

# Eldoret Polytechnic September Intake 2014

Getting the books **eldoret polytechnic september intake 2014** now is not type of challenging means. You could not unaided going subsequently ebook growth or library or borrowing from your connections to gate them. This is an very easy means to specifically acquire lead by on-line. This online broadcast **eldoret polytechnic september intake 2014** can be one of the options to accompany you afterward having supplementary time.

It will not waste your time. acknowledge me, the e-book will totally appearance you supplementary matter to read. Just invest tiny epoch to read this on-line statement **eldoret polytechnic september intake 2014** as skillfully as evaluation them wherever you are now.

**Understanding Global Higher Education** Georgiana Mihut 2017-08-24 This volume brings together selected articles published in University World News (UWN) and International Higher Education (IHE) between 2011 and 2016. Researchers, policy makers, and practitioners alike further the development of higher education as a field of study through public and ongoing conversations. It is news, analysis, and commentary publications like UWN and IHE that facilitate this dialogue and keep pace with the most up-to-date developments in the field. Together, the articles included in this volume—alongside the section introductions—offer a rich and relevant picture of the dynamic state of higher education globally. While both publications are freely available online, this book provides a thematically coherent selection of articles, offering an accessible and analytic perspective on the pressing concerns of contemporary higher education.

*Cities and Agriculture* Henk de Zeeuw 2015-09-16 As people increasingly migrate to urban settings and more than half of the world's population now lives in cities, it is vital to plan and provide for sustainable and resilient food systems which reflect this challenge. This volume presents experience and evidence-based "state of the art" chapters on the key dimensions of urban food challenges and types of intra- and peri-urban agriculture. The book provides urban planners, local policy makers and urban development practitioners with an overview of crucial aspects of urban food systems based on an up to date review of research results and practical experiences in both developed and developing countries. By doing so, the international team of authors provides a balanced textbook for students of the growing number of courses on sustainable agriculture, food and urban studies, as well as a solid basis for well-informed policy making, planning and implementation regarding the development of sustainable, resilient and just urban food systems.

**Skills Development for Inclusive and Sustainable Growth in Developing Asia-Pacific** Rupert Maclean 2012-12-09 Focusing on the Asia-Pacific region, which in recent years has been the engine of global economic growth , this volume surveys trends and prospects in technical and vocational education and training (TVET) with particular reference to achieving inclusive growth and the greening of economies. Underlying the increasing pressure for new models of TVET provision is the rapid pace of technological change, demand for a work force which is highly responsive to evolving needs and a transforming market place that calls for higher order skills and lifelong learning. The book proposes a re-engineered, modernized TVET system that fosters an innovative approach which enhances the employability of workers as well as the sustainability of their livelihoods. The book includes contributions from leading policy makers, researchers, and practitioners, including those in the private sector in

analyzing and forecasting the most urgent priorities in skills development. The book argues for creative approaches to TVET design and delivery particularly with a view to improve job prospects , and meeting the goals of inclusion, sustainable development and social cohesion. Addressing issues such as the chronic mismatches between skills acquired and actual skills required in the work place, the volume proposes diversified approaches towards workforce development and partnerships with the private sector to improve the quality and relevance of skills development . The new imperatives created by 'greening' economies and responses required in skills development and training are addressed. Developing TVET is a high priority for governments in the Asia Pacific region as they seek to achieve long-term sustainable growth since the .continued success of their economic destinies depend on it. The volume also includes an emerging framework for skills development for inclusive and sustainable growth in the Asia and Pacific region.

