The Last Book in the Universe Rodman Philbrick 2013-03-01 This fast-paced action novel is set in a future where the world has been almost destroyed. Like the award-winning novel *Freak the Mighty*, this is Philbrick at his very best. It's the story of an epileptic teenager nicknamed Spaz, who begins the heroic fight to bring human intelligence back to the planet. In a world where most people are plugged into brain-drain entertainment systems, Spaz is the rare human being who can see life as it really is. When he meets an old man called Ryter, he begins to learn about Earth and its past. With Ryter as his companion, Spaz sets off an unlikely quest to save his dying sister -- and in the process, perhaps the world.

The First Book of Moses, Called Genesis 1999 The publication of the King James version of the Bible,

translated between 1603 and 1611, coincided with an extraordinary flowering of English literature and is universally acknowledged as the greatest influence on English-language literature in history. Now, world-class literary writers introduce the book of the King James Bible in a series of beautifully designed, small-format volumes. The introducers' passionate, provocative, and personal engagements with the spirituality and the language of the text make the Bible come alive as a stunning work of literature and remind us of its overwhelming contemporary relevance.

You Won't Believe Your Eyes! A Front Row Look at the Science Fiction and Horror Films of the 1950s

Mark Thomas McGee 2019-03-03 Walking out of the theater showing *Viking Women and the Sea Serpent* and *The Astounding She-Monster*, one disappointed lad was heard to say, "They might as well have mugged us in the parking lot." This was Science Fiction's Golden Age, when giant bugs, prehistoric leftovers and creatures from other planets filled the giant theater screens, movies that were usually made outside of the studio system on the cheap. Horror-hungry kids soon realized that nine times out of ten, the movie would be little more than a pale suggestion of what the posters promised. Nevertheless, we kept coming back, week after week, ever skeptical, ever hopeful, and then went home and read about the movies we just saw in *Famous Monsters of Filmland* magazine. This revised and expanded "Monster-Kids" edition of *You Won't Believe Your Eyes!* is an affectionate and funny look at the movies your parents didn't want you to see. You will hear from the actors who were in them, the people who made them, the critics who reviewed them, the exhibitors who showed them, and the children who saw them back in the day. "McGee knows this genre upside down and backwards, and writes with real authority. He loves these movies, and celebrates them as much for their goofy failings as for their imagination and entertainment value. Best of all, McGee is a terrific colloquial writer of great wit; I laughed out loud as I revisited many of my favorite pictures. You will too." David J. Hogan, author of *Dark Romance* and *Film Noir FAQ*

Climate Change Science National Research Council 2001-07-28 The warming of the Earth has been the subject of intense debate and concern for many scientists, policy-makers, and citizens for at least the past

A Wrinkle in Time Madeleine L'Engle 2019-07-18 A Wrinkle in Time is the winner of the 1963 Newbery Medal. It was a dark and stormy night—Meg Murry, her small brother Charles Wallace, and her mother had come down to the kitchen for a midnight snack when they were upset by the arrival of a most disturbing stranger. "Wild nights are my glory," the unearthly stranger told them. "I just got caught in a downdraft and blown off course. Let me sit down for a moment, and then I'll be on my way. Speaking of ways, by the way, there is such a thing as a tesseract." A tesseract (in case the reader doesn't know) is a wrinkle in time. To tell more would rob the reader of the enjoyment of Miss L'Engle's unusual book. A Wrinkle in Time, winner of the Newbery Medal in 1963, is the story of the adventures in space and time of Meg, Charles Wallace, and Calvin O'Keefe (athlete, student, and one of the most popular boys in high school). They are in search of Meg's father, a scientist who disappeared while engaged in secret work for the government on the tesseract problem.

"Twice the Thrills! Twice the Chills!" Bryan Senn 2019-02-22 In the mid-1950s, to combat declining theater attendance, film distributors began releasing pre-packaged genre double-bills—including many horror and science fiction double features. Though many of these films were low-budget and low-end, others, such as *Invasion of the Body Snatchers*, *Horror of Dracula* and *The Fly*, became bona fide classics. Beginning with Universal-International's 1955 pairing of *Revenge of the Creature* and *Cult of the Cobra*, 147 officially sanctioned horror and sci-fi double-bills were released over a 20-year period. This book presents these double features year-by-year, and includes production details, historical notes, and critical commentary for each film.

