The Handbook of Financial Communication and Investor Relations Alexander V. Laskin
2017-09-14 The first book to offer a global look at the state-of-the-art thinking and practice in investor relations and financial communication. Featuring contributions from leading scholars and practitioners in financial communication and related fields—including public relations, corporate communications, finance, and accounting—this volume in the critically acclaimed “Handbooks in Communication and Media” series provides readers with a comprehensive, up-to-date picture of investor relations and financial communications as they are practiced in North America and around the world. The Handbook of Financial Communication and Investor Relations provides an overview of the past, present, and future of investor relations and financial communications as a profession. It identifies the central issues of contemporary investor relations and financial communications practice, including financial information versus non-financial information, intangibles, risk, value, and growth. Authors address key topics of concern to contemporary practitioners, such as socially responsible investing, corporate governance, shareholder activism, ethics, and professionalism. In addition, the book arms readers with metrics and proven techniques for reliably measuring and evaluating the effectiveness of investor relations and financial communications. Bringing together the most up-to-date research on investor relations and financial communication and the insights and expertise of an all-star team of practitioners, *The Handbook of Financial Communication and Investor Relations: Explores how the profession is practiced in various regions of the globe, including North America, South America, Europe, the Middle East, India, Australia, and other areas. Provides a unique look at financial communication as it is practiced beyond the corporate world, including in families, the medical profession, government, and the not-for-profit sector. Addresses “big-picture” strategies as well as specific tactics for financial communication during crises, the use of social media, dealing with shareholder activism, integrated reporting and CSR, and more.* This book makes an ideal reference resource for undergrads and graduate students, scholars, and practitioners studying or researching investor relations and financial communication across schools of communication, journalism, business, and management. It also offers professionals an up-to-date, uniquely holistic look at

best practices in financial communication investor relations worldwide.

Praxiskommentar zur HOAI 2013 Andreas Ebert 2015-11-13 This volume offers practical commentary on the modernization of service descriptions in the new HOAI [German fee scales for architects and engineers]. The commentary aims to educate readers on legal principals resting at the intersection of contract law and price law. It also provides practical assistance for drafting and executing architectural and engineering contracts.

Die HOAI 2013 verstehen und richtig anwenden Klaus D. Siemon 2018-09-07 Das Buch bietet einen praxisnahen Einstieg in die HOAI 2013 und fundierte Grundlagen zur Honorarermittlung für Architekten und Innenarchitekten. Protecting Groundwater for Health World Health Organization 2006 This publication provides a structured approach to analyzing hazards to groundwater quality, assessing the risk they may cause for a specific supply, setting priorities in addressing these, and developing management strategies for their control. This book summarizes which pathogens and chemicals are relevant to human health, how they are transported, reduced, removed or retarded; provides practical guidance on characterizing the drinking-water catchment area and assessing potential health hazards; provides guidance on prioritising both hazards and management responses; presents key information on potential management actions and explains their integration into a comprehensive Water Safety Plan from catchment to consumer; and describes policy, land-use planning and implementation of pollution prevention, groundwater, with overviews of specific management approaches applicable to agriculture, sanitation, industry, mining, military sites, waste disposal and traffic.--Publisher's description.

Portals to the Past and to the Future Jürgen Seefeldt 2007

Architectural Thought: Michael Brawne 2007-06-01 An introduction to architectural thought, this text is a thorough and accessible discussion in search of the principles of the design process. Documenting the non-verbal processes and decisions that architects and designers make is a difficult task, but one that is important when trying to understand the development of architectural design through the ages. Michael Brawne uses his experience as a practicing architect, academic and educator to provide an overview of the subject. By looking at the practices and buildings of architects past and present he incorporates history and philosophy in the search for a theory of design.

Floor plan atlas, housing Friederike Schneider 1997 Der Entwurfsatlas für den Wohnungsbau stellt Bauprojekte aus 50 Jahren vor: mit Grundrissen in einheitlichem Maßstab (1:200) und Datensteckbriefen. Im Mittelpunkt stehen dabei die Grundriss-Idee und die Besonderheit des Wohnungsgrundrisses, die in kurzen, prägnanten Projekttexten anschaulich erklärt werden. Zusätzliche Grundrissdiagramme helfen, die Grundriss-Idee noch schneller zu erfassen. (Quelle: Buchhandel.de).

fib Model Code for Concrete Structures 2010 fib - federation internationale du beton 2013-12-04 The International Federation for Structural Concrete (fib) is a pre-normative organization. 'Pre-normative' implies pioneering work in codification. This work has now been realized with the fib Model Code 2010. The objectives of the fib Model Code 2010 are to serve as a basis for future codes for concrete structures, and present new developments with regard to concrete structures, structural materials and new ideas in order to achieve optimum behaviour. The fib Model Code 2010 is now the most comprehensive code on concrete structures, including their complete life cycle: conceptual design, dimensioning, construction, conservation and dismantlement. It is expected to become an important document for both national and international code committees, practitioners and researchers. The fib Model Code 2010 was produced during the last ten years through an exceptional effort by Joost Walraven (Convener; Delft University of Technology, The Netherlands), Agnieszka Bigaj-van Vliet (Technical Secretary; TNO Built Environment and Geosciences, The Netherlands) as well as experts out of 44 countries from five continents.

