Headstart Science - 5 Gayatri Moorthy, Kanchan Deshpande, Vidhu Narayanan, Charu Maini, Meenambika Menon, Vandana Saxena Headstart Science series consists of eight well-written textbooks for classes 1-8. The series, as the name suggests, aims to provide a head start to the learners for developing a scientific outlook. The books have been formulated as per the Continuous and Comprehensive Evaluation (CCE) pattern of Central Board of Secondary Education (CBSE). The authors have put in their best efforts while writing the books keeping in mind the psychological requirements of the learners as well as the pedagogical aspirations of the teachers. The ebook version does not contain CD.

A Manual of Practical Zoology: INVERTEBRATES PS Verma 2010 The book provides discussion on all aspects of Invertebrates as covered in Practical Zoology. Beginning with general techniques of preparation of cultures of Protozoa, microscopic slides and laboratory reagents, it also covers in tabular and detailed form, recent classification of various invertebrate phyla with examples of each order or suborder. Wide coverage of each phylum, and diagrams of major and minor dissections make the book equally useful for both undergraduate and postgraduate students.

Science for English Language Learners Dolores Beltran 2012-10-01 Science for English Language Learners uses the inquiry-based 5E model of instruction (Engage, Explore, Explain, Extend, and Evaluate) to offer valuable strategies for academic language development and gaining science content knowledge. With engaging stories and interactive activities examples suitable for all grade levels, teachers will learn how to assist their students to activate prior knowledge, build understanding, and question and explore crucial science themes, as well as explicitly develop their language abilities.

100 Backyard Activities That Are the Dirtiest, Coolest, Creepy-Crawliest Ever! Colleen Kessler 2017-05-02 Awesome Experiments and Nature Activities You Can Do Without Your Parents Can a worm smell different foods? How much weight can a super-strong bess beetle carry? Are crickets happier alone or with a friend? Would you touch a spider or keep one for a pet? 100 Backyard Activities That Are the Dirtiest, Coolest, Creepy-Crawliest Ever! will teach you how to find the answers to these questions and more, and have tons of fun while you do it! Forget big-city museums, boring books and science games on your computer or tablet—with this book your backyard is your new museum, and grown-ups are only your assistants. You'll become an expert on bugs, reptiles, birds and plants by getting to know them up close and personal. How cool is that? Colleen Kessler is a teacher and mom whose mission is to share unique and effective ways to ignite a passion in kids for hands-on learning, experimentation, science and creativity. This book does all of that and more—you'll have fun catching bugs, and your parents will love that you're gaining important critical-thinking skills and knowledge about science that will help you do well in school. There's a whole world out there waiting to be discovered . . . take this book with you, go exploring and have a blast spending hours outside.