The Man Who Fell to Earth Walter Tevis 2014-09-29 The “beautiful” novel that inspired the Showtime series, from a Nebula Award finalist (The New York Times). The Man Who Fell to Earth tells the story of Thomas Jerome Newton, an alien disguised as a human who comes to Earth on a mission to save his people. Devastated by nuclear war, his home planet, Anthea, is no longer habitable. Newton lands in Kentucky and starts patenting Anthean technology—amassing the fortune he needs to build a spaceship that will bring the last three hundred Anthean survivors to Earth. But instead of the help he seeks, he finds only self-destruction, sinking into alcoholism and abandoning his spaceship, in this poignant story about the human condition—which has inspired both a film starring David Bowie and the new series starring Chiwetel Ejiofor—by the acclaimed author of *Mockingbird*. “Beautiful science fiction . . . The story of an extraterrestrial visitor from another planet is designed mainly to say something about life on this one.” —The New York Times “An utterly realistic novel about an alien human on Earth . . . Realistic enough to become a metaphor for something inside us all, some existential loneliness.” —Norman Spinrad, author of *The Iron Dream* “Those who know *The Man Who Fell to Earth* only from the film version are missing something. This is one of the finest science fiction novels of its period.” —J. R. Dunn, author of *This Side of Judgment*

Encyclopedia of Chinese Film Zhiwei Xiao 2002-06-01 The Encyclopedia of Chinese Film, one of the first

ever encyclopedias in this area, provides alphabetically organized entries on directors, genres, themes, and actors and actresses from mainland China, Hong Kong and Taiwan as well as 300 film synopses. Great care has been taken to provide solid cultural and historical context to the facts. The alphabetical entries are preceded by a substantial historical section, incorporating material on the the main studios and analysing the impact of Chinese film abroad as well as at home in recent years. This Encyclopedia meets the needs, equally, of * the film studies scholar * the student of Chinese culture * the specialist in Chinese film * the curious viewer wanting to know more. Additional features include: * comprehensive cross-references and suggestions for further reading * a list of relevant websites * a chronology of films and a classified contents list * three indexes - (one of film and tv titles with directors names and year of release, one of names including actors, writers, directors and producers and one of studios, all with pinyin romanizations) * a glossary of pinyin romanizations, Chinese characters and English equivalents to aid the specialist in moving between Chinese titles and English translations.

A Life on Our Planet Sir David Attenborough 2020-10-06 *Goodreads Choice Award Winner for Best Science & Technology Book of the Year* In this scientifically informed account of the changes occurring in the world over the last century, award-winning broadcaster and natural historian shares a lifetime of wisdom and a hopeful vision for the future. See the world. Then make it better. I am 93. I've had an extraordinary life. It's only now that I appreciate how extraordinary. As a young man, I felt I was out there in the wild, experiencing the untouched natural world - but it was an illusion. The tragedy of our time has been happening all around us, barely noticeable from day to day -- the loss of our planet's wild places, its biodiversity. I have been witness to this decline. A Life on Our Planet is my witness statement, and my vision for the future. It is the story of how we came to make this, our greatest mistake -- and how, if we act now, we can yet put it right. We have one final chance to create the perfect home for ourselves and restore the wonderful world we inherited. All we need is the will to do so.

Explore Your Environment: K-8 Activity Guide Project Learning Tree 2021-08 Explore Your Environment: K-8 Activity Guide includes 50 hands-on, multidisciplinary activities to connect children to nature and increase young people's awareness and knowledge about their environment. Activities include step-by-step instructions, time and material requirements, and corresponding student worksheets with green

career connections. Teachers and nonformal educators can easily integrate the activities into their programming. Activities are organized by grade level (K-2, 3-5, and 6-8) and align with national standards for science, English language arts, math, and social studies. Many activities offer variations for a different grade level or focus. While lessons can be conducted both indoors and outdoors, all suggest meaningful ways to take student learning outside. Many activities are particularly suited to urban environments and STEM learning as well as some longer-term studies. This supplementary curriculum develops students' critical thinking and problem-solving skills.

A New Earth Eckhart Tolle 2006-08-29 The 10th anniversary edition of A New Earth with a new preface by Eckhart Tolle. With his bestselling spiritual guide The Power of Now, Eckhart Tolle inspired millions of readers to discover the freedom and joy of a life lived “in the now.” In A New Earth, Tolle expands on these powerful ideas to show how transcending our ego-based state of consciousness is not only essential to personal happiness, but also the key to ending conflict and suffering throughout the world. Tolle describes how our attachment to the ego creates the dysfunction that leads to anger, jealousy, and unhappiness, and shows readers how to awaken to a new state of consciousness and follow the path to a truly fulfilling existence. Illuminating, enlightening, and uplifting, A New Earth is a profoundly spiritual manifesto for a better way of life—and for building a better world.

Pale Blue Dot Carl Sagan 2011-07-06 “Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan’s books.”—The Washington Post Book World (front page review) In *Cosmos*, the late

astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. “Takes readers far beyond *Cosmos* . . . Sagan sees humanity’s future in the stars.”—Chicago Tribune
