Memory before Modernity Erika Kuijpers 2013-12-05 This volume examines the practice of memory in early modern Europe, showing that this was already a multimedia affair with many political uses, and affecting people at all levels of society; many pre-modern memory practices persist until today.

The Wild Man Within Edward Dudley 1972-10-15 These essays trace the myth of the wild man from the Middle Ages to its disintegration into symbol in the periods following the discovery of America and encounter with real "wild men." This is the first book to discuss the concept of wildness in the writings of the Enlightenment period in Western Europe and the first to attempt a broad, interdisciplinary approach to the subject of primitivism, not only from a strict "history of ideas" approach, but through discussions of individual works, both literary and political, and encompassing various subject matter from racism to the origins of language. Contributors: Richard Ashcraft; Ehrhard Bahr; John G. Burke; Earl Miner; Gary B. Nash; Stanley Robe; Geoffrey Symcox; Peter Thoralev; Hayden V. White, and the editors.

Hypermedia and Literary Studies Paul Delany 1994 The essays in *Hypermedia and Literary Studies* discuss the theoretical and practical opportunities and challenges posed by the convergence of hypermedia systems and traditional written texts. Consider a work from Shakespeare. Imagine, as you read it, being able to call up instantly the Elizabethan usage of a particular word, variant texts for any part of the work, critical commentary, historically relevant facts, or oral interpretations by different sets of actors. This is the sort of

richly interconnected, immediately accessible literary universe that can be created by hypertext (electronically linked texts) and hypermedia (the extension of linkages to visual and aural material). The essays in Hypermedia and Literary Studies discuss the theoretical and practical opportunities and challenges posed by the convergence of hypermedia systems and traditional written texts. They range from the theory and design of literary hypermedia to reports of actual hypermedia projects from secondary school to university and from educational and scholarly to creative applications in poetry and fiction.

Wall Remnants - Wall Traces Axel Klausmeier 2004 For twenty-eight years, the forbidding and constantly changing Berlin Wall marked the boundary between freedom and oppression in the city of Berlin. Although much of it has been removed since the fall of the Iron Curtain, hundreds of remnants and traces still exist, marking where the border was and how it worked. Based on a 2002-2003 report to the Berlin Senate documenting the extant remains of the wall, this book provides a valuable record and entirely new view of a once reviled border.

Cultural Histories of the Material World Peter N. Miller 2013-07-23 All across the humanities fields there is a new interest in materials and materiality. This is the first book to capture and study the “material turn” in the humanities from all its varied perspectives. *Cultural Histories of the Material World* brings together top scholars from all these different fields—from Art History, Anthropology, Archaeology, Classics, Folklore, History, History of Science, Literature, Philosophy—to offer their vision of what cultural history of the material world looks like and attempt to show how attention to materiality can contribute to a more precise historical understanding of specific times, places, ways, and means. The result is a spectacular kaleidoscope of future possibilities and new perspectives.

What Einstein Told His Barber Robert Wolke 2009-07-29 What makes ice cubes cloudy? How do shark attacks make airplanes safer? Can a person traveling in a car at the speed of sound still hear the radio? Moreover, would they want to...? Do you often find yourself pondering life's little conundrums? Have you ever wondered why the ocean is blue? Or why birds don't get electrocuted when perching on high-voltage power lines? Robert L. Wolke, professor emeritus of chemistry at the University of Pittsburgh and acclaimed author of *What Einstein Didn't Know*, understands the need to...well, understand. Now he provides more amusing explanations of such everyday phenomena as gravity (If you're in a falling elevator, will jumping at the last instant save your life?) and acoustics (Why does a whip make such a loud cracking noise?), along with amazing facts, belly-up-to-the-bar bets, and mind-blowing reality bites all with his trademark wit and wisdom. If you shoot a bullet into the air, can it kill somebody when it comes down? You can find out about all this and more in an astonishing compendium of the proverbial mind-boggling mysteries of the physical world we inhabit. Arranged in a question-and-answer format and grouped by subject for browsing ease, **WHAT EINSTEIN TOLD HIS BARBER** is for anyone who ever pondered such things as why colors fade in sunlight, what happens to the rubber from worn-out tires, what makes red-hot objects glow red, and other scientific curiosities. Perfect for fans of *Newton's Apple*, *Jeopardy!*, and *The Discovery Channel*, **WHAT EINSTEIN TOLD HIS BARBER** also includes a glossary of important scientific buzz words and a comprehensive index. -->

