Fairy Tales Transformed? Cristina Bacchilega 2013-11-01 Fairy-tale adaptations are ubiquitous in modern popular culture, but readers and scholars alike may take for granted the many voices and traditions folded into today's tales. In *Fairy Tales Transformed?: Twenty-First-Century Adaptations and the Politics of Wonder*, accomplished fairy-tale scholar Cristina Bacchilega traces what she

terms a "fairy-tale web" of multivocal influences in modern adaptations, asking how tales have been changed by and for the early twenty-first century. Dealing mainly with literary and cinematic adaptations for adults and young adults, Bacchilega investigates the linked and yet divergent social projects these fairy tales imagine, their participation and competition in multiple genre and media systems, and their relation to a politics of wonder that contests a naturalized hierarchy of Euro-American literary fairy tale over folktale and other wonder genres. Bacchilega begins by assessing changes in contemporary understandings and adaptations of the Euro-American fairy tale since the 1970s, and introduces the fairy-tale web as a network of reading and writing practices with a long history shaped by forces of gender politics, capitalism, and colonialism. In the chapters that follow, Bacchilega considers a range of texts, from high profile films like Disney's *Enchanted*, Guillermo del Toro's *Pan's Labyrinth*, and Catherine Breillat's *Bluebeard* to literary adaptations like Nalo Hopkinson's *Skin Folk*, Emma Donoghue's *Kissing the Witch*, and Bill Willingham's popular comics series, *Fables*. She looks at the fairy-tale web from a number of approaches, including adaptation as "activist response" in Chapter 1, as remediation within convergence culture in Chapter 2, and a space of genre mixing in Chapter 3. Chapter 4 connects adaptation with issues of translation and stereotyping to discuss mainstream North American adaptations of *The Arabian Nights* as "media text" in post-9/11 globalized culture. Bacchilega's epilogue invites scholars to intensify their attention to multimedia fairy-tale traditions and the relationship of folk and fairy tales with other cultures' wonder genres. Scholars of fairy-tale studies will enjoy Bacchilega's significant new study of contemporary adaptations.

Training for the New Millennium Martha Tennent 2005-01-01 Originating at an international forum held at the University of Vic (Spain), the twelve essays collected here attest to important changes in translation practice and the assumptions which underpin them. Leading theorists respond to the state of Translation Studies today, particularly the epistemological dilemma between

theories that are empirically oriented and those that are inspired by developments in Cultural Studies. But the volume is also practical. Experienced instructors survey existing pedagogies at translator/interpreter training programs and explore new techniques that address the technological and global challenges of the new millennium. Among the topics considered are: how to use translation technology in the classroom, how to construct a syllabus for a course in audiovisual translating or in translation theory, and how to develop guidelines for a program for community interpreters or conference interpreters. The contributors all assume that translation, whether written or oral, does not occupy a neutral space. It is a cross-cultural exchange that produces far-reaching social effects. Their essays significantly advance the theoretical and practical understanding of translation along these lines.

Innovation—The Missing Dimension Richard K. Lester 2006-04-15 Amid mounting concern over the loss of jobs to low-wage economies, one fact is clear: America's prosperity hinges on the ability of its businesses to continually introduce new products and services. But what makes for a creative economy? How can the remarkable surge of innovation that fueled the boom of the 1990s be sustained? For an answer, Richard K. Lester and Michael J. Piore examine innovation strategies in some of the economy's most dynamic sectors. Through eye-opening case studies of new product development in fields such as cell phones, medical devices, and blue jeans, two fundamental processes emerge. One of these processes, analysis--rational problem solving--dominates management and engineering practice. The other, interpretation, is not widely understood, or even recognized--although, as the authors make clear, it is absolutely crucial to innovation. Unlike problem solving, interpretation embraces and exploits ambiguity, the wellspring of creativity in the economy. By emphasizing interpretation, and showing how these two radically different processes can be combined, Lester and Piore's book gives managers and designers the concepts and tools to keep new products flowing. But the authors also offer an unsettling critique of national policy. By ignoring the role of interpretation, economic policymakers are drawing the wrong lessons from the 1990s boom. The current emphasis on expanding the reach of market competition will help the analytical processes needed to implement innovation. But if unchecked it risks choking off the economy's vital interpretive spaces. Unless a more balanced policy approach is adopted, warn Lester and Piore, America's capacity to innovate--its greatest economic asset--will erode.

