Journey to Jo'burg Beverley Naidoo 2008 Separated from their mother by the harsh social and economic conditions prevalent among blacks in South Africa, thirteen-year-old Naledi and her younger brother make a journey of over 300 kilometers to find her in Johannesburg.

His Day Is Done Maya Angelou 2014-01-21 He was a son of Africa who became father to a nation and, for billions of people around the world, a beacon of hope, courage, and perseverance in the face of opposition. Now, acclaimed poet Maya Angelou honors the life and remarkable soul of Nelson Mandela, former president of South Africa and Nobel laureate. In His Day is Done, Angelou delivers an authentically heartfelt and elegant tribute to Mandela, who stood as David to the mighty Goliath of Apartheid and who, after twenty-seven years of unjust imprisonment on the notorious Robben Island, emerged with "His stupendous heart intact / His gargantuan will / Hale and hearty" to lead his people into a new era. This poignant work of gratitude and remembrance offers condolences to the resilient people of South Africa on the loss of their beloved "Madiba" and celebrates a man like no other, whose life and work changed the world. Praise for His Day Is Done "Moving and heartfelt."—The Washington Post "A powerful, gripping tribute."—NewsOne "[His Day Is Done captures] how many were feeling."—BBC News

Small Things Nthikeng Mohlele 2018-05 In this haunting tale of love and learning, the existential chaos of a life ravaged by circumstance takes on a rhythm of its own, one bound by loss and loneliness, but also an intelligent awareness of self. Sometimes melancholy, sometimes brutal, occasionally funny and infuriating, a journalist-comrade-lover caught up in the shade and shadow of politics and social injustice faces treachery and betrayal on every level. Set against the backdrop of a cityscape that taunts and tantalises, this is where love fails and passion wanes, "where suffering has no meaning", where an individual escapes death only to find himself confronted with choices wrought by remorse and retribution, by conscience and character. And yet, with all trauma, there is a distinct musicality to the lyrical unpacking that follows a string of small things ...

Trees Outside Forests R. Bellefontaine 2002 Trees outside forests (including fruit trees, trees in parks, fields, those growing in the wild and as amenities), together with forests and other woodlands, contribute to the structure of the landscape, generate numerous environmental and social services, and yield important food, drink and fuel products as well as meeting other domestic needs of urban and rural populations. However, trees outside forests are not well documented and receive little attention in the formulation of national forestry policy and planning. This publication seeks to fill this gap, by providing information on the role of these resources and options for their integration in territorial

management policies.

And Still I Rise Maya Angelou 2011-08-17 Maya Angelou's unforgettable collection of poetry lends its name to the documentary film about her life, *And Still I Rise*, as seen on PBS's *American Masters*. Pretty women wonder where my secret lies. I'm not cute or built to suit a fashion model's size But when I start to tell them, They think I'm telling lies. I say, It's in the reach of my arms, The span of my hips, The stride of my step, The curl of my lips. I'm a woman Phenomenally. Phenomenal woman, That's me. Thus begins "Phenomenal Woman," just one of the beloved poems collected here in Maya Angelou's third book of verse. These poems are powerful, distinctive, and fresh—and, as always, full of the lifting rhythms of love and remembering. *And Still I Rise* is written from the heart, a celebration of life as only Maya Angelou has discovered it. "It is true poetry she is writing," M.F.K. Fisher has observed, "not just rhythm, the beat, rhymes. I find it very moving and at times beautiful. It has an innate purity about it, unquenchable dignity. . . . It is astounding, flabbergasting, to recognize it, in all the words I read every day and night . . . it gives me heart, to hear so clearly the caged bird singing and to understand her notes."

