Way Down in Upper Egypt Jonna Castle 2013-06 "Way Down in Upper Egypt" is a collection of colorful and intimate stories about the people, culture and customs in this region of Egypt, where life continues much as it has for the past hundred or so years. Why is this unique area called Upper Egypt when it's down in the southernmost part of the country? Why is marriage to a first cousin the most desirable and sought after, why don't automobile drivers turn on the lights after dark and what it means when a man puts his "tails in his teeth." Why must a man enter the house backwards where there'a a newborn baby? Meet colorful friends like Om Mustafa, whose arranged marriage took place at age eleven. What saved the author when a five foot crocodile came at her full speed with mouth wide open and how she escaped after making the carriage driver angry enough to want to kill her.

The Holobiont Imperative Thomas C. G. Bosch 2016-03-08 This book examines how the growing knowledge of the huge range of animal-bacterial interactions, whether in shared ecosystems or intimate symbioses, is fundamentally altering our understanding of animal biology. Individuals from simple

invertebrates to human are not solitary, homogenous entities but consist of complex communities of many species that likely evolved during a billion years of coexistence. Defining the individual microbe-host conversations in these consortia, is a challenging but necessary step on the path to understanding the function of the associations as a whole. The hologenome theory of evolution considers the holobiont with its hologenome as a unit of selection in evolution. This new view may have profound impact on understanding a strictly microbe/symbiont-dependent life style and its evolutionary consequences. It may also affect the way how we approach complex environmental diseases from corals (coral bleaching) to human (inflammatory bowel disease etc). The book is written for scientists as well as medically interested persons in the field of immunobiology, microbiology, evolutionary biology, evolutionary medicine and corals.

Digital Transformation Stanisław Wrycza 2021-09-14 This book constitutes the refereed proceedings of the 13th PLAIS EuroSymposium 2021 which was held in Sopot, Poland, on September 23, 2021. The objective of the PLAIS EuroSymposium 2021 is to promote and develop high quality research on all issues related to digital transformation. It provides a forum for IS researchers and practitioners in Europe and beyond to interact, collaborate, and develop this field. The 10 papers presented in this volume were carefully reviewed and selected from 34 submissions. They were organized in topical sections named: digital enterprises; smart cities; digital education; and innovative methods in data and process analysis.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

When Generations Collide Lynne C. Lancaster 2003-03-04 If your workplace feels like a battle zone and

colleagues sometimes act like adversaries, you are not alone. Today four generations glare at one another across the conference table, and the potential for conflict and confusion has never been greater. Traditionalist employees with their "heads down, onward and upward" attitude live out a work ethic shaped during the Great Depression. Eighty million Baby Boomers vacillate between their overwhelming need to succeed and their growing desire to slow down and enjoy life. Generation Xers try to prove themselves constantly yet dislike the image of being overly ambitious, disrespectful, and irreverent. Millennials, new to the workforce, mix savvy with social conscience and promise to further change the business landscape. This insightful book provides hands-on methods to close the generation gaps. With effective tools to recruit, retain, motivate, and manage each generation, you can now create teamwork, not war, in today's highperformance workplace . . . where at any age, productivity is what counts.

Overcoming School Refusal Joanne Garfi 2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include: • types of school refusers • why children refuse to go to school • symptoms • short term and long term consequences • accurate assessment • treatment options • what parents can do • what schools can do • dealing with anxious high achievers • how to help children on the autism spectrum with school refusal

Green Building Trends Jerry Yudelson 2012-07-16 The "green building revolution" is a worldwide movement for energy-efficient, environmentally aware architecture and design. Europe has been in the forefront of green building technology, and *Green Building Trends: Europe* provides an indispensable overview of these cutting edge ideas and applications. In order to write this book, well-known U.S. green building expert Jerry Yudelson interviewed a number of Europe's leading architects and engineers and visited many exemplary projects. With the help of copious photographs and illustrations, Yudelson describes some of the leading contemporary green buildings in Europe, including the new Lufthansa

headquarters in Frankfurt, the Norddeutsche Landesbank in Hannover, a new school at University College London, the Beaufort Court Zero-Emissions building, the Merck Serono headquarters in Geneva, and a zero-net-energy, all-glass house in Stuttgart. In clear, jargon-free prose, Yudelson provides profiles of progress in the journey towards sustainability, describes the current regulatory and business climates, and predicts what the near future may bring. He also provides a primer on new technologies, systems, and regulatory approaches in Western Europe that can be adopted in North America, including building-integrated solar technologies, radiant heating and cooling systems, dynamic façades that provide natural ventilation, innovative methods for combining climate control and water features in larger buildings, zero-netenergy homes built like Thermos bottles, and strict government timetables for achieving zero-carbon buildings. *Green Building Trends: Europe* is an essential resource for anyone interested in the latest developments in this rapidly growing field.

Women Want More Michael J. Silverstein 2009-09-08 In *Women Want More*, Michael Silverstein and Kate Sayre, two of the world's leading authorities on the retail business, argue that women are the key to fixing the economy. Based on a groundbreaking study and offering tremendous insight into the purchasing habits and power of women, *Women Want More* doesn't just offer a glimpse into consumer behavior; it reveals what consumer behavior says about human psychology and desire.

Cold War Modern David Crowley 2008 Modern life after 1945 seemed to promise both utopia and catastrophe. Both could, it seemed, be achieved at the 'push of a button'. Published to accompany a major V & A exhibition, '*Cold War Modern: Design 1945-1970*', this book explores how the politics of the Cold War shaped architecture and design. Reassessing 'classic' designs and introducing many little-known objects.

