Every Day I Write the Book Amitava Kumar 2020-03-13 Amitava Kumar's *Every Day I Write the Book* is for academic writers what Annie Dillard's *The Writing Life* and Stephen King's *On Writing* are for creative writers. Alongside Kumar's interviews with an array of scholars whose distinct writing offers inspiring examples for students and academics alike, the book's pages are full of practical advice about everything from how to write criticism to making use of a kitchen timer. Communication, engagement, honesty: these are the aims and sources of good writing. Storytelling, attention to organization, solid work habits: these are its tools. Kumar's own voice is present in his essays about the writing process and in his perceptive and witty observations on the academic world. A writing manual as well as a manifesto, *Every Day I Write the Book* will interest and guide aspiring writers everywhere.

Concepts of Biology Samantha Fowler 2018-01-07 *Concepts of Biology* is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of *Concepts of Biology* is that instructors can customize the book, adapting it to the approach that works best in their classroom. *Concepts of Biology* also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Pollution Is Colonialism Max Liboiron 2021-04-23 In *Pollution Is Colonialism* Max Liboiron presents a framework for understanding scientific research methods as practices that can align with or against colonialism. They point out that even when researchers are working toward benevolent goals, environmental science and activism are often premised on a colonial worldview and access to land. Focusing on plastic pollution, the book models an anticolonial scientific practice aligned with Indigenous, particularly Métis, concepts of land, ethics, and relations. Liboiron draws on their work in the Civic Laboratory for Environmental Action Research (CLEAR)—an anticolonial science laboratory in Newfoundland, Canada—to illuminate how pollution is not a symptom of capitalism but a violent

enactment of colonial land relations that claim access to Indigenous land. Liboiron's creative, lively, and passionate text refuses theories of pollution that make Indigenous land available for settler and colonial goals. In this way, their methodology demonstrates that anticolonial science is not only possible but is currently being practiced in ways that enact more ethical modes of being in the world.

In the Wake Christina Sharpe 2016-10-21 In this original and trenchant work, Christina Sharpe interrogates literary, visual, cinematic, and quotidian representations of Black life that comprise what she calls the "orthography of the wake." Activating multiple registers of "wake"—the path behind a ship, keeping watch with the dead, coming to consciousness—Sharpe illustrates how Black lives are swept up and animated by the afterlives of slavery, and she delineates what survives despite such insistent violence and negation. Initiating and describing a theory and method of reading the metaphors and materiality of "the wake," "the ship," "the hold," and "the weather," Sharpe shows how the sign of the slave ship marks and haunts contemporary Black life in the diaspora and how the specter of the hold produces conditions of containment, regulation, and punishment, but also something in excess of them. In the weather, Sharpe situates anti-Blackness and white supremacy as the total climate that produces premature Black death as normative. Formulating the wake and "wake work" as sites of artistic production, resistance, consciousness, and possibility for living in diaspora, *In the Wake* offers a way forward.

Living a Feminist Life Sara Ahmed 2017-01-13 In *Living a Feminist Life* Sara Ahmed shows how feminist theory is generated from everyday life and the ordinary experiences of being a feminist at home and at work. Building on legacies of feminist of color scholarship in particular, Ahmed offers a poetic and personal meditation on how feminists become estranged from worlds they critique—often by naming and calling attention to problems—and how feminists learn about worlds from their efforts to transform them. Ahmed also provides her most sustained commentary on the figure of the feminist killjoy introduced in

her earlier work while showing how feminists create inventive solutions—such as forming support systems—to survive the shattering experiences of facing the walls of racism and sexism. The killjoy survival kit and killjoy manifesto, with which the book concludes, supply practical tools for how to live a feminist life, thereby strengthening the ties between the inventive creation of feminist theory and living a life that sustains it.

Progressive Dystopia Savannah Shange 2019-11-15 San Francisco is the endgame of gentrification, where racialized displacement means that the Black population of the city hovers at just over 3 percent. The Robeson Justice Academy opened to serve the few remaining low-income neighborhoods of the city, with the mission of offering liberatory, social justice--themed education to youth of color. While it features a progressive curriculum including Frantz Fanon and Audre Lorde, the majority Latinx school also has the district's highest suspension rates for Black students. In *Progressive Dystopia* Savannah Shange explores the potential for reconciling the school's marginalization of Black students with its sincere pursuit of multiracial uplift and solidarity. Drawing on ethnographic fieldwork and six years of experience teaching at the school, Shange outlines how the school fails its students and the community because it operates within a space predicated on antiblackness. Seeing San Francisco as a social laboratory for how Black communities survive the end of their worlds, Shange argues for abolition over revolution or progressive reform as the needed path toward Black freedom.

