Migration, Multilingualism and Education Latisha Mary 2021-07-01 This book explores the question of how equitable and inclusive education can be implemented in heterogeneous classes where learners' languages and cultures reflect the social reality of mass migration and everyday plurilingualism. The book brings together researchers and practitioners working in inclusive teaching and learning in a variety of migration contexts from pre-school to university. The book opens with an exploration of the relationship between language ideologies and policies with respect to the inclusion of learners for whom the language of education is not the language spoken in the home. The following section focuses on innovative pedagogical practices which allow migrants to be socially, culturally and institutionally included at school and at university while using their plurilingual competences as resources for learning/teaching and allowing them to fully realise their potential.

Active Learning Charles C. Bonwell 1991 This monograph examines the nature of active learning at the higher education level, the empirical research on its use, the common obstacles and barriers that give rise to faculty resistance, and how faculty and staff can implement active learning techniques. A preliminary section defines active learning and looks at the current climate surrounding the concept. A second section, entitled "The Modified Lecture" offers ways that teachers can incorporate active learning into their most frequently used format: the lecture. The following section on classroom discussion explains the conditions and techniques needed for the most useful type of exchange. Other ways to promote active learning are also described including: visual learning, writing in class, problem solving, computer-based instruction, cooperative learning, debates, drama, role playing, simulations, games, and peer teaching. A section on obstacles to implementing active learning techniques leads naturally to the final section, "Conclusions and Recommendations," which outlines the roles that each group within the university can play in order to encourage the implementation of active learning strategies. The text

includes over 200 references and an index. (JB)

Methodology in Language Teaching Jack C. Richards 2002-04-08 This comprehensive anthology provides an overview of current approaches, issues, and practices in the teaching of English to speakers of other languages. Containing a broad collection of articles published primarily in the last decade, it illustrates the complexity underlying many of the practical planning and instructional activities involved in teaching English. These activities include teaching English at elementary, secondary, and tertiary levels, teacher training, language testing, curriculum and materials development, the use of computers and other technology in teaching, as well as research on different aspects of second-language learning. Organized into 16 sections, the book contains 41 articles by well-known teacher trainers and researchers. Also included are two sets of discussion questions--a pre-reading background set and a post-reading reflection set. The anthology serves as an important resource for researchers, M.A. TESOL students, and teachers wishing to design a basic course in methodology.

Success Is a Journey, Hard Work Pays Ahmed Sabie, PH.D. 2019-05-16 Success is a Journey, Hard Work Pays By: Dr. Ahmed Sabie Ahmed Sabie's wife Vicki prompted him to write this book so their children would have a better perspective of their Iraqi heritage. They needed to know the details of his background and early childhood, and of the experience he had growing up disadvantaged, yet struggling to succeed, despite all obstacles. Beginning as a foreign student, and becoming an American citizen, this is his success story: "Therefore, this is the theme of my book: How hard work and persistence can be rewarding. There was no option BUT to succeed."

[Writing the Modern History of Iraq](#) Jordi Tejel 2012-09-06 The modern history of Iraq is punctuated by a series of successive and radical ruptures (coups d'etat, changes of regime, military adventures and foreign invasions) whose chronological markers are relatively easy to identify. Although researchers cannot ignore these ruptures, they should also be encouraged to establish links between the moments when the breaks occur and the *longue durée*, in order to gain a better understanding of the period. Combining a variety of different disciplinary and methodological perspectives, this collection of essays seeks to establish some new markers which will open fresh perspectives on the history of Iraq in the twentieth and twenty-first centuries, and suggest a narrative that fits into new paradigms. The book covers the various different periods of the modern state (the British occupation and mandate, the monarchy, the first revolutions and the decades of Ba'thist rule) through the lens of significant groups in Iraq society, including artists, film-makers, political and opposition groups, members of ethnic and religious groups, and tribes. Commitment and Self-Assertion (Leslie Tramontini) Not Just "For Art's Sake": Exhibiting Iraqi Art in the West After 2003 (Silvia Naef) Appendix: State of the Art on Iraqi Studies: A Bibliographical Survey of English and French Sources (Hamit Bozarslan and Jordi Tejel) Readership: Professionals, students & scholars interested in historical, social & political issues in Iraq & the Middle East. Keywords: Iraq; US Invasion; Ba'th Party; De-Ba'thification; Kurds; Shiis; Sunnis Key Features: Most existing publications on Iraqi history present a succession of tragic events which would lead the reader to assume a sort of fatality in the country's evolution towards the present situation Due to deeper observation and analysis (between the local, the regional and the global; between internal and external), the authors offer, in contrast, new grids of analysis on Iraqi history rejecting a primordialist approach that establishes ethnic and sectarian borders as the self-evident reasons of the present situation Contributors to this book are well-established researchers in their field

