Subsystem and Transaction Monitoring and Tuning with DB2 11 for z/OS Paolo Bruni 2015-07-29 This IBM® Redbooks® publication discusses in detail the facilities of DB2® for z/OS®, which allow complete monitoring of a DB2 environment. It focuses on the use of the DB2 instrumentation facility component (IFC) to provide monitoring of DB2 data and events and includes suggestions for related tuning. We discuss the collection of statistics for the verification of performance of the various components of the DB2 system and accounting for tracking the behavior of the applications. We have intentionally omitted considerations for query optimization; they are worth a separate document. Use this book to activate the right traces to help you monitor the performance of your DB2 system and to tune the various aspects of subsystem and application performance.

Arts & Humanities Citation Index 1997 A multidisciplinary index covering the journal literature of the arts and humanities. It fully covers 1,144 of the world's leading arts and humanities journals, and it indexes individually selected, relevant items from over 6,800 major science and social science

journals.

Summa philosophie naturalis ... Pauli veneti Paulus (de Venetiis) 1514

Nature and Society Philippe Descola 2003-12-16 The contributors to this book focus on the relationship between nature and society from a variety of theoretical and ethnographic perspectives. Their work draws upon recent developments in social theory, biology, ethnobiology, epistemology, sociology of science, and a wide array of ethnographic case studies -- from Amazonia, the Solomon Islands, Malaysia, the Mollucan Islands, rural communities from Japan and north-west Europe, urban Greece, and laboratories of molecular biology and high-energy physics. The discussion is divided into three parts, emphasising the problems posed by the nature-culture dualism, some misguided attempts to respond to these problems, and potential avenues out of the current dilemmas of ecological discourse.

Humiliation, Degradation, Dehumanization Paulus Kaufmann 2010-10-07 Degradation, dehumanization, instrumentalization, humiliation, and nonrecognition – these concepts point to ways in which we understand human beings to be violated in their dignity. Violations of human dignity are brought about by concrete practices and conditions; some commonly acknowledged, such as torture and rape, and others more contested, such as poverty and exclusion. This volume collates reflections on such concepts and a range of practices, deepening our understanding of human dignity and its violation, bringing to the surface interrelationships and commonalities, and pointing to the values that are thereby shown to be in danger. In presenting a streamlined discussion from a negative perspective, complemented by conclusions for a positive account of human dignity, the book is at once a contribution to the body of literature on what dignity is and how it should be protected as well as constituting an alternative, fresh and focused perspective relevant to this significant recurring debate. As the concept of human dignity itself crosses disciplinary boundaries, this is mirrored in the unique range of perspectives brought by the book's European and American contributors – in philosophy and ethics, law, human rights, literature, cultural studies and interdisciplinary research. This volume will be of interest to social and moral philosophers, legal and human rights theorists, practitioners and students.

Royal Dictionary English and French and French and English Compiled from the Dictionaries of Johnson, Todd ... by Professors Fleming and Tibbins Charles Fleming 1857

Traduction spécialisée Elisabeth Lavault-Olléon 2007 Contrairement à ce que les progrès de la traduction automatique et de la traduction assistée par ordinateur pourraient laisser croire, on n'a jamais eu autant besoin de traducteurs spécialisés qu'aujourd'hui. Du fait de l'évolution technologique et de la mondialisation qui multiplie et diversifie les besoins, les traducteurs spécialisés deviennent des spécialistes en communication multilingue multimédia. A leurs compétences langagières et culturelles

s'ajoutent des compétences méthodologiques, rédactionnelles, techniques, pragmatiques et relationnelles, intégrées dans le processus de gestion de l'information multilingue. Cet ouvrage fait le point avec des traducteurs et universitaires engagés dans la mise en place de formations professionnelles adaptées. Sans prétendre à l'exhaustivité, les quatorze contributions réunies ici reflètent la diversité et la richesse des approches théoriques les plus pertinentes et des pratiques et domaines les plus demandés, en tenant compte de l'évolution des enjeux économiques et technologiques qui conditionnent le métier de traducteur spécialisé aujourd'hui.

Design, Ecology, Politics Joanna Boehnert 2018-02-08 Design, Ecology, Politics links social and ecological theory to design theory and practice, critiquing the ways in which the design industry perpetuates unsustainable development. Boehnert argues that when design does engage with issues of sustainability, this engagement remains shallow, due to the narrow basis of analysis in design education and theory. The situation is made more severe by design cultures which claim to be apolitical. Where design education fails to recognise the historical roots of unsustainable practice, it reproduces old errors. New ecologically informed design methods and tools hold promise only when incorporated into a larger project of political change. Design, Ecology, Politics describes how ecological literacy challenges many central assumptions in design theory and practice. By bringing design, ecology and socio-political theory together, Boehnert describes how power is constructed, reproduced and obfuscated by design in ways which often cause environmental harms. She uses case studies to illustrate how communication design functions to either conceal or reveal the ecological and social impacts of current modes of production. The transformative potential of design is dependent on deep-reaching analysis of the problems design attempts to address. Ecologically literate and critically engaged design is a practice primed to facilitate the creation of viable, sustainable and just futures. With this approach, designers can make sustainability not only possible, but attractive.

