Fire in Montana Greg Martin 2006-05 In the summer of 1949 fifteen smokejumpers parachuted into a remote Montana canyon called Mann Gulch. It started as a very small fire in rugged country but within two hours after landing, thirteen of these young men were caught in a raging inferno and were killed. They died bravely, together with their friends, and in the service of their country. Everyone was young and attractive, healthy and strong, enthusiastic and in love. They were bursting into the prime of their lives. There were no malcontents here. Everyone did their best but events overtook them. Until now the actual time line has never been connected to the people involved. Fire in Montana connects the lives of young smokejumpers who lived with a joy of life and expectations of shining futures, the forest rangers and volunteers who fought valiantly to rescue them, and their families, lovers, and friends who were forced to wait and pray, then face the devastating and heart wrenching loss.

Overwhelming Terror Robert Knox Dentan 2008 This powerful ethnography of a people believed to be the least violent in the world explores how they maintain peaceful relations even under the most dire circumstances. Robert Knox Dentan, the world's foremost scholar of Semai, brings its members vividly to life. His book includes translations of their poetry, dramatized accounts of particular events, and extensive quotations from a wide range of individuals. In a clear, gripping, sometimes novelistic style, Dentan introduces the reader to tortured Nakhoda; beautiful, stubborn Kliy; witty, ironic Grcaangsmother; doomed Rmpent; brutal, alienated Juni; and other memorable Semai. The book opens with the horrific circumstances that the author argues gave rise to Semai peaceability, continues by illuminating their adaptation to those circumstances, and closes by sketching the eventual decline of that adaptation under the pressures of globalization. Unlike many behavioral scientists, Dentan argues that the Semai approach to conflict is a successful Darwinian adaptation. A recurring theme is the importance of psychological "surrender" to maintaining this adaptation. Throughout, the author highlights the mechanisms and costs of peace, underscoring their relevance to everyday life in all societies. Students and scholars of peace studies, conflict resolution, ethnography, and Southeast Asia will find this unique work an invaluable and compelling study. Street Farm Michael Ableman 2016-08-17 Street Farm is the inspirational account of residents in the notorious Low Track in Vancouver, British Columbia—one of the worst urban slums in North America—who joined together to create an urban farm as a means of addressing the chronic problems in their neighborhood. It is a story of recovery, of land and food, of people, and of the power of farming and nourishing others as a way to heal our world and ourselves. During the past

seven years, Sole Food Street Farms—now North America’s largest urban farm project—has transformed acres of vacant and contaminated urban land into street farms that grow artisan-quality fruits and vegetables. By providing jobs, agricultural training, and inclusion in a community of farmers and food lovers, the Sole Food project has empowered dozens of individuals with limited resources who are managing addiction and chronic mental health problems. Sole Food’s mission is to encourage small farms in every urban neighborhood so that good food can be accessible to all, and to do so in a manner that allows everyone to participate in the process. In *Street Farm*, author-photographer-farmer Michael Ableman chronicles the challenges, growth, and success of this groundbreaking project and presents compelling portraits of the neighborhood residents-turned-farmers whose lives have been touched by it. Throughout, he also weaves his philosophy and insights about food and farming, as well as the fundamentals that are the underpinnings of success for both rural farms and urban farms. *Street Farm* will inspire individuals and communities everywhere by providing a clear vision for combining innovative farming methods with concrete social goals, all of which aim to create healthier and more resilient communities.

Girls in Contemporary Vampire Fiction Agnieszka Stasiewicz-Bieńkowska

2021-05-08 This book explores the narratives of girlhood in contemporary YA vampire fiction, bringing into the spotlight the genre’s radical, ambivalent, and contradictory visions of young femininity. Agnieszka Stasiewicz-Bieńkowska considers less-explored popular vampire series for girls, particularly those by P.C. and Kristin Cast and Richelle Mead, tracing the ways in which they engage in larger cultural conversations on girlhood in the Western world. Mapping the interactions between girl and vampire corporealities, delving into the unconventional tales of vampire romance and girl sexual expressions, examining the narratives of women and violence, and venturing into the uncanny vampire classroom to unmask its critique of present-day schooling, the volume offers a new perspective on the vampire genre and an engaging insight into the complexities of growing up a girl.

Ethnography by Design Luke Cantarella 2019 *Ethnography by Design*, unlike many investigations into how ethnography can be done, focuses on the benefits of sustained collaboration across projects to ethnographic enquiry, and the possibilities of experimental co-design as part of field research. The book translates specifically scenic design practices, which include processes like speculation, materialization, and iteration, and applies them to ethnographic inquiry, emphasizing both the value of design studio processes and "designed" field encounters. The authors make it clear that design studio practices allow ethnographers to ask and develop very different questions within their own and others' research and thus, design also offers a framework for shaping the conditions of encounter in ways that make anthropological suppositions tangible and visually apparent. Written by two anthropologists and a designer, and based on their experience of their collective endeavours during three projects, Luke Cantarella, Christine Hegel, and George E. Marcus examine their works as a way to continue a broader inquiry into what the practice of ethnography can be in the twenty-first century, and how any project distinctively moves beyond standard perspectives through its crafted modes of participation and engagement.
