Quantitative Fish Dynamics Terrance J. Quinn 1999 The fields of fish population dynamics and stock assessment have seen major advances in the 1980s and 1990s, creating the need for a

new synthesis. This text attempts that synthesis by presenting a contemporary approach for quantitative fisheries science that incorporates modern statistical and mathematical techniques. It emphasizes the link between biology and theory by explaining the assumptions inherent in the quantitative methods and models. The book covers key topics that are often overlooked in other texts, such as optimal harvesting, migratory stocks, and complex age and size-structured models. Quantitative Fish Dynamics is an ideal textbook for graduate and undergraduate courses in fish population dynamics and stock assessment. It is an indispensable reference work for fisheries scientists and others interested in conservation biology, fish and wildlife management, population ecology, and statistical applications.

**Summer Song** Kevin Henkes 2022-05-10 "A vibrant and sophisticated ode to nature." --Kirkus (starred review) From Caldecott Medalist and Newbery Honor author Kevin Henkes and acclaimed painter Laura Dronzek, the bestselling and award-winning creators of *Winter Is Here*, *When Spring Comes*, and *In the Middle of Fall*, this book about summer celebrates the sights, sounds, and smells of the season. Bees buzz, birds sing, and children roll in the grass and feel the heat of the summer sun. With striking verbal imagery, repetition, and alliteration, Kevin Henkes introduces basic concepts of language and the summer season. Laura Dronzek's glowing paintings beautifully illustrate the wonders of summer. In *In the Middle of Fall*, *Winter Is Here*, *When Spring Comes*, and *Summer Song* make for a beautiful quartet of seasonal-theme picture books to share at home or in the classroom. Ideal for introducing the season, for story time, and for bedtime reading.

*A Weekend with Wendell* Kevin Henkes 1995-05-24 Wendell was spending the weekend at Sophie's house. Playing house, Wendell was the mother, the father, and the children; Sophie was the dog. Playing bakery, Wendell was the baker; Sophie got to be the sweet roll. Wendell shone his flashlight in Sophie's eyes when she tried to sleep. But when he gave her a new hairdo with shaving cream, it was the last straw, and Sophie made up a game that left Wendell speechless for a time -- and won the day for friendship.

**Badger is Bored** Moritz Petz 2022-04-19 When Badger gets up on the wrong side of the bed, he spreads his bad mood to all his friends, but by the end of the day, he finds a way to shed his own moodiness and needs to cheer up everyone else as well.

The Birthday Room Kevin Henkes 2013-07-02 "Two of the things Benjamin Hunter received for his twelfth birthday took him completely by surprise: A room and a letter. The room was from his parents. The letter was from his uncle." Ben was just two years old when he and his uncle, Ian, were last together, so Ben didn't remember him. And no one in Ben's family ever talked about the man. Then the letter arrived, changing Ben's life, and changing his family in

unexpected ways. And there was the birthday room...

**Little Polar Bear** Hans de Beer 1987 While hunting with his father, Little Polar Bear drifts out to sea and ends up in a jungle where a friendly hippopotamus helps him return home.

Protecting Marie Kevin Henkes 2013-07-02 "Fanny sensed that from the moment she was born she was meant to have a dog. It was as though some unique and independent organ deep inside her, like a tiny heart, couldn't thrive properly without one." With humor and compassion Kevin Henkes tells Fanny's story. But this is not just a dog story. This is a story about a girl and her father. This is a story about growing up. This is a story about wanting and getting and realizing that nothing is simple or easy.

**Sleepy Owl** Marcus Pfister 1998-01-01 Because she never wakes up before the other owls leave for the night, Little Owl feels lonely and tries to make friends with a little boy.

**Just-in-Time Systems** Roger Rios 2011-11-09 Whether different types of costs are to be reduced, benefits to be maximized or scarce resources to be managed, scheduling theory provides intelligent methods for practitioners and scientists. The just-in-time (JIT) production philosophy has enriched the classical scheduling theory with models that consider characteristics such as inventory costs, set-up times, lot sizing, or maintenance. This edited volume considers the specifics of just-in-time systems. It provides knowledge and insights on recent advances in scheduling theory where just-in-time aspects are considered. Contributions on models, theory, algorithms, and applications, that bring the theory up-to-date on the state-of-the-art of JIT systems are presented. Professionals, researchers and graduate students will find this book useful.