Media and Convergence Management Sandra Diehl 2013-05-24 Convergence has gained an enormous amount of attention in media studies within the last several years. It is used to describe the merging of formerly distinct functions, markets and fields of application, which has changed the way companies operate and consumers perceive and process media content. These transformations have not only led business practices to change and required companies to adapt to new conditions, they also continue to have a lasting impact on research in this area. This book's main purpose is to shed some light on crucial phenomena of media and convergence management, while also addressing more specific issues brought about by innovations related to media, technologies, industries, business models, consumer behavior and content management. This book gathers insights from renowned academic researchers and pursues a highly interdisciplinary approach. It will serve as a valuable reference guide for students, practitioners and researchers interested in media convergence processes.

Large Infrastructure Projects in Germany Genia Kostka 2016-05-23 This book presents an analysis of why some large infrastructure projects are delayed or compromised and offers important insights into the better delivery of future projects. It provides an important reaction to the ambitious €315 billion investment plan devised by the European Commission, wherein

Europe's infrastructure is a key investment target. Germany is adopted as a focus, as Europe's largest economy, and a nation that has seen significant delays and tensions in the delivery of key infrastructure projects. The contributions to this volume demonstrate various patterns for infrastructure assets and illustrate how factors such as poor project governance, early planning mistakes, inappropriate risk management and unforeseen technological challenges influence delivery. The in-depth case studies on the Berlin Brandenburg Airport, the Hamburg Elbphilharmonie, and offshore wind parks show how project delivery can face massive problems, and illuminating solutions are offered to these problems. Overall, the case of Germany also offers the opportunity to assess various new forms of project delivery, such as public-private partnerships (PPP), and the risks and opportunities of ambitious first-mover 'pioneer' projects. The book will be of great interest for scholars and upper-level students of human geography, business and management, as well as policy makers.

Automotive Powertrains PEP (Professional Engineering Publishers) 1996-04-18 These seminar proceedings contain selected papers from the prestigious Autotech event. This highly regarded key meeting for engineers from the international automotive industry is organised by engineers for engineers. It brings together representatives from many of the industry's main innovating companies, creating a forum in which the technology that will be seen in vehicles of the future is considered and debated. A wide range of topics across the whole field of automotive technology are discussed. These include: Automotive Electronics, Manufacturing, Powertrain, Refinement, and Safety. A selection of papers dealing with Automotive Powertrains is presented in this volume. Topics covered include: Hybrid powertrains Engine developments Driveline developments Transmissions Emissions Mechanical developments This volume is one of a number published as a result of this important and influential event.

Analogous and Digital Otl Aicher 2015-04-27 Otl Aicher (1922-1991) was an outstanding personality in modern design, he was a co-founder of the legendary Hochschule für Gestaltung (HfG), the Ulm School of Design, Germany. His works since the fifties of the last century in the field of corporate design and his pictograms for the 1972 Summer Olympics in Munich are major achievements in the visual communication of our times. "An integral component of Aicher's work is that it is anchored in a "philosophy of making" inspired by such thinkers as Ockham, Kant or Wittgenstein, a philosophy concerned with the prerequisites and aims, the objects and claims, of design. Aicher's complete theoretical and practical writings on design (which include all other aspects of visual creativity, such as architecture) are available with this new edition of the classic work. If Aicher prefers the analogous and concrete to the digital and abstract he does it with a philosophical intention. He relativizes the role of pure reason. He criticizes the rationality of Modernism as a result of the dominance of purely abstract thinking. Anyone who prefers the abstract to the concrete does not only misunderstand the mutual dependence of concept and view. In Aicher's judgement he is also creating a false hierarchy, a rank order that is culturally fatal. Things that are digital and abstract are not greater, higher and more important than things that are analogous and concrete." Wilhelm Vossenkuhl

Philosophy for Architects Branko Mitrovic 2012-03-20 Philosophy for Architects is an engaging and easy-to-grasp introduction to philosophical questions of interest to students of architectural theory. Topics include Aristotle's theories of "visual imagination" and their relevance to digital design, the problem of optical correction as explored by Plato, Hegel's theory of zeitgeist, and Kant's examinations of space and aesthetics, among others. Focusing primarily on nineteenth- and twentieth-century philosophy, it provides students with a wider perspective concerning philosophical problems that come up in contemporary architectural debates.

