Swiss Sensibility Anna Roos 2017-04-24 Contemporary architecture in Switzerland is influenced by Peter Zumthor and Herzog & de Meuron, recipients of the Swiss Pritzker Prize, as well as a number of other prominent architects. The book presents 25 buildings in Switzerland designed by 16 influential Swiss architects: The range covers high-density urban developments through to rural sites in the alpine environment, with examples of traditional craftsmanship and materials, and modern construction technology and engineering. Large-format photographs illustrate the buildings' proportions, materials, and details. Four authors analyze the Swiss building culture and its high architectural quality from an insider's and an outsider's point of view. In a detailed interview, Peter Zumthor explains his approach to architectural design.

Upgrade Gestalten 2017-03 'Upgrade' breathes new life into forgotten architecture. Past structures are consciously preserved and revamped, expanded and altered, to create something exciting and enticing. 'Upgrade' explores architectural and design concepts that seek to enhance and repurpose our surroundings from slight changes to complete renovations. Extensions upon a rooftop. Factories turned into relaxing retreats. Wood additions contrasting with antique brick exteriors. Through engaging anecdotes and inspiring images, 'Upgrade' provides vibrant exemplars and enthusiasm for revamping existing spaces. Repurposing the unused: be it an empty chapel that becomes an inviting writer's nook or a rotten barn converted into a cozy living space for a small family. The projects illustrate the possibility of adding a touch of the new to the old: farmhouses adorned with modern glass additions or churches whose traditional lines now frame an office. What are ruins to some become another's architectural playground.

NASA Goddard Space Flight Center Cooperative Enterprise National Aeronautics and Space Adm Nasa 2018-09-20 The viability of a Capillary Heat Pump (CHP) concept using a Loop Heat Pipe evaporator and an eductor in a closed loop to reject heat at a higher temperature than it is acquired at with the goal of reducing spacecraft radiator area is examined. Eductor inefficiency resulting from the mixing of high velocity motive flow with low velocity suction flow may preclude spacecraft radiator area savings. The utility of a CHP for thermal management may be limited to those missions where system mass is of secondary concern compared to system reliability, or where a heat pump is required to accommodate relatively high thermal rejection temperatures. Shearography techniques for nondestructive inspection and evaluation were examined for two unique applications. Shearography is shown to give good results in evaluating the quality of bonds holding lead tiles to the SWIFT spacecraft BAT gamma ray mask. Also, a novel technique was developed allowing specular objects to be inspected using shearography to evaluate bonding between the skin and core of a specular surface honeycomb structure. Large-scale bond failures are readily identified. Fredley, Joseph E. and Lysak, Daniel B. Experiencing Nature Antonio Barrera-Osorio 2010-01-01 As Spain colonized the Americas during the sixteenth century, Spanish soldiers, bureaucrats, merchants, adventurers, physicians, ship pilots, and friars explored the natural world, gathered data, drew maps, and sent home specimens of America's vast resources of animals, plants, and minerals. This amassing of empirical knowledge about Spain's American possessions had two far-reaching effects. It overturned the medieval understanding of nature derived from Classical texts and helped initiate the modern scientific revolution. And it allowed Spain to commodify and control the natural resources upon which it built its American empire. In this book, Antonio Barrera-Osorio investigates how Spain's need for accurate information about its American colonies gave rise to empirical scientific practices and their institutionalization, which, he asserts, was Spain's chief contribution to the early scientific revolution. He also conclusively links empiricism to empire-building as he focuses on five areas of Spanish activity in America: the search for commodities in, and the ecological transformation of, the New World; the institutionalization of navigational and information-gathering practices at the Spanish Casa de la Contratación (House of Trade); the development of instruments and technologies for exploiting the natural resources of the Americas; the use of reports and questionnaires for gathering information; and the writing of natural histories about the Americas.