**Slide and Seek: 100 Words English-Spanish** Insight Editions 2020-11-03 Play slide and seek to reveal 100 new words in both English and Spanish with this larger format board book. With multiple tabs to pull and flaps to lift, new words await young learners in Slide and Seek: 100 Words English-Spanish. Alloys Fathi Habashi 2008-11-21 In industry very few metals are used in their pure form; the majority are employed as a combination of a metal with other metals, nonmetals or metalloids. In this way some specific properties are improved, making the alloy more attractive than the pure metal. The present work comprises essential information on alloys in one compact volume. Classification, properties, preparation, applications, and economic aspects are discussed for alloy steels, primary-metal alloys, light-metal alloys, and some other alloy systems. The work is based on more than 30 articles from Ullmann's Encyclopedia of Industrial Chemistry and represents the effort of over 60 specialists. It supplies hundreds of top-quality illustrations, diagrams, and charts and provides hand-picked references for further study. An introductory overview of the subject is provided by the editor. The book is a handy yet authoritative reference work for the practicing metallurgist, but also for physical metallurgists, engineers and scientists in industry.

**The Year of Billy Miller** Kevin Henkes 2013-09-17 Newbery Honor Book and New York Times Bestseller! Award-winning, nationally bestselling author Kevin Henkes introduces second-grader Billy Miller in this fast-paced and funny story about friendship, sibling rivalry, and elementary school. *The Year of Billy Miller* includes black-and-white art by Kevin Henkes and is perfect for fans of the Ramona books; *Frindle*, by Andrew Clements; and the Clementine series. The New York Times declared: "Henkes's delightful story is restrained and vivid . . . forgoing the overdramatic or zany, it shows the substance, warmth and adaptability of beautifully common family love." When Billy Miller has a mishap at the statue of the Jolly Green Giant at the end of summer vacation, he ends up with a big lump on his head. What a way to start second grade! As the year goes by, though, Billy figures out how to navigate elementary school, how to appreciate his little sister, and how to be a more grown up and responsible member of the family and a help to his busy working mom and stay-at-home dad. Newbery Honor author and Caldecott Medalist Kevin Henkes delivers a short, satisfying, laugh-out-loud-funny school and family story that features a diorama homework assignment, a school poetry slam, cancelled sleepovers, and epic sibling temper tantrums. This is a perfect short novel for the early elementary grades. Plus don't miss the follow-up, *Billy Miller Makes a Wish!*

**Battle Against Extinction** W. L. Minckley 2017-08-15 In 1962 the Green River was poisoned and its native fishes killed so that the new Flaming Gorge Reservoir could be stocked with non-native game fishes for sportsmen. This incident was representative of water management in the West, where dams and other projects have been built to serve human needs without consideration for the effects of water diversion or depletion on the ecosystem. Indeed, it took a Supreme Court decision in 1976 to save Devils Hole pupfish from habitat destruction at the hands of developers. Nearly a third of the native fish fauna of North America lives in the arid

West; this book traces their decline toward extinction as a result of human interference and the threat to their genetic diversity posed by decreases in their populations. What can be done to slow or end this tragedy? As the most comprehensive treatment ever attempted on the subject, *Battle Against Extinction* shows how conservation efforts have been or can be used to reverse these trends. In covering fishes in arid lands west of the Mississippi Valley, the contributors provide a species-by-species appraisal of their status and potential for recovery, bringing together in one volume nearly all of the scattered literature on western fishes to produce a monumental work in conservation biology. They also ponder ethical considerations related to the issue, ask why conservation efforts have not proceeded at a proper pace, and suggest how native fish protection relates to other aspects of biodiversity planetwide. Their insights will allow scientific and public agencies to evaluate future management of these animal populations and will offer additional guidance for those active in water rights and conservation biology. First published in 1991, *Battle Against Extinction* is now back in print and available as an open-access e-book thanks to the Desert Fishes Council.