Inbetriebnahme verfahrenstechnischer Anlagen Klaus H. Weber 2019-07-08 Das Buch ist eine praktische Handlungsanleitung für jeden, der an der Planung, Montage und Inbetriebnahme von Anlagen mitwirkt. Zahlreiche Workflows, Checklisten, Templates und Beispiele weisen den Weg zur erfolgreichen Inbetriebnahme und Kosteneinsparung. Die Kosten der Inbetriebnahme von Neuanlagen sind mit 8 bis 15 % der Investitionssumme erheblich; gravierende Einsparpotentiale werden häufig nicht genutzt. Die Inbetriebnahme ist für alle Beteiligten die „Stunde der Wahrheit“ und mit vielen Unwägbarkeiten verbunden. Sie beinhaltet u.a. den Leistungsnachweis und die rechtsverbindliche Abnahme der Anlage sowie der AS BUILT-Dokumentation. Die 5. Auflage ist eine vollständige Überarbeitung, Aktualisierung und wesentliche Erweiterung. Dies betrifft insbesondere - die Umsetzung neuer Rechtsvorschriften, - die Spezifikation der Reinheit und die systematische Reinigung der Anlage, - die Beschreibung effizienter spezifischer Organisationsstrukturen, - die GMP-konforme Vorgehensweise in Pharmaanlagen, - die Darstellung neuer Praxisbeispiele, Workflows und Checklisten. Insgesamt wurden der Textumfang und die Anzahl an Abbildungen, Tabellen, Checklisten und Praxisbeispielen deutlich erweitert. Das Buch ist in einer Reihe mit den bewährten Praxishandbüchern des Autors über „Engineering bzw. Dokumentation verfahrenstechnischer Anlagen“ zu sehen.

Building with Timber Hermann Kaufmann 2011 A building material of the future, timber bridges the gap between nature and technology. A sustainable resource and climate-friendly construction material, timber is also materialised solar energy and carbon dioxide accumulator. As a universally applicable heat-insulating material and highly resilient natural product, it is the building material of the future. In this book renowned experts examine timber's ecological importance, it's technological potential as well as the new possibilities for architectural construction and design of the familiar material. The 50 international examples selected in this volume illustrate digital manufacturing methods for timber and the variety of modern timber constructions, from low-energy houses and wide-span supporting structures to high-rise construction.

Green BIM Eddy Krygiel 2008-04-28 Meet the challenge of integrating Building Information Modeling and sustainability with this in-depth guide, which pairs these two revolutionary movements to create environmentally friendly design through a streamlined process. Written by an award-winning team that has gone beyond theory to lead the implementation of Green BIM projects, this comprehensive reference features practical strategies, techniques, and real-world expertise so that you can create sustainable BIM projects, no matter what their scale.

Basics Project Planning Hartmut Klein 2017-05-22 The main task of the classical architect is project planning, from basic evaluation to design all the way to execution planning, the call for bids, construction management, and completion of the building. This volume explains the individual planning steps in context, presents the networking of the various specialists involved in the project, and offers a clear and practical description of the various levels of organization. Themes are - Planning steps from basic evaluation to handing over the keys, - Project participants (including the authorities, specialized planners, construction firms, etc.), - Organizing the plan (sequence, what's needed when?, work organization, documentation), - Coordination of the participants.

The Modern Functional Building Adolf Behne 1996 Bruno Taut and Walter Gropius, organized the Arbeitsrat für Kunst (Work council on the arts). Behne would also become an early critic of both the Werkbund and the Bauhaus. Written in 1923, Behne's *Modern Functional Building* clarifies the concepts of German Modernism at their very inception, especially the crucial distinctions between functionalism, rationalism, and utilitarianism. In this text, Behne advocates a functionalism that is not technocentric, but is comparable.

New Generation Whole-Life Costing Ian Ellingham 2007-05-07 *New Generation Whole-Life Costing* presents an innovative approach to decision-making and risk management for construction and real estate. It applies the options-based approach that has revolutionized the management of uncertainty in the business world. Based on government-sponsored research at Cambridge Architectural Research Ltd., the book introduces the idea of 'lifecycle options'. The desirability of whole-life costing is widely accepted, but take-up levels have been low. One problem is that traditional techniques fail to take account of future uncertainty. In contrast, the new options-based approach considers a diversity of possible futures, and favours flexible strategies that incorporate lifecycle options. This approach leads to more cost-effective and sustainable decisions, minimizing the risk of under- or over-investment. This book is structured around realistic case studies that demonstrate the prevalence of lifecycle options. These case studies are backed up by clear presentation of basic principles and mathematical techniques allowing the book to be read either as a stimulating introduction to new concepts, or as a guide to mathematical methods.

