Ultrasonic Production of Nano-emulsions for Bioactive Delivery in Drug and Food Applications Thomas Seak Hou Leong 2018-02-21 This SpringerBrief provides an overview of ultrasonic emulsification and an update on recent advances in developing stable emulsions for the creation of novel drugs and functional foods, with a focus on bioactive delivery in these products. Emulsification is the process of combining two or more immiscible liquids to

form a semi-stable mixture. These two liquids generally consist of an organic (oil) phase and an aqueous (water) phase that is stabilized by the addition of an emulsifier. Most common emulsions are of the oil-in-water (O/W) type, but can also be of water-in-oil (W/O) or even multiple emulsion types (i.e. double emulsions) in the form of water-in-oil-in-water (W/O/W) or oil-in-water-in-oil (O/W/O) phases. The formation of an emulsion requires input of energy to distribute the disperse phase in the continuous phase in small-sized droplets that are able to resist instability. There is great interest in the use of ultrasound to produce emulsions, as it is able to do so relatively efficiently and effectively compared to existing techniques such as rotor stator, high-pressure homogenization and microfluidization. The interaction of ultrasound with the hydrocolloids and biopolymers that are often used to stabilize emulsions can offer advantages such as improved stability or greater control of formed droplet size distributions.

Cake J. Bengtsson 2020-02 Jake McKallister might have been a rock star, but he was no ordinary one. Surviving an unspeakable crime as a young teen had shaped him into a guarded workaholic, and he now lived his life trying to forget. If it hadn't been for music and the redemption he found through it, he might not have survived. Career success came easily for him. Personal connections did not. When outspoken, vivacious college student Casey Caldwell was paired with the famously reserved rockstar for a friend's wedding, she was prepared for the worst. What could they possibly have in common? She was a bubbly talker; he was a reclusive loner. His life was filled with music; she couldn't carry a tune. She'd enjoyed a happy childhood; his was a well-publicized nightmare. Yet despite their obvious differences, Jake and Casey found each other, and her light balanced out his darkness. Would their love be strong enough to survive the weight of his tragic past?

In the Prison of Her Skin Violette Leduc 1970

Dear Professor Einstein Alice Calaprice . . . I probably would have written ages ago, only I was not aware that you were still alive. . . . -Tyfanny Thank you for your letter of July 10th. I have to apologize to you that I am still among the living. There will be a remedy for this, however. . . . -Albert Einstein. . . I'm a little below average in mathematics. . . . I worry (perhaps too much), although in the end I imagine it will all work out for the best. . . . -Barbara. . . Do not worry about your difficulties in mathematics; I can assure you that mine are still greater. -Albert Einstein This enchanting book displays a small sampling of the amusing, touching, and sometimes precocious letters sent to Albert Einstein by children from around the world, and his often witty and very considerate responses. Alice Calaprice has compiled a delightful and charming collection of more than 70 letters, most never published before, from children to perhaps the greatest scientist of all time. Enhancing this correspondence are numerous photographs showing Einstein amid children, wearing an Indian headdress, carrying a puppet of himself, donning furry slippers, among many other wonderful pictures. They reveal the intimate human side of the great public persona, a man who, though he spent his days contemplating the impersonal abstractions of mathematics and physics, was very fond of children and enjoyed being in their company. Obviously, Einstein led a busy life, and so he could not answer every letter sent to him. Nonetheless, he made time to respond to those that touched him in some way. To Monique from New York, who asked about the age of the Earth and when it will come to an end, he patiently responded that it is a little more than a billion years old, and, As for the question of the end of it I advise: Wait and see! To six little scientists from Morgan City, Louisiana, who despite the skepticism of their classmates maintained that life would survive even if the sun burned out, he wrote, The minority is sometimes right-but not in your case. Complete with a foreword by Einstein's granddaughter Evelyn, a biography and chronology of Einstein's life, and an introduction by Einstein scholar Robert Schulmann on the great scientist's educational philosophy, this wonderful compilation will be welcomed by teachers, parents, and all the young, budding scientists in their lives. A portion of the author's royalties will be donated to UNICEF. Alice Calaprice (Princeton, NJ) is the editor of *The Quotable Einstein* and *The Expanded Quotable Einstein*, and the author of *An Owl in the House*, a science book for young audiences. She is the in-house editor for *The Collected Papers of Albert Einstein* and the former Senior Editor at Princeton University Press.

The Indian Ocean Michael N. Pearson 2003-09-02 In this stimulating and authoritative overview, Michael Pearson reverses the traditional angle of maritime history and looks from the sea to its shores - its impact on the land through trade, naval power, travel and scientific exploration. This vast ocean, both connecting and separating nations, has shaped many countries' cultures and ideologies through the movement of goods, people, ideas and religions across the sea. The Indian Ocean moves from a discussion of physical elements, its shape, winds, currents and boundaries, to a history from pre-Islamic times to the modern period of European dominance. Going far beyond pure maritime history, this compelling survey is an invaluable addition to political, cultural and economic world history.

Staging of the New State Regime provides groundbreaking analysis of Portuguese feature films produced in the first three decades of the New State (Estado Novo), a right-wing totalitarian regime that lasted between 1933 and 1974. These films, sponsored by the National Propaganda Institute (Secretariado Nacional de Propaganda), convey a conservative image of both mainland Portugal and the country's overseas African colonies (Angola, Mozambique, Cape Verde, Guinea-Bissau and St. Thomas and Príncipe). The films about the mainland emphasize traditional values, the importance of obedience to authorities and a strict division of gender roles, whereby women are relegated to the domestic sphere. The Portuguese countryside, where age-old customs and a strong social hierarchy prevailed, is presented in these movies as a model for the rest of the country. The films about the colonies, in turn, underline the benefits of the Portuguese presence in Africa and portray the colonized as docile subjects to Portuguese rule. The book includes chapter summaries in the introduction, in-depth analyses of the most important Portuguese films produced between 1930 and 1960, a discussion of the main topics of Portuguese cinema from the New State, and a comprehensive bibliography that guides students who wish to read further on a specific topic. First published in Portuguese to wide acclaim, Portuguese Film, 1930-1960: The Staging of the New State Regime fills a gap in English-language scholarship on the history of the national cinema of the Iberian peninsula. Films covered include Fatima, Land of Faith (Terra de Fe), Spell of the Empire (Feitico do Imperio), and Chaimite.
