The Crisis of the European Union Andreas Grimmel 2017-07-20 The European integration project currently faces profound political, economic, legal, and societal challenges. These challenges seem increasingly to overburden the European Union as well as the cohesion among the Member States, and therefore pose a serious threat to the integration project. The EU faces a major task in coping with this situation and it is one that calls for new approaches and ideas This book addresses the major challenges confronting the EU, analyses the consequences for the integration project, and develops fresh perspectives on the EU's future prospects for coping with the most debated, current and upcoming issues, such as the rise of Euroscepticism or the contested idea of an 'ever-closer union'. Renowned experts in European Studies from the fields of political science, law, economics and sociology provide an interdisciplinary perspective on the different dimensions of the EU's crisis-laden situation and question whether the EU's existing problem-solving mechanisms and methods are sufficient to address the imminent tasks. This text will be of key interest to scholars and students of EU Politics, European Politics, European Governance, and more broadly European law, history and the wider social sciences.

*Introduction to Industrial Organization, second edition* Luis M. B. Cabral 2017-03-03 An issue-driven introduction to industrial organization, thoroughly updated and revised. The study of industrial organization (IO)—the analysis of the way firms compete with one another—has become a key component of economics and of such related disciplines as finance, strategy, and marketing. This book provides an issue-driven introduction to industrial organization. Although formal in its approach, it is written in a way that requires only basic mathematical training. It includes a vast array of examples, from both within and outside the United States. This second edition has been thoroughly updated and revised. In addition to updated examples, this edition presents a more systematic treatment of public policy implications. It features added advanced sections, with analytical treatment of ideas previously presented verbally; and exercises, which allow for a deeper and more formal understanding of each topic. The new edition also includes an introduction to such empirical methods as demand estimation and equilibrium identification. Supplemental material is available online.

**Globalisation and Poverty** Maurizio Bussolo 2006-03-29 The consequences of globalization for the world's poor are uncertain and fierce rhetoric is dividing its supporters and detractors. The channels of effect of essentially macroeconomic shocks on the microeconomic position of individuals and households in poor countries are many and various. This book addresses three core issues: 1) what are the main channels of effect? 2) what are the lessons to be learned from policy measures to alleviate negative poverty consequences? and 3) do the proposed analytical approaches assist in providing a monitoring capability? This volume assesses the more easily quantifiable effects resulting from price and quantity responses in the goods and labour markets. It includes studies of Colombia, Ghana, India, Nepal, Bangladesh and Vietnam. It uses key analytical approaches, most of which are based on numerical simulation methods employing models with different levels of complexity. These models capture the features of an economy, how it functions, and how it might respond to globalization shocks. The most important collective contribution of the authors is their establishment of directions and magnitudes of effect, based on empirical evidence.

Ernst Neufert, Peter Neufert Nicole Delmes 2014 The numerous designs by Ernst Neufert (1900-1986) and his son, Peter Neufert (1925-1999), which ranged from residences to industrial and office buildings, helped define twentieth-century German architecture. Especially influential, of course, were the many years that Ernst Neufert taught at the Technical University of Darmstadt as well as his Bauentwurfslehre, a theory of architectural design that continues to be a standard work to this day. The Neuferts' buildings stand for Modernism and the rebuilding of Germany after World War II. Ernst Neufert, for instance, designed the strictly functional Quelle distribution center in Nuremberg. Prestressed concrete offered technical opportunities for Peter Neufert's bold experiments in form, which clearly distinguished his buildings in the late sixties from those of his father. Using large-format photographs, this volume documents the first stage of six selected building projects by the two architects and attests to the quality and relevance of their designs.

University of Prishtina (Universität Prishtina), language: English, abstract: Public administration, as a particular form of state activity practice, respectively as a particular form of practicing state executive power, represents a very important segment, both for the state that through the administration exercises its executive activity as well as for the subjects (primarily citizens) who through the administration realize their rights in relation to the state. Each state aims to practice its state activity (executive power) in such a way that its citizens can be offered the public services in the most qualitative manner possible. As a result, a qualitative public administration, consistent towards any impact and transparent with its citizens, is a necessity that each state must realize. In this context, the development and evolution of the form of practicing the state activity, namely the development and evolution of its own public administration at the current level is a result of the citizens' needs that their rights in relation to the state (receiving public services) to be implemented in the most advanced way, on the one hand and as a result of the state's obligation to respond to these needs (public service delivery), on the other. The structural organization of the public administration in general, as well as the legal framework governing and defining this structure, are amongst the main factors influencing the advancement and reformation of public administration. In the Republic of Kosovo there is no specific law on organization of public administration, which would regulate the organization and activity of public administration, thus the structure of the organization of this administration is partially regulated by other laws that regulate the field of public administration generally. Apart from regulating the organization of state administration as a very important segment of public administration, via a special law, the rest of the organization of public administration in Kosovo cannot be stated that is not regulated however, it is partially regulated by laws and various acts, but not a special law. In this paper will be presented a reflection of the organization of public administration according to the Constitution of the Republic of Kosovo, the Law on General Administrative Procedure and other laws that regulate issues from the field of public administration, but with particular emphasis on the organization of administration state according to the Law on State Administration in the Republic of Kosovo.

The text also includes a mixture of terminologies used in accounting, which will help the reader to develop a global accounting vocabulary. Comprehensive case studies are embedded within the text.