Oracle Power Objects Handbook Bruce Kolste 1995 A professional database developer takes readers through the basics of Project X and teaches them how to create databases and use Project X as a single-user database. Kolste covers the more advanced operations, such as creating applications, advanced reporting techniques, and Oracle BASIC, and shows how to use Project X as a front-end for corporate databases that use Oracle 7.

No-regret Potentials in Energy Conservation Katrin Ostertag 2012-12-06 (2) Do existing estimates of the no-regret potential stand up to re-evaluation within this framework? As a result of this analysis the size of previous estimates for no-regret potentials may be modified - in terms of energy savings or in financial terms. On the basis of these findings, we will approach the overriding third research question: (3) How large is the no-regret potential and what determines its size? The following chapter will provide a fuller account of the debate on no-regret potentials. This will be complemented by a detailed theory-based definition of no

regret potentials in Chapter 2. The thesis will focus mostly on the micro-level of analysis. But we will also address the implications of our findings for the analysis of energy saving measures and policies at more aggregate levels, notably within a feasibility study for adapting a model which represents the level of the national economy. The debate on no-regret potentials 1 origin, context, issues The term "no-regret potentials" was coined during the debate on climate change. It designates opportunities for the reduction of greenhouse gas (GHG) emissions ". . . that are worth undertaking whether or not there are climate-related reasons for doing so. " (IPCC 1996, p. 271). In the IPCC's Third Assessment Report (TAR), no regret potentials are increasingly equated with GHG emission reduction potentials at negative (net) costs (IPCC 2001, p. 21).

IFLA Library Building Guidelines: Developments & Reflections Karen Latimer 2007-01-01 The information society and the information age are changing library services as well as library premises. This raises questions about what needs to be considered when planning and designing new library buildings in order to achieve attractive, efficient and future-oriented new library spaces. This new publication provides information and guidelines for the building planning process, whether you are planning a new public or academic library building. It reflects on fundamental issues, on new development trends and on the planning process. The library building process is seen from both the library manager's perspective as well as that of the architect and designer. Issues covered include what to consider when investigating the need for space, library design from a marketing viewpoint, green management and sustainability relating to library buildings and a layman's guide to reading plans. This publication and the IFLA guidelines provided are not seen as a traditional set of recommendations to be rigidly adhered to since this would be unrealistic in a fast-changing and global context. Rather, library managers and architects should read them in order to inform their thinking on key issues and establish a planning programme. They must then relate them to their own countries and circumstances by making the relevant local adjustments.

Die Honorarklage von Architekten und Ingenieuren vor Gericht Ralf Averhaus 2016-10-06 Der Architekten- und Ingenieur-Honorarprozess vor Gericht stellt besondere Anforderungen an beide Parteien, den Auftraggeber und den Auftragnehmer, sowie deren Prozessbevollmächtigte. Dies gilt gleichermaßen für die materiellen Anspruchsvoraussetzungen als auch hinsichtlich der prozessualen Besonderheiten des Honorarrechtsstreits. Für den Kläger kommt es darauf an, den Honoraranspruch unter Beachtung der Rechtsprechung schlüssig darzulegen und die Weichen im Verlauf des Prozesses richtig zu stellen. Dabei liegt ein besonderes Augenmerk auf der Honorarermittlung nach der HOAI. Der Beklagte muss eine effektive Verteidigungsstrategie festlegen. Dargestellt werden dabei nicht nur die relevanten Einwendungen, Einreden und denkbare Gegenforderungen, sondern auch den Prozess betreffende Fragen und Besonderheiten. Für Gesamtschuldfälle werden Fragen der Sicherung von möglichen Regressansprüchen erörtert.

Healing Architecture Christine Nickl-Weller 2013 How can architecture contribute to healing and recovery? And how do our surroundings - both built and unbuilt - influence our prospects of staying healthy?. This title addresses the development and design of spaces for hospitals and other healthcare institutions, how they are perceived, and their overall impact on combating illnesses. This volume presents in detail the principles of this field of study and all the major issues involved, using a range of international projects as illustrative examples. In

order to present a comprehensively interdisciplinary analysis of the subject matter, architects, medical practitioners, economists, artists, urban planners and communication scientists discuss the various aspects of 'Healing Architecture'. This book thus makes an important contribution to achieving an architecture that is attuned to people's needs and helps to promote the recovery process.

