*Douglas SBD Dauntless* Robert Peczkowski 2007-09-19 The "Slow But Deadly" Dauntless was the US Navy's premier carrier-borne dive bomber, and proved immensely successful in all the major Pacific naval campaigns of WW2. Designed by Ed Heinemann, who later was involved in the design of the equally successful A-20, A-26, F4D and A-4 Skyhawk. The Dauntless continued on operations until the end of the war, and even post-war with the French and Mexicans. The SBD's design and development are covered in detail in this book The book contains: superb color illustrations of camouflage and markings, rare b/w archive photographs, scale plans. Essential reading for aviation enthusiasts, historians & scale aeromodellers.

**Mustang Ace** Robert J. Goebel 2010-09 MUSTANG ACE Memoirs of a P-51 Fighter Pilot by Robert J. Goebel When Robert Goebel left home to join the Army Air Corps in 1942, he was a 19 years old and a high-school graduate. The only previous time he had traveled far from his native Racine, Wisconsin, was an epic trip in the summer of 1940, when he and a pal had ridden the rails to Texas and back to visit two of Bob's brothers who were in the service. Even during his weeks in Pre-flight training, young Goebel found that he felt at home in the service, and he looked forward to the great adventure on which he had

embarked out of a sense of patriotism and yearning to see the wide world. Easygoing and quick to learn, Cadet Goebel worked his way steadily through the Basic, Primary, and Advanced phases of military flight training, and found in himself an aptitude for flight. However, like nearly all of his comrades, Goebel could not learn how to hit a flying target with the guns mounted on the trainers he flew. Nevertheless, he-and they-graduated to fighter school and, after earning their wings and commissions, were sent on to join an operational fighter unit - in Panama. The months of rigorous operational flying in Panama seasoned Lieutenant Goebel and his young companions, and made better aviators of them, but it did little to advance their gunnery skills. When a new crop of novices arrived, Goebel and his companions found themselves on their way to Europe to join the fight. They wound up in North Africa in the Spring of 1944 with orders to join the 31st Fighter Group in Italy. Just as Goebel and his young companions were about to join the leading fighter group in the Mediterranean Theater of Operations, the 31st turned in its British-made Spitfire fighters for new P-51 Mustang fighters. Within weeks, Bob Goebel had flown his first combat missions and had lost his element leader, who was shot down in a swirling dogfight. But master the job he did. A steady succession of bomber-escort missions over southeastern Europe slowly and then more rapidly forced Lieutenant Goebel to settle in and master aerial gunnery and the mentally taxing high-speed dogfights in which he became engaged. At last, he shot down his first German fighter. And he advanced to positions of leadership, in due course leading the entire 31st Fighter Group deep into enemy territory. At length, he shot down a fifth German and thus became an ace-a Mustang Ace. And then he shot down three Germans in one day on a mission to Ploesti, Rumania. He flew to Russia and back, and supported the invasion of southern France. In the end, by September 1944, he had eleven confirmed victories to his credit and was one of the 308th Fighter Squadron's most respected combat leaders. When he was sent home at the end of his combat tour, Captain Bob Goebel was not yet 22 years old.

Macchi MC.202 Folgore Przemyslaw Skulski 2012-12-24 econd edition, revised and extended. The development of the most famous Italian WWII fighter is described and illustrated. Combining the agility and excellent flying characteristics of the earlier MC.200 with a powerful German aero-engine, the Folgore was the best Italian fighter in large-scale service. It served with the Regia Aeronautica and other forces, including the Croatian air arm. This book describes the design, development and operations of this elegant and effective fighter. This expanded 2nd edition contains: scale plans, photos and drawings from Technical Manuals, superb color illustrations of camouflage and markings, and rare b/w archive photographs. Color photos of the preserved aircraft illustrate all aspects of the airframe. Essential reading for aviation enthusiasts & scale aeromodelers.

Defending Champ Mike Lupica 2021-09-07 In this follow up to Triple Threat, New York Times bestseller Mike Lupica takes us to the soccer field in another empowering story about dismantling sexism in sports. Fresh off her football victory as QB, Alex Carlisle is on cloud nine. But with football season ending, Alex is ready to get back on the field in the spring. Ideally she'd like to play soccer again, but as she's about to sign up for tryouts, she hears word around the school that they're planning to cut athletic funding. and girls soccer might be first to go. Now, Alex knows playing soccer is about more than just healthy competition. It's about fighting for their right to play. Why should the girls team be first to get cut? It's an injustice that seems to follow Alex through her middle school athletic career, and it needs to stop. The soccer girls get together and hatch a plan. A battle of the sexes. The girls team versus the boys team. Whoever wins gets to play in the spring. But Alex soon realizes that's not the right approach. Everyone deserves to play. So instead, she hatches a new plan--charging tickets to the game to raise money for the school's athletic program so that no one is left on the sidelines.

