Latin literature arise out of a charred papyrus is significant. The present volume is made up of two complementary sections, each of which contains seven contributions. They are in close dialogue with each other, as looking at the same literary matter from several points of view yields undeniable advantages and represents an innovative and fruitful step in Latin literary criticism. These two sections express the two different but interlinked axes along which the contributions were developed. On one side, the focus is on the starting point of the debate, namely the discovery of the papyrus roll transmitting the *Historiae* of Seneca the Elder and how such a discovery can be integrated with prior knowledge about this historiographical work. On the other side, there is a broader view on early-imperial Roman historiography, to which the new perspectives opened by the rediscovery of Seneca the Elder's *Historiae* greatly contribute.