The Hollow Land Jane Gardam 2015-01-06 The barren, beautiful Cumbrian fells provide the bewitching setting for the adventures of Bell and Harry, two children who find enchanting wonder at every turn, as they explore THE HOLLOW LAND. Everyday challenges give a daring edge to this rural work and play. There are ancient mysteries to explore and uncover, like the case of the Egg Witch, and everyone is curious about the Household Name, a wildly famous Londoner moving in to the jewel of the territory, Light Trees Farm. With painterly ease, Jane Gardam's stories fly with a marvelous spirit that will delight readers of all ages!

Manifesto of New Realism Maurizio Ferraris 2014-12-01 Retraces the history of postmodern philosophy and proposes solutions to overcome its impasses. Philosophical realism has taken a number of different forms, each applied to different topics and set against different forms of idealism and subjectivism. Maurizio Ferraris's Manifesto of New Realism takes aim at postmodernism and hermeneutics, arguing against their emphasis on reality as constructed and interpreted. While acknowledging the value of these criticisms of traditional, dogmatic realism, Ferraris insists that the insights of postmodernism have reached a dead end. Calling for the discipline to turn its focus back to truth and the external world, Ferraris's manifesto—which sparked lively debate in Italy and beyond—offers a wiser realism with social and political relevance. Maurizio Ferraris is Full Professor of Philosophy and Director of the Laboratory for Ontology at the University of Turin, Italy. His books include *Goodbye, Kant! What Still Stands of the Critique of Pure Reason*, also published by SUNY Press. Sarah De Sanctis is a PhD candidate in contemporary forms of realism in literature and philosophy at the London Graduate School and a translator for the Department of Philosophy at the University of Turin.

Brut Iris de Feijter 2017-04 In the field of design, nothing stands still forever. Cycles come and go, reconfiguring the old to create the new. What was once hidden is now boldly displayed. The raw materials that comprise modern interiors have been given centre stage, handicraft is no longer considered 'old-fashioned', but has instead become a key instigator for design, and dark colours are back in vogue. Materials are allowed to have patina again, bearing the signs of their age and use. Industrial, rusted iron; brushed granite; untreated wood... It is all coming back! The retro revival promises to inject new energy into the design world, making pure beauty stand out. Design blogger Irene Schampaert guides you in discovering these exciting new trends. AUTHOR: Irene Schampaert is a graphic designer and blogger. She writes about design, colours, patterns, deco, typography and photography. SELLING POINTS: * Celebrates artisans and their work with an international scope, highlighting interiors from all over the world * The most innovative new faces in modern design are brought together in a single stunning volume 180 colour

Rabbits Terry Miles 2021-06-08 A deadly underground game might just be altering reality itself in this all-new adventure set in the world of the hit Rabbits podcast. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY THE WALL STREET JOURNAL • “A wild ride . . . impossible to put down.”—Publishers Weekly (starred review) It’s an average work day. You’ve been wrapped up in a task, and you check the clock when you come up for air—4:44 p.m. You check your email, and 44 unread messages have built up. With a shock, you realize the date is April 4—4/4. And when you get in your car to drive home, your odometer reads 44,444. Coincidence? Or have you just seen the edge of a rabbit hole? Rabbits is a mysterious alternate reality game so vast it uses the entire world as its canvas. Since the game started in 1959, ten iterations have appeared and nine winners have been declared. The identities of these winners are unknown. So is their reward, which is whispered to be NSA or CIA recruitment, vast wealth, immortality, or perhaps even the key to the secrets of the universe itself. But the deeper you get, the more dangerous the game becomes. Players have died in the past—and the body count is rising. And now the eleventh round is about to begin. Enter K—a Rabbits obsessive who has been trying to find a way into the game for years. That path opens when K is approached by billionaire Alan Scarpio, rumored to be the winner of the sixth iteration. Scarpio says that something has gone wrong with the game and that K needs to fix it before Eleven starts, or the whole world will pay the price. Five days later, Scarpio is declared missing. Two weeks after that, K blows the deadline: Eleven begins. And

suddenly, the fate of the entire universe is at stake.
