Handbook of Early Christian Art surveys a broad spectrum of Christian art produced from the late second to the sixth centuries. The first part of the book opens with a general survey of the subject and then presents fifteen essays that discuss specific media of visual art--catacomb paintings, sculpture, mosaics, gold glass, gems, reliquaries, ceramics, icons, ivories, textiles, silver, and illuminated manuscripts. Each is written by a noted expert in the field. The second part of the book takes up themes relevant to the study of early Christian art. These seven chapters consider the ritual practices in decorated spaces, the emergence of images of Christ's Passion and miracles, the functions of Christian secular portraits, the exemplary mosaics of Ravenna, the early modern history of Christian art and archaeology studies, and further reflection on this field called "early Christian art." Each of the volume's chapters includes photographs of many of the objects discussed, plus bibliographic notes and recommendations for further reading. The result is an invaluable introduction to and appraisal of the art that developed out of the spread of Christianity through the late antique world. Undergraduate and graduate students of late classical, early Christian, and Byzantine culture, religion, or art will find it an accessible and insightful orientation to the field. Additionally, professional academics, archivists, and curators working in these areas will also find it valuable as a resource for their own research, as well as a textbook or reference work for their students.

History of Art Horst Woldemar Janson 2004 For forty years, this widely acclaimed classic has remained unsurpassed as an introduction to art in the Western world, boasting the matchless credibility of the Janson name. This newest update features a more contemporary, more colorful design and vast array of extraordinarily produced illustrations that have become the Janson hallmark. A narrative voice makes this book a truly enjoyable read, and carefully reviewed and revised updates to this edition offer the utmost clarity in contributions based on recent scholarship. Extensive captions for the book's incredible art program offer profound insight through the eyes of twentieth-century art historians speaking about specific pieces of art featured throughout. Significantly changed in this edition is the chapter on "The Late Renaissance," in which Janson offers a new perspective on the subject, tracing in detail the religious art tied to the Catholic Reform movement, whose early history is little known to many readers of art history. Janson has also rearranged early Renaissance art according to genres instead of time sequence, and he has followed the reinterpretation of Etruscan art begun in recent years by German and English art

historians. With a truly humanist approach, this book gives written and visual meaning to the captivating story of what artists have tried to express—and why—for more than 30,000 years.

The Oxford Handbook of Early Christian Ritual Risto Uro 2019 Scholars of religion have long assumed that ritual and belief constitute the fundamental building blocks of religious traditions and that these two components of religion are interrelated and interdependent in significant ways. Generations of New Testament and Early Christian scholars have produced detailed analyses of the belief systems of nascent Christian communities, including their ideological and political dimensions, but have by and large ignored ritual as an important element of early Christian religion and as a factor contributing to the rise and the organization of the movement. In recent years, however, scholars of early Christianity have begun to use ritual as an analytical tool for describing and explaining Christian origins and the early history of the movement. Such a development has created a momentum toward producing a more comprehensive volume on the ritual world of Early Christianity employing advances made in the field of ritual studies. The Oxford Handbook of Early Christian Ritual gives a manifold account of the ritual world of early Christianity from the beginning of the movement up to the end of the fifth century. The volume introduces relevant theories and approaches; central topics of ritual life in the cultural world of early Christianity; and important Christian ritual themes and practices in emerging Christian groups and factions.

Sense and the Senses in Early Modern Art and Cultural Practice SivToveKulbrandstad Walker 2017-07-05
Employing a wide range of approaches from various disciplines, contributors to this volume explore the diverse ways in which European art and cultural practice from the fourteenth through the seventeenth centuries confronted, interpreted, represented and evoked the realm of the sensual. *Sense and the Senses in Early Modern Art and Cultural Practice* investigates how the faculties of sight, hearing, touch, taste and smell were made to perform in a range of guises in early modern cultural practice: as agents of indulgence and pleasure, as bearers of information on material reality, as mediators between the mind and the outer world, and even as intercessors between humans and the divine. The volume examines not only aspects of the arts of painting and sculpture but also extends into other spheres: philosophy, music

and poetry, gardens, food, relics and rituals. Collectively, the essays gathered here form a survey of key debates and practices attached to the theme of the senses in Renaissance and Baroque art and cultural practice.