System Dynamics Bilash Kanti Bala 2016-10-28 This book covers the broad spectrum of system dynamics methodologies for the modelling and simulation of complex systems: systems thinking, causal diagrams, systems structure of stock and flow diagrams, parameter estimation and tests for confidence building in system dynamics models. It includes a comprehensive review of model validation and policy design and provides a practical presentation of system dynamics modelling. It also offers numerous worked-out examples and case studies in diverse fields using STELLA and VENSIM. The system dynamics methodologies presented here can be applied to nearly all areas of research and planning, and the simulations provided make the complicated issues more easily understandable. System Dynamics: Modelling and Simulation is an essential system dynamics and systems engineering textbook for undergraduate and graduate courses. It also offers an excellent reference guide for managers in industry and policy planners who wish to use modelling and simulation to manage complex systems more effectively, as well as researchers in the fields of modelling and simulation-based systems thinking.

Sustainable Building Design for Tropical Climates Federico Butera 2014

**The Architecture of Innovative Apprenticeship** Ludger Deitmer 2012-12-14 Benefiting from the support and involvement of two major international research networks, this collection features the latest research findings in TVET. Members of INAP, the International Network on Innovative Apprenticeship, and VETNET, the Vocational Education and Training Network, have contributed key research findings to this detailed survey of the field. Featuring the inclusion of the internationally recognized memorandum released in April 2012 by the INAP Architecture Apprenticeship Commission, the volume covers a wealth of issues relating to technical and vocational education and training, including exemplar architectures such as successful school-to-work transitions, competence assessment and development models, and governance, including the role of stakeholders. The book provides many opportunities to explore in depth the scholarly debate on TVET, as well as to learn from positive international experiences. It aims to inform the practice of TVET professionals as much as the decision making of administrators.

*Chemical Speciation in the Environment* A. M. Ure 2008-04-15 Considerable recent research has focused on the topic of chemical speciation in the environment. It is increasingly realised that the distribution, mobility and biological availability of chemical elements depend not simply on their concentrations but, critically, on the forms in which they occur in natural systems. Continuing developments in analytical chemistry have made speciation practicable even where analytes are present at trace levels (as is often the case in natural samples). In the second edition of this book, the expertise of scientists involved in chemical speciation in various fields have been brought together to provide an overview of the current status of speciation science and indicate how the field may develop in the future.

**Multilingualism and Education in Africa** Ruth W. Ndung'u 2014-10-16 This book is a must-read for every language teaching professional and researcher working in a multilingual context. *Multilingualism and Education in Africa: The State of the State of the Art* is an up-to-date exploration and wide-ranging review of the symbiotic relationship between multilingualism and education in Africa. The African continent is rich in languages. Most of her inhabitants are multilingual and many of the nations have embraced multilingual education. This book examines multilingualism in education from three broad perspectives: multilingualism and language in education policy in Africa; multilingualism as an educational resource in Africa; and attitudes and challenges of multilingualism and education in Africa. The book's nineteen chapters discuss these three perspectives from East, West, Central and South Africa. All the contributors are leading authorities in multilingualism and education. The chapters combine a wide range of viewpoints based on theoretical, empirical and personal experiences. The reader is left with a deeper understanding of the unique features of multilingualism and education in Africa that have seldom been addressed by those who experience them first-hand. The book demonstrates successful practices in multilingualism and education; showing how African nations have determined what works for them without ignoring challenges such as policies on paper, attitudes towards African languages and limited resources. The benefits of multilingual education override the challenges. The book's extensive coverage makes it an important resource for scholars and policy makers in the field of multilingualism and education. Overall, this book represents an important contribution to an important subject in education globally. The editors have provided an introductory overview to the book and commentaries on the three sections.

**Food Safety and Informal Markets** Kristina Roesel 2014-10-03 Animal products are vital components of the diets and livelihoods of people across sub-Saharan Africa. They are frequently traded in local, unregulated markets and this can pose significant health risks. This volume presents an accessible overview of these issues in the context of food safety, zoonoses and public health, while at the same time maintaining fair and equitable livelihoods for poorer people across the continent. The book includes a review of the key issues and 25 case studies of the meat, milk, egg and fish food sectors drawn from a wide range of countries in East, West and Southern Africa, as part of the "Safe Food, Fair Food" project. It describes a realistic analysis of food safety risk by developing a methodology of 'participatory food safety risk assessment', involving small-scale producers and consumers in the process of data collection in a data-poor environment often found in developing countries. This approach aims to ensure market access for poor producers, while adopting a realistic and pragmatic strategy for reducing the risk of food-borne diseases for consumers.

