Babasaheb Savita Ambedkar 2022-10-24 Born into a middle-class, Sarasvat Brahmin family, Dr Sharada Kabir met and got to know Dr Bhimrao Ambedkar as a patient riddled with life-threatening diseases, and eventually married him on 15 April 1948, getting rechristened as Savita Ambedkar. From the day of their wedding to the death of Dr Ambedkar on 6 December 1956, she aided him in some of his greatest achievements-drafting the Constitution of India, framing the Hindu Code Bill, writing some of his most celebrated books, including *The Buddha and His Dhamma*, and leading millions of Dalits into Buddhism. Following his death, she was hounded into obscurity by some of Dr Ambedkar's followers, who saw her as a threat to their political ambitions. She re-emerged into public life in 1970 and got back to working on the mission to which her husband had devoted his life-the welfare of the Dalit community. Her autobiography, *Dr Ambedkaraanchya Sahavaasaat*, was first published in Marathi in 1990. This English translation by Nadeem Khan unearths a much valuable and forgotten account, an intimate portrait of one of the greatest figures of the twentieth century. A tenacious fighter, an outstanding scholar and an iconic leader, Dr B.R. Ambedkar was all that and more. Savita Ambedkar brings alive a different side of her husband: a man who wrote romantic letters, dictated what she should wear, whipped up delicious mutton curry, played the violin, and even tried his hand at sculpting. This is a book that humanizes Ambedkar as no other book has done yet.

The Abolition of Christianity Mark Walia 2022-05-26 Thanks to a wave of militant secularism now sweeping across America and the entire Western World, Traditional Christianity stands on the verge of destruction. Secularism has already triumphed on multiple fronts, be it abortion, euthanasia, homosexuality, or the "right" to sexual freedom, and aspires to further revolutionary changes, including elimination of marriage, the family, and gender itself. That is the provocative message set forth in Mark Walia's *The Abolition of Christianity*. Tailor-made for people of faith seeking to understand exactly why our culture has become so hostile towards Christian principles, this lively book will also appeal to anyone who enjoys controversial material on religion and politics.

The Medical Messiahs James Harvey Young 2015-03-08 James Harvey Young describes the development of patent medicines in America from the enactment in 1906 of the Pure Food and Drugs Act through the mid-1960s. Many predicted that the Pure Food and Drugs Act would be the end of harmful nostrums, but Young describes in colorful detail post-Act cases involving manufacturers and promoters of such products as Cuforhedake Brane-Fude, B. & M. "tuberculosis-curing" liniment, and the dangerous reducing pill Marmola. We meet, among others, the brothers Charles Frederick and Peter Kaadt, who treated diabetic patients with a mixture of vinegar and saltpeter; Louisiana state senator Dudley J. LeBlanc, who put on fabulous medicine shows as late as the 1950s promoting Hadacol and his own political career, and Adolphus Hohensee, whose lectures on nutrition provide a classic example of the continuing appeal of food faddism. Review: "The Medical Messiahs is an example of historical writing at its best—scholarly, perceptive, and exceedingly readable. Despite his objectivity, Young's dry humor shines through and illuminates his entire book."—John Duffy, *Journal of Southern History* "This book is written in tight, graceful prose that reflects thought rather than substitutes for it. Done with a sure feel for the larger political, social, and economic background, it demonstrates that historians who would make socially relevant contributions need only adhere to the best canons of their art."—Oscar E. Anderson, Jr., *The American Historical Review* "[This] material is so interestingly presented that the readers may not immediately appreciate what a major historic study [the book] is, and how carefully documented and critically analyzed."—Lester S. King, *Journal of the American Medical Association* "Dr. Young's well-written social history of health quackery in twentieth-century America will not only increase the understanding of our times by future historians but will also be of great value to all those interested in improving the health of the population by reminding them of the past."—F. M. Berger, *The American Scientist* Originally published in 1967. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. Spine-Chilling Murders in the Northeast Nick Vulich 2022-05-04 Ever wonder what evil lurks in your hometown? Spine-Chilling Murders in the Northeast takes you behind the scenes of some old-time killings in New York, New Jersey, Delaware, Connecticut, Massachusetts, and more. Joseph Elwell, the Whist Wizard of Manhattan, was shot to death in his home overnight on June 11, 1920. Roy Harris, an aspiring novelist, confessed to the crime, but it soon turned out to be nothing more than a publicity stunt to help sell his new

