How can America revitalize its innovation leadership and kick-start the economy again? In *Great Again*, veteran high-tech CEO Henry Nothhaft takes us inside the heart of America's innovation community to surface a new proposal for the job creation and economic growth we need. Bringing to life the human drama of the exhilarating, demanding and often frustrating startup environment, Nothhaft offers this complex world as the setting for a promising solution to the country's current standstill. Nothhaft, with journalist David Kline, says a breakthrough can be achieved through a series of practical and achievable tax, regulatory and other reforms that would help strengthen entrepreneurial startup businesses--and offer the necessary fuel for an American resurgence. They key is to bolster the segment and lessen the startup's struggle against a perfect storm of "red tape" burdens. In fact, this entrepreneurial ecosystem may be the only force in society that can create revolutionary innovations that would lead to new industries and millions of new jobs--generating prosperity again for all citizens. *Great Again* provides fresh research and original analysis to offer an entirely new lens for recovery. **Beyond Collisions** Maria Meyers 2017-12-19 In communities across America, people are trying to support entrepreneurs. They know entrepreneurs add jobs, character and vitality to a community's economy. Beyond Collisions gets behind the meetups, the accelerators and the hackathons to provide a guide for how to support entrepreneurs - how to build the entrepreneurial infrastructure. Entrepreneurship is poised to take its place alongside attraction and retention as a key economic development strategy. In traditional economic development, there is a defined process for the attraction and retention of companies. With entrepreneurship, there's been no infrastructure, no roadmap. In most communities, efforts to support entrepreneurs are fragmented. Beyond Collisions provides a clear, proven path to building the entrepreneurial infrastructure that can enable people to start and grow thriving companies. It's not one program, no silver bullet. It's a process, a strategy to identify, connect and empower entrepreneurial support resources, and then measure the results. Maria Meyers, Kate Pope Hodel and the SourceLink team have been working in Kansas City and across the country for 15 years, listening, learning and leading. They join with others, the entrepreneurs of entrepreneurship, to share hard-earned lessons about how to build the kind of inclusive, supportive network that encourages entrepreneurship. Beyond Collisions explores key questions. Section One addresses why should a community support entrepreneurship, what an entrepreneurial infrastructure looks like and who benefits. Section Two provides practical, tactical steps to identify, connect, empower and measure the entrepreneurial infrastructure. Section Three outlines strategies around marketing, funding and leadership. Sprinkled throughout are stories from the field, firsthand accounts of building networks, encouraging entrepreneurs and analyzing outcomes.

**Creativity, Innovation, and Entrepreneurship** H. James Harrington 2018-11-13 People with ideas are dreamers. People who get things done are doers. One doer is worth eight dreamers. There are three kinds of people who make up an innovator. There are inventors (people who have new and unique ideas), problem solvers (people who have ideas about how to correct a previous error) and entrepreneurs (people who transform ideas into realities). Put them altogether they spell "innovator." Most innovative books today focus on ways to create new and unique ideas; some of them also address problem-solving, but this is less than 10% of the methodologies that the innovator needs to master. The approaches used in this book transform an idea into reality, or to put it another way, deliver innovative products to make a profit for the organization and instill pride in its employees. This means that every step in the process needs to have innovation applied to it in order to meet the expectations and demands of today's sophisticated customer. This book is designed to help the reader and their organization complete the complex process of bringing a new product to market by presenting what is expected at each step in the cycle and providing step-by-step instructions on what to do at each specific step. In large to mid-sized organizations this book is designed to help each individual understand how they fit into the innovative cycle and explains why they should be more creative related to the work they do and more conscious of the contributions they can make. It emphasizes the importance of every individual

contributing to the organization's innovative process. The book is designed to help the organization understand its Innovation Systems Cycle. In the early part of the cycle it focuses on weeding out projects that do not have the potential to produce value-added results to the stakeholders. By using the guidelines outlined in this book, an organization can reduce its new project failure rate by as much as 50% which should result in almost doubling the organization's new product output thereby increasing profits by as much as 15%.

