Cambodian Buddhism Ian Harris 2008-03-11 The study of Cambodian religion has long been hampered by a lack of easily accessible scholarship. This impressive new work by Ian Harris thus fills a major gap and offers English-language scholars a booklength, up-to-date treatment of the religious aspects of Cambodian culture. Beginning with a coherent history of the presence of religion in the country from its inception to the present day, the book goes on to furnish insights into the distinctive nature of Cambodia's important yet overlooked manifestation of Theravada Buddhist tradition and to show how it reestablished itself following almost total annihilation during the Pol Pot period. Historical sections cover the dominant role of tantric Mahayana concepts and rituals under the last great king of Angkor, Jayavarman VII (1181-c. 1220); the rise of Theravada traditions after the collapse of the Angkorian civilization; the impact of foreign influences on the development of the nineteenth-century monastic order; and politicized Buddhism and the Buddhist contribution to an emerging sense of Khmer nationhood. The Buddhism practiced in Cambodia has much in common with parallel traditions in Thailand and Sri Lanka, yet there are also significant differences. The book concentrates on these and illustrates how a distinctly Cambodian Theravada developed by accommodating itself to premodern Khmer modes of thought. Following the overthrow of Prince Sihanouk in 1970, Cambodia slid rapidly into disorder and violence. Later chapters chart the elimination of institutional Buddhism under the Khmer Rouge and its gradual reemergence after Pol Pot, the restoration of the monastic order's

prerevolutionary institutional forms, and the emergence of contemporary Buddhist groupings.

Oral Literature in Africa Ruth Finnegan 2012-09 Ruth Finnegan's *Oral Literature in Africa* was first published in 1970, and since then has been widely praised as one of the most important books in its field. Based on years of fieldwork, the study traces the history of storytelling across the continent of Africa. This revised edition makes Finnegan's ground-breaking research available to the next generation of scholars. It includes a new introduction, additional images and an updated bibliography, as well as its original chapters on poetry, prose, "drum language" and drama, and an overview of the social, linguistic and historical background of oral literature in Africa. This book is the first volume in the *World Oral Literature Series*, an ongoing collaboration between OBP and World Oral Literature Project. A free online archive of recordings and photographs that Finnegan made during her fieldwork in the late 1960s is hosted by the World Oral Literature Project (<http://www.oralliterature.org/collections/rfinnegan001.html>) and can also be accessed from publisher's website.

Traditions of Theology Dorothea Frede 2002 Articles in this volume, originally presented at the 1998 Symposium Hellenisticum in Lille, discuss theological questions that were central to the doctrines of the dominant schools in the Hellenistic age, such as the existence of the gods, their nature, and their concern for humankind.

How We Think They Think Maurice E F Bloch 2018-02-02 "Maurice Bloch is so ferociously smart that one can always enjoy tangling with his ideas, even when—perhaps especially when—one doesn't agree with him. This is an important and provocative book." —Sherry Ortner Columbia University These essays by one of anthropology's most original theorists consider such fundamental questions as: Is cognition language-based? How reliable a guide to memory are people's narratives about themselves? What connects the "social recalling" studied by anthropologists to the "autobiographical memory" studied by psychologists? Now gathered in accessible form for the first time and drawing frequently upon the author's fieldwork among the Zafimaniry of Madagascar for ethnographic examples, the twelve closely linked essays of *How We Think They Think* pose provocative challenges not only to conventional cognitive models but to the basic assumptions that underlie much of ethnography. This book will be read with interest by those who study culture and cognition, ethnographic theory and practice, and the peoples and cultures of Africa.