Handbook of Cognition and Emotion Michael D. Robinson 2013-03-29 Comprehensively examining the relationship between cognition and emotion, this authoritative handbook brings together leading investigators from multiple psychological subdisciplines. Biological underpinnings of the cognition-emotion interface are reviewed, including the role of neurotransmitters and hormones. Contributors explore how key cognitive processes -- such as attention, learning, and memory -- shape emotional phenomena, and vice versa. Individual differences in areas where cognition and emotion interact -- such as agreeableness and emotional intelligence -- are addressed. The volume also analyzes the roles of cognition and emotion in anxiety, depression, borderline personality disorder, and other psychological disorders.

Water Security, Conflict and Cooperation in Peri-Urban South Asia Vishal Narain 2021-12-10 This open access book explores the implications of urbanization in South Asia for water (in-) security in the peri-urban spaces of Dhaka and Khulna in Bangladesh, Bengaluru, Gurugram, Hyderabad, Kolkata and Pune in India, and Kathmandu Valley in Nepal. The book looks into specifically peri-urban water security issues in a context of rapid urbanization and social-environmental changes, including the changing climate and its emerging impacts. It demonstrates how urbanization processes change water flows between rural and urban areas, the implications of this processes for the water security of peri-urban populations, and how new institutions and technologies develop to mediate the relationships between peri-urban communities and water. The book seeks to further the debate on peri-urban water security, including what constitutes the peri-urban, socially differentiated access to water in peri-urban spaces, interventions for improving water access, and emerging forms of cooperation and conflict related to water access in a context of urbanization and climate change. As such, this book is an interesting read for academics with various disciplinary backgrounds, professionals working in the worlds of national and international policy, NGOs, activist groups, research and development institutes, and individual readers interested in water security and urbanization.

Dreaming of Light Jayne Bauling 2012 Regile is a zama-zama working illegally in an abandoned mine near Barberton. He has moved up the ranks and is now paid a salary to keep the other child workers in line. Towards the end of a three-month stint underground, a fourteen-year-old boy from Mozambique, Taiba, starts asking questions about their rescue. Taiba constantly reaffirms his belief that they will be saved: by the police, by the private security firms that guard the mines, or maybe even by the mythical Spike Maphosa. Regile knows that such hope is dangerous.

Current Debates in International Relations & Law Övgü Kalkan Küçüksolak In this collection of CUDES 2017, wide spectrum of topics that occupy primary place in the current debates of International Relations and Law were addressed by the papers presented at the Current Debates in Social Sciences Conference which was held in İstanbul, on December 14-16, 2017. The purpose of this conference was to provide a forum for scholars, researchers and students to foster discussion and expand understanding on the current themes of Social Sciences. In parallel to changing and multiplying dynamics of world politics, papers reflect diversity of issues in International Relations and Law including: the impacts of the Syrian Refugee Crisis on EU-Turkey relations, lone wolf terrorism, energy security, Russia's domestic factors in its foreign policy, foreign policy of Iran and Russia in the Middle East, Mirziyoyev's first year in presidency, Turkish foreign aid under the Justice and Development Party, the place of civil aviation in Turkish foreign policy as a soft power instrument, the Kosovo intervention in the context of UN's human security discourse, UN and gender issues, mediation in international law and Turkey, the development of good corporate governance in Turkey, Ombudsman institution in Turkey, the status of surviving spouse in terms of law of succession and the regime of participation in acquired property in Turkey, legitimacy of censorship in the West from the perspective of human rights, intellectual property protection for plant innovation, legal framework of 'autonomy in modern liberal eugenics', the impact of the new technologies on the law.

Mud to bricks: A review of school infrastructure spending and delivery Carmen Abdoll
2014-07-04 The Centre for Child Law commissioned this study by Cornerstone Economic Research, to track school infrastructure spending and delivery. The report, written by Carmen Abdoll and Conrad Barberton, makes the concerning finding that the national Department of Basic Education has woefully underspent the School Infrastructure Backlog grant for two years running. In 2011/2012 spending was a little over 10 per cent and only at 23 per cent in 2012/2013 at the end of the third quarter. The ASIDI target for the number of schools to be built in 2011/2012 and 2012/2013 was 49. However, only 10 had been completed by the end of the first year. They predict that if the DBE continues at the same delivery rate, a realistic timeframe for the eradication of schools with inappropriate structures is probably 2023/24. They make recommendations which, if followed, could shorten the delay significantly. This study shows the importance of monitoring and evaluating progress against court orders and out of court settlements, to ensure that the right to a basic education is made real.