Winter Letters (Galician Wave Book 6) Agustin Fernandez Paz 2015-09-28 "The oldest and strongest emotion of mankind is fear, and the oldest and strongest kind of fear is fear of the unknown," writes H. P. Lovecraft at the start of his essay "Supernatural Horror in Literature." In real life, the author Agustin Fernandez Paz, Galicia's answer to H. P. Lovecraft, is reading the newspaper

and comes across a classified ad for a haunted house. He imagines what would happen if someone answered that ad. Then what would happen if they went to see the house and liked it. Then what would happen if they had enough money and decided to buy it. And finally what would happen if they went to live there and discovered that the house was really haunted. This is the plot of "Winter Letters," one of the best-selling Galician novels of all time. The house will bring to mind, for older readers, the Bates' home in Alfred Hitchcock's film "Psycho." Inside the house is a book of prints that may remind younger readers of Tom Riddle's diary in "Harry Potter and the Chamber of Secrets." However this may be, the reader is sure to be drawn in by the force and power of the narrative, which is as smooth and sinuous as the sirens' song heard by Ulysses from the sanctuary of the mast of his ship. Agustin Fernandez Paz is the author of another novel in English, "Black Air," about a psychiatrist's race against time to save his patient from a malignant presence, the Great Beast. He was awarded the Spanish National Prize for Literature in 2008 and is Spain's nominee for the Hans Christian Andersen Award. Other titles in the series Galician Wave include: "Dragal I: The Dragon's Inheritance" and "Dragal II: The Dragon's Metamorphosis" by Elena Gallego Abad, "Dove and Cut Throat" by Fina Casalderrey, "The Painter with the Hat of Mallows" by Marcos Calveiro and "I Love You Leo A. Destination Somewhere" by Rosa Aneiros."

Ask A North Korean Daniel Tudor 2018-03-20 "In his new book, *Ask a North Korean*, Daniel Tudor—a former Economist journalist and current Korean beer entrepreneur—wants people to understand the true lives of everyday North Koreans. Using translated essays written by defectors, the book covers topics from politics to pornography." – The Boston Globe Understanding North Korean Through the Eyes of Defectors. The weekly column *Ask A North Korean*, published by NK News, invites readers from around the world to pose questions to North Korean defectors. Adapted from the long-running column, these fascinating interviews provide authentic firsthand testimonies about life in North Korea and what is really happening inside the "Hermit Kingdom." North Korean contributors to this book include: "Seong" who went to South Korea after dropping out during his final year of university. He is now training to be an elementary school teacher. "Kang" who left North Korea in 2005. He now lives in London, England. "Cheol" who was from South Hamgyeong in North Korea and is now a second-year university student in Seoul. "Park" worked and studied in Pyongyang before defecting to the U.S. in 2011. He is now studying at a U.S. college. *Ask A North Korean* sheds critical light on all aspects of North Korean politics and society and shows that, even in the world's most authoritarian regime, life goes on in ways that are very different from what outsiders may think.

Uncertain Glory Joan Sales 2014-10-02 SPAIN, 1937. Posted to the Aragonese front, Lieutenant Lluís Rusalleda eschews the drunken antics of his comrades and goes in search of intrigue. But the lady of Castel de Olivo - a beautiful widow with a shadowy past - puts a high price on her affections. In Barcelona, Trini Milmany struggles to raise Lluís' son on her own, letters from the front her only solace. With bombs falling as fast as the city's morale, she leaves to winter with Lluís' brigade on a quiet section of the line. But even on 'dead' fronts the guns do not stay silent for long. Trini's decision will put her family's fate in the hands of Juli Soleràs, old friend and traitor of easy conscience, a philosopher-cynic locked in an eternal struggle with himself. Joan Sales, a combatant in the civil war, distilled his experiences into a timeless story of thwarted love, lost youth and crushed illusions. A thrilling epic that has drawn comparison with the work of Dostoevsky and Stendhal, Uncertain Glory is a homegrown counterpart to classics such as Homage to Catalonia and For Whom the Bell Tolls.

