A Letter to My Teacher Deborah Hopkinson 2017-04-04 This funny, touching picture book celebrates the difference a good teacher can make. Written as a thank-you note to a special teacher from the student who never forgot her, this moving story makes a great classroom read-aloud, and a perfect back-to-school gift for students and teachers! Dear Teacher, Whenever I had something to tell you, I tugged on your shirt and whispered in your ear. This time I'm writing a letter. So begins this heartfelt picture book about a girl who prefers running and jumping to listening and learning—and the teacher who gently inspires her. From stomping through creeks on a field trip to pretending to choke when called upon to read aloud, this book's young heroine would be a challenge to any teacher. But this teacher isn't just any teacher. By listening carefully and knowing just the right thing to say, she quickly learns that the girl's unruly behavior is due to her struggles with reading. And at the very end, we learn what this former student is now: a teacher herself. From award winning author Deborah Hopkinson and acclaimed illustrator Nancy Carpenter, this picture book is made to be treasured by both those who teach and those who learn.

The Knowledge Gap Natalie Wexler 2019-08-06 The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers, shoddy facilities, lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension "skills" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's

The Teacher Wars, Wexler brings together history, research, and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers, journalists, and policymakers have long overlooked, and of which the general public, including many parents, remains unaware. But The Knowledge Gap isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits, and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children, we have no choice but to pay attention.

demonstrate understanding in a variety of ways.

How People Learn National Research Council 2000-08-11 First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do—with curricula, classroom settings, and teaching methods—to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

how to apply the UDL principles and guidelines to the practice of co-teaching. How does UDL inform the lesson-planning process? What does UDL look like in the classroom? What role does formative assessment play? How do you get buy-in for the UDL approach from administrators, parents, and students themselves? These and other questions are answered in this must-have book for anyone interested in co-teaching.

Reflective Writing. A Way to Lifelong Teacher Learning Jill Burton 2009 Writing as a means of teacher learning is the focus of this resource. It focuses on the value of reflective writing as a learning resource for teacher professional development and as a powerful tool in inquiry-based learning. The contributors in this book are language learners, teachers of English and other languages, teacher educators, and higher education teachers. Their writing includes dialoguing in online journals, group journals, and using autobiography, narrative, memoir, phenomenology, and self-study. Most of the contributors demonstrate the use of reflective writing as a class resource as well as a support for their own professional development. The chapters comprise case analyses of teacher learning. The contexts include formal teacher education, such as short courses and graduate programs. The chapters also document professional in-service communities, informal teacher groups, pairs of teachers reflecting together, and individual teachers writing to reflect on practice at particular points in their lives, or integrating it in their daily practice. A variety of themes are evident, such as the use of electronic technology as a writing tool, collaborative journaling, global networking, creating teacher-learning communities, and teacher-initiated research. Table of contents: * Chapter 1: Reflective writing - getting to the heart of teaching and learning (Jill Burton) * Chapter 2: Moving towards truly reflective writing (Phil Quirke and Eberth Zagallo) * Chapter 3: The language teacher as language learner (Shelley A. Spencer) * Chapter 4: Constructing communities of practice through memoirs and journals (Carla L. Reichmann) * Chapter 5: Collaborative reflections on learning another language: implications for teaching (Michael Carroll and Seiko Tatsuta) * Chapter 6: Small-group journals as a tool of critical reflection: a measure of success and failure (Latricia Trites) * Chapter 7: Reflecting through autobiographies in teacher education (Tania R.S. Romero) * Chapter 8: Online dialogue journals - a virtual voice (Silvia Correa and Deborah Skibelski) * Chapter 9: The discussion doesn't end here - the online discussion board as a reflective writing forum (Mary Jeannot and James Hunter) * Chapter 10: The role of free writing in teachers' growth and development: insights from Austria (Rebecca Mlynarczyk, Renate Potzmann, and Kunigunde Haigner) * Chapter 11: Teaching on soft earth - writing and professional transformations in Peru (Spencer Salas) * Chapter 12: Building an international community of scholars and practitioners through e-mail journaling (Joy Kreeft Peyton) * End tasks.

The Role of Reflection in Professional Identity Development Tami Devine Fagan 2015 The purpose of this qualitative, single case study was to explore, from multiple perspectives, how preservice secondary English/Language Arts teachers develop their professional identities as teachers of writing during the

clinical student teaching experience. The work of Schön (1983) and Argyris (2008), which focused on reflection-in-action, served as the conceptual framework. Participants consisted of a triumvirate group engaged in the clinical student teaching process, including a student teacher, cooperating teacher, and university supervisor. Data for the study was collected using initial workshop reflections, individual interviews at the beginning, mid-point, and end of the student teaching experience, two group interviews, and written reflections. Four significant themes emerged from the data: interpersonal relationships, personal capacities, pedagogical issues, and identity development. The study is significant in that it explores, in depth, the role of authentic reflection in the development of the writing teacher's professional identity. Conclusions and recommendations for practice and future research are offered not only for teachers on the precipice of careers in the English/Language Arts classroom, but for those changed with preparing them for that role. The study sheds new light on reflection in action as a tool for new teachers and teacher educators seeking to move away from stagnancy and toward innovation in the changing domain of American education and within the vital realm of the teaching of writing.

acclaimed Introduction to Rubrics ** Major growth of interest in keeping journals or diaries for personal reflection and growth; and as a teaching tool ** Will appeal to college faculty, administrators and teachers One of the most powerful ways to learn, reflect and make sense of our lives is through journal keeping. This book presents the potential uses and benefits of journals for personal and professional development—particularly for those in academic life; and demonstrates journals’ potential to foster college students’ learning, fluency and voice, and creative thinking. In professional life, a journal helps to organize, prioritize and address the many expectations of a faculty member’s or administrator’s roles. Journals are effective for developing time management skills, building problem-solving skills, fostering insight, and decreasing stress. Both writing and rereading journal entries allow the journal keeper to document thinking; to track changes and review observations; and to examine assumptions and so gain fresh perspectives and insights over past events. The authors present the background to help readers make an informed decision about the value of journals and to determine whether journals will fit appropriately with their teaching objectives or help manage their personal and professional lives. They offer insights and advice on selecting the format or formats and techniques most appropriate for the reader’s purposes.

Reflection In The Writing Classroom Kathleen Yancey 1998-03 Yancey explores reflection as a promising body of practice and inquiry in the writing classroom. Yancey develops a line of research based on concepts of philosopher Donald Schon and others involving the role of deliberative reflection in classroom contexts. Developing the concepts of reflection-in-action, constructive reflection, and reflection-in-presentation, she offers a structure for discussing how reflection operates as students compose individual pieces of writing, as they progress through successive writings, and as they deliberately review a compiled body of their work—a portfolio, for example. Throughout the book, she explores how reflection can enhance student learning along with teacher response to and evaluation of student writing. Reflection in the Writing Classroom will be a valuable addition to the personal library of faculty currently teaching in or administering a writing program; it is also a natural for graduate students who teach writing courses, for the TA training program, or for the English Education program.

The Portfolio as a Learning Strategy Carol J. Porter 1995 The Portfolio as a Learning Strategy is Carol Porter and Janell Cleland's chronicle of three years of experimentation with portfolios. Their honest portrayal includes not just their successes but also their mistakes - all of which allowed them to learn with their students as they discovered the value of portfolios as a tool for reflection. Portfolios, to them, help students learn about themselves as learners. The text looks in depth at the curricular and instructional framework of a student-centered classroom. Learning strategies are described in detail and illustrated with student samples that demonstrate firsthand how portfolios can assist students in reflective self-evaluation.