**Women in the Sun, Linen in the Wind** María Claudia Otsubo 2018-10-30 These fifteen short stories dive deeply into reality looking to pull out new senses. They have the ability to show - especially what cannot be told. Tales of the feminine world, the natural world and of freedom (or the lack of it) open up the blinds to let us see beyond everyday's acts and wordly rites; to let us see beyond words and gestures.

*Mitsubishi A6M Zero* James D'Angina 2016-10-20 Unquestionably the most iconic Japanese fighter of World War II, the Mitsubishi A6M Rei-Sen, Type Zero fighter was used from the initial raid on Pearl Harbor up to the Kamikaze attacks at the end of the war. Facing off against the likes of the Wildcat, Corsair and even the Spitfire, the Zero gained a legendary reputation amongst Allied pilots due to its incredible manoeuvrability. Detailed analysis of its technical qualities show why the Zero was so feared, but also pinpoints the weaknesses that would eventually be its downfall as Allied pilots learned how to combat it. A selection of historical photographs and unique artwork accompany the analysis as James D'Angina delves into the history of the premier Axis fighter of the Pacific Theatre, exploring the design and combat

effectiveness of the Zero as well as the tactics developed by Allied pilots to counter it.

**Modelling the P-47 Thunderbolt** Brett Green 2012-04-20 The P-47 Thunderbolt, affectionately nicknamed the 'Jug', was one of the most famous fighter aircraft of World War II. Used as both a high-altitude escort fighter and a low-level fighter-bomber, it quickly gained a reputation for being tough and resilient. Many different air forces operated this plane, and it sported a wide range of camouflage schemes, finishes and markings, including stunning nose art. Modellers have been well served with Thunderbolt kits over the years, right up to the latest highly accurate releases. This book takes a step-by-step approach to modelling a wide variety of P-47 types in 1/48-scale, from 'Razorbacks' in USAAF colours to RAF T-bolts in the Far East. It provides expert advice on conversions (including a Bubbletop to a P-47M), adding aftermarket items, detailing, and ways to achieve top quality weathering and finishes.

**I Murdered Your Mother, I Think?** Robert Beckstedt 2018-11-30 Maria the nurse and nanny - invoking Haitian Voodoo to protect those she loves from her damaged, violent sister Andrea. And Michael - the wealthy man between them, fighting desperately to save his baby son and escape with the sister he truly loves. This exhilarating saga of love and revenge sweeps us from Hispaniola in 1916, where the sisters' family originated in poverty and slavery, to the lurking drug culture of Balboa, Panama, and finally, to the United States. The ripples of the sisters' family history spread insidiously and threaten all that Michael has built. Will the Voodoo that was meant to protect save them? Or will it finally bring disaster upon Michael, Maria, and everything they love?

*Bell P-39 Airacobra* Robert Peczkowski 2011-03-01 Designed as an interceptor, when the Bell P-39

Airacobra appeared in 1941 it was acclaimed as one of the most advanced combat planes of the time. Elegantly designed and innovatively engineered (it featured the engine mid-aircraft like a racing car), it experienced mixed operational fortunes but was especially successful in the Soviet Air Force. This book is a full technical history of this important but neglected fighter of World War Two. It presents scale plans of all versions, many detailed photographs of surviving aircraft, full color illustrations of the aircraft in the different liveries of its many users: USAAF, RAF, Soviet, French, Italian and others, in total more than 50 color profiles.

**Hudson Steamship** Graham Atkinson 2004 The Hudson company is perhaps best known for its collier fleet that became a familiar sight loading coal in ports in the north-east of England for delivery to utility companies in the south-east. This book includes a detailed fleet list of owned and managed vessels.

**Brewster F2A Buffalo Aces of World War 2** Kari Stenman 2013-06-20 Although designed and built for the US Navy, the F2A fought in only one major US engagement, the battle of Midway, in which F2A pilots managed to shoot down a number of Japanese fighters. Soon replaced by the navy, the F2A was exported to Britain, where it was nicknamed the 'Buffalo' thanks to its stubby appearance. The British sent most of these fighters to the Far East where they were used in the defence of Singapore and Malaya. It was in the Winter War, however, that the F2A truly found a home. Calling the plane simply the Brewster, the Finnish flew it against the invading Russians. Overall 37 Finns achieved ace status flying the Brewster, and it was the Finnish fighter of choice until succeeded by the Bf 109 in 1943.