The Newtonian Revolution I. Bernard Cohen 1983-04-29 This volume presents Professor Cohen's original interpretation of the revolution that marked the beginnings of modern science and set Newtonian science as the model for the highest level of achievement in other branches of science. It shows that Newton developed a special kind of relation between abstract mathematical constructs and the physical systems that we observe in the world around us by means of experiment and critical observation. The heart of the radical Newtonian style is the construction on the mind of a mathematical system that has some features in common with the physical world; this system was then modified when the deductions and conclusions drawn from it are tested against the physical universe. Using this system Newton was able to make his revolutionary innovations in celestial mechanics and, ultimately, create a new physics of central forces and the law of universal gravitation. Building on his analysis of Newton's methodology, Professor Cohen explores the fine structure of revolutionary change and scientific creativity in general. This is done by developing the concept of scientific change as a series of transformations of existing ideas. It is shown that such transformation is characteristic of many aspects of the sciences and that the concept of scientific change by transformation suggests a new way of examining the very nature of scientific creativity.

Sexual Heretics Brian Reade 2017-10-06 The years between 1850 and 1900 were the vintage years of a discreet homosexual culture in England. In this period, educational, personal and foreign influences all contributed to the establishment of a trend expressed in the works of authors such as John Addington Symonds, Walter Pater, and A.E. Housman, and in those of lesser writers, now largely forgotten. This book, first published in 1970, is an anthology of English prose and verse, either homosexual in tone or providing a vehicle for homosexual emotions, and in several examples even overtly and experimentally frank. The book includes an introduction by Brian Reade explaining the network of friendships and associations which underlay this development and tracing some of its origins.

The Symbolic Order of the Mother Luisa Muraro 2017-12-21 Argues that affirming the irreducible differences between men and women can lead to more transformative politics than the struggle for abstract equality between the sexes. In *The Symbolic Order of the Mother* Luisa Muraro identifies the bond between mother and child as ontologically fundamental to the development of culture and politics, and therefore as key to achieving truly emancipatory political change. Both corporeal development and language acquisition, which are the sources of all thinking, begin in this relationship. However, Western civilization has been defined by men, and Muraro recalls the admiration and envy she felt for the great philosophers as she strove to become one herself, as well as the desire for independence that opposed her to her mother. This conflict between philosophy and culture on the one hand and the relationship with the mother on the other constitutes the root of patriarchy's symbolic disorder, which blocks women's (and men's) access to genuine freedom. Muraro appeals to the feminist practice of gratitude to the mother and the recognition of her authority as a model of unconditional nurture and support that must be restored. This, she argues, is the symbolic order of the mother that must overcome the disorder of patriarchy. The mediating power of the mother tongue constitutes a symbolic order that comes before all others, for both women and men.

Ehregard Karen Blixen, Karen 2018-01-17 Ehregard is a delightful fairy-tale set in the early nineteenth century in the grand Duchy of Babenhausen. The story revolves around the desire of the court portrait painter, Herr Cazotte, to seduce Ehregard, maid-of-honour to Princess Ludmilla. The artist's ambition is to conquer the young maiden simply by causing her to blush 'not with indignation at an assault, but with ecstasy at a revelation... In this blush her past, present and future will be thrown at my feet'. To this end he resolves to paint a portrait of her as Venus bathing: to capture her on canvas for all eternity. But the beautiful maid from the mountains is not swift to surrender her virtue, as the artist discovers to his cost. 'Ehregard' is the lightest, the most purely comic and pastoral story she ever wrote... it is unsurpassed by sheer loveliness... [it] brings all Isak Dinesen's work to a triumphant conclusion'--Robert Langbaum, author of *Isak Dinesen's Art*