**Chikungunya and Zika Viruses** Stephen Higgs 2018-05-30 *Chikungunya and Zika Viruses: Global Emerging Health Threats* is the go-to resource for both historical and current information on this important virus that is rapidly increasing its global range. Epidemics since 2005 have spread from Africa and Asia, and through Europe, and an ongoing epidemic has caused nearly two million cases in the Americas. It causes severe crippling arthritis, with symptoms lasting for months or years. As no vaccine or treatment is available, there is international interest in the virus, thus funding opportunities for research have dramatically increased. This book presents our understanding of the virus, bringing comprehensive knowledge in a single source. Provides a comprehensive collection of the state-of-the-art on CHIKV biology in a go-to reference book Edited by leaders in the field who provide a single, up-to-date source of information Gives a better understanding of the transmission and spread of chikungunya virus, a clear, coherent description of the outcomes of infection (both acute and chronic), and its biology and risk factors Pulls relevant background information to justify projects of many professionals developing vaccines and mosquito vector control approaches

**National Heart Institute** Heart Information Center (U.S.) 1969

**Dynamics of Pond Aquaculture** Hillary S. Eгна 2017-12-14 The culmination of over a decade's worth of research by the Pond Dynamics/Aquaculture Collaborative Research Support Program (CRSP), *Dynamics of Pond Aquaculture* not only explains the physical, chemical, and biological processes that interact in pond culture systems, but also presents real-world research findings and considers the people who depend on these systems. This book uses data from CRSP field research sites in East Africa, Southeast Asia, Central America, and North America to present a complete picture of the pond system and the environment in which it exists. A thorough study of the principles and practices of aquaculture, the book reflects the state of the art in pond aquaculture and incorporates recent advances that have changed the science in the last decade or so. It provides a thorough review of the many methods, techniques, and ideas that comprise this complex and fascinating area of study.

Applied Demography for Biologists James R. Carey 1993-02-04 This is the first book to comprehensively apply the fundamental tools and concepts of demography to a nonhuman species. It provides clear and concise treatment of standard demographic techniques such as life table analysis and population projection; introduces models that have seldom appeared outside of the demographic literature including the multiple decrement life table, the intrinsic sex ratio, and multiregional demography; and addresses demographic problems that are unique to nonhuman organisms such as the demographic theory of social insects and harvesting techniques applied to insect mass rearing. The book also contains a synthesis of fundamental properties of population such as momentum and convergence to the stable age distribution, with a section on the unity of demographic models, and appendices detailing analytical methods used to quantify and model the data gathered in a ground-breaking study on the mortality experience of 1.2 million medflies. Based on an insect demography course at the University of California, Davis, the book is intended for practicing entomologists, population biologists, and ecologists for use in research or as a graduate text.

**Competency Based Education And Training** John Burke 2005-10-18 First published in 1989. Routledge is an imprint of Taylor & Francis, an informa company.

**Internationalisation of African Higher Education** Chika Sehoole 2013-10-30 The role of higher education, especially the international dimension, is given little importance in the discourse on achieving the Millennium Development Goals (MDGs) in Africa. This book aims to change that. The potential of higher education's contribution to Africa's development remains unrealized and often misunderstood. In today's globalised world, which prioritises economic growth through liberalised trade and competitive market strategies, much emphasis has been placed on higher education's ability to produce graduates to serve the labour market and produce new knowledge for the knowledge economy. While these are important contributions, the book argues that international higher education and new knowledge must go beyond economic purposes and serve the human and social development needs of the continent. It is against this background that the African Network for the Internationalisation of Education (ANIE) undertook research on the international dimension of higher education in Africa and its role in the achievement of the MDGs. Through empirical research, seven case studies address how international and regional higher education programmes and policies in African universities can address MDG priorities of promoting gender equality and women's empowerment, combating HIV/AIDS and establishing global partnerships for development through academic mobility, joint research initiatives, curriculum innovation and policy development.

