Knowledge-building Karl Maton 2015-10-08 Education and knowledge have never been more important to society, yet research is segmented by approach, methodology or topic. Legitimation Code Theory or 'LCT' extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an international and multidisciplinary group of scholars, Knowledge-building offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by: - enabling dialogue between theory and data in qualitative research - bringing together quantitative and qualitative methodologies in mixed-methods research - relating theory and practice in praxis - conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge-building in education and beyond, encompassing: - diverse subject areas, including physics, English, cultural studies, music, and design - educational sites: schooling, vocational education, and higher education - practices of research, curriculum, pedagogy and assessment - both education and informal learning contexts, such as museums and masonic lodges Carefully sequenced and interrelated, these chapters form a coherent collection that gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about knowledge-building in

education and society to have emerged this century. This book is essential reading for all serious students and scholars of education, sociology and linguistics.

Creating Responsive Classroom Communities Lisa Auslander 2019-06-07 In this study, data from four high schools describe the characteristics of linguistically and culturally responsive classroom and school communities developed by administrators, educators, counselors, and students. The participating schools showcase supportive environments that strongly foster the growth of newcomers with interrupted education.

Teaching Learners with Visual Impairment Maximus M. Sefotho 2020-12-31 This book, *Teaching Learners with Visual Impairment*, focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices, to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

Family Language Policy in the Polish Diaspora Piotr Romanowski 2021-04-06 This book explores language practices, beliefs and management across a group of Polish immigrant families in Australia, drawing on these case studies as a lens through which to unpack dynamics of Family Language Policy (FLP) and their implications for future research on FLP. The volume begins by outlining the historical context of Polish immigration in Australia, charting two key waves of Polish migration in the 20th century and the subsequent unfolding of issues around language and culture maintenance in these families. This discussion paves the way for exploring key themes of language socialization, language ideologies and heritage language maintenance and the affordances of FLP research in elucidating these dynamics at work in the lived experiences of a group of Polish immigrant families in Melbourne. The book highlights

the importance of a triangulated approach, integrating qualitative and quantitative methods, in offering nuanced insights into parental approaches and children's experiences of a bilingual upbringing and the wider impact of FLP on transnational families. Opening up avenues for future research on Family Language Policy and a better understanding of the language practices of specific communities in a globalised world, this book will be of interest to scholars in multilingualism, sociolinguistics and applied linguistics.

Reflections on School Integration Mokubung O. Nkomo 2004 School integration means, among other things, that the divisions created by apartheid need to be addressed systematically and systemically. Integration is not merely about changing the racial demographics of learner and educator bodies. It means schools changing to meet the needs of all children, fostering meaningful interaction among learners in the classroom, on the playground and in extra-mural activities as well as instilling a human rights culture. It means constructing curricula, texts and pedagogies that are informed by a democratic ethos and it requires teachers, school managers and communities that are equipped to promote a democratic school environment. In short, it is about inclusivity and social cohesion. And the issue of integration is as pertinent internationally as it is in South Africa - questions of race, racism, citizenship and diversity are central to school systems throughout the world. This book contains the proceedings of a colloquium held in October 2003, attended by leading South African and international researchers, to take stock of the status quo in school integration and identify new directions research should be taking to support the process of change.

The Global Testing Culture William C. Smith 2016-01-04 The past thirty years have seen a rapid expansion of testing, exposing students worldwide to tests that are now, more than ever, standardized and linked to high-stakes outcomes. The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide. The embedded nature and normative power of high-stakes standardized testing across national

contexts can be understood as a global testing culture. The global testing culture permeates all aspects of education, from financing, to parental involvement, to teacher and student beliefs and practices. The reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability, which becomes synonymous with education quality. Underlying the global testing culture is a set of values identified from the increasing literature on world culture. These include: education as a human right, academic intelligence, faith in science, decentralization, and neoliberalism. Each of these values highlights different aspects of the dialogue in support of high-stakes standardized testing. The wide approval of these values and their ability to legitimate various aspects of high-stakes testing reinforces the taken-for-granted notion that such tests are effective and appropriate education practices. However, a large body of literature emphasizes the negative unintended consequences – teaching to the test, reshaping the testing pool, the inequitable distribution of school resources and teachers' attention, and reconstructing the role of the student, teacher, and parent – commonly found when standardized, census-based tests are combined with high-stakes outcomes for educators or students. This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts. The volume makes it clear that testing, per se, is not the problem. Instead it is how tests are administered, used or misused, and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended, undesirable consequences.

