*Konduru Paul G. Hiebert* 1971 *Konduru* was first published in 1971. Minnesota Archive Editions uses digital technology to make long-unavailable books once again accessible, and are published unaltered from the original University of Minnesota Press editions. This is a detailed anthropological description and analysis of life in Konduru, a village in the central part of southern India about one hundred miles south of Hyderabad. The study is based on field work done by Professor Hiebert over a period of several years when he lived in the village, spoke its language, Telugu, and became closely acquainted with the people and their culture. After sketching the geographic and historical setting of the village, Professor Hiebert describes and discusses the social structure, including the societal categories, the various castes, the social groups including family, patrilineage, associations, and communities, and hamlets, villages, and towns in the region. There are chapters on status and power, networks of interpersonal relationships, panchayats (the system of justice), and rituals. Finally, the author discusses changes which are taking place in the society and culture of Konduru and presents his conclusions. He points out that this study of Konduru illustrates the importance of the village within the social order but at the same time demonstrates that the village cannot be understood apart from the other social groups in which its members are involved and interrelated, and that these relationships are neither static nor simple. But, as he concludes, the village is, for the individual, the concrete expression of his society. The book is illustrated with photographs, maps, and drawings. E. Adamson Hoebel, Regents' professor of anthropology at the University of Minnesota, writes a foreword.

**The Fama Portfolio** Eugene F. Fama 2017-09-07 Few scholars have been as influential in finance, both as an academic field and an industry, as Eugene Fama. Since writing his groundbreaking 1970 essay on efficient capital markets, Fama has written over 100 papers and books that have been cited hundreds of thousands of times. Yet there is no one collection where one can easily find his best work in all fields. "The Fama Portfolio" will be an outstanding and unprecedented resource in a field that still concentrates mainly on questions stemming from Fama's work: Is the finance industry too large or too small? Why do people continue to pay active managers so much? What accounts for the monstrous amount of trading? Do high-speed traders help or hurt? The ideas, facts, and empirical methods in Fama's work continue to guide these investigations. "The Fama Portfolio" will be a historic and long-lasting collection of some of the finest work ever produced in finance."

*One Last Lunch* Erica Heller 2020-05-12 In this heartwarming essay collection, dozens of authors, actors, artists and others imagine one last lunch with someone they cherished. A few years ago, Erica Heller realized how universal the longing is for one more moment with a lost loved one. It could be a parent, a sibling, a mentor, or a friend, but who wouldn't love the opportunity to sit down, break bread, and just talk? Who wouldn't jump at the chance to ask those unasked questions, or share those unvoiced feelings? In *One Last Lunch*, Heller has asked friends and family of authors, artists, musicians, comedians, actors, and others, to recount one such fantastic repast. Muffie Meyer and her documentary subject Little Edie Beale go to a deli in Montreal. Kirk Douglas asks his father what he thought of him becoming an actor. Sara Moulton dines with her friend Julia Child. The Anglican priest George Pitcher has lunch with Jesus. And Heller herself connects with her father, the renowned author Joseph Heller. These richly imagined stories are endlessly revealing, about the subject, the writer, the passage of time, regret, gratitude, and the power of enduring love.

**Elementary Differential Equations and Boundary Value Problems** William E. Boyce 2017-08-21 *Elementary Differential Equations and Boundary Value Problems 11e*, like its predecessors, is written from the viewpoint of the applied mathematician, whose interest in differential equations may sometimes be quite theoretical, sometimes intensely practical, and often somewhere in between. The authors have sought to combine a sound and accurate (but not abstract) exposition of the elementary theory of differential equations with considerable material on methods of solution, analysis, and

approximation that have proved useful in a wide variety of applications. While the general structure of the book remains unchanged, some notable changes have been made to improve the clarity and readability of basic material about differential equations and their applications. In addition to expanded explanations, the 11th edition includes new problems, updated figures and examples to help motivate students. The program is primarily intended for undergraduate students of mathematics, science, or engineering, who typically take a course on differential equations during their first or second year of study. The main prerequisite for engaging with the program is a working knowledge of calculus, gained from a normal two- or three- semester course sequence or its equivalent. Some familiarity with matrices will also be helpful in the chapters on systems of differential equations.