Flagship Universities in Africa Damtew Teferra 2017-06-26 This book advances an in-depth,

Downloaded from [avenza-dev.avenza.com](http://avenza-dev.avenza.com)  
on October 2, 2022 by guest

comprehensive analysis of flagship universities in Africa – the largest, most selective, and most prestigious universities on the continent. The book draws on a range of country-specific case-studies, including Botswana, Egypt, Ethiopia, Ghana, Kenya, Mauritius, Nigeria, Senegal, Tanzania and Zambia, to explore a range of issues associated with flagship universities and their role in higher education in Africa. . Newly-established institutions in new nation states, and states emerging from conflict, often rely on these flagship universities to train their academics, and build their intelligentsia; flagship universities are thus capacity-builders and trend-setters in their respective countries and sub-regions. This volume brings together a range of scholars to celebrate the impact, influence and contributions of African universities, not only within Africa, but across the globe The book will be of great significance to students and researchers in the field of education, particularly those with an interest in sociology and politics of higher education.

**Female Pelvic Medicine and Reconstructive Pelvic Surgery** Harold P. Drutz 2007-12-31 This text includes sections on anatomy, normal and abnormal physiology, investigation techniques, inflammatory conditions and treatment options. The international panel of contributors is at the forefront of research in the field; the editors have assembled these contributors and topics that span the entire range of pelvic floor disorders in women. Throughout, the emphasis is on an evidence-based approach to the treatment of pelvic floor problems. Indispensable for gynecologists and urologists.

**Agribusiness and Innovation Systems in Africa** Kurt Larsen 2009 This book examines how agricultural innovation arises in four African countries ? Ghana, Kenya, Tanzania, and Uganda ? through the lens of agribusiness, public policies, and specific value chains for food staples, high value products, and livestock.

**African Rhino** Richard Emslie 1999 The black and the white rhinoceros have become flagship species for international conservation. They are significant not only for the continuation of a major evolutionary heritage, but also as symbols for the protection of African savannahs. The battle for the survival of these species has been marked by some notable successes and sadly, many failures, and the situation is still critical. The international horn trade ban and the domestic bans imposed in most traditional user states have driven the trade further underground, in some cases inflating prices and making illegal dealing even more lucrative. This Plan is aimed at donors, government and non-government organizations, and all those involved in rhino conservation. It outlines the actions and strategies needed to catalyse support for these majestic animals, and help secure their future in sub-Saharan Africa. The overall conclusion is that, given the political will, stability and adequate field expenditure, rhinos can be conserved in the wild.

**Towards Sustainable Global Food Systems** Ruerd Ruben 2019-04-30 One of the major knowledge challenges in the domain of Resilient and Sustainable Food Systems refers to the integration of perspectives on consumption, patterns that support public health, inclusive value chains, and environmentally sustainable food production. While there is a long record of the analysis of separate interventions, this special issue generates integrated insights, provides cross-cutting perspectives, and outlines practical and policy solutions that address these global challenges. The collection of papers promotes the view that sustainable food systems require thorough insights into the structure and dynamics of agri-food production systems, the drivers for integrating food value chains and markets, and key incentives for supporting healthier consumer choices. On the production side, potential linkages between agricultural commercialization and intensification and their effects for food security and nutritional outcomes are analyzed. Value Chains are assessed for their contribution to improving exchange networks and markets for food products that simultaneously support efficiency, circularity, and responsiveness. Individual motives and market structures for food consumption need to be understood in

order to be able to outline suitable incentives to enhance healthy dietary choice. The contributed papers focus on interfaces between food system activities and processes of adaptive change that are critical for overcoming key constraints and trade-offs between sustainable food and healthy diets.

