by disseminating modern Chinese values is one of the policies of President Xi Jinping. Although, it is usually understood as a top-down initiative, implemented willingly or unwillingly by writers, filmmakers, artists, and so on, and often manifesting itself in clumsy and awkward ways, for example, the concept of "the Chinese dream," intended to rival and perhaps appeal more strongly than "the American dream," modern Chinese values are in fact put forward in many ways by many different cultural actors. Through analyses of film festivals, CCTV, Confucius Institutes, auteurs, blockbusters, reality TV, and online digital cultures, this book exposes the limitations of China's officially promoted soft power in both conception and practice, and proposes a pluralistic approach to understanding Chinese soft power in local, regional, and transnational contexts. As such, the book demonstrates the limitations of existing theories of soft power, and argues that the US-derived concept of soft power can benefit from being examined from a China perspective.

**English Language Teacher Education** Minh Hue Nguyen 2019-07-16 This book examines a range of complex issues concerning the professional experience (i.e., practicum) in English language teacher education with regard to curriculum design and implementation, as well as professional learning. Drawing on a sociocultural perspective, it explores the context of the professional experience, preservice teachers as learners of English language teaching, and the activity of learning to teach English language in connection with interrelated contextual and personal issues: contextual issues such as policies, curricula, university-school partnerships, and mentoring relations are investigated in relation to personal issues such as the beliefs, expectations, prior educational experiences, previous teaching experiences, and cultural-linguistic backgrounds of preservice teachers. In turn, the book addresses professional learning issues, including professional identity development, emotional experiences, and pedagogical learning, in depth. The book delves into the qualitative “fine-grained” aspects of the professional experience while also making valuable conceptual contributions through a sociocultural analysis of the professional learning experience, which can also be applied to research in other teacher education contexts. The findings presented here hold practical implications for English language teacher education in terms of developing a knowledge base for English language teaching and an effective model of professional experience to prepare English language teachers for working in today’s expanded, diverse and dynamic neoliberal contexts.

Smart Grid Applications and Developments Daphne Mah 2014-07-25 Meeting today’s energy and climate challenges require not only technological advancement but also a good understanding of stakeholders’ perceptions, political sensitivity, well-informed policy analyses and innovative interdisciplinary solutions. This book will fill this gap. This is an interdisciplinary informative book to provide a holistic and integrated understanding of the technology-stakeholder-policy interactions of smart grid technologies. The unique features of the book include the following: (a) interdisciplinary approach - by bringing in the policy dimensions to smart grid technologies; (b) global and Asian perspective and (c) learning from national case studies. This book is organised into five sections. Part 1 discusses the historical and conceptual aspects of smart grids. Part 2 introduces the technological aspects and showcase the state of the art of the technologies. Part 3 explores the policy and governance dimensions by bringing in a stakeholder perspective. Part 4 presents a collection of national case studies. Part 5 shares insights and lesson learnt and provide policy recommendations. This book showcases the state-of-the-art R&D developments and policy experiences. This book contributes to a better understanding of governance institution and policy challenges

**Extended Curriculum Programmes** Tennyson Mgutshini 2022-04-30 The introduction of ECPs in South African Universities is seen by many as South Africa's key strategy for addressing the problem of poor patterns of student success and has its basis on the uncontested acceptance that an extended study duration may be necessary to bring some categories of learners to a level of parity with the readiness expectations of their course of study. Even so, this transformative strategic imperative has been plagued by a range of challenges that include poor systems readiness; poor selection mechanisms in the identification of ECP students; poor numeracy and literacy amongst students, and indifferent teacher involvement in ECPs. This volume offers a rare insight into many of the above-recognised challenges and in so doing provides critical matter for thought for educators within the higher education sector.

*Measuring Globalization* Susan N. Houseman 2015-02-23 Understanding the impacts of globalization requires good data, and national statistical systems were not designed to measure many of the transactions occurring in today's global economy. The chapters in this two-volume set identify biases and gaps in national statistics, examine the magnitude of the problems they pose, and propose solutions to address significant biases and fill key data gaps.
