**Serious Violations of Human Rights** Ilia Siatitsa 2022-05-12 This book analyses the use of the expression 'serious violations of human rights', and similar ones, such as 'gross' or 'grave', in international practice. It highlights some of the recurring responses and consequences to such violations and suggests that a new special regime - eponymous to the above-mentioned expression - was formed. This special regime is understood as substantively limited to a very specific issue-area of human rights violations. Within this regime, a series of monitoring mechanisms and procedures are in place to highlight, document, and record such violations; specific measures are taken to enforce compliance; and certain consequences arise focused on remedying the victims of such violations. As such, this special regime is comprised of at least four thinly interconnected components: the substantive, the monitoring, the enforcement, and the remedial ones. This monograph constitutes a first step towards the recognition of such a regime, allowing far more constructive and coherent elaboration in the future. Practice around this category of violations may well evolve in a different direction than the one suggested here. However, what becomes apparent from this work is that the serious violations of human rights are a key notion in the international legal order as it allows the international community to depict those factual situations requiring its attention and action.

The Year of Faith Mitch Pacwa 2012-08-15 Our society is struggling with what Pope Benedict has called "profound crisis of faith that has affected many people." In response, the Holy Father has called us all to a Year of Faith from October 2012 to November 2013. We see the signs all around us: the demand for science to prove everything before we can believe it, the role of media and celebrities who deny the existence of God and denounce the role of the

Church, and the ease in which we can all isolate God and faith into only one part of our life. In a follow-up to his best selling St. Paul Bible Study for Catholics during the year of St. Paul, Fr. Mitch Pacwa once again leads Catholics to a deeper understanding of Pope Benedict's call to action for the year. Perfect for individual or group study, this book is a wonderful guide to experiencing a conversion, growing in faith, and following Jesus Christ more closely. It shows us how to integrate every component of our life – relationships, morality, work, recreation, and all – into a meaningful whole. Make the most of Pope Benedict's Year of Faith, walking hand in hand with Fr. Pacwa as he guides you through the beauty and insights of Scripture in relationship to your everyday life.

**The Sun: A Laboratory for Astrophysics** J.T. Schmelz 1992-07-31 As in the days following Skylab, solar physics came to the end of an era when the Solar Maximum Mission re-entered the earth's atmosphere in December 1989. The 1980s had been a pioneering decade not only in space- and ground-based studies of the solar atmosphere (Solar Maximum Mission, Hinotori, VLA, Big Bear, Nancay, etc.) but also in solar-terrestrial relations (ISEE, AMPTE), and solar interior neutrino and helioseismology studies. The pace of development in related areas of theory (nuclear, atomic, MHD, beam-plasma) has been equally impressive. All of these raised tantalizing further questions about the structure and dynamics of the Sun as the

prototypical and best observed star. This Advanced Study Institute was timed at a pivotal point between that decade and the realisation of Yohkoh, Ulysses, SOHO, GRANAT, Coronas, and new ground-based optical facilities such as LEST and GONG, so as to teach and inspire the up and coming young solar researchers of the 1990s. The topics, lecturers, and students were all chosen with this goal in mind, and the result seems to have been highly successful by all reports.