**Global Orthopedics** Richard A. Gosselin 2014-04-18 *Global Orthopedics: Caring for Musculoskeletal Conditions and Injuries in Austere Settings* was conceived and written to be a unique reference for surgeons working in resource-limited environments. The first sections provide historical background, global public health perspectives of orthopedics, the role of culture, and a broad discussion of clinical topics that orthopedic surgeons rarely deal with in high-resource settings but that affect orthopedic care. Adult and pediatric trauma are presented in an anatomical format for easy reference, with a focus on the natural history and the best treatment methods within existing limitations. The chapters on musculoskeletal infections provide a focused discussion about these common debilitating conditions that is unavailable in any other single modern text. The non-infectious pediatric conditions section has been written for the non-specialist to handle selected developmental and early childhood orthopedic problems commonly seen in low-resource settings. Detailed chapters on reconstruction surgery, tumor management, amputations, and the orthopedic needs in the face of conflicts and natural disasters round out the text.

**Population Situation Analysis (PSA)** United Nations 2011-05 "Provides the basis for an integrated appraisal of population and reproductive health dynamics and their linkages and impacts on poverty, inequality and development. Furthermore, by integrating a micro and macro analytical approach, the PSA makes the interactions between individual behaviour and demographic dynamics explicit."--Foreword.

Primate Tourism Anne E. Russon 2014-09-11 *Primate tourism as a primate conservation tool: weighing its effects and developing informed guidelines for ongoing and future tourism ventures.*

Advances in Integrated Soil Fertility Management in sub-Saharan Africa: Challenges and Opportunities Andre Bationo 2007-10-16 Food insecurity is a fundamental challenge to human welfare and economic growth in Africa. Low agricultural production leads to low incomes, poor nutrition, vulnerability to risk and threat and lack of empowerment. This book offers a comprehensive synthesis of agricultural research and development experiences from sub-Saharan Africa. The text highlights practical lessons from the sub-Saharan Africa region.

**Vocational Education and Training in Sub-Saharan Africa** Gesine Haseloff 2017-03-17

*Globalisation and Education Reforms* Joseph Zajda 2018-02-27 This book explores the interrelationship between ideology, the state, and education reforms, placing it in a global context. It examines some of the major education reforms and policy issues in a global culture, particularly in light of recent shifts in quality and standards-driven education, and policy research. The book critiques the neo-liberal ideological imperatives of current education and policy reforms, and illustrates the way the shifts in the relationship between the state and education policy affect current trends in education reforms and schooling globally. With this as its focus, the book's individual chapters highlight hand-picked scholarly research on major discourses in the field of comparative education. A compendium of the very latest thinking on the subject, the book – like the other volumes in the series – offers a state-of-the-art sourcebook for researchers, practitioners and policymakers alike. Not only do the chapters offer a timely overview of current issues affecting comparative education and education policy research in what is now a global educational culture; they also outline future directions that education and policy reforms could take. By doing so, they provide a comprehensive picture of the intersecting and diverse discourses of

globalisation and policy-driven reforms in education. Individual chapters critically assess the dominant discourses and debates on education and policy reforms. Using diverse comparative education paradigms from critical theory to historical-comparative research, they address globalisation, ideology and democracy and examine both the reasons for and outcomes of education reforms and policy change. As such, they provide an informed critique of models of quality and standards-driven education reforms that are informed by Western dominant ideologies and social values.