Navigating International Academia Jill Brown 2014-07-11 These narratives recount what it means to be a research student at an Australian university. They unpack the complex pathways that have led the authors to this place, the early imaginings, the attempts to achieve the dream and the challenges that come with that achievement. These students bring a range of life skills and experiences to their studies and need to balance competing financial, family and employment related demands on their time and attention. For the international students whose voices dominate this text, there are also barriers of culture, language and physical and emotional dislocation. Students from Vietnam, Indonesia, Bangladesh, Iraq and Romania recount the personal and academic challenges they have faced and the ways in which they have struggled to find a way of being in academia which both accommodates their sense of self and allows them to be recognised as researchers in the international arena. An Australian student adds her voice to the collection. Their stories all combine the intensely personal with the academic. There is the joy of finding libraries full of books, of making friends with strangers, of managing to be student, partner and parent. There is pride in the achievement of children coping with school and gratitude for the support of family and fellow students. There is also developing confidence in their ability to contribute to research in the international arena and increasing authority in the ownership of their research. As a collection these narratives offer insight into both the student travellers and the academic and personal journeys being taken. Writing the Modern History of Iraq Jordi Tejel 2012 The history of Iraq is made up of successive and radical breaks (coup d'état, changes of regime, military invasions), the chronological markers of which are easy to identify. Although researchers cannot ignore these disruptions, it is also necessary to establish a link between the moments when the breaks occur and the longer term, in order to shed light on the period under study. Combining different disciplines (history, sociology, political science and anthropology), the book seeks to advance some milestones that will allow for a renewed perspective on Iraqi 20th century history and propose a narrative that fits into new paradigms. Finally, the book tackles different periods (monarchy, republic, Ba'thist, etc.) with an interest in diverse spheres of the Iraqi society (arts, politics, religious, tribal, etc.).

Teachers as State-Builders Hilary Falb Kalisman 2022-09-20 The little-known history of public school teachers across the Arab world—and how they wielded an unlikely influence over the modern Middle East Today, it is hard to imagine a time and place when public school teachers were considered among the elite strata of society. But in the lands controlled by the Ottomans, and then by the British in the early and mid-twentieth century, teachers were key players in government and leading formulators of ideologies. Drawing on archival research and oral histories, *Teachers as State-Builders* brings to light educators' outsized role in shaping the politics of the modern Middle East. Hilary Falb Kalisman tells the story of the few young Arab men—and fewer young Arab women—who were lucky enough to teach public

school in the territories that became Iraq, Jordan, and Palestine/Israel. Crossing Ottoman provincial and, later, Mandate and national borders for work and study, these educators were advantageously positioned to assume mid- and even high-level administrative positions in multiple government bureaucracies. All told, over one-third of the prime ministers who served in Iraq from the 1950s through the 1960s, and in Jordan from the 1940s through the early 1970s, were former public school teachers—a trend that changed only when independence, occupation, and mass education degraded the status of teaching. The first history of education across Britain's Middle Eastern Mandates, this transnational study reframes our understanding of the profession of teaching, the connections between public education and nationalism, and the fluid politics of the interwar Middle East.

State and Society in Iraq Benjamin Isakhan 2017-03-17 The activities of ISIS since 2014 have brought back to centre stage a series of very old and very troubling questions about the integrity and viability of the Iraqi state. However, most analysts have framed recent events in terms of their immediate past and without the contextual background to explain their evolution. *State and Society in Iraq* moves beyond a short-sighted analysis to place the complex and contested nature of Iraqi politics within a broader and deeper historical examination. In doing so, the chapters demonstrate that beyond the overwhelming emphasis on failed occupations, cruel tyrants, ethnic separatists and violent religious fanatics, is an Iraqi people who have routinely agitated against the state, advocated for legitimate and accountable government, and called for inter-communal harmony. When, the authors maintain, the Iraqi people are given agency in the complex process of consent, negotiation and resistance that underpin successful state-society relations, the nation can move beyond patterns of oppression and cruelty, of dangerous rhetoric and divisive politics, and towards a cohesive, peaceful and prosperous future - despite the many difficulties and the steep challenges that lie ahead.

Foreign Language Research in Cross-cultural Perspective Kees De Bot 1991 This volume focuses on priorities for research in language pedagogy. The aim is to give an up-to-date overview of current thinking about important research issues such as the viability of large scale comparisons, the quantitative/qualitative research controversy, new trends in language testing and evaluation, and the role of different learning environments. In their discussions of these issues researchers from the US and from different countries in Europe show to what extent the priorities differ on both sides of the Atlantic Ocean.