Staying with the Trouble Donna J. Haraway 2016-08-19 In the midst of spiraling ecological devastation, multispecies feminist theorist Donna J. Haraway offers provocative new ways to reconfigure our relations to the earth and all its inhabitants. She eschews referring to our current epoch as the Anthropocene, preferring to conceptualize it as what she calls the Chthulucene, as it more aptly and fully describes our

epoch as one in which the human and nonhuman are inextricably linked in tentacular practices. The Chthulucene, Haraway explains, requires sym-poiesis, or making-with, rather than auto-poiesis, or self-making. Learning to stay with the trouble of living and dying together on a damaged earth will prove more conducive to the kind of thinking that would provide the means to building more livable futures. Theoretically and methodologically driven by the signifier SF—string figures, science fact, science fiction, speculative feminism, speculative fabulation, so far—Staying with the Trouble further cements Haraway's reputation as one of the most daring and original thinkers of our time.

Critique and Postcritique Elizabeth S. Anker 2017-03-10 Now that literary critique's intellectual and political pay-off is no longer quite so self-evident, critics are vigorously debating the functions and futures of critique. The contributors to *Critique and Postcritique* join this conversation, evaluating critique's structural, methodological, and political potentials and limitations. Following the interventions made by Bruno Latour, Eve Kosofsky Sedgwick, Sharon Marcus and Stephen Best, and others, the contributors assess the merits of the postcritical turn while exploring a range of alternate methods and critical

orientations. Among other topics, the contributors challenge the distinction between surface and deep reading; outline how critique-based theory has shaped the development of the novel; examine Donna Haraway's feminist epistemology and objectivity; advocate for a "hopeful" critical disposition; highlight the difference between reading as method and critique as genre; and question critique's efficacy at attending to the affective dimensions of experience. In these and other essays this volume outlines the state of contemporary literary criticism while pointing to new ways of conducting scholarship that are better suited to the intellectual and political challenges of the present. On Being Included Sara Ahmed 2012-03-28 Ahmed argues that a commitment to diversity is frequently substituted for a commitment to actual change. She traces the work that diversity does, examining how the term is used and the way it serves to make questions about racism seem impertinent. Her study is based in universities and her research is primarily in the UK and Australia, but the argument is equally valid in North America and beyond.

The Process Genre Salomé Aguilera Skvirsky 2020-03-20 From IKEA assembly guides and "hands and pans" cooking videos on social media to Mister Rogers's classic factory tours, representations of the step-by-step fabrication of objects and food are ubiquitous in popular media. In *The Process Genre* Salomé Aguilera Skvirsky introduces and theorizes the process genre—a heretofore unacknowledged and untheorized transmedial genre characterized by its representation of chronologically ordered steps in which some form of labor results in a finished product. Originating in the fifteenth century with machine drawings, and now including everything from cookbooks to instructional videos and art cinema, the process genre achieves its most powerful affective and ideological results in film. By visualizing technique and absorbing viewers into the actions of social actors and machines, industrial, educational, ethnographic, and other process films stake out diverse ideological positions on the meaning of labor and on a society's level of technological development. In systematically theorizing a genre familiar to anyone with access to a screen, Skvirsky opens up new possibilities for film theory.

Cruel Optimism Lauren Berlant 2011-10-27 A relation of cruel optimism exists when something you desire is actually an obstacle to your flourishing. Offering bold new ways of conceiving the present, Lauren Berlant describes the cruel optimism that has prevailed since the 1980s, as the social-democratic promise of the postwar period in the United States and Europe has retracted. People have remained attached to unachievable fantasies of the good life—with its promises of upward mobility, job security,

political and social equality, and durable intimacy—despite evidence that liberal-capitalist societies can no longer be counted on to provide opportunities for individuals to make their lives “add up to something.” Arguing that the historical present is perceived affectively before it is understood in any other way, Berlant traces affective and aesthetic responses to the dramas of adjustment that unfold amid talk of precarity, contingency, and crisis. She suggests that our stretched-out present is characterized by new modes of temporality, and she explains why trauma theory—with its focus on reactions to the exceptional event that shatters the ordinary—is not useful for understanding the ways that people adjust over time, once crisis itself has become ordinary. *Cruel Optimism* is a remarkable affective history of the present.

Hydraulic City Nikhil Anand 2017-02-17 In *Hydraulic City* Nikhil Anand explores the politics of Mumbai's water infrastructure to demonstrate how citizenship emerges through the continuous efforts to control, maintain, and manage the city's water. Through extensive ethnographic fieldwork in Mumbai's settlements, Anand found that Mumbai's water flows, not through a static collection of pipes and valves, but through a dynamic infrastructure built on the relations between residents, plumbers, politicians, engineers, and the 3,000 miles of pipe that bind them. In addition to distributing water, the public water network often reinforces social identities and the exclusion of marginalized groups, as only those actively recognized by city agencies receive legitimate water services. This form of recognition—what Anand calls “hydraulic citizenship”—is incremental, intermittent, and reversible. It provides residents an important access point through which they can make demands on the state for other public services such as sanitation and education. Tying the ways Mumbai's poorer residents are seen by the state to their historic, political, and material relations with water pipes, the book highlights the critical role infrastructures play in consolidating civic and social belonging in the city.