**The New Entrepreneurial Leader** Danna Greenberg 2011-09-06 In years past, the keywords for leaders were confidence, single-minded purpose, and strategic planning. But today's vastly complex, globalized, and fast-evolving world requires a different kind of leadership. This game-changing book details a new approach—entrepreneurial leadership—developed at Babson College, the number-one school for entrepreneurship in the world. Entrepreneurial leadership is inspired by, but is separate from, entrepreneurship. It can be applied in any organizational situation, not just start-ups. Based on two years of extensive research, it embraces three principles that add up to a fundamentally new worldview of business and a new logic of decision making. First, rapid change and increasing uncertainty require leaders to be “cognitively ambidextrous,” able to shift between traditional “prediction logic” (choosing actions based on analysis) and “creation logic” (taking action despite considerable unknowns). Guiding this different way of thinking and acting is a new view of business, where simultaneous creation of social, environmental, and economic value is the order of the day. Finally, entrepreneurial leaders leverage their understanding of themselves and their social context to guide effective action. Each chapter offers concrete examples of how educators across all disciplines are integrating these ideas into their courses—and even their entire curricula. *The New Entrepreneurial Leader* lays out a comprehensive new paradigm for reinventing management education in order to mold leaders who will shape social and economic opportunity.

*Competitive Strategies for Academic Entrepreneurship: Commercialization of Research-Based Products* Szopa, Anna 2015-09-21 In recent years, the pace of technological growth—from the very first stages of research and development to full-scale industrial implementation—has quickened at an exponential rate. To better keep pace with rapidly-changing market demands, the gap between university research incubators and public-sector start-up companies has undergone a marked contraction. *Competitive Strategies for Academic Entrepreneurship: Commercialization of Research-Based Products* seeks to fill the gap in research between universities and the public, and offers cutting-edge insight into the current state of the field. Charting a course that moves from discussions of academic resistance and implications for knowledge-transfer theory to current case-studies of academic/industrial launch-pads like COTEC's Technology Commercialization Accelerator and the Maryland Industrial Partnerships program, this publication targets an audience of academicians, administrators, researchers, entrepreneurs, and established professionals, and seeks to provide insight into the mechanisms by which the research of today becomes the household names of tomorrow.

Many leaders see their roles as presidents/managers, with a primary focus on keeping results consistent with past performance and on budget. After three careers and demanding roles as CFO, CEO, chairman, lead director, adjunct professor, founder, author, entrepreneur and investor, Joel Peterson is often sought as a mentor and coach by leaders and aspiring leaders. He has worked with all types of leaders and considers the entrepreneurial leader to be the highest level of influence. In *Entrepreneurial Leadership*, Peterson lays out a path to achieving this summit with a series of leadership maps organized around the four essential basecamps: Establishing Trust Creating a Sense of Mission Building a Cohesive Team Executing and Delivering Results These core philosophies, while easy to summarize, can be extremely difficult to implement. This book of maps and mindsets is aimed at those who hope to lead others, help them achieve their best, break new barriers, change the status quo, create a legacy, develop a brand, and enjoy a life-altering experience. developed to create the greatest wealth for society as a whole? This is the question Peter Drucker sets out to answer in *Innovation and Entrepreneurship*. A brilliant, mould-breaking attack on management orthodoxy it is one of Drucker's most important books, offering an excellent overview of some of his main ideas. He argues that what defines an entrepreneur is their attitude to change: 'the entrepreneur always searches for change, responds to it and exploits it as an opportunity'. To exploit change, according to Drucker, is to innovate. Stressing the importance of low-tech entrepreneurship, the challenge of balancing technological possibilities with limited resources, and the organisation as a learning organism, he concludes with a vision of an entrepreneurial society where individuals increasingly take responsibility for their own learning and careers. *The Innovator's DNA* Jeff Dyer 2011-07-12 A new classic, cited by leaders and media around the globe as a highly recommended read for anyone interested in innovation. In *The Innovator's DNA*, authors Jeffrey Dyer, Hal Gregersen, and bestselling author Clayton Christensen (*The Innovator's Dilemma*, *The Innovator's Solution*, *How Will You Measure Your Life?*) build on what we know about disruptive innovation to show how individuals can develop the skills necessary to move progressively from idea to impact. By identifying behaviors of the world's best innovators—from leaders at Amazon and Apple to those at Google, Skype, and Virgin Group—the authors outline five discovery skills that distinguish innovative entrepreneurs and executives from ordinary managers: Associating, Questioning, Observing, Networking, and Experimenting. Once you master these competencies (the authors provide a self-assessment for rating your own innovator's DNA), the authors explain how to generate ideas, collaborate to implement them, and build innovation skills throughout the organization to result in a competitive edge. This innovation advantage will translate into a premium in your company's stock price—an innovation premium—which is possible only by building the code for innovation right into your organization's people, processes, and guiding philosophies. Practical and provocative, *The Innovator's DNA* is an essential resource for individuals and teams who want to strengthen their innovative prowess.