Designing Processes Christian Bergmann 2019-02-19 How do we make building sustainable and fit for the future? The book presents a strategy for tackling the construction industry's future challenges from the perspective of the organizing architect, and with a view to the interdisciplinary knowledge, capable of integration, of related disciplines. With a profound insight into the operative processes, the author analyses the complex mechanisms of the system that affect the whole of society and often follow very traditional process structures. He investigates the interaction between the stakeholders' actions in the construction process and the framework conditions and, on that basis, develops a strategy which—itself a process—computes the elements of the intended target state.

Dust & Data Nicholas De Monchaux 2019-05 One hundred years after the Bauhaus School's founding in 1919, this volume tells its story by interweaving the multiple historiographies of the Bauhaus with the global histories of modernist architecture.

The Seven Pillars of Partnering John Bennett 1998 Partnering is a set of strategic actions that deliver vast improvements in construction performance. It is driven by a clear understanding of mutual objectives and cooperative decision making by a number of firms, who are all focused on using feedback to continuously improve their joint performance. A 'second generation' of Partnering has now emerged that requires a strategic decision to cooperate in improving joint performance by a client and a group of consultants, contractors and specialists engaged in an ongoing series of projects. Second Generation Partnering is underpinned by 'Seven Pillars'. Each pillar represents a set of management actions that provide an essential element of Second Generation Partnering. The research also identifies the beginnings of a third generation of Partnering in which the construction industry becomes a truly modern industry producing and marketing a range of products and services that clients are eager to invest in. The dramatic improvements in performance delivered by Second and Third Generation Partnering enable construction firms to meet the demands of their customers - whether they need greater certainty, better designs, faster delivery, lower costs, zero defects,

guarantees or sophisticated after-care services.

Computer Integrated Construction H. Wagter 2012-12-02 The contributions in this volume portray, in terms of the current state of the art, research on computer-aided construction in the building industry. A complete overview is given within the areas of computer-aided design, product modelling in construction, and robot-oriented design and construction together with a summary of the commercial developments in computerized systems within those areas. The papers will be essential reading for all those interested in future automation in relation to the building construction industry with the accent on design and engineering.

Second RILEM International Conference on Concrete and Digital Fabrication Freek P. Bos 2020-07-08 This book gathers peer-reviewed contributions presented at the 2nd RILEM International Conference on Concrete and Digital Fabrication (Digital Concrete), held online and hosted by the Eindhoven University of Technology, the Netherlands from 6-9 July 2020. Focusing on additive and automated manufacturing technologies for the fabrication of cementitious construction materials, such as 3D concrete printing, powder bed printing, and shotcrete 3D printing, the papers highlight the latest findings in this fast-growing field, addressing topics like mixture design, admixtures, rheology and fresh-state behavior, alternative materials, microstructure, cold joints & interfaces, mechanical performance, reinforcement, structural engineering, durability and sustainability, automation and industrialization.

Schwellenwerte und Schätzung des Auftragswertes im Vergaberecht Thomas Ferber
2016-04-18 Die Schätzung des Auftragswertes ist von zentraler Bedeutung bei der Vorbereitung von Vergabeverfahren. Der Titel erläutert die praktische Bestimmung von Schwellen- und Auftragswerten. Was auf den ersten Blick relativ trivial klingt, ist in der Praxis mehr als komplex. Da die EU-Schwellenwerte von Bauaufträgen und Liefer-/Dienstleistungen unterschiedlich hoch sind, ist die richtige Einordnung des Auftragsgegenstandes von besonderer Wichtigkeit. Eine falsche Einordnung einer Ausschreibung als Bauauftrag obwohl der Auftragsgegenstand richtigerweise als Liefer- / Dienstleistung mit einzuordnen gewesen wäre, kann aufgrund des unterschiedlichen Schwellenwerts schwerwiegende Konsequenzen im Vergabeverfahren haben. Sind im Auftrag Optionen, Eventualpositionen bzw. Vertragsverlängerungen vorgesehen, so müssen auch diese berücksichtigt werden. Ebenso stellt sich sehr oft die Frage, ob Aufträge abhängig oder unabhängig voneinander zu betrachten sind. Das Buch „Schwellenwerte und Schätzung des Auftragswertes“ geht auf die Besonderheiten beim Schätzen des Auftragswertes ein und bereitet die Aspekte zu diesem Thema durch eine Vielzahl an Grafiken und Tabellen anschaulich auf. Durch die durchdachte und praxiserprobte Struktur findet man sich in dem Titel sehr schnell zurecht.
