The American Crisis Thomas Paine 2021-04-26T23:11:56Z The American Crisis is a collection of articles by Thomas Paine, originally published from December 1776 to December 1783, that focus on rallying Americans during the worst years of the Revolutionary War. Paine used his deistic beliefs to galvanize the revolutionaries, for example by claiming that the British are trying to assume the powers of God and that God would support the American colonists. These articles were so influential that others began to adopt some of their more stirring phrases, catapulting them into the cultural consciousness; for example, the opening line of the first Crisis, which reads "These are the times that try men's souls." This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Diphthongs in Frisian Kathrin S. Bussmann 2004 Frisian dialects have been particularly noted for the wealth and variety of their diphthongs. Using a set of specific phonological criteria, this study evaluates the diphthongs of Classical Old Frisian through to those of the modern Frisian dialects to determine which diphthongs actually hold phonemic status. For each posited inventory of phonemic diphthongs, those features which play a distinctive role are identified. A comparison with other West-Germanic diphthong inventories leads to a number of interesting findings. Unlike other West-Germanic languages, Frisian shows a general historical trend toward diphthong conservation, even in the case of highly "marked" diphthongs. Furthermore, Frisian diphthong accentuation allows for rising as well as falling diphthongs to occur within the same dialect, challenging previous assumptions that accentuation is always assigned through a binary parameter setting based on vocoid position. Finally, nuclear quantity is shown to play a phonemically-distinctive role between certain diphthongs. A new taxonomy of vowel-system types is consequently proposed, whereby quantitative oppositions between diphthongs can be represented.