Homographs & Heteronyms Remedia Publications 2021-12-22 Grade Level: 4-6 Making sense of multiple-meaning words. The 25 lessons in this book are designed to give students plenty of practice recognizing and using homographs and heteronyms in written and oral communication. Activities ranging from matching meanings to completing sentences work to stimulate awareness of the multiple meanings a single word can have and how pronunciation changes the meaning of like words. Example: - They tied a BOW on the present. - Robin Hood used a BOW and arrows. - The star came on stage to take a BOW. Exercises increase in difficulty as students progress. A list of homographs not used in the lessons is included so teachers can design their own activities.

Nothing but the Truth John Kani 2002-01-01 An award-winning play about the relationship between brothers. Nothing but the Truth is the story of two brothers, of sibling rivalry, of exile, of memory and reconciliation, and the ambiguities of freedom. The play was John Kani's debut as sole playwright and was first performed in the Market Theatre in Johannesburg. It won the 2003 Fleur du Cap Award for best actor and best new South African play. In the same year Kani was also awarded a special Obie award for his extraordinary contribution to theatre in the USA.

Technology and Testing Fritz Drasgow 2015-08-20 From early answer sheets filled in with number 2 pencils, to tests administered by mainframe computers, to assessments wholly constructed by computers, it is clear that technology is changing the field of educational and psychological measurement. The numerous and rapid advances have immediate impact on test creators, assessment professionals, and those who implement and analyze assessments. This comprehensive new volume brings together leading experts on the issues posed by technological applications in testing, with chapters on game-based assessment, testing with simulations, video assessment, computerized test development, large-scale test delivery, model choice, validity, and error issues. Including an overview of existing literature and ground-breaking research, each chapter considers the technological, practical, and ethical considerations of this rapidly-changing area. Ideal for researchers and professionals in testing and assessment, *Technology and Testing* provides a critical and in-depth look at one of the most pressing topics in educational testing today. Communities in Action National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population, but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can

be mitigated by social policies that can shape health in powerful ways. *Communities in Action: Pathways to Health Equity* seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

The Central Intelligence Agency and Overhead Reconnaissance Gregory Pedlow 2016-03-15 This volume presents the complete CIA document revealing newly declassified information on the U-2 and Oxcart programs—plus new photos and supporting text. The Central Intelligence Agency and Overhead Reconnaissance 1954-1974 is a fascinating and important historical document. It contains a significant amount of newly declassified material with respect to the U-2 and Oxcart programs, including names of pilots; codenames and cryptonyms; locations, funding, and cover arrangements; electronic countermeasures equipment; cooperation with foreign governments; and overflights of the Soviet Union, Cuba, China, and other countries. Originally published with a Secret/No Foreign Dissemination classification, this detailed study describes not only the program's technological and bureaucratic aspects, but also its political and international context, including the difficult choices faced by President Eisenhower in authorizing overflights of the Soviet Union and the controversy surrounding the shoot down of U-2 pilot Francis Gary Powers in 1960. The authors discuss the origins of the U-2, its top-secret testing, its specially designed high-altitude cameras and complex life-support systems, and even the possible use of poison capsules by its pilots, if captured. Finally, they discuss the CIA's development of a successor to the U-2, the Oxcart, which became the world's most technologically advanced aircraft. For the first time, the more complete 2013 release of this historical text is available in a professionally typeset format, supplemented with higher quality photographs, a new preface by author Gregory W. Pedlow, and a foreword by Chris Pocock.