**A6M Zero-sen Aces 1940-42** Nicholas Millman 2019-04-18 The Mitsubishi A6M Zero-sen was Japan's Spitfire. In continuous development and operational service from the time of the Sino-Japanese war in 1940 to the end of the Pacific War in 1945, it is held in almost mythical awe, similar to Britain's legendary fighter aircraft. At the time of its operational debut the fighter's design features offered the revolutionary combination of an all-round vision canopy, cannon armament and a jettisonable drop tank giving it phenomenal range. Together with the flying and tactical proficiency of superbly trained pilots, this made the Zero-sen a true strategic fighter, spearheading Japan's offensive in the Pacific. It was also the mount of a plethora of successful and flamboyant naval aces engaged in both sea and land campaigns. This volume covers the use of the A6M2 variant from its debut in China to the Solomons Campaign, and also tells the story of the A6M2 fighter aces of the 4th and Tainan Kokutai.

**White Eagles** Bartłomiej Belcarz 2001 Polish fliers had to fight for their existence from the chaotic beginnings in the aftermath of World War I, through the Nazi and Soviet juggernauts in September 1939. In White Eagles the authors describe, squadron by squadron in enormous detail, exactly how the well trained but isolated Poles fought bitterly against their invaders. Using outdated tactics and old equipment, they proved to be the most successful and courageous airmen to defend England during the summer of 1940.

**Japanese Heavy Cruiser Takao** Janusz Skulski 2014-02-19 The design of four-member Japanese Takao-class heavy cruisers built between 1927-1928 was based on earlier Myoko-class heavy cruisers. The Takao-class was better armored and equipped including the main artillery being modified to engage air targets. The Takao-class had a distinctive look thanks to the massive superstructure and the first chimney being inclined towards the second one which was set vertically. Only the lead ship of her class, i.e. Takao survived the war and was scrapped in 1946. The latest volume of the Super Drawings in 3D series harvests many years of Janusz Skulski's work who is considered the world's best Imperial Japanese Navy expert. Takao renders by Waldemar Goralski include the majority of adjustments made by Janusz Skulski and depict Takao in the camouflage pattern form the last days of the World War II."

**Mitsubishi A5m Claude** Tadeusz Januszewski 2013-03-19 The Mitsubishi A5M, the Japanese Imperial Navy's first metal monoplane fighter, was the creation of Jiro Horikoshi, father of the legendary A6M Zero. Labelled Claude in the Allies' code, the A5M was a transitional fighter which marked a significant step in the development of the Japanese Navy's air force during the early 1930s. This book contains a full technical history of the aircraft and all its variants from its prototype development and test flights in 1935 to its production and introduction in the Second Sino-Japanese War from 1937 to 1940. It is illustrated with photographs, colour drawings and technical plans. \* Rarely documented aspect of World War Two aviation history. \* Superb colour illustrations of camouflage and markings, walk-around colour photographs and rare b+w archive photographs. \* Essential reading for aviation enthusiasts & scale aero-modellers.

**Messerschmitt Me 410** Robert Peczkowski 2013-06-01 This is the illustrated story of the World War Two Me410 twin-engine fighter-bomber and reconnaissance aircraft, which the Luftwaffe High Command commissioned as the successor to the Bf110 "heavy fighter" and the ultimate version of the experimental Me210. In all, 1,160 aircraft were built and the final years of the war the Me410 valiantly defended Germany against the incessant raids of Allied bombers. This work features: scale plans; photographs and drawings from technical manuals; walk-around color photographs; b/w archive photographs; rarely documented aspect of World War Two aviation history covering a lesser known but significant Luftwaffe aircraft; and superb color illustrations of camouflage and markings, detailed color photographs of surviving aircraft and period wartime b/w photographs. It is an essential reading for aviation enthusiasts and scale air modelers. REVIEWS .. a most complete look at one of the Luftwaffe's more interesting aircraft. A book that continues the excellent of MMP products and one that I can highly recommend to you. Model Madness

**Ki-43 'Oscar' Aces of World War 2** Hiroshi Ichimura 2012-10-20 Dubbed the 'Oscar' by the Allies, the Ki-43 Hayabusa Peregrine was the most prolific Japanese fighter of World War 2. Designed for manoeuvrability and speed, the low-wing model meant that firepower and safety had to be sacrificed, with only two machine guns per plane. Despite this, more Japanese pilots achieved Ace status flying the Hayabusa than any other plane. This book expertly charts the experiences of the pilots and discusses the early stages of the war in South-East Asia, China, Burma and New Guinea. Accompanied by detailed appendices and specially commissioned artwork, this is the first volume in English to focus exclusively on the exploits of the Ki-43.