**Rodent Malaria** R. Killick-Kendrick 2012-12-02 Rodent Malaria reviews significant findings concerning malaria parasites of rodents, including their taxonomy, zoogeography, and evolution, along with life cycles and morphology; genetics and biochemistry; and concomitant infections. This volume is organized into eight chapters and begins by sketching out the history of the discovery of rodent as well as aspects of parasitology, immunology, and chemotherapy. These concepts are investigated two decades following Ignace Vincke's major discovery and Meir Yoeli's successful establishment of the method of cyclical transmission of the parasite. The following chapters focus on the taxonomy and systematics of the subgenus *Vinckeia*, with reference to the concepts of species and subspecies of animals and the degree to which they apply to malaria parasites, in particular to those of rodents. The discussion then shifts to how the rodent malaria parasites provide a unique insight into the subcellular organization of *Plasmodium* species, the use of rodent malaria as an experimental model to study immunological responses, and infectious agents that interact with malaria parasites. The book concludes with a chapter on malaria chemotherapy, with emphasis on the value of rodent malaria in antimalarial drug screening and the use of antimalarial drugs as biological probes. This book will be of interest to protozoologists and physicians as well as those from other disciplines including biochemistry, immunology, pharmacology, cell biology, and genetics.

Transnational Mobility and Global Health Peter H. Koehn 2020-06 Transnational Mobility and Global Health spotlights the powerful and dynamic intersections of human movement and health. The book explores the interacting political, social, economic, and cultural determinants of migrant health, proposing specific and innovative ways to enhance global health in an age of transnational mobility.

**Challenges and Opportunities for Agricultural Intensification of the Humid Highland Systems of Sub-Saharan Africa** Bernard Vanlauwe 2014-10-07 The humid highlands in sub-Saharan Africa (SSA) are characterized by high population densities and require intensification. The Consortium for Improving Agriculture-based Livelihoods in Central Africa (CIALCA) has set up a research for development platform in various mandate areas in DR Congo, Burundi, and Rwanda, aiming to identify improved production, market, and nutrition options and facilitating the access for development partners to these options. This platform is supported by capacity building, multi-stakeholder dialogue, and monitoring and evaluation efforts. The conference, facilitated by CIALCA, aimed to (i) take stock of the state-of-the-art in agricultural intensification in the highlands of SSA and (ii) chart the way forward for agricultural research for development in the humid highlands of SSA, and more specifically in the recently launched Humidtropics Consortium Research Programme, through keynote, oral and poster presentations, and strategic panel discussions.

*Microbial-Based Biopesticides* Travis R. Glare 2016-08-27 This volume focuses on the developmental areas of biopesticides: production, formulation, application and field efficacy. Chapters guide readers through methods and techniques on environmental, mammalian, safety, and registration. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and cutting-

edge, Microbial-Based Biopesticides aims to ensure successful results in the further study of this vital field.

**Lesser Flamingos** Lothar Krienitz 2018-12-31 This book provides insights into the fascinating life of the Lesser Flamingo (*Phoeniconaias minor*) and describes how this enigmatic bird has adapted to the extreme conditions of tropical soda lakes and can even withstand the caustic effects of brine. However, humans are increasingly disrupting the natural cycles of these wetlands, and for these pink birds characteristic of these salt lakes, it is becoming more and more difficult to find suitable habitats, food and breeding grounds. Their fate is considered a cautionary example of man's dealings with nature. Will the Lesser Flamingo survive in a man-made world? Flamingos are considered to be an embodiment of the Phoenix, and the author interweaves his personal experiences with and observations of the flamingos' unusual habitats with the Phoenix motif in order to stimulate reflection on the circle of life. Written in an accessible style that combines science, biological information and the author's own travels and fieldwork, the book also includes a wealth of captivating images. As such, it offers a unique resource for biologists and nature-loving Africa and Asia enthusiasts alike.

*Africa Study Bible, NLT* 2017-03-21 God's Word through African Eyes. The Africa Study Bible brings together 350 contributors from over 50 countries, providing a unique African perspective. It's an all-in-one course in biblical content, theology, history, and culture, with special attention to the African context. Each feature was planned by African leaders to help readers grow strong in Jesus Christ by providing understanding and instruction on how to live a good and righteous life: Over 2400 notes explain the Bible, inspire readers to apply truth to everyday life, teach Christian values and doctrine, and more. "Touchpoints" and "Proverbs and Stories" give African perspective on the Bible and also show parallels with African wisdom. A narrative timeline highlights God's work in Africa. There are over 1.3 million African immigrants in the US and an additional half million African born people living in the UK.

