Karin Sander Harald Welzer 2011 Karin Sander's Patina Paintings are created at--and by--the site of their exhibition. Sander transports blank canvases to the exhibition venue and leaves them outside, unprotected, to accumulate the patina of their location as chance and the whims of nature determine. The results are delicate abstractions resembling the mark-making of John Cage or Cy Twombly. This

handsome monograph records the series.

United States of You Kathrin Köster 2018-11-27 The United States of You is a game changer: it enables you to align your mind, body, and heart in a systematic way to gain sustainable access to your source of infinite energy. With this self-leadership book, you'll learn how to be balanced and constantly in touch with your creative power. You'll gain inner clarity by being aware of yourself and others. How? You see and manage yourself as a team of four: the four Mes or Formies. Each Formie represents a vital part of you: your mind, your body, your heart and your consciousness. You will become familiar with the language and the needs of all Formies, enabling you to be in command of yourself and your life. You will gain stamina, inner strength, wisdom, and joy. Especially in times of disruptive change, you'll benefit from an increased awareness level with which to master life. But be aware: beginning this journey means buying a one-way ticket. You only can move ahead - there is no way back. Embarking on this journey means changing yourself, regardless of how tiring the trip gets. To smoothen your journey, you get a navigation system, the L-Loops which you can follow through each part of your inner map to locate self-limitations, let go of mental and emotional patterns, learn more about yourself and your issues, laugh about your quirks and the funny side of life, leverage your insights to changed behaviour and love what you do and who you are.

Hardware Malware Edgar Weippl 2022-05-31 In our digital world, integrated circuits are present in nearly every moment of our daily life. Even when using the coffee machine in the morning, or driving our car to work, we interact with integrated circuits. The increasing spread of information technology in virtually all areas of life in the industrialized world offers a broad range of attack vectors. So far, mainly software-based attacks have been considered and investigated, while hardware-based attacks have attracted comparatively little interest. The design and production process of integrated circuits is mostly decentralized due to financial and logistical reasons. Therefore, a high level of trust has to be established between the parties involved in the hardware development lifecycle. During the complex production chain, malicious attackers can insert non-specified functionality by exploiting untrusted processes and backdoors. This work deals with the ways in which such hidden, non-specified functionality can be introduced into hardware systems. After briefly outlining the development and production process of hardware systems, we systematically describe a new type of threat, the hardware Trojan. We provide a historical overview of the development of research activities in this field to show the growing interest of international research in this topic. Current work is considered in more detail. We discuss the components that make up a hardware Trojan as well as the parameters that are relevant for an attack. Furthermore, we describe current approaches for detecting, localizing, and avoiding hardware Trojans to combat them effectively. Moreover, this work develops a comprehensive taxonomy of countermeasures and explains in detail how specific problems are solved. In a final step, we provide an overview of related work and offer an outlook on further research in this field.

Salvatore Vitale - How to Secure a Country Salvatore Vitale 2019-06 Switzerland is well-known as one of the safest countries on earth and as a prime example of efficiency and efficacy. One of the central reasons that such a country exists is the development of a culture based on protection, which is supported by the presence and production of national security. When in 2014 Swiss people voted in favour of a federal popular initiative against massive immigration, Salvatore Vitale, an immigrant living

in Switzerland felt the need to research this phenomenon in order to comprehend where the motives for this constant need for security originate and how they became part of Swiss culture. In *How to Secure a Country* Vitale explores this country's national security measures by focusing on matter-of-fact types of instructions, protocols, bureaucracies, and clear-cut solutions which he visualises in photographs, diagrams, and graphical illustrations. The result is a case study that can be used to explain the global context and the functioning of contemporary societies. Essays by political scientists Jonas Hagmann (ETH Zurich) and Roland Bleiker (University of Queensland, Australia) provide an analysis of the structure of the Swiss security system and a view on the politics of photography. Lars Willumeit, curator and social anthropologist, will discuss attitudes, behaviours, and codes in 21st Century statehood. 118 illustrations

