TechGnosis Erik Davis 2015-03-17 TechGnosis is a cult classic of media studies that straddles the line between academic discourse and popular culture; it appeals to both those secular and spiritual, to fans of cyberpunk and hacker literature and culture as much as new-thought adherents and spiritual seekers How does our fascination with technology intersect with the religious imagination? In TechGnosis—a cult classic now updated and reissued with a new afterword—Erik Davis argues that while the realms of the digital and the spiritual may seem worlds apart, esoteric and religious impulses have in fact always permeated (and sometimes inspired) technological communication. Davis uncovers startling connections between such seemingly disparate topics as electricity and alchemy; online roleplaying games and religious and occult practices; virtual reality and gnostic mythology; programming languages and Kabbalah. The final chapters address the apocalyptic dreams that haunt technology, providing vital historical context as well as new ways to think about a future defined by the mutant intermingling of mind and machine, nightmare and fantasy.

Zurich Transit Max Frisch 2021-04-15 The screenplay "Zurich Transit" was developed from an episode in the novel *Gantenbein*, published in 1964: 'A story for Camilla: of a man who decides several times to change his life but, of course, never succeeds ...' Yet one day he, Theo Ehrismann, returns from a trip abroad and reads in the paper his own obituary. He arrives just on time for his own funeral and observes the attending mourners, and yet he is not able to reveal himself to them, especially not to his wife: 'How does one say that he is alive?' Max Frisch counters the traditional dramaturgy based on causality with a dramaturgy of coincidence. 'Life,' Max Frisch said in 1965, 'is the sum of events that happen by chance, and it always could as well have turned out differently; there is not a single action or omission that does not allow for variables in the future.'

The History of Motion Graphics Michael Betancourt 2020-04-20 Expand your knowledge of the aesthetics, forms and meaning of motion graphics as well as the long-running connections between the American avant-garde film, video art and TV commercials. In 1960 avant-garde animator and inventor John Whitney started a company called "Motion Graphics, Inc." to make animated titles and logos. His new company crystalized a relationship between avant-garde film and commercial broadcast design/film titles. Careful discussion of historical works puts them in context, allowing their reappearance in contemporary motion graphics clear. This book includes a thorough examination of the history of title design from the earliest films through the present, including Walter Anthony, Saul Bass, Maurice Binder, Pablo Ferro, Wayne Fitzgerald, Nina Saxon, and Kyle Cooper. This book also covers early abstract film (the Futurists Bruno Corra and Arnaldo Ginna, Leopold Survage, Walther Ruttmann, Viking Eggeling, Hans Richter, Oskar Fischinger, Mary Ellen Bute, Len Lye and Norman McLaren) and puts the work of visual music pioneers Mary Hallock-Greenewalt and Thomas Wilfred in context. The History of Motion Graphics is the essential textbook and general reference for understanding how and where the field of motion graphic design came from and where it's going.

The Scandal of the Scandals Manfred Lütz 2020-05-08 Mahatma Gandhi once chided a Christian friend, "All you Christians, missionaries and all, must begin to live more like Jesus Christ." And what Christian among us would disagree with him? After the holy wars and witch-hunts, after persecutions and political machinations, there is a broad sense today that the Church, however well-meaning, is on the wrong side of history. But do we really know our history? In this collaboration with historian Arnold Angenendt, best-selling German author Manfred Lütz dares to show us what contemporary historians actually say about Christianity's track record over the ages. This detailed overview begins with the ancient pagans, passing through Israel, the early Church martyrs, Constantine's Rome, the reign of Charlemagne, the Crusades, the Inquisition, the Reformation, the Borgia popes, the Galileo affair, the conquistadores, the French Revolution, the slave trade, the Holocaust, the sex abuse crisis, and more. The Scandal of the Scandals separates myth from fact, giving us a candid portrait of Christendom with its scars and all. Prepare to be amazed at how little you really knew about Christianity.

Performing Citizenship Paula Hildebrandt 2019-02-05 This open access book discusses how citizenship is performed today, mostly through the optic of the arts, in particular the performing arts, but also from the perspective of a wide range of academic disciplines such as urbanism and media studies, cultural education and postcolonial theory. It is a compendium that includes insights from artistic and activist experimentation. Each chapter investigates a different aspect of citizenship, such as identity and belonging, rights and responsibilities, bodies and materials, agencies and spaces, and limitations and interventions. It rewrites and rethinks the many-layered concept of citizenship by emphasising the performative tensions produced by various uses, occupations, interpretations and framings.

