The Incomplete Book of Running Peter Sagal 2019-09-10 Peter Sagal, the host of NPR's Wait Wait...Don't Tell Me! and a popular columnist for Runner's World, shares "commentary and reflection about running with a deeply felt personal story, this book is winning, smart, honest, and affecting. Whether you are a runner or not, it will move you" (Susan Orlean). On the verge of turning forty, Peter Sagal—brainiac Harvard grad, short bald Jew with a disposition towards heft, and a sedentary star of public radio—started running seriously. And much to his own surprise, he kept going, faster and further, running fourteen marathons and logging tens of thousands of miles on roads, sidewalks, paths, and trails all over the United States and the world, including the 2013 Boston Marathon, where he crossed the finish line moments before the bombings. In The Incomplete Book of Running, Sagal reflects on the trails, tracks, and routes he's traveled, from the humorous absurdity of running charity races in his underwear—in St. Louis, in February—or attempting to "quiet his colon" on runs around his neighborhood—to the experience of running as a guide to visually impaired runners, and the triumphant post-bombing running of the Boston Marathon in 2014. With humor and humanity, Sagal also writes about the emotional experience of running, body image, the similarities between endurance sports and sadomasochism, the legacy of running as passed down from parent to child, and the odd but extraordinary bonds created between strangers and friends. The result is "a brilliant book about running...What Peter runs toward is strength, understanding, endurance, acceptance, faith, hope, and charity" (P.J. O'Rourke).

Slow Jogging Hiroaki Tanaka 2016-05-10 Running is America's most popular participatory sport, yet more than half of those who identify as runners get injured every year. Falling prey to injuries from overtraining, faulty form, poor eating, and improper footwear, many runners eventually, and reluctantly, abandon the sport for a less strenuous pastime. But for the first time in the United States, Hiroaki Tanaka's *Slow Jogging* demonstrates that there is an efficient, healthier, and pain-free approach to running for all ages and lifestyles. Tanaka's method of easy running, or "slow jogging," is an injury-free approach to running that helps participants burn calories, lose weight, and even reverse the effects of Type-2 diabetes. With easy-to-follow steps and colorful charts, *Slow Jogging* teaches runners to enjoy injury-free activity by:

- Maintaining a smiling, or niko niko in Japanese, pace that is both easy and enjoyable
- Landing on mid-foot, instead of on the heel
- Choosing shoes with thin, flexible soles and no oversized heel
- Aiming for a pace of 180 steps per minute
- And trying to find time for activity every day

Accessible to runners of all fitness levels and ages, *Slow Jogging* will inspire thousands more Americans to take up running and will change the way that avid runners hit the pavement.

The Art of Intentional Living Delia Delia 2016-01-08 *The Art of Intentional Living* explains how our life is the creation of our mind. We have knowingly or unknowingly created all the outcomes and circumstances of our life, and frequently many of them are not what we would have chosen because we ourselves have created the blockages that keep us disconnected from abundance, peace, love, joy, and fulfillment in so many areas of our life. The goal of this book is to promote the healing and integration of your body, mind, emotions, and spirit, which is an essential element of intentional living. You will learn how to attain a balanced mind and calm emotions, how to transition to a healthy, balanced lifestyle in harmony with the rhythms of nature, and how to nurture your spiritual connection in order to receive greater wisdom and inner strength. Furthermore, the healing of our world begins with peace, harmony, and wisdom in our own heart. Therefore, when we have made our transition to intentional living and have allowed our present reality to be transformed, we will at the same time be contributing to the healing and transformation of the earth and all her inhabitants.

Meal planning is the basic demonstration of taking some time to plan any number of your meals for the week. Whether you're planning for yourself or plan for your family. It is important for you to plan what you eat for breakfast, lunch, and dinner. Plan to eat healthily, and plan a night out. It doesn't generally make a difference what you plan, as long as you thought about it. The objective isn't to begin from zero for each and every single meal. We Are What We Eat Alice Waters 2022-06-07 From chef and food activist Alice Waters, an impassioned plea for a radical reconsideration of the way each and every one of us cooks and eats In *We Are What We Eat*, Alice Waters urges us to take up the mantle of slow food culture, the philosophy at the core of her life's work. When Waters first opened *Chez Panisse* in 1971, she did so with the intention of feeding people good food during a time of political turmoil.

Customers responded to the locally sourced organic ingredients, to the dishes made by hand, and to the welcoming hospitality that infused the small space—human qualities that were disappearing from a country increasingly seduced by takeout, frozen dinners, and prepackaged ingredients. Waters came to see that the phenomenon of fast food culture, which prioritized cheapness, availability, and speed, was not only ruining our health, but also dehumanizing the ways we live and relate to one another. Over years of working with regional farmers, Waters and her partners learned how geography and seasonal fluctuations affect the ingredients on the menu, as well as about the dangers of pesticides, the plight of fieldworkers, and the social, economic, and environmental threats posed by industrial farming and food distribution. So many of the serious problems we face in the world today—from illness, to social unrest, to economic disparity, and environmental degradation—are all, at their core, connected to food. Fortunately, there is an antidote. Waters argues that by eating in a “slow food way,” each of us—like the community around her restaurant—can be empowered to prioritize and nurture a different kind of culture, one that champions values such as biodiversity, seasonality, stewardship, and pleasure in work. This is a declaration of action against fast food values, and a working theory about what we can do to change the course. As Waters makes clear, every decision we make about what we put in our mouths affects not only our bodies but also the world at large—our families, our communities, and our environment. We have the power to choose what we eat, and we have the potential for individual and global transformation—simply by shifting our relationship to food. All it takes is a taste.