Die Magicbox für Präsentationen Matthias Garten 2017-10-13 Jeder Vortragende steht heute vor der Herausforderung, eine spannende und überzeugende Präsentation zu halten. Viele Bücher beschäftigen sich mit einer Methode oder einem Vorgehen. Als Leser ist man meistens gezwungen, das Gesamtwerk zu lesen, um die Methode erfolgreich anwenden zu können. Stellen Sie sich vor, Sie haben nicht viel Zeit und der nächste Vortrag steht an. Sie würden gerne frische Ideen, neue Techniken, bewährte Methoden und sichere Argumentationen einsetzen, um Ihren Vortrag spannender und überzeugender zu gestalten. Dieses Buch hilft Ihnen, sich aus einem Füllhorn von thematisch gut gegliederten Ideen, eine passende herauszusuchen und umzusetzen. Beispielsweise eine Geschichte für den Einstieg oder eine wirkungsvolle humorvolle Folie für den Hauptteil. Das Buch gliedert sich in drei Hauptkapitel analog einer Präsentation, nämlich Einstieg, Hauptteil und Schluss. Im Kapitel über Einstiege findet jeder Referent eine Reihe von erprobten und wirkungsvollen Techniken. Zum Beispiel, wie das Publikum am Anfang eines Vortrags abgeholt werden kann. Im Kapitel über Hauptteile werden zahlreiche Ideen zur Visualisierung mit und ohne Programme wie PowerPoint, Keynote, Prezi & Co., aber auch pfiffige Ideen vorgestellt, wie überzeugend argumentiert oder der Inhalt spannend aufgebaut werden kann. Die Schlussideen würzen den Vortrag und sollen in Erinnerung bleiben. Im Kapitel finden sich wirkungsvolle Ideen, die haften bleiben. Jede Idee wird mit Anleitung, Beispielen und Empfehlungen zu Internetseiten, Büchern und weiterführenden Informationen aufgeführt. Fazit: Ein Schnell-Ratgeber, bei dem jeder Referent einfach nach einer Idee, Methode oder Technik suchen und sich daraus etwas für seine Präsentation herauspicken und in seine Präsentation (Vortrag) einbauen kann.

The Needs of Children M. K. Pringle 2013-09-13 'A compelling book' - Observer '...an exceptionally clear and comprehensive synthesis of current research findings made readily comprehensible to both parents and teachers' - Dr M Levy in the Foreword to the French edition Mia Kellmer Pringle was commissioned by the Department of Social Security: To prepare a comprehensive document about the development needs of all children, about the ways in which these needs are normally met, and about the consequences for emotional, intellectual, social and physical growth and development of children when, for some reason or another, these needs are not adequately met Whilst the central themes of this classic text remain as relevant as ever, over forty new references have now been added and many passages have been substantially updated to reflect current thinking and to take account of new research. *The Needs of Children*, published in seven countries, continues to be a principal work in its field and a landmark in our understanding of childhood.

Knowledge Maturing Andreas Kaschig 2013-08-26 The agility of organizations has become the critical success factor for competitiveness in a world characterized by an accelerating rate of change. Agility requires that companies and their employees together and mutually dependently learn and develop their competencies efficiently in order to improve productivity of knowledge work. As a reaction to failures of organisation-driven approaches to technology-enhanced learning and the success of community-driven approaches in the spirit of Web 2.0, we have recently seen a paradigm shift in technology support for learning towards more participatory approaches in which learners are seen as active contributors. Within enterprises, this new perspective brings together traditionally separated disciplines like e-learning, knowledge management, and human resources development, but also requires a fundamental change of the culture of the respective enterprise towards an enterprise 2.0, which is characterized by enhanced collaboration and a cultural of employee participation. These developments are at the heart of how individuals and companies value and deal with knowledge. To make sense it and to productively shape the change process, we need a new conceptual framework that is both well-grounded on extensive research and practically relevant and proven through application in numerous projects. The Knowledge Maturing perspective is a novel approach that helps understanding the fundamental change, the barriers and disruptions in knowledge development, but also shows opportunities and gives guidance to make use of them. This book summarizes the results of the European Research Project MATURE.

Internationaler Lizenzhandel mit Fernsehformaten Timmy Ehegötz 2015-02-17 Das vorliegende Werk thematisiert einerseits die programmpolitische - als auch ökonomische - Relevanz des globalen Formathandels für die zuschauerstärksten inländischen TV-Sender, zum anderen werden Faktoren und Strategien benannt, die für eine erfolgreiche Reproduktion von Fernsehformaten ausschlaggebend sind. Die Erarbeitung von Erfolgsfaktoren und Strategien erfolgt mithilfe einer genauen Betrachtung des globalen Fernsehformathandels (u. a. Bedeutung und Gegenstand des Lizenzgeschäfts, rechtliche Rahmenbedingungen, Kulturspezifika, wichtige Akteure und ihre Merkmale, Strategien und Strukturen), einer ausführlichen Programmanalyse der reichweitenstärksten einheimischen TV-Sender sowie eines konkreten Fallbeispiels - dem Formatimport "Ich bin ein Star - Holt mich hier raus!". Anhand der durchgeführten qualitativen Inhaltsanalyse des "Dschungelcamps" (britisches Original vs. deutsche Adaption) steht am Ende ein begründeter Kriterien- und Maßnahmenkatalog, den Fernsehsender bei der erfolgreichen Reproduktion von internationalen Formaten beachten sollten.

