The chapters express the hidden potential of textiles in South Asia. In this book, experts in textile engineering of each country describe the potential and prospects of textile education and how it can lead to internationalization. The book contains updated new illustrations, images, data, graphs, and tables. It also discusses the textile university alliance and the potential for international education related to textiles in the developing region.

A Hand Book on Engineering Chemistry Rajendra Prasad 2017-03-04 Technological advancements in the present time involves innovation at all stages of research, development, diffusion and use; and in this process of continuous advancement demands all round skilling of the students as well as improvements in the employability of the pass out students. The curriculum plays an important role in the process of skilling of the students. Keeping all these under considerations, the curriculum of most of the states in the North - eastern states of India either has been revised or are in the progress. The availability of a suitable book becomes a big problem for the students and teachers as per the new/ revised curriculum/ syllabus; and to help in the teaching - learning process this book has been written. This book contains only twelve units; and each unit has been further divided into sub units. It is hoped that the text matters given in this book will attract students and teachers, and will enable the students to develop a greater interest in the science & technology, especially in the field of engineering chemistry. Any suggestion aimed to improve the content of the book will be highly appreciated. I owe my gratefulness to all those who have supported me in writing this book. I extend my thanks to the entire team of publisher for their dedication and efficient support in publishing this hand book. Dr. Rajendra Prasad, Mizoram Polytechnic, Lunglei.