Correspondence 1943-1955 Theodor W. Adorno 2006-12-04 In December 1945 Thomas Mann wrote a famous letter to Adorno in which he formulated the principle of montage adopted in his novel Doctor Faustus. The writer expressly invited the philosopher to consider, with me, how such a work and I mean Leverkhn's work could more or less be practically realized. Their close collaboration on questions concerning the character of the fictional composers putatively late works (Adorno produced specific sketches which are included as an appendix to the present volume) effectively laid the basis for a further exchange of letters. The ensuing correspondence between the two men documents a rare encounter of creative tension between literary tradition and aesthetic modernism which would be sustained right up until the novelists death in 1955. In the letters, Thomas Mann openly acknowledged his fascinated reading of Adorno's *Minima Moralia* and commented in detail on the *Essay on Wagner*, which he was as eager to read as the one in the *Book of Revelation* consumes a book which tastes as sweet as honey. Adorno in turn offered detailed observations upon and frequently enthusiastic commendations of Mann's later writings, such as *The Holy Sinner*, *The Betrayed One* and *The Confessions of Felix Krull*. Their correspondence also touches upon issues of great personal significance, notably the sensitive discussion of the problems of returning from exile to postwar Germany. The letters are extensively annotated and offer the reader detailed notes concerning the writings, events and personalities referred or alluded to in the correspondence.

Studying Men and Masculinities David Buchbinder 2012-10-12 The late-twentieth-century anxiety about a 'crisis in masculinity' still persists today, particularly in English-speaking cultures. *Studying Men and Masculinities* offers an engaging and comprehensive overview of masculinity. Drawing on a wide range of cultural practices and texts from different genres and media, David Buchbinder examines the notion of patriarchy and the challenges to patriarchal power, including queer theory. The book considers whether crisis may in fact be built into the very structure of the masculine, and examines emergent

masculinities post-9/11. Theoretical positions within the field are clearly explained and applied to real life case studies from literature, film, and television. Interspersed in each chapter are a series of questions and tasks aimed at encouraging the reader to engage her/himself in the study of masculinities in everyday life and popular culture. This topical and thought-provoking book will be an invaluable resource for students of masculinities studies, sexuality studies, cultural studies, and gender theory.

Social Work Practice in Africa Janestic Mwendu Twikirize 2019-01-10 The importance of integrating indigenous knowledge systems into mainstream social work and ensuring context-specific, culturally relevant practice has long been emphasised in Africa and the Global South. This book, based on empirical research, presents a selection of indigenous and innovative models and approaches of problem solving that will inspire social work practice and education. At the core of these models lies a conceptual understanding of the community as the overarching principle for effective social work and social development in African contexts. The empirical part of the book has a focus on East Africa and highlights case examples from Rwanda, Tanzania, Uganda, Burundi, and Kenya. The book is intended for use by those involved in social work and social development practice, social work educators, students, as well as policy makers. It is relevant not just for audiences in Africa but also the global social work community, especially those interested in promoting culturally relevant social work.