Christianity, Book-Burning and Censorship in Late Antiquity Dirk Rohmann 2016-07-25 It is estimated that only a small fraction, less than 1 per cent, of ancient literature has survived to the present day. The role of Christian authorities in the active suppression and destruction of books in Late

Antiquity has received surprisingly little sustained consideration by academics. In an approach that presents evidence for the role played by Christian institutions, writers and saints, this book analyses a broad range of literary and legal sources, some of which have hitherto been little studied. Paying special attention to the problem of which genres and book types were likely to be targeted, the author argues that in addition to heretical, magical, astrological and anti-Christian books, other less obviously subversive categories of literature were also vulnerable to destruction, censorship or suppression through prohibition of the copying of manuscripts. These include texts from materialistic philosophical traditions, texts which were to become the basis for modern philosophy and science. This book examines how Christian authorities, theologians and ideologues suppressed ancient texts and associated ideas at a time of fundamental transformation in the late classical world.

Historical Disaster Experiences Gerrit Jasper Schenk 2017-03-20 Historical disaster research is still a young field. This book discusses the experiences of natural disasters in different cultures, from Europe across the Near East to Asia. It focuses on the pre-industrial era and on the question of similarities, differences and transcultural dynamics in the cultural handling of natural disasters. Which long-lasting cultural patterns of perception, interpretation and handling of disasters can be determined? Have specific types of disasters changed the affected societies? What have people learned from disasters and what not? What adaptation and coping strategies existed? Which natural, societal and economic parameters play a part? The book not only reveals the historical depth of present practices, but also reveals possible comparisons that show globalization processes, entanglements and exchanges of ideas and practices in pre-modern times.

Divination on stage Folke Gernert 2021-02-08 Magicians, necromancers and astrologers are assiduous characters in the European golden age theatre. This book deals with dramatic characters who act as physiognomists or palm readers in the fictional world and analyses the fictionalisation of physiognomic lore as a practice of divination in early modern Romance theatre from Pietro Aretino and Giordano Bruno to Lope de Vega, Calderón de la Barca and Thomas Corneille.

Africa from the Sixteenth to the Eighteenth Century Bethwell A. Ogot 1992-01-01 One of UNESCO's most important publishing projects in the last thirty years, the General History of Africa marks a major breakthrough in the recognition of Africa's cultural heritage. Offering an internal perspective of Africa, the eight-volume work provides a comprehensive approach to the history of ideas, civilizations, societies and institutions of African history. The volumes also discuss historical relationships among Africans as well as multilateral interactions with other cultures and continents.

Dunhuang Manuscript Culture Imre Galambos 2020-12-07 "Dunhuang Manuscript Culture" explores the world of Chinese manuscripts from ninth-tenth century Dunhuang, an oasis city along the network of pre-modern routes known today collectively as the Silk Roads. The manuscripts have been discovered in 1900 in a sealed-off side-chamber of a Buddhist cave temple, where they had lain undisturbed for almost nine hundred years. The discovery comprised tens of thousands of texts, written in over twenty different languages and scripts, including Chinese, Tibetan, Old Uighur, Khotanese, Sogdian and Sanskrit. This study centres around four groups of manuscripts from the mid-ninth to the late tenth

centuries, a period when the region was an independent kingdom ruled by local families. The central argument is that the manuscripts attest to the unique cultural diversity of the region during this period, exhibiting—alongside obvious Chinese elements—the heavy influence of Central Asian cultures. As a result, it was much less 'Chinese' than commonly portrayed in modern scholarship. The book makes a contribution to the study of cultural and linguistic interaction along the Silk Roads.

Mo Jamgon Mipham 2000-05-02 The Tibetan divination system called "Mo" has been relied upon for centuries to give insight into the future turns of events, undertakings, and relationships. It is a clear and simple method involving two rolls of a die to reveal one of the thirty-six possible outcomes described in the text. This Mo, which obtains its power from Manjushri, was developed by the great master Jamgön Mipham from sacred texts expounded by the Buddha.