Rethinking India's Oral and Classical Epics Alf Hiltebeitel 2009-02-15 Throughout India and Southeast Asia, ancient classical epics—the Mahabharata and the Ramayana—continue to exert considerable cultural influence. Rethinking India's Oral and Classical Epics offers an unprecedented exploration into South Asia's regional epic traditions. Using his own fieldwork as a starting point, Alf Hiltebeitel analyzes how the oral tradition of the south Indian cult of the goddess Draupadi and five regional martial oral epics compare with one another and tie in with the Sanskrit epics. Drawing on literary theory and cultural studies, he reveals the shared subtexts of the Draupadi cult Mahabharata and the five oral epics, and shows how the traditional plots are twisted and classical characters reshaped to reflect local history and religion. In doing so, Hiltebeitel sheds new light on the intertwining oral traditions of medieval Rajput military culture, Dalits ("former Untouchables"), and Muslims. Breathtaking in scope, this work is indispensable for those seeking a deeper understanding of South Asia's Hindu and Muslim traditions. This work is the third volume in Hiltebeitel's study of the Draupadi cult. Other volumes include Mythologies: From Gingee to Kuruksetra (Volume One), On Hindu Ritual and the Goddess (Volume Two), and Rethinking the Mahabharata (Volume Four).

[How to Destroy Surveillance Capitalism](#) Cory Doctorow 2020-12-29 OneZero, Medium's official technology publication, is thrilled to announce a print-on-demand edition of *How to Destroy Surveillance Capitalism* by Cory Doctorow, with an exclusive new chapter. *How to Destroy Surveillance Capitalism* was first published online in August, where it was an instant hit with readers, scholars, and critics alike. For years now, we've been hearing about the ills of surveillance capitalism - the business of extracting, collecting, and selling vast reams of user data that has exploded with the rise of tech giants like Google, Facebook, and Amazon. But what if everything we've been hearing is wrong? What if surveillance capitalism is not some rogue capitalism or a wrong turn taken by some misguided corporations? What if the system is working exactly as intended - and the only hope of restoring an open web is to take the fight directly to the system itself? In Doctorow's timely and crucial new nonfiction

work, the internationally bestselling author of *Walkaway*, *Down and Out in the Magic Kingdom*, and *Little Brother*, argues that if we're to have any hope of destroying surveillance capitalism, we're going to have to destroy the monopolies that currently comprise the commercial web as we know it. Only by breaking apart the tech giants that totally control our online experiences can we hope to return to a more open and free web - one where predatory data-harvesting is not a founding principle. Doctorow shows how, despite popular misconception, Facebook and Google do not possess any "mind-control rays" capable of brainwashing users into, say, voting for a presidential candidate or joining an extremist group - they have simply used their monopoly power to profit mightily off of people interested in doing those things and made it easy for them to find each other. Doctorow takes us on a whirlwind tour of the last 30 years of digital rights battles and the history of American monopoly - and where the two intersect. Through a deeply compelling and highly readable narrative, he makes the case for breaking up Google, Facebook, Amazon, and Apple as a means of ending surveillance capitalism.

*Unfamiliar Relations* Indrani Chatterjee 2004 *Unfamiliar Relations* restores the family and its many forms and meanings to a central place in the history of South Asia between the seventeenth and nineteenth centuries. In her incisive introduction, Indrani Chatterjee argues that the recent wealth of scholarship on ethnicity, sexuality, gender, imperialism, and patriarchy in South Asia during the colonial period often overlooks careful historical analysis of the highly contested concept of family. Together, the essays in this book demolish "family" as an abstract concept in South Asian colonial

history, demonstrating its exceedingly different meanings across temporal and geographical space. The scholarship in this volume reveals a far more complex set of dynamics than a simple binary between indigenous and colonial forms and structures. It approaches this study from the pre-colonial period on, rather than backwards as has been the case with previous scholarship. Topics include a British colonial officer who married a Mughal noblewoman and converted to Islam around the turn of the nineteenth century, the role gossip and taboo play in the formation of Indian family history, and an analysis of social relations in the penal colony on the Andaman Islands.