*Peace* Miranda Paul 2021-03-02 Peace is on purpose. Peace is a choice. Peace lets the smallest of us have a voice. From a hello and pronouncing your friend's name correctly to giving more than you take and saying I'm sorry, this simple concept book explores definitions of peace and actions small and big that foster it. Award-winning authors, Baptiste Paul and Miranda Paul, have teamed up with illustrator Estelí Meza—winner of the 'A la Orilla del Viento' the premier Picture Book Contest Award in Mexico—to create an inspiring look at things we can all do to bring peace into our lives and world.

**Meta-Heuristics** Ibrahim H. Osman 2012-12-06 Meta-heuristics have developed dramatically since their inception in the early 1980s. They have had widespread success in attacking a variety of practical and difficult combinatorial optimization problems. These families of approaches include, but are not limited to greedy random adaptive search procedures, genetic algorithms, problem-space search, neural networks, simulated annealing, tabu search, threshold algorithms, and their hybrids. They incorporate concepts based on biological evolution, intelligent problem solving, mathematical and physical sciences, nervous systems, and statistical mechanics. Since the 1980s, a great deal of effort has been invested in the field of combinatorial optimization theory in which heuristic algorithms have become an important area of research and applications. This volume is drawn from the first conference on Meta-Heuristics and contains 41 papers on the state-of-the-art in heuristic theory and applications. The book treats the following meta-heuristics and applications: Genetic Algorithms, Simulated Annealing, Tabu Search, Networks & Graphs, Scheduling and Control, TSP, and Vehicle Routing Problems. It represents research from the fields of Operations Research, Management Science, Artificial Intelligence and Computer Science.

*Olive's Ocean* Kevin Henkes 2013-07-02 "Olive Barstow was dead. She'd been hit by a car on Monroe Street while riding her bicycle weeks ago. That was about all Martha knew." Martha Boyle and Olive Barstow could have been friends. But they weren't -- and now all that is left are eerie connections between two girls who were in the same grade at school and who both kept the same secret without knowing it. Now Martha can't stop thinking about Olive. A family summer on Cape Cod should help banish those thoughts; instead, they seep in everywhere. And this year Martha's routine at her beloved grandmother's beachside house is complicated by the Manning boys. Jimmy, Tate, Todd, Luke, and Leo. But especially Jimmy. What if, what if, what if, what if? The world can change in a minute.

I Am a Thief! Abigail Rayner 2019-09-03 When Eliza Jane Murphy—line leader, captain of the worm rescue team—impulsively pockets a sparkly green stone from her classroom’s “Exploring Green” display table, her heart crumples. My heart stopped singing. My letters went wonky. I was too heavy to swing! I wanted to put it back . . . But what if someone saw? But when she discovers that nearly everyone in her family took something once in their lives—from her baby brother and mom, to her nana with her sausage-stealing dog—Eliza overcomes her shame to make things right. A hilarious and heartfelt story about stealing and finding the courage to do the right thing.

**Fuzzy Differential Equations in Various Approaches** Luciana Takata Gomes 2015-09-07 This book may be used as reference for graduate students interested in fuzzy differential equations and researchers working in fuzzy sets and systems, dynamical systems, uncertainty analysis, and applications of uncertain dynamical systems. Beginning with a historical overview and introduction to fundamental notions of fuzzy sets, including different possibilities of fuzzy differentiation and metric spaces, this book moves on to an overview of fuzzy calculus thorough exposition and comparison of different approaches. Innovative theories of fuzzy calculus and fuzzy differential equations using fuzzy bunches of functions are introduced and explored. Launching with a brief review of essential theories, this book investigates both well-known and novel approaches in this field; such as the Hukuhara differentiability and its generalizations as well as differential inclusions and Zadeh’s extension. Through a unique analysis, results of all these theories are examined and compared.