Another Country Josep-Anton Fernàndez 2000 This book studies the emergence, in the late 1960s and 1970s, of a sophisticated body of gay fiction in Catalan, and examines the relation between the representation of homosexuality and the discourses on national identity that legitimate modern Catalan literature. Gay fiction, argues the author, reveals a tension between the nation and the body in Catalan literature: Catalonia is a nation different from Spain, a cultural and political minority within Europe; but the existence of sexual minorities within its boundaries reveals its inner complexity, which resists homogenization. Catalonia is another country in more ways than one. Drawing on a variety of critical discourses (gay theory, psychoanalysis, and authors such as Foucault, Deleuze and Guattari, and Bourdieu), *Another Country* explores the intertwinings of identity, cultural politics, and desire in the work of Terenci Moix, Lluís Fernandez, Biel Mesquida, and Lluís Maria Todo. The book analyses how gay writers renegotiate identity discourses in Catalan literature in order to introduce homosexuality into them, often with destabilising effects. The role of gay authors in the process of canon construction (a crucial aspect of contemporary cultural nationalism in Catalonia) is also considered, focusing on postmodernism and the divide between high and mass culture. Finally, *Another Country* addresses the interplay of homosexual desire within the frame of a distinction between perversion and transgression, and proposes an alliance between queer and nationalist discourses.

Victus Albert Sanchez Pinol 2014-09-09 A #1 international bestseller reminiscent of the works of Roberto Bolaño, Carlos Ruiz Zafon, and Edward Rutherford—a page-turning historical epic, set in early eighteenth-century Spain, about a military mastermind whose betrayal ultimately leads to the conquest of Barcelona, from the globally popular Catalan writer Albert Sánchez Piñol. Why do the weak fight against the strong? At 98, Martí Zuviría ponders this question as he begins to tell the extraordinary tale of Catalonia and its annexation in 1714. No one knows the truth of the story better, for Martí was the very villain who betrayed the city he was commended to keep. The story of Catalonia and Barcelona is also Martí's story. A prestigious military engineer in the early 1700s, he fought on both sides of the long War of the Spanish Succession between the Two Crowns—France and Spain—and aided an Allied enemy in resisting the consolidation of those two powers. Politically ambitious

yet morally weak, Martí carefully navigates a sea of Machiavellian intrigue, eventually rising to a position of power that he will use for his own mercenary ends. A sweeping tale of heroism, treason, war, love, pride, and regret that culminates in the tragic fall of a legendary city, illustrated with battle diagrams, portraits of political figures, and priceless maps of the old city of Barcelona, *Victus* is a magnificent literary achievement that is sure to be hailed as an instant classic.

Dhuoda Marie Anne Mayeski 1995 Dhuoda of Septimania was a remarkable Carolingian aristocrat who wrote a *Liber Manualis* of biblically based practical directions for her at times wayward warrior son. Her method of interpreting the Bible is of special interest. The meaning of the ancient Old Testament texts opened up for her not through allegory, as it did for Origen, but through a sense of experience shared across the centuries. The tales of the religious experiences of Israel were seen by her as family experiences, involving a sense of genuine continuity. Or, from another direction, she used the concrete experiences of her life to find a special meaning in the biblical text. Mayeski explores this approach in considerable detail through Dhuoda's interpretation of the story of the Syro-Phoenician woman in Matthew 15:21-25 and Mark 7:24-30. Interpreting it for her son, she speaks of the encouragement that can be found there in the way that God supplies the food of grace to those who persist in seeking it. She also uses the beatitudes as an outline of a treatise on her son's responsibilities as a member of the ruling class. Underlying her practical bent is the vision of human life as a journey toward the kingdom of God, with its need for alertness and its sense of motion.

The Making of Modern Colombia David Bushnell 1993-02-09 Colombia's status as the fourth largest nation in Latin America and third most populous—as well as its largest exporter of such disparate commodities as emeralds, books, processed cocaine, and cut flowers—makes this, the first history of Colombia written in English, a much-needed book. It tells the remarkable story of a country that has consistently defied modern Latin American stereotypes—a country where military dictators are virtually unknown, where the political left is congenitally weak, and where urbanization and industrialization have spawned no lasting populist movement. There is more to Colombia than the drug trafficking and violence that have recently gripped the world's attention. In the face of both cocaine wars and guerrilla conflict, the country has maintained steady economic growth as well as a relatively open and democratic government based on a two-party system. It has also produced an impressive body of art and literature. David Bushnell traces the process of state-building in Colombia from the struggle for independence, territorial consolidation, and reform in the nineteenth century to economic development and social and political democratization in the twentieth. He also sheds light on the modern history of Latin America as a whole.