History and Material Culture Karen Harvey 2013-02-01 Sources are the raw material of history, but where the written word has traditionally been seen as the principal source, today historians are increasingly recognizing the value of sources beyond text. In *History and Material Culture*, Karen Harvey embarks upon a discussion about material culture – considering objects, often those found surrounding us in day to day life, as sources, which can help historians develop new interpretations and new knowledge about the past. Across ten chapters, different historians look at a variety of material sources from around the globe and across centuries to assess how such sources can be used to study history. While the sources are discussed from ‘interdisciplinary’ perspectives, each contributor examines how material culture can be approached from an historical viewpoint, and each chapter addresses its theme or approach in a way accessible to readers without expertise in the area. In her introduction, Karen Harvey discusses some of the key issues raised when historians use material culture, and suggests some basic steps for those new to these kinds of sources. Opening up the discipline of history to new approaches, and introducing those working in other disciplines to historical approaches, this book is the ideal introduction to the opportunities and challenges of researching material culture.

Semiotics Robert E. Innis 1985-06-22 "... fifteen texts which are essential reading for anyone interested in semiotics... This collection will surely become a standard text for those who teach semiotics, aesthetics or philosophy of language." -- *International Philosophical Quarterly* This volume presents the classic statements in semiotics and touches on a vast set of problems and themes -- philosophical, aesthetic, literary, cultural, biological, and anthropological.

The Light Between Us Vincent Peters 2014 How can a photographer of internationally known stars create iconic portraits that linger in the memory--especially since these actors have already been photographed and filmed millions of times? Vincent Peters--who has been working since 1995 for magazines such as *Vogue* and *GQ* and fashion brands including Dior, Louis Vuitton, and Yves Saint Laurent--relies entirely on the classic art of portrait photography for his pictures. Focusing on small gestures and subtle productions instead of prominent poses, he ensures that his subjects do not disappear into the backdrop and that their faces are the focal point. Emma Watson's features are lent a tragic note with white makeup. Annie Lennox appears like a stern missionary in a suit and fedora. Photographs of stars such as David Beckham and Christian Bale are markedly masculine. Even more intimate are the images that Peters has taken in private surroundings, like when he accompanied Monica Bellucci during her second pregnancy. His sophisticated lighting has the most impact in his black-and-white photos, bestowing them with a breathtaking cinematic quality.

Order in the Twilight Bernhard Waldenfels 1996 Waldenfels (philosophy, Ruhr U., Bochum, Germany) explores the problem of the nature of order after the loss of the idea of a universal or fundamental order. He combines phenomenological methodology with recent work on the theory of order, normativity, dialogue, structuralism, and Gestalt theory. His attitude is more optimistic than deconstructionism and many other modern approaches. Originally published as *Ordnung in Zwilicht* by Suhrkamp Verlag, Frankfurt am Main, in 1987. Materiality And Society Dant, Tim 2004-12-01 This book examines the relationships between society and material culture: the interaction between people and things. Tim Dant argues that the traditional approach to material culture has focused on the symbolic meanings of objects, largely overlooking the material impact that objects have on everyday life in late modernity.

Bodies of Evidence Jane Draycott 2017-07-05 Dedicating objects to the divine was a central component of both Greek and Roman religion. Some of the most conspicuous offerings were shaped like parts of the internal or external human body: so-called 'anatomical votives'. These archaeological artefacts capture the modern imagination, recalling vividly the physical and fragile bodies of the past whilst posing interpretative challenges in the present. This volume scrutinises this distinctive dedicatory phenomenon, bringing together for the first time a range of methodologically diverse approaches which challenge traditional assumptions and simple categorisations. The chapters presented here ask new questions about what constitutes an anatomical votive, how they were used and manipulated in cultural, cultic and curative contexts and the complex role of anatomical votives in negotiations between humans and gods, the body and its disparate parts, divine and medical healing, ancient assemblages and modern collections and collectors. In seeking to re-contextualise and re-conceptualise anatomical votives this volume uniquely juxtaposes the medical with the religious, the social with the conceptual, the idea of the body in fragments with the body whole and the museum with the sanctuary, crossing the boundaries between studies of ancient religion, medicine, the body and the reception of antiquity.