Social Media Christian Fuchs 2013-12-06 Now more than ever, we need to understand social media - the good as well as the bad. We need critical knowledge that helps us to navigate the controversies and contradictions of this complex digital media landscape. Only then can we make informed judgements about what's happening in our media world, and why. Showing the reader how to ask the right kinds of questions about social media, Christian Fuchs takes us on a journey across social media, delving deep into case studies on Google, Facebook, Twitter, WikiLeaks and Wikipedia. The result lays bare the structures and power relations at the heart of our media landscape. This book is the essential, critical guide for all students of media studies and sociology. Readers will never look at social media the same

way again.

Logical Reasoning Bradley Harris Dowden 1993 This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

Elliptic Curves (Second Edition) James S Milne 2020-08-20 This book uses the beautiful theory of elliptic curves to introduce the reader to some of the deeper aspects of number theory. It assumes only a knowledge of the basic algebra, complex analysis, and topology usually taught in first-year graduate courses. An elliptic curve is a plane curve defined by a cubic polynomial. Although the problem of finding the rational points on an elliptic curve has fascinated mathematicians since ancient times, it was not until 1922 that Mordell proved that the points form a finitely generated group. There is still no proven algorithm for finding the rank of the group, but in one of the earliest important applications of computers to mathematics, Birch and Swinnerton-Dyer discovered a relation between the rank and the numbers of points on the curve computed modulo a prime. Chapter IV of the book proves Mordell's theorem and explains the conjecture of Birch and Swinnerton-Dyer. Every elliptic curve over the rational numbers has an L-series attached to it. Hasse conjectured that this L-series satisfies a functional equation, and in 1955 Taniyama suggested that Hasse's conjecture could be proved by showing that the L-series arises from a modular form. This was shown to be correct by Wiles (and others) in the 1990s, and, as a consequence, one obtains a proof of Fermat's Last Theorem. Chapter V of the book is devoted to explaining this work. The first three chapters develop the basic theory of elliptic curves. For this edition, the text has been completely revised and updated.

Robots that Talk and Listen Judith Markowitz 2014-12-12 Robots That Talk and Listen provides a forward-looking examination of speech and language in robots from technical, functional, and social perspectives. Contributors address cultural foundations as well as the linguistic skills and technologies that robots need to function effectively in real-world settings. Among the most difficult and complex is the ability to understand and use language. Speech-enabled automata are already serving as interactive toys, teacher's aides, and research assistants. These robots will soon be joined by personal companions, industrial co-workers, and military support automata. The social impact of these and other robots extends well beyond the specific tasks they perform. Contributors tackle the most knotty of those issues, notably acceptance of advanced, speech-enabled robots and developing ethical and moral controls for robots. Topics in this book include: •Language and Beyond: The True Meaning of "Speech Enabled" •Robots in Myth and Media •Enabling Robots to Converse •Language Learning by Automata •Handling Noisy Settings •Empirical Studies of Robots in Real-World Environments •Acceptance of Intelligent Robots •Managing Robots that Can Lie and Deceive •Envisioning a World Shared with Intelligent Robots

Selfies, Sexts and Smartphones Emma Sadleir 2017-10-01 As a teenager in today's crazy online world, you may think you've got it all sussed out. But even you don't know about all the legal pitfalls, hidden dangers and future implications of what you do, see and post online. Selfies, Sexts and Smartphones is the book every teenager (and their parents) should read. It covers all of the major issues teenagers face in the digital age, including cyberbullying, sexting, addiction, internet safety, porn, anxiety, depression, privacy and reputation, and does so within a South African context. Accessible, informative and even fun, this book will help guide you to a happy, rewarding and, most importantly, safe online life. Upon reading Selfies, Sexts and Smartphones, one 17-year-old remarked: 'I feel I need to say thank you for this. It talks about the stuff I deal with every single day.'

An African Elegy Ben Okri 2015-04-30 Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*
