The Underdogs Mariano Azuela 2008-07-29 The greatest novel of the Mexican Revolution, in a brilliant new translation by an award-winning translator *The Underdogs* is the first great novel about the first great revolution of the twentieth century. Demetrio Macias, a poor, illiterate Indian, must join the rebels to save his family. Courageous and charismatic, he earns a generalship in Pancho Villa's army, only to become discouraged with the cause after it becomes hopelessly factionalized. At once a spare, moving depiction of the limits of political idealism, an authentic representation of Mexico's peasant life, and a timeless portrait of revolution, *The Underdogs* is an iconic novel of the Latin American experience and a powerful novel about the disillusionment of war.

The Development of a Common Framework Scale of Language Proficiency Brian North 2000 Scales describing language proficiency in a series of levels can provide orientation for educational programmes, criteria for assessment, and reporting to stakeholders. However, in most cases such instruments are produced just by expert opinion. A scale of language proficiency actually implies a descriptive scheme related to theory but usable by practitioners. It also implies a methodology for scaling content to different levels. This book describes the use of both qualitative and quantitative techniques to develop scales for the «Common Reference Levels» in the Common European Framework of Reference for modern languages. Short stand-alone descriptors were (i) developed and classified, (ii) refined and elaborated in workshops, and then (iii) scaled by analyzing the judgments of one hundred teachers on the English language proficiency of the learners in their classes.

Guiding Creative Talent E. Paul Torrance 2018-12-01 Anyone with an interest in the problems of highly creative children will find this volume useful in guiding a wide range of creative talent at all age and educational levels. In preparing this material, I have drawn most heavily upon my own research and that of my colleagues concerning the creative thinking of children, adolescents, and adults. Although my emphasis is upon the problems of highly creative children, I believe you will find these materials useful in guiding a wide range of creative talent at all age and educational levels. I have also attempted to give these research findings and observations meaning from my experience as a teacher, counselor, and principal in a high school and as a college teacher and counselor, roles in which I have met many highly creative individuals. I have also drawn upon my research concerning behavior under emergency and extreme conditions, especially situations involving coercion.

Story Proof Kendall Haven 2007-10-30 Like Stephen Krashen's important work in *The Power of Reading*, *Story Proof* collects and analyzes the research that validates the importance of story, story reading, and storytelling to the brain development and education of children and adults. Accomplished researcher and storyteller Kendall Haven, establishes the need for understanding the research findings in neural psychology and brain development and the value of a common definition of story if one is to fully grasp the importance and necessity of story to the development of the human mind. To support his case, he reviews a wealth of research from storytellers, teachers, and others who have experienced the power of story firsthand. The author has collected anecdotal experiences from over 100 performing storytellers and from 1,800 story practitioners (mostly teachers) who have made extensive use of stories. He has read more than 150 qualitative and quantitative research studies that discuss the effectiveness of stories and/or storytelling for one or more specific applications (education, organizational management, knowledge management, medical and narrative therapy, etc.). Forty of these studies were literature reviews and comparative studies including analysis of over 1,000 studies and descriptive articles. He has also gathered research evidence from his own story performances for total audiences of over 4 million and from conducting story writing workshops with 200,000 students and 40,000 teachers.