Encyclopedia of Bilingual Education Josue M. Gonzalez 2008-06-05 "With articles on Spanglish and Spanish loan words in English as well as Southeast Asian refugees and World Englishes, this encyclopedia has a broad scope that will make it useful in academic and large public libraries serving those involved in teaching and learning in multiple languages. Also available as an ebook." – Booklist

The simplest definition of bilingual education is the use of two languages in the teaching of curriculum content in K–12 schools. There is an important difference to keep in mind between bilingual education and the study of foreign languages as school subjects: In bilingual education, two languages are used for instruction, and the goal is academic success in and through the two languages. The traditional model of foreign-language study places the emphasis on the acquisition of the languages themselves. The field of bilingual education is dynamic and even controversial. The two volumes of this comprehensive, first-stop reference work collect and synthesize the knowledge base that has been well researched and accepted in the United States and abroad while also taking note of how this topic affects schools, research centers, legislative bodies, advocacy organizations, and families. The *Encyclopedia of Bilingual Education* is embedded in several disciplines, including applied linguistics, politics, civil rights, historical events, and of course, classroom instruction. This work is a compendium of information on bilingual education and related topics in the United States with select international contributors providing global insight onto the field.

Key Features Explores in a comprehensive, non-technical way the intricacies of this subject from multiple perspectives: its history, policy, classroom practice, instructional design, and research bases Shows connections between bilingual education and related subjects, such as linguistics, education equity issues, socio-cultural diversity, and the nature of demographic change in the United States Documents the history of bilingual education in the last half of the 20th century and summarizes its roots in earlier periods Discusses important legislation and litigation documents

Key Themes · Family, Community, and Society · History · Instructional Design · Languages and Linguistics · People and Organizations · Policy Evolution · Social Science Perspectives · Teaching and Learning

The *Encyclopedia of Bilingual Education* is a valuable resource for those who wish to understand the polemics associated with this field as well as its technical details. This will be an excellent addition to any academic library.

An African Elegy Ben Okri 2015-04-30 Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*

E-Infrastructures and E-Services on Developing Countries Adolfo Villafiorita 2010-05-10 The first edition of a conference is a significant organizational and scientific gamble. In some cases, these challenges are rewarded by results well above the initial expectations. AFRICOMM 2009, the First International ICST Conference on e-Infrastructure and e-Services for Developing Countries, was clearly one of such cases. The conference aimed at bringing together international researchers, public officers, policy makers and practitioners in ICT to discuss issues and trends, recent research, innovation advances, and on-the-field experiences related to e-Government, e-Governance, e-Infrastructure, and e-Business, with a focus on

developing countries. It is in fact widely accepted that ICT Infrastructure and (e-*)services are key drivers for development, well-being, and improved quality of life. This was also highlighted by Kofi Annan, former UN General Secretary, in 2002: “While ICT cannot address all of [Africa's] problems, they can do much to place Africa on a firmer industrial footing. . . and strengthen the continent's human resources, with training that leads to sustainable livelihoods. ” AFRICOMM 2009 was organized in three tracks: two of them organized as Research Tracks, on Information and Communication Infrastructures and on e- Services for Developing Countries, and one Policy and Governance Track. Contributions to the first two tracks were selected by peer-review, while the policies session involved key stakeholders in the areas of ICT, development, and policy making who submitted position papers. Participation and selection of papers for the tracks was quite good.

Safety is Seguridad National Research Council 2003-03-03 Approximately 32.8 million persons of Hispanic descent live in the United States, half of whom were born outside the United States (Therrien and Ramirez, 2000). By the year 2050, it is expected that Hispanics will constitute more than 25 percent of the total U.S. population and approximately 15 percent of the U.S. labor force. These estimates and the fact that 90 percent of Hispanic American men and 60 percent of Hispanic American women participate in the U.S. workforce strongly suggest a need for occupational safety and health information in Spanish. The growing presence of Spanish-speaking workers and employers in the United States and the unprecedented 12-percent increase in the overall rate of workplace fatalities among Hispanic workers in 2000 highlights the need to better communicate occupational safety and health information in Spanish to both employees and employers. To address this need the National Institute for Occupational Safety and Health (NIOSH) is preparing a strategy for developing and disseminating Spanish-language occupational safety and health educational and technical material. To gather information necessary to create this strategic plan the National Research Council (NRC) was asked to host a workshop. The committee commissioned five white papers (see Appendices D-H) and organized a workshop on May 29-30, in San Diego, California. *Safety is Seguridad: A Workshop Summary* is a synopsis of the presentations and discussions at the workshop. It does not contain any conclusions and recommendations. The conclusions

and recommendations in the white papers represent the views of the authors and not necessarily those of the committee or the NRC. It is intended as input to the NIOSH strategic planning in this area. Chapter 2 discusses the available information and identifies information gaps regarding risks and adverse events for Latino workers. Chapter 3 examines the available health and safety training resource materials for Latino workers, especially for those with little or no English capabilities; in particular, it discusses issues of the linguistic and cultural appropriateness of materials. Chapter 4 considers issues surrounding the assessment of existing materials and the development of new materials. Chapter 5 discusses the various means of conveying information to Spanish-speaking workers, again focusing on cultural appropriateness and ways of maximizing understanding. Chapter 6 summarizes the discussion in the prior chapters and presents some overarching issues raised by the workshop attendees.