Montaigne and Bayle Craig B. Brush 2012-12-06 It is traditional in the literature on Pierre Bayle to make some reference to Montaigne as one of the masters of skepticism in whose tracks he follows, albeit hardly so closely as Charron had. Time and again critics feel the need to mention Montaigne and Bayle in the same context, sometimes to contrast their brands of Pyrrhonism, more often to explain similarities in their ideas and methods, which have frequently been regarded as important steps in the gradual evolution of un-Christian, even anti-Christian, thought. Their names were already associated during Bayle's life, for example, in the mediocre work by Dom Alexis Gaudin, *La Distinction et la Nature du Bien et du Mal, Traite ou l'on combat l'erreur des Manicheens, les sentimens de Jvfontaigne & de Charron, & ceux de J. Vfonsieur Bayle*. In the nineteenth century, the author of the *Dictionnaire historique et critique* was generally classified as a skeptic; and his name was inevitably linked with the essayist's. In his *Port-Royal*, Sainte-Beuve pictured Bayle as one of the avowed skeptics in Montaigne's funeral cortege and spoke of both men as "d'autant plus fourbes qu'ils ne le sont pas toujours." His later works show that he revised his opinion on each somewhat, but in this he was unusual for his century.

Why We Play Roberte Hamayon 2016 Play is one of humanity's straightforward yet deceitful ideas: though the notion is unanimously agreed upon to be universal, used for man and animal alike, nothing defines what all its manifestations share, from childish playtime to on stage drama, from sporting events to market speculation. Within the author's anthropological field of work (Mongolia and Siberia), playing holds a core position: national holidays are called "Games," echoing in that way the circus games in Ancient Rome and today's Olympics. These games convey ethical values and local identity. Roberte Hamayon bases her analysis of the playing spectrum on their scrutiny. Starting from fighting and dancing, encompassing learning, interaction, emotion and strategy, this study heads towards luck and belief as well as the ambiguity of the relation to fiction and reality. It closes by indicating two features of play: its margin and its metaphorical structure. Ultimately revealing its consistency and coherence, the author displays play as a modality of action of its own. "Playing is no 'doing' in the ordinary sense" once wrote Johan Huizinga. Isn't playing doing something else, elsewhere and otherwise?

Dictionary Of Word Roots Donald Borrer 1960-09-01 One of the outstanding problems of the biologist, whether he be beginning student or specialists, is that of understanding technical terms. The best way to understand and remember technical terms is to understand first their component parts, or roots. This dictionary has been designed primarily to meet the needs of the beginning student, the medical student, and the taxonomist, but it should be of value to all biologists.

Supernatural and Natural Selection Lyle B. Steadman 2015-11-17 Spanning many different epochs and varieties of religious experience, this book develops a new approach to religion and its role in human history. The authors look across a range of religious phenomena-from ancestor worship to totemism, shamanism, and worldwide modern religions-to offer a new explanation of the evolutionary success of religious behaviors. Their book is more empirical and verifiable than most previous books on evolution and religion because they develop an approach that removes guesswork about beliefs in the supernatural, focusing instead on the behaviors of individuals. The result is a pioneering look at how and why natural selection has favored religious behaviors throughout history.

An Imaginary Trio Yaacov Shavit 2020-08-10 This book focuses on places and instances where Solomon's legendary biography intersects with those of Jesus Christ and of Aristotle. Solomon is the axis around which this trio revolves, the thread that binds it together. It is based on the premise that there exists a correspondence, both overt and implied, between these three biographies, that has taken shape within a vast, multifaceted field of texts for more than two thousand years.

Manuscript Cultures: Mapping the Field Jörg Quenzer 2014-12-12 Script and writing were among the most important inventions in human history, and until the invention of printing, the handwritten book was the primary medium of literary and cultural transmission. Although the study of manuscripts is already quite advanced for many regions of the world, no unified discipline of 'manuscript studies' has yet evolved which is capable of treating handwritten books from East Asia, India and the Islamic world equally alongside the European manuscript tradition. This book, which aims to begin the interdisciplinary dialogue needed to arrive at a truly systematic and comparative approach to manuscript cultures worldwide, brings together papers by leading researchers concerned with material, philological and cultural aspects of different manuscript traditions.