History, Medicine, and the Traditions of Renaissance Learning Nancy G. Siraisi 2010-02-24 A major, path-breaking work, *History, Medicine, and the Traditions of Renaissance Learning* is Nancy G. Siraisi's examination into the intersections of medically trained authors and history in the period 1450 to 1650. Rather than studying medicine and history as separate disciplinary traditions, Siraisi calls attention to their mutual interaction in the rapidly changing world of Renaissance erudition. Far from their contributions being a mere footnote in the historical record, medical writers had extensive involvement in the reading, production, and shaping of historical knowledge during this important period. With remarkably detailed scholarship, Siraisi investigates doctors' efforts to explore the legacies handed down to them from ancient medical and anatomical

writings and the difficult reconciliations this required between the authority of the ancient world and the discoveries of the modern. She also studies the ways in which sixteenth-century medical authors wrote history, both in their own medical texts and in more general historical works. In the course of her study, Siraisi finds that what allowed medical writers to become so fully engaged in the writing of history was their general humanistic background, their experience of history through the field of medicine's past, and the tools that the writing of history offered to the development of a rapidly evolving profession. Nancy G. Siraisi is one of the preeminent scholars of medieval and Renaissance intellectual history, specializing in medicine and science. Now Distinguished Professor Emerita of History at Hunter College and the Graduate Center, City University of New York, and a 2008 winner of a John D. and Catherine T. MacArthur Foundation Fellowship, she has written numerous books, including *Taddeo Alderotti and His Pupils* (Princeton, 1981), which won the American Association for the History of Medicine William H. Welch Medal; *Avicenna in Renaissance Italy* (Princeton, 1987); *The Clock and the Mirror* (Princeton, 1997); and the widely used textbook *Medieval and Early Renaissance Medicine* (Chicago, 1990), which won the Watson Davis and Helen Miles Davis Prize from the History of Science Society. In 2003 Siraisi received the History of Science Society's George Sarton Medal, in 2004 she received the Paul Oskar Kristellar Award for Lifetime Achievement of the Renaissance Society of America, and in 2005 she was awarded the American Historical Association Award for Scholarly Distinction. "A fascinating study of Renaissance physicians as avid readers and enthusiastic writers of all kinds of history: from case narratives and medical biographies to archaeological and environmental histories. In this wide-ranging book, Nancy Siraisi demonstrates the deep links between the medical and the humanistic disciplines in early modern Europe." ---Katharine Park, Zemurray Stone Radcliffe Professor of the History of Science, Harvard University "This is a salient but little explored aspect of Renaissance humanism, and there is no doubt that Siraisi has succeeded in throwing light onto a vast subject. The scholarship is wide-ranging and profound, and breaks new ground. The choice of examples is fascinating, and it puts Renaissance documents into a new context. This is a major book, well written, richly learned and with further implications for more than students of medical history." ---Vivian Nutton, Professor, The Wellcome Trust Centre for the History of Medicine, University College London, and author of *From Democedes to Harvey: Studies in the History of Medicine* "Siraisi shows the many-dimensional overlaps and interactions between medicine and 'history' in the early modern period, marking a pioneering effort to survey a neglected discipline. Her book follows the changing usage of the classical term 'history' both as empiricism and as a kind of scholarship in the Renaissance before its more modern analytical and critical applications. It is a marvel of erudition in an area insufficiently studied." ---Donald R. Kelley, Emeritus James Westfall Thompson Professor of History, Rutgers University, New Brunswick, and Executive Editor of *Journal of the History of Ideas*

Medicine and the Italian Universities, 1250-1600 Siraisi 2022-02-07 This volume of collected essays deals with medicine in the university world of thirteenth to sixteenth century Italy, discussing both the internal academic milieu of teaching and learning and its relation to the surrounding culture of medieval and Renaissance Italian cities.

Louis-Alphonse Poitevin Daniel Blau 2021-06-15 The first book on the man who made it possible to print photographs in books. Louis Alphonse Poitevin (1819-1882) was an outstanding inventor, chemist, engineer, scientist, artist, and photographer. This book looks into the life of this famous pioneer of photography for the first time. For more than thirty-five years Poitevin experimented with chemical and mechanical processes in order to make photographs printable and more durable. At an early stage of the medium's development, Poitevin recognized how important photography would become for illustrating printed books. Among other achievements, he developed the first successful processes for illustrating books with photographs. This book brings together Poitevin's photographs and research on his scientific experiments to put his accomplishments in the context of art history and the history of science.