Ecopsychology Revisited Jorge Conesa-Sevilla 2019-06-04 Ecopsychology Revisited

Downloaded from avenza-dev.avenza.com
on December 3, 2022 by guest

is a critique of and deconstructive approach to several trends termed "ecopsychology." This work attempts to bring light to some of the misconceptions that have hardened as "ecopsychology," as these ideas have been reinterpreted and sometimes oversimplified by the general public and some professionals outside mainstream psychology. Part of the confusion arose when "ecopsychology" became inadequately amalgamated with other ideas. Nevertheless, within the social and behavioral sciences, at least, there is great value in devising and applying evidence-based strategies that track the normative ramifications dealing with cognition, emotion and behavior, exploring how or why humans relate to natural processes in a wide range of ways.

Umberto Eco in His Own Words Torkild Thellefsen 2017-08-21 Hitherto, there has been no book that attempted to sum up the breadth of Umberto Eco's work and its importance for the study of semiotics, communication and cognition. There have been anthologies and overviews of Eco's work within Eco Studies; sometimes, works in semiotics have used aspects of Eco's work. Yet, thus far, there has been no overview of the work of Eco in the breadth of semiotics. This volume is a contribution to both semiotics and Eco studies. The 40 scholars who participate in the volume come from a variety of disciplines but have all chosen to work with a favorite quotation from Eco that they find particularly illustrative of the issues that his work raises. Some of the scholars have worked exegetically placing the quotation within a tradition, others have determined the (epistemic) value of the quotation and offered a critique, while still others have seen the quotation as a starting point for conceptual developments within a field of application. However, each article within this volume points toward the relevance of Eco -- for contemporary studies concerning semiotics, communication and cognition.

De cōsolacione philosophie Anicius Manlius Severinus Boethius 1481

Dictionnaire général des lettres, des beaux-arts et des sciences morales et politiques par m. Th. Bachelet et avec la collaboration et la co-direction de m. Ch. Dezobry 1862

The Oxford Handbook of Latin Palaeography Frank Coulson 2020-10-02 Latin books are among the most numerous surviving artifacts of the Late Antique, Mediaeval, and Renaissance periods in European history; written in a variety of formats and scripts, they preserve the literary, philosophical, scientific, and religious heritage of the West. The Oxford Handbook of Latin Palaeography surveys these books, with special emphasis on the variety of scripts in which they were written. Palaeography, in the strictest sense, examines how the changing styles of script and the fluctuating shapes of individual letters allow the date and the place of production of books to be determined. More broadly conceived, palaeography examines the totality of early book production, ownership, dissemination, and use. The Oxford Handbook of Latin Palaeography includes essays on major types of script (Uncial, Insular, Beneventan, Visigothic, Gothic, etc.), describing what defines these distinct script types, and outlining when and where they were used. It expands on previous handbooks of the subject by incorporating select essays on less well-studied periods and regions, in particular late mediaeval Eastern Europe. The Oxford Handbook of Latin Palaeography is also distinguished from prior handbooks by its extensive focus on codicology and on the cultural settings and contexts of mediaeval books. Essays treat of various important features, formats, styles, and genres of mediaeval books, and of representative mediaeval libraries as intellectual centers. Additional studies explore questions of orality and the written word, the book trade, glossing and glossaries, and manuscript cataloguing. The extensive plates and figures in the volume will provide readers with clear illustrations of the major points, and the succinct bibliographies in each essay will direct them to more detailed works in the field.

Summa philosophie naturalis prestantissimi viri Magistri Pauli Ueneti Paulus (de Venetiis) 1525

Hypatia Silvia Ronchey 2021-06-21 This study reconstructs Hypatia's existential and intellectual life and her modern Nachleben through a reception-oriented and interdisciplinary approach. Unlike previous publications on the subject, Hypatia explores all available ancient and medieval sources as well as the history of the reception of the figure of Hypatia in later history, literature, and arts in order to illuminate the ideological transformations/deformations of her story throughout the centuries and recover "the true story". The intentionally provocative title relates to the contemporary historiographical notion of "false" or "fake history", as does the overall conceptual and methodological treatment. Through this reception-oriented approach, this study suggests a new reading of the ancient sources that demonstrates the intrinsically political nature of the murder of Hypatia, caused by the phthonos (violent envy) of the Christian bishop Cyril of Alexandria. This is the first comprehensive treatment of the figure of Hypatia addressed to both academic readers – in Classics, Religious Studies, and Reception Studies – and a learned, non-specialist readership.

Contributions to Law, Philosophy and Ecology Ruth Thomas-Pellicer 2016-05-26 Contributions to Law, Philosophy and Ecology: Exploring Re-Embodiments is a

Downloaded from avenza-dev.avenza.com

preliminary contribution to the establishment of re-embodiments as a theoretical strand within legal and ecological theory, and philosophy. Re-embodiments are all those contemporary practices and processes that exceed the epistemic horizon of modernity. As such, they offer a plurality of alternative modes of theory and practice that seek to counteract the ecocidal tendencies of the Anthropocene. The collection comprises eleven contributions approaching re-embodiments from a multiplicity of fields, including legal theory, eco-philosophy, eco-feminism and anthropology. The contributions are organized into three parts: 'Beyond Modernity', 'The Sacred Dimension' and 'The Legal Dimension'. The collection is opened by a comprehensive introduction that situates re-embodiments in theoretical context. Whilst closely bound with embodiment and new materialist theory, this book contributes a unique voice that echoes diverse political processes contemporaneous to our times. Written in an elegant and accessible language, the book will appeal to undergraduates, postgraduates and established scholars alike seeking to understand and take re-embodiments further, both politically and theoretically.
