101 Kruger Tales Jeff Gordon 2016-01 " An enraged elephant flips a car onto its roof. A lioness prises open the door of a terrified couple. A leopard helps itself to a family's picnic breakfast. A fleeing impala leaps through an open car window. A lion charges around inside a busy rest camp. A hyaena snatches a baby from a tent. A tourist takes a bath in a croc-infested dam...These are just a few of the 101 jaw-dropping sightings, scrapes and encounters in this collection of extraordinary true stories from the roads, camps, picnic sites and walking trails of South Africa's Kruger National Park, as told by the very people who experienced them. There are no game ranger tales here - each and every story happened to an ordinary Kruger visitor doing what over a million tourists do in this spectacular reserve each year." -- Back cover.

The Three Dimensions of Freedom Billy Bragg 2019-04-30 At a time when opinion trumps facts and truth is treated as nothing more than another perspective, free speech has become a battleground. While authoritarians and algorithms threaten democracy, we argue over who has the right to speak. To protect ourselves from encroaching tyranny, we must look beyond this one-dimensional notion of what it means to be free and, by reconnecting liberty to equality and accountability, restore the individual agency engendered by the three dimensions of freedom.

MCQ Companion to General and Systematic Pathology Simon S. Cross 1996 A collection of 300 multiple-choice questions which are divided into subject chapters corresponding with those in *General and Systematic Pathology*, a complementary text. However, full explanatory answers are supplied so that this book may be used with any pathology textbook. The questions take the form of a stem with five branches which must be marked true or false. This is the most commonly used system of questions in British medical schools and is usually scored as +1 for a correct response and zero for no response.

Chuck Klosterman X Chuck Klosterman 2017-05-16 New York Times-bestselling author and cultural critic Chuck Klosterman sorts through the past decade and how we got to now. Chuck Klosterman has created an incomparable body of work in books, magazines, newspapers, and on the Web. His writing spans the realms of culture and sports, while also addressing interpersonal issues, social quandaries, and ethical boundaries. Klosterman has written nine previous books, helped found and establish Grantland, served as the New York Times Magazine Ethicist, worked on film and television productions, and contributed profiles and essays to outlets such as GQ, Esquire, Billboard, The A.V. Club, and The Guardian. Chuck Klosterman's tenth book (aka Chuck Klosterman X) collects his most intriguing of those pieces, accompanied by fresh introductions and new footnotes throughout. Klosterman presents many of the articles in their original form, featuring previously unpublished passages and digressions. Subjects include Breaking Bad, Lou Reed, zombies, KISS, Jimmy Page, Stephen Malkmus, steroids, Mountain Dew, Chinese Democracy, The Beatles, Jonathan Franzen, Taylor Swift, Tim Tebow, Kobe Bryant, Usain Bolt, Eddie Van Halen, Charlie Brown, the Cleveland Browns, and many more cultural figures and pop phenomena. This is a tour of the past decade from one of the sharpest and most prolific observers of our unusual times.

White Death Robbie Morrison 2014-08-27 In 1916, Pietro Aquasanta, an Italian rifleman, returns to his childhood home of the Trentino mountain range to find that it's no longer the realm of wonder and adventure he remembers, but has become a place of death and despair, where the elements are as great a threat as the enemy. No weapon of war was more feared than the White Death, thundering avalanches deliberately caused by cannon fire which consumed everything in their path

Rummelplatz Werner Bräunig 2016 "Rummelplatz, " a novel of epic proportions, focuses on those whose lives are connected to Wismut, East Germany's notorious uranium mine, run by the Soviet and supplying the brotherland with much-needed uranium for its atomic programme. The mine attracts war veterans, fortune-seekers and outsiders like Peter Loose (in effect the author's alter ego), who had a difficult childhood and an SS-member father. Although these workers are well remunerated the local paper factory suffers as a result life in the mine is bleak. Safety provisions are almost non-existent and there are inadequate tools with which to work. The only outlet for the mine's workers are the bars and fairground where copious amounts of alcohol are consumed and the usual fights ensue. In brief, Wismut emerges as a microcosm of the nascent society that was East Germany. Suppressed by the East German censorship authorities in 1965, "Rummelplatz" paints characters as intrinsically human, and by the end the author asks all of them the salient question: What is left behind when a worker dies? His work? Braunig believes that there is no one, no matter how poor, who does not leave something behind. Following his tragic premature death at the age of 42, he himself has left more than most. "

The Earth as a Distant Planet M. Vázquez 2010-03-12 In *The Earth as a Distant Planet*, the authors become external observers of our solar system from a distance and try to determine

how one can understand how Earth, the third in distance to the central star, is essentially unique and capable of sustaining life. The knowledge gained from this original perspective is then applied to the search for other planets outside the solar system, or exoplanets. Since the discovery in 1992 of the first exoplanet, the number of planet detections has increased exponentially and ambitious missions are already being planned for the future. The exploration of Earth and the rest of the rocky planets are Rosetta stones in classifying and understanding the multiplicity of planetary systems that exist in our galaxy. In time, statistics on the formation and evolution of exoplanets will be available and will provide vital information for solving some of the unanswered questions about the formation, as well as evolution of our own world and solar system. Special attention is paid to the biosignatures (signs of life) detectable in the Earth's reflected spectra and the search for life in the universe. The authors are experts on the subject of extrasolar planets. They provide an introductory but also very much up-to-date text, making this book suitable for researchers and for advanced students in astronomy and astrophysics.