A Man and a Motorcycle Bette Dam 2014-08-28 With a secondhand motorcycle, the support of a few powerful tribesmen and a good friend in the CIA, the unknown Hamid Karzai willed himself to power as the new hope of Afghanistan. Acclaimed journalist Bette Dam chronicles the astonishing rise of Afghanistan's U.S.-backed leader from obscurity to one of the most influential figures in the global war on terror. Following the 2001 toppling of the Taliban, a fragile Afghanistan was on the brink. Karzai, armed

with a recipe for victory came within inches of helping the U.S. declare victory in the war on terror. But sentiments run high in post-9/11 America, and the desire for revenge derailed an early chance at peace. As U.S. troops leave Afghanistan, and power is handed to a new president, Karzai's legacy remains one of betrayal, mistrust, and missed opportunities.

Nature's Web: Rethinking Our Place on Earth Peter Marshall 2015-02-12 This powerful book provides the first comprehensive overview of the intellectual roots of the worldwide environmental movement - from ancient religions and philosophies to modern science and ethics - and synthesizes them into a new philosophy of nature in which to ground our moral values and social action. It traces the origins and evolution of the dominant worldview that has built our industrial, technocratic, man-centered civilization, and brought us to the current ecological crisis. At the same time, it uncovers an alternative cultural tradition in the world's different religions and philosophies and describes how these ideas are now surfacing and coalescing to form an ecological sensibility and a new vision of nature which recognizes the inter-relatedness of all living things. Finally, this book integrates these varied traditions with modern physics and the science of ecology into a larger philosophical whole that provides the environmental movement with a comprehensive vision of an organic and sustainable society in harmony with nature. As ecological disasters continue to threaten our planet, becoming worse with every passing moment of indifference, it has become clear that we must take action. We must change our relationship with nature, and return to the days when our lives were intimately connected to and dependent upon the natural world. Nature's Web lays the foundations for that change by explaining where our complex ideas about nature come from, why they are wrong, and what we can do to change them.

The Art of Structuring Katrin Bergener 2019-01-25 Structuring, or, as it is referred to in the title of this book, the art of structuring, is one of the core elements in the discipline of Information Systems. While the world is becoming increasingly complex, and a growing number of disciplines are evolving to help make it a better place, structure is what is needed in order to understand and combine the various perspectives and approaches involved. Structure is the essential component that allows us to bridge the gaps between these different worlds, and offers a medium for communication and exchange. The contributions in this book build these bridges, which are vital in order to communicate between different worlds of thought and methodology – be it between Information Systems (IS) research and practice, or between IS research and other research disciplines. They describe how structuring can be and should be done so as to foster communication and collaboration. The topics covered reflect various layers of structure that can serve as bridges: models, processes, data, organizations, and technologies. In turn, these aspects are complemented by visionary outlooks on how structure influences the field.

Think of a Number M. E. Lines 2021-12-17 How many colors are needed to color a map? Must hailstones numbers always fall to the ground? Can statistics prove anything? What is a perfect square, and who has found the ultimate one? How do numbers affect national security? What kinds of problems confront the traveling salesman? Does anyone know how best to pack balls together? What is life like in 4 (or $3 \frac{1}{2}$) dimensions? How does a clock count, and why should we care? What number secrets do sunflowers and pine cones conceal? What is a monster doing in mathematics? These and many other fascinating questions about familiar numbers like 1, 2, and 3 are explored in Malcolm Line's second adventure into the world of numbers. Written in a lively and readable style, *Think of a Number* relates the story of some of the most famous problems that have confronted the world's experts over the centuries, from the earliest interests of the ancient Greeks to the very cutting-edge of modern research involving today's most powerful computers. The book explores the relationship between numbers and nature in its broadest sense and discovers the beauty of fractals and chaos. Requiring little or no prior knowledge of mathematics, this resource will be fascinating reading for anyone with an interest in numbers and their role in the natural world.

Think! Different Andreas Boskugel 2015-03-25 *Think! Different* is a different kind of self-help book: the author, Andreas Boskugel, is well-known in Europe and appreciated for his clear and direct manner. Boskugel has taken the law of attraction to its systematic and logical conclusion! This book is completely free of otherwise typical references to moral or religious "standards" because the law of attraction – like all natural laws – isn't based on morality or religion. Consequently the author has a very different take than do others on success; for example, he doesn't idolize hard work, honesty and gratitude ad absurdum, for these are only religious and cultural based opinions and actually contradict the law of attraction. The author also forgoes otherwise typical teachings about what is right or wrong; after all, what is "right" is individually defined. Feigned pity or morality sermons are also not included in this work. This work is for those who love the integrity of the law of attraction and prefer clarity over political correctness. And it's for those who really want to get somewhere in life and who therefore question existing opinions. It's for people who are able to think on their own instead of going with the flow. For many, it was not until

reading this book that they finally understood the law of attraction, for the topics in this book are more logically organized than in other popular works, and insights are offered that can dramatically improve the lives of readers. Completely new insights about the existing laws of life can help readers become invincible masters of their own destiny. Keywords: Law of Attraction, Self-Help, Success, Wealth, Dream, Wish Fulfillment, Love, Relationship, Money

Mary's Little Donkey Gunhild Sehlin 2016-09-15 A long time ago in the Holy Land lived a scruffy little donkey who hated hard work. And then he met gentle, kind Mary, and his world changed forever. When Mary and Joseph have to travel the long journey to Bethlehem, who can they rely on to get them there safely? This is a unique version of the traditional nativity story, told from the child-friendly perspective of the little donkey, who grows in confidence and pride as Mary and Joseph place their trust in him. The story ends with the wonder of the birth of Jesus, and the little donkey's promise to keep looking after his new family. Adapted for younger children from Gunhild Sehlin's classic chapter book, this Christmas story is sumptuously illustrated by H el ene Muller, with marvelous details of the Holy Land.