book. Louise Lawson led a double life. The folks back home in Walnut Springs, Texas, knew her as a shy young girl aspiring to a big-time musical career. Her friends in New York knew her as a Broadway Butterfly, one of those kept girls who lived in a fancy apartment. When she was found dead in 1918, it turned out she was the victim of a gang that targeted the working girls of New York. Marie Williams (aka Boots) was the prettiest girl ever arrested in West Virginia. She told police that she, and her boyfriend, Peter Treadwell, were in the room when Henry Pierce was murdered, but they did not have anything to do with the crime. The police wanted to believe her, but... When nineteen-year-old Avis Linnell turned up dead at the Y. M. C. A. in Boston, suspicion quickly fell on her fiance, Reverend Clarence V. T. Richeson. The Boston Globe said Richeson had a "soft" and "musical" voice, almost too much for a girl to resist. It didn't help the Reverend any that he was carrying on with Avis, while he announced his upcoming marriage to wealthy Boston socialite, Violet Edmands. Pretty Josephine Amore killed her neighbor/lover Michael Martelle in Newark, New Jersey, in August 1908. Martelle kissed her and threatened to harm her family unless she ran away with him. "I got me a great big gun," said Josephine, "and killed him." Detectives didn't believe her for a minute. They were convinced her husband, Carmine Amore, was the killer, but could never quite pin the killing on him. Alfred Morrison shot his wife in his sleep and told police he didn't know anything about it. He was lost in a dreamlike state much like Walter Mitty. The newspapers quickly labeled him the Mount Vernon Dream Killer. Hans Schmidt, a New York Priest, became known as the Dr. Jekyll and Mr. Hyde Killer after he murdered Anna Aumuller and scattered her dismembered remains in the North River. He told detectives he tasted her blood first, then when she was dead dragged her body into the bathroom and carved it up. George White, a man of color, was arrested for sexually assaulting and murdering seventeen-year-old Helen S. Bishop in Wilmington Delaware in June 1903. A mob broke him out of the Castle County Work House as guards stood by and did nothing to stop them. White was dragged out into the woods and burned alive. All he could say in his defense was, "You would not have done this if I was a white man." Read them if you dare!

A Doctor in the Pacific War Malcolm Hawk 2020-02-27 In August 1942, Malcolm Henry Hawk left a promising post-graduate medical residency in Wisconsin to begin serving his country in the Pacific Theater during World War II. In the Pacific, he served as an anesthesiologist with the 44th General Army Hospital, first in Australia and then in the Philippines. The work was essential and often hard; the medical staff treated frontline casualties and also kept the support troops healthy. Malcolm was fortunate to be seldom in danger, although he mentions being uncomfortably close to a few Japanese attacks in the Philippines. But the hazards of his military life included the frustrations of trying to obtain the equipment and operating facilities that his unit needed, the rigors of tent life, searing heat and monsoon rains, the loneliness of missing his family, endless hours of boredom, and worries about what he would do after the war was over and he came home to resume his career. His letters home paint a vivid picture of what daily life was actually like for one medical doctor during the war.

I Want To Live Volume 2 Patrick Feenan 2014-04-03 This book, I Want To Live, Volume Two, is the follow up to the first I Want To Live book. After my first medical operation for bowel cancer in 1994, I thought then that I was free of this awful disease. But my troubles had only just begun. What had pleasantly turned from good news from the doctors about an illness that was in remission would turn into another nightmare. Just a short eighteen months later, after a Cat-scan at hospital, I was told by the doctors that there had been a recurrence of my illness. Now another serious operation was in the offing in 1996. This second operation took place, following by radiotherapy. I had triumphed again, for how long? I was to return to hospital for another operation in 1997, the third in three years... surely this was the last, I wondered. But it was not to be. Ten years passed, then I returned to hospital again in 2007.

Pillars of Fire Laurice Elehwany Molinari 2015-01-27 After Vero Leland discovered his true identity in book one, he must continue to maintain his life on earth as a regular 12-year-old kid, which is hard to do when you are really a fledgling, a guardian angel in training to become one of the fiercest of all angels. At any moment, he could be called to the Ether, the spiritual realm surrounding the earth, where he must face whatever trials come his way in angel school, aka C.A.N.D.L.E. (the Cathedral of Angels for Novice Development, Learning and Edification). In book two, part of Vero's training involves the Angel Trials, a set of three challenges where he and his group of fellow fledglings compete with angels from other realms. But while he is competing in the Ether, back on earth his sister is in trouble. She has a new friend who is leading her down the wrong path. During the third trial, Vero realizes he must choose between saving his sister or winning his competition. But the attack on Clover is only a means to get to Vero, and he finds himself face-to-face with an evil even greater

than what he experienced in the Bottomless Pit. Once again, he is tested beyond what any previous fledgling has endured, and how the battle ends will affect not only his grade in C.A.N.D.L.E., but also the fate of the world.