Innovations as Key to the Green Revolution in Africa Andre Bationo 2011-08-30 Africa can achieve self sufficiency in food production through adoption of innovations in the agriculture sector. Numerous soil fertility and crop production technologies have been generated through research, however, wide adoption has been low. African farmers need better technologies, more sustainable practices, and fertilizers to improve and sustain their crop productivity and to prevent further degradation of agricultural lands. The agricultural sector also needs to be supported by functional institutions and policies that will be able to respond to emerging challenges of globalization and climate change.

Entrepreneurial Universities Sola Adesola 2020-09-12 This book explores the idea of the 'Entrepreneurial University' within the institutional environment that focuses on the production, dissemination, and exploitation of knowledge. Keeping its gaze firmly on the constitutive elements of the knowledge-based institutional environment - the key actors and their interactions - the book makes important theoretical and empirical contributions to the burgeoning literature on academic entrepreneurship. The contributing chapters in the book draw insights from a range of disciplines including history, institutional and evolutionary economics, strategic management, entrepreneurship, and innovation studies to explore how institutions can create new business opportunities in turbulent times. This interdisciplinary approach has generated a rich and diverse set of insights on the idea of Entrepreneurial Universities for students, researchers, practitioners and policymakers interested in innovation and technology studies, entrepreneurship, and knowledge management.

*Econometric Analysis in Poverty Research* Johannes Gräb 2009 3.5 Empirical Findings 853.5.1 Data 85; 3.5.2 Descriptive Statistics 90; 3.5.3 Method 95; 3.5.4 Regression Results 98; 3.6 Conclusion 111.

*Circular Economy: Global Perspective* Sadhan Kumar Ghosh 2019-11-01 A circular economy is an alternative to a traditional linear economy (make, use, dispose) in which we keep resources in use for as long as possible, extract the maximum value from them whilst in use, then recover and regenerate products and materials at the end of each service life. Circular economy (CE) is important towards sustainable development, resources circulation and conservation, involving closing of material loops and cascading used resources, to prevent waste occurrence, and transforming the resulting residual streams into new (secondary) resources. Strategies and legislative framework for waste management are important steps for development of a more CE where resource efficiency becomes the key driver for both economic growth and environmental protections. A few countries achieved good results implementing CE as a replacement of the linear economy. Resource managers and planners should thoroughly identify factors to implement CE for societal benefits. This book presents how resource consumption is minimized with rational use based on 3Rs, legislative framework and government supports towards implementing CE initiatives, example of best practices, future plans and targets in different countries those are helpful for researchers, planners and implementers.

**Parenting Across Cultures** Helaine Selin 2013-11-19 There is a strong connection between culture and parenting. What is acceptable in one culture is frowned upon in another. This applies to behavior after birth, encouragement in early childhood, and regulation and freedom during adolescence. There are differences in affection and distance, harshness and repression, and acceptance and criticism. Some parents insist on obedience; others are concerned with individual development. This clearly differs from parent to parent, but there is just as clearly a connection to culture. This book includes chapters on China, Colombia, Jordan, Kenya, the Philippines, Thailand, Korea, Vietnam, Brazil, Native Americans and Australians, Argentina, Chile, Mexico, Ecuador, Cuba, Pakistan, Nigeria, Morocco, and several other countries. Beside this, the authors address depression, academic achievement, behavior, adolescent identity, abusive parenting, grandparents as parents, fatherhood, parental agreement and disagreement, emotional availability and stepparents.

**Abolishing Performance Appraisals** Tom Coens 2002-10-12 The authors separate the five discrete functions of appraisal: coaching, feedback, compensation, employee development, and legal documentation and clarify the objectives of each. They examine the atrocious track record of appraisals.