Tabletops - Horizontal Interactive Displays Christian Müller-Tomfelde 2010-06-16 The objects displayed on a table can take multiple forms. In meetings, it is still very often printed paper although its content was originally created on a computer. The content can also be a "table", but now in the mathematical sense, showing, e. g. , the budget of a project. Then, we have a "table" on the table. Most often, the computer-generated contents are subject of frequent changes or dynamic in nature. It is a logical consequence to avoid the detour and the inherent media break by transforming the surface of the table into a display able to show media that are active and can be computer-generated and computer-controlled. At the same time, it is desirable to maintain the inherent features and affordances

of working with the objects and the contents while sitting or standing around a table. Electronic Meeting Rooms On the basis of these and other elaborate considerations, we started to design in 1992/1993 an electronic meeting room in Darmstadt at GMD-IPSI (later Fraunhofer IPSI). The setup of our custom-built DOLPHIN-System consisted of a "traditional" large rectangular wooden table with four physically integrated workstation-like computers with at screens. This set-up was complemented by linking a large vertical pen-operated interactive display, at that time the first LiveBoard outside of Xerox PARC (two of which I was able to get to Darmstadt after my stay at Xerox PARC in 1990).

The Functions of Social Conflict Lewis A. Coser 1998 This volume traces the modern critical and performance history of this play, one of Shakespeare's most-loved and most-performed comedies. The essay focus on such modern concerns as feminism, deconstruction, textual theory, and queer theory.

Special Effects Artists Rolf Giesen 2014-04-24 "Alphabetized entries provide career synopses and movie credits for important special effects practitioners and inventors, spanning the early years of cinematography through the end of the mechanical age of filmmaking. Coverage ranges from pioneers through modern special effects masters working with traditional techniques. A select chronological filmography, a glossary of technical terms and numerous publicity stills are included."--Provided by publisher.

Privacy in Public Space Tjerk Timan 2017-11-24 This book examines privacy in public space from both legal and regulatory perspectives. With on-going technological innovations such as mobile cameras, WiFi tracking, drones and augmented reality, aspects of citizens' lives are increasingly vulnerable to intrusion. The contributions describe contemporary challenges to achieving privacy and anonymity in physical public space, at a time when legal protection remains limited compared to 'private' space. To address this problem, the book clearly shows why privacy in public space needs defending. Different ways of conceptualizing and shaping such protection are explored, for example through 'privacy bubbles', obfuscation and surveillance transparency, as well as revising the assumptions underlying current privacy laws.

Animation Under the Swastika Rolf Giesen 2012-08-02 Among their many idiosyncrasies, Adolf Hitler and Joseph Goebbels, the Nazi minister of propaganda, remained serious cartoon aficionados throughout their lives. They adored animation and their influence on German animation after World War II continues to this day. This study explores Hitler and Goebbels' efforts to establish a German cartoon industry to rival Walt Disney's and their love-hate relationship with American producers, whose films they studied behind locked doors. Despite their ambitious dream, all that remains of their efforts are a few cartoon shorts—advertising and puppet films starring dogs, cats, birds, hedgehogs, insects, Teutonic dwarves, and other fairy-tale ensemble. While these pieces do not hold much propaganda value, they perfectly illustrate Hannah Arendt's controversial description of those who perpetrated the Holocaust: the banality of evil.

United by AIDS Raphael Gyga 2019-11-07 The appearance of HIV/AIDS in the early 1980s and its subsequent rapid spread left deep marks on society. Artists and activists across the world responded to both the illness itself and its effects with moving work that reflects on loss, remembrance, and activism in art. *United by AIDS* sheds light on the multifaceted and complex interrelation between art and HIV/AIDS from the 1980s to the present. Published to accompany an exhibition at Zurich's Migros Museum of Contemporary Art (Migros Museum für Gegenwartskunst), it looks at the blurred lines between art production and HIV/AIDS activism and showcases artists who played-and still play-leading roles in this discourse. Alongside fifty illustrations of important works, including many in color, the book includes brief texts on the featured artists and essays by Douglas Crimp, Alexander García Düttmann, Raphael Gyga, Elsa Himmer, Ted Kerr, Elisabeth Lebovici, and Nurja Ritter.