O. N. Pruitt's Possum Town Berkley Hudson 2021-12-17 Photographer O. N. Pruitt (1891–1967) was for some forty years the de facto documentarian of Lowndes County, Mississippi, and its county seat, Columbus—known to locals as “Possum Town.” His body of work recalls many FSA photographers, but Pruitt was not an outsider with an agenda; he was a community member with intimate knowledge of the town and its residents. He photographed his fellow white citizens and Black ones as well, in circumstances ranging from the mundane to the horrific: family picnics, parades, river baptisms, carnivals, fires, funerals, two of Mississippi's last public and legal executions by hanging, and a lynching. From formal portraits to candid images of events in the moment, Pruitt's documentary of a specific yet

representative southern town offers viewers today an invitation to meditate on the interrelations of photography, community, race, and historical memory. Columbus native Berkley Hudson was photographed by Pruitt, and for more than three decades he has considered and curated Pruitt's expansive archive, both as a scholar of media and visual journalism and as a community member. This stunning book presents Pruitt's photography as never before, combining more than 190 images with a biographical introduction and Hudson's short essays and reflective captions on subjects such as religion, ethnic identity, the ordinary graces of everyday life, and the exercise of brutal power.

Inside Out & Back Again Thanhha Lai 2013-03 Through a series of poems, a young girl chronicles the life-changing year of 1975, when she, her mother, and her brothers leave Vietnam and resettle in Alabama.

Light in August William Faulkner 2022-05-12 First published in 1932, 'Light in August' is a novel that contrasts stark tragedy with optimistic perseverance in the face of mortality, written by William Faulkner, a Nobel Prize-winning American author. One of the most influential writers of the 20th century, Faulkner's reputation is based on his novels, novellas, and short stories. He was also a published poet and an occasional screenwriter. The novel is set in the American South during prohibition and features an ensemble cast of Faulkner's most memorable characters: honest and brave Lena Grove, in search of the father of her unborn child; Reverend Gail Hightower, a lonely outcast haunted by visions of Confederate glory; and Joe Christmas, a desperate, enigmatic drifter consumed by his mixed ancestry. These characters tussle with alienation, racism, and heartbreak across a nonlinear narrative. Classified as a Southern gothic and modernist novel, it is considered a seminal work in 20th-century American literature.

Paper Knowledge Lisa Gitelman 2014-03-28 *Paper Knowledge* is a remarkable book about the mundane: the library card, the promissory note, the movie ticket, the PDF (Portable Document Format). It is a media history of the document. Drawing examples from the 1870s, the 1930s, the 1960s, and today, Lisa Gitelman thinks across the media that the document form has come to inhabit over the last 150 years, including letterpress printing, typing and carbon paper, mimeograph, microfilm, offset printing, photocopying, and scanning. Whether examining late nineteenth century commercial, or "job" printing, or the Xerox machine and the role of reproduction in our understanding of the document, Gitelman reveals a keen eye for vernacular uses of technology. She tells nuanced, anecdote-filled stories of the waning of old technologies and the emergence of new. Along the way, she discusses documentary matters such as the relation between twentieth-century technological innovation and the management of paper, and the interdependence of computer programming and documentation. *Paper Knowledge* is destined to set a new agenda for media studies.

Dear Science and Other Stories Katherine McKittrick 2020-12-14 In *Dear Science and Other Stories* Katherine McKittrick presents a creative and rigorous study of black and anticolonial methodologies. Drawing on black studies, studies of race, cultural geography, and black feminism as well as a mix of methods, citational practices, and theoretical frameworks, she positions black storytelling and stories as strategies of invention and collaboration. She analyzes a number of texts from intellectuals and artists ranging from Sylvia Wynter to the electronica band Drexciya to explore how narratives of imprecision and relationality interrupt knowledge systems that seek to observe, index, know, and discipline blackness. Throughout, McKittrick offers curiosity, wonder, citations, numbers, playlists, friendship, poetry, inquiry, song, grooves, and anticolonial chronologies as interdisciplinary codes that entwine with the academic form. Suggesting that black life and black livingness are, in themselves, rebellious methodologies, McKittrick imagines without totally disclosing the ways in which black intellectuals invent ways of living outside prevailing knowledge systems.

Designs for the Pluriverse Arturo Escobar 2018-03-09 In *Designs for the Pluriverse* Arturo Escobar presents a new vision of design theory and practice aimed at channeling design's world-making capacity toward ways of being and doing that are deeply attuned to justice and the Earth. Noting that most design—from consumer goods and digital technologies to built environments—currently serves capitalist ends, Escobar argues for the development of an “autonomous design” that eschews commercial and

modernizing aims in favor of more collaborative and placed-based approaches. Such design attends to questions of environment, experience, and politics while focusing on the production of human experience based on the radical interdependence of all beings.