**Crime, Mental Health and the Criminal Justice System in Africa** Heng Choon (Oliver) Chan 2021-08-26 This book aims to serve as a comprehensive resource for a myriad of crime and mental health topics and issues in the African criminal justice system from a psycho-criminological perspective. *Crime, Mental Health and the Criminal Justice System in Africa: A Psycho-Criminological Perspective* is an ideal primary text for courses in criminology, criminal justice, and forensic psychology, as well as a source of reference for practitioners who deal with offenders or victims. "For a long time, African historiography has been viewed and interpreted from Eurocentric perspectives. This book is a timely contribution towards infusing Afrocentric perspectives in African scholarship by indigenous scholars. The authors' interdisciplinary topical approach, covering a gamut of topics ranging from African criminology, through mental health and psychology, to criminal justice systems, has lent a decolonizing voice toward African literary pursuit and thereby laid a solid foundation for further research by other scholars. I highly recommend it to readers, academic institutions and researchers on Africa." - Emmanuel Onyeozili, Ph.D., Professor of Criminology and Criminal Justice, Department of Criminal Justice, University of Maryland Eastern Shore, USA "This edited volume by an array of experts from West and Southern Africa has given a refreshing voice to psycho-criminological narratives in the continent. In a region of the world in which there is insufficient documentation of the patterns, determinants and outcomes of criminal behaviour, this book offers a culturally competent and contemporary flavour to an ancient discourse. Its focus on

new areas of concern such as online dating scams, kidnapping and the mental health of officials in the criminal justice system compellingly captures the potential reader and gives good value for time. It is warmly recommended for its breadth of coverage, the authority of its claims and the multi-disciplinary outlook of its authors.” – Adegboyega Ogunwale, MBBS, FWACP, Consultant Psychiatrist, Forensic Unit, Neuropsychiatric Hospital, Aro, Ogun State, Nigeria “This collection represents a significant step in the study of mental health, crime and criminal justice in sub-Saharan Africa. The breadth of topics covered is impressive, with each contribution based on methodologically-sound empirical analyses. It deserves to become a key reference for students, researchers and policy makers interested in suicide, drug use, violence, the work of prison officers, criminal investigations, and police-community interactions.” – Justice Tankebe, Ph.D., Lecturer, Institute of Criminology, University of Cambridge, UK “Mental health and criminal justice issues are growing problems facing the world today. Questions about whether mental health affects crime or whether involvement in the criminal justice system affects an individual’s health have become part of national policy discussion. This nicely written book brings together eminent scholars and experts with extensive experience in their various fields to address these and other questions related to crime, mental health, and criminal justice in Africa. The editors did well to coordinate the efforts of the contributors into a valuable piece. I highly recommend it for all who are interested in the nexus between crime, mental health, and criminal justice systems.” – Francis D. Boateng, Ph.D., Assistant Professor, Department of Criminal Justice and Legal Studies, University of Mississippi, USA

Vocational Education and Training in Times of Economic Crisis Matthias Pilz 2016-12-20 This book brings together a broad range of approaches and methodologies relevant to international comparative vocational education and training (VET). Revealing how youth in transition is affected by economic crises, it provides essential insights into the strengths and weaknesses of the various systems and prospects of VET in contexts ranging from North America to Europe, (e.g. Spain, Germany or the UK) to Asia (such as China, Thailand and India). Though each country examined in this volume is affected by the economic crisis in a different way, the effects are especially apparent for the young generation. In many countries the youth unemployment rate is still very high and the job perspectives for young people are often limited at best. The contributions in this volume demonstrate that VET alone cannot solve these problems, but can be used to support a smooth transition from school to work. If the quality of VET is high and the status and job expectations are good, VET can help to fill the skills gap, especially at the intermediate skill level. Furthermore, VET can also offer a realistic alternative to the university track for young people in many countries.