Die Phase der Postproduktion bei Film und Fernsehen Sophie Marie Scharner 2017-02-24 Bachelorarbeit aus dem Jahr 2013 im Fachbereich Medien / Kommunikation - Film und Fernsehen, Note: 1,00, Universität Wien (Institut für Publizistik und Kommunikationswissenschaft), Veranstaltung: SE Bakk1: Bakkalaureats-Seminar aus Medien- und kommunikationstheoretische Grundlagen, Sprache: Deutsch, Abstract: Das Thema der Postproduktion von Film und Fernsehen umfasst eine außergewöhnlich gewichtige Kategorie in der gesamten Herstellung von Televisions- Beiträgen, egal ob es sich um Spielfilme, Serien, Reportagen, Dokumentationen, Werbespots oder anderes handelt. Nach der Vorbereitungszeit und den Dreharbeiten, bestimmt insbesondere die Postproduktion die einzuschlagende Richtung. Denn vom Drehbuch bis zum fertigen Filmprodukt ist es ein langer Weg, auf dem sich das angestrebte Ziel fortlaufend verändern wird. In der letzten Periode der Filmherstellung findet dabei in gewisser Weise die Umwandlung des Rohmaterials zum Endprodukt statt. Es ist kaum zu glauben, was Schnitt, Vertonung, Spezialeffekte und vieles mehr so auslösen können. Hier geschieht eine extreme Modifikation beziehungsweise Beeinflussung des bereits abgeschlossenen Drehmaterials. Außerdem werden in dieser dritten Phase der Produktion die Zielsetzungen der Drehplanung in punkto Einfluss auf KonsumentInnen verwirklicht. Verzerrungen, Illusionen sowie Fantasiebilder können erzeugt werden. Die Möglichkeiten im Schnitt Szenen wahr werden zu lassen, obwohl sie es in dieser Art nie gab, sind fast grenzenlos. Ereignisse können somit ausgelöscht oder hinzugefügt werden, je nachdem ob sie gezeigt werden oder eben nicht. Besonders interessant ist der Aspekt, wie RezipientInnen durch die Postproduktion auf das Glatteis geführt werden können. Augen sowie Ohren unterliegen beim Fernsehen definitiv der Täuschung. Diese Arbeit soll ausschließlich auf Literaturrecherche basieren und zusätzlich mit einem unterstützenden Experteninterview untermauert werden, was die Tipps und Tricks des Fernsehhandwerks in Hinblick auf den hier gelegten Schwerpunkt beleuchten. Dementsprechend wird der empirische Teil einen genaueren Einblick in die allgemeinen Rahmenbedingungen bieten. Nach der Basiseinführung in die Stufen der Postproduktion werden dann fortlaufend zwei essentielle

Forschungsfragen behandelt und mit Hilfe der gegebenen Ressourcen beantwortet. Somit wird versucht hypothesengenerierend zu arbeiten. Nach Abschluss des Werkes ist ein differenzierter Blick auf TV-Inhalte garantiert.

Thinking Without a Banister Hannah Arendt 2021-02-23 Hannah Arendt was born in Germany in 1906 and lived in America from 1941 until her death in 1975. Thus her life spanned the tumultuous years of the twentieth century, as did her thought. She did not consider herself a philosopher, though she studied and maintained close relationships with two great philosophers—Karl Jaspers and Martin Heidegger—throughout their lives. She was a thinker, in search not of metaphysical truth but of the meaning of appearances and events. She was a questioner rather than an answerer, and she wrote what she thought, principally to encourage others to think for themselves. Fearless of the consequences of thinking, Arendt found courage woven in each and every strand of human freedom. In 1951 she published *The Origins of Totalitarianism*, in 1958 *The Human Condition*, in 1961 *Between Past and Future*, in 1963 *On Revolution* and *Eichmann in Jerusalem*, in 1968 *Men in Dark Times*, in 1970 *On Violence*, in 1972 *Crises of the Republic*, and in 1978, posthumously, *The Life of the Mind*. Starting at the turn of the twenty-first century, Schocken Books has published a series of collections of Arendt's unpublished and uncollected writings, of which *Thinking Without a Banister* is the fifth volume. The title refers to Arendt's description of her experience of thinking, an activity she indulged without any of the traditional religious, moral, political, or philosophic pillars of support. The book's contents are varied: the essays, lectures, reviews, interviews, speeches, and editorials, taken together, manifest the relentless

activity of her mind as well as her character, acquainting the reader with the person Arendt was, and who has hardly yet been appreciated or understood.

The Panentheism of Karl Christian Friedrich Krause (1781-1832) Benedikt Paul Göcke 2018-06 The book provides the first analysis of Karl Christian Friedrich Krause's system of philosophy and his panentheism in English. Karl Christian Friedrich Krause has bequeathed to us a system of philosophy which is little recognised in contemporary philosophy. This is both surprising and unfortunate, because Krause's philosophical system has much to offer: Through transcendental reflection on the nature of the human, Krause understands God as the one infinite and unconditioned reality, and the ultimate necessary condition of knowledge. God makes humanity, nature, and reason ultimately comprehensible as the essential categories of the divine Essence. God is thus the single, primary, object of science that is already logically presupposed even before His discovery. Science presupposes theology, and theology is best read as panentheism.