Historia Gianna Pomata 2005 Essays examine how the genre of historia reflects connections between the study of nature and the study of culture in early modern scholarly pursuits. The early modern genre of historia connected the study of nature and the study of culture from the early Renaissance to the eighteenth century. The ubiquity of historia as a descriptive method across a variety of disciplines--including natural history, medicine, antiquarianism, and philology--indicates how closely intertwined these scholarly pursuits were in the early modern period. The essays collected in this volume demonstrate that historia can be considered a key epistemic tool of early modern intellectual practices. Focusing on the actual use of historia across disciplines, the essays highlight a distinctive feature of early modern descriptive sciences: the coupling of observational skills with philological learning, empiricism with erudition. Thus the essays bring to light previously unexamined links between the culture of humanism and the scientific revolution. The contributors, from a range of disciplines that echoes the broad scope of early modern historia, examine such topics as the development of a new interest in historical method from the Renaissance artes historicae to the eighteenth-century tension between "history" and "system"; shifts in Aristotelian thought paving the way for reevaluation of historia as descriptive knowledge; the rise of the new discipline of natural history; the uses of historia in anatomical and medical investigation and the writing of history by physicians; parallels between the practices of collecting and presenting information in both natural history and antiquarianism; and significant examples of the ease with which early seventeenth-century antiquarian scholars moved from studies of nature to studies of culture.

Ex Voto Ittai Weinryb 2016 Derived from the Latin term "ex voto suscepto" meaning made in accordance with a vow, ex votos embody the hopes, dreams, and anxieties of the people who deposited them. Thus, almost anything, no matter its size, weight, form, or original function, can become a votive object. The category ex voto refers to a particular subset of the material world in which objects are not necessarily made with the intention of being votive, but become charged with votive meaning once they have been consecrated to a deity or deities. The variety of materials, forms, techniques of making, and manner of dedication all suggest that the wide array of materialized aspects of human devotion, function as a category in itself. This volume one of the only collections dedicated exclusively to the subject has been compiled with the assumption that a shared conceptual framework underpins the objects produced as part of the ritual of votive giving, and that by merit of their dedication they have become a category which represents a stage and a place in the life of a material artifact. As such, "Ex Voto: Votive Giving Across Cultures," is a comparative study, and the volume ranges from the classical Mediterranean world, through medieval Italy and northern Europe, to the period of the Catholic Reform and on to Mexico, Shinto and Buddhist Japan, and Muslim Iran. This volume will be read with interest and stimulate fresh discussion across cultures and disciplines. "

The Architecture of Modern Culture Wolfgang Müller-Funk 2013-01-01 These collected essays contain fundamental contributions to contemporary cultural analysis and theory as well as exemplary interpretations of film, literature and other media. Central issues of current cultural studies are addressed: cultural narratives, cultural identity, collective memory and post-colonial thinking. The oeuvre of cultural and literary critic Wolfgang Müller-Funk encompasses historic analyses such as readings of Broch, Canetti and Musil, and the heritage they passed on. Other essays move from the beginning of the 20th to the 21st century and address questions of space, time and globalization discussing, for example, Walter Benjamin and 9/11.

Quoting Caravaggio Mieke Bal 2001-03 The author's primary object of investigation in this text is not the Caravaggio, but rather the issue of temporality in art. She analyzes the productives relationship between Caravaggio and a number of late-20th century artists who "quote" the baroque master in their own works.

Robert Bosch Peter Theiner 2019-10-15 Robert Bosch (1861 - 1942) was one of the most successful German entrepreneurs and philanthropists of the 20th century and, at the same time, a pioneer of the social market economy. This book presents a comprehensive and impressive biography of a visionary who thought far ahead of his time like almost no other. Peter Theiner follows the traces of this trailblazer of modernity who founded a global company. 1886, Robert Bosch opened his Werkstätte für Feinmechanik und Elektrotechnik, today's Robert Bosch GmbH, in a modest rear building. Pioneering innovations for motorized vehicles emerged from the young company, and Bosch was quickly able to point to tremendous international successes as an industrialist. Today, his name represents the rise of motor vehicles and electricity in the home. In addition, he also had an impact as a benefactor and philanthropist with a well-developed political profile and a strong sense of social responsibility. In a time of wars and upheaval, in an age of extremes, Bosch positioned himself as a staunch Democrat who cut against the grain of German history.

Greek Votive Offerings William Henry Denham Rouse 1902 This essay explores the relationship of ancient Greeks to their dieties through votive offerings - those things given freely to a being conceived as superhuman.
