The Semiotics of Movement in Space Robert James McMurtrie 2016-12-01 The Semiotics of Movement in Space explores how people move through buildings and interact with objects in space. Focusing on visitors to the Museum of Contemporary Art in Sydney, McMurtrie analyses and interprets movement and space relations to highlight new developments and applications of spatial semiotics as he proposes that people's movement options have the potential to transform the meaning of a particular space. He illustrates people's interaction with microcamera footage of people's movement through the museum from a first-person point of view, thereby providing an alternative, complementary perspective on how buildings are actually used. The book offers effective tools for practitioners to analyse people's actual and potential movement patterns to rethink spatial design options from a semiotic perspective. The applicability of the semiotic principles developed in this book is demonstrated by examining movement options in a restaurant and a café, with the hope that the principles can be developed and applied to other sites of displays such as shopping centres and transportation hubs. This book should appeal to scholars of visual communication, semiotics, multimodal discourse analysis and visitor studies.

Museums and Communities Viv Golding 2013-08-01 This edited volume critically engages with contemporary scholarship on museums and their engagement with the communities they purport to serve and represent. Foregrounding new curatorial strategies, it addresses a significant gap in the available literature, exploring some of the complex issues arising from recent approaches to collaboration between museums and their communities. The book unpacks taken-for-granted notions such as scholarship, community, participation and collaboration, which can gloss over the complexity of identities and lead to tokenistic claims of inclusion by museums. Over sixteen chapters, well-respected authors from the US, Australia and Europe offer a timely critique to

address what happens when museums put community-minded principles into practice, challenging readers to move beyond shallow notions of political correctness that ignore vital difference in this contested field. Contributors address a wide range of key issues, asking pertinent questions such as how museums negotiate the complexities of integrating collaboration when the target community is a living, fluid, changeable mass of people with their own agendas and agency. When is engagement real as opposed to symbolic, who benefits from and who drives initiatives? What particular challenges and benefits do artist collaborations bring? Recognising the multiple perspectives of community participants is one thing, but how can museums incorporate this successfully into exhibition practice? Students of museum and cultural studies, practitioners and everyone who cares about museums around the world will find this volume essential reading.

This unique textbook provides a foundation for students advancing to a career in the types of spaces—museums, historic sites, heritage tourism, and archives—that require an understanding of public history. It offers a review of the various types of methodologies that are commonly employed including oral history and digital history. The author also explores issues of monuments and memory upon which public historians are increasingly called to comment. Lastly, the textbook includes a section on questions of ethics that public historians must face in their profession. This important book: Contains a synthetic history on the significant individuals and events associated with museums, historic preservation, archives, and oral history. Partial Differential Equations Walter A. Strauss 2007-12-21 *Partial Differential Equations* presents a balanced and comprehensive introduction to the concepts and techniques required to solve problems containing unknown functions of multiple variables. While focusing on the three most classical partial differential equations (PDEs)—the wave, heat, and Laplace equations—this detailed text also presents a broad practical perspective that merges mathematical concepts with real-world application in diverse areas including molecular structure, photon and electron interactions, radiation of electromagnetic waves, vibrations of a solid, and many more. Rigorous pedagogical tools aid in student comprehension; advanced topics are introduced frequently, with minimal technical jargon, and a wealth of exercises reinforce vital skills and invite additional self-study. Topics are presented in a logical progression, with major concepts such as wave propagation, heat and diffusion, electrostatics, and quantum mechanics placed in contexts familiar to students of various fields in science and engineering. By understanding the properties and applications of PDEs, students will be equipped to better analyze and interpret central processes of the natural world.

Exhibit Makeovers Alice Parman 2017-02-15 Since its publication in 2008, Exhibit Makeovers has been a useful do-it-yourself handbook for museum staff and volunteers. Exhibit Makeovers is a workbook that provides grounding in interpretive principles, how-to-advice, step-by-step guidance, and moral support for in-house exhibit planning and design. The revised and expanded 2nd edition preserves the supportive tone and easy-to-follow steps that make the original Exhibit Makeovers so user-friendly. Significant revisions—especially in the technology arena—and additions make this new edition a must-have addition to any museum's toolkit: • New emphasis on visitor input, with step-by-step guidelines for evaluation studies during planning and design. • New text and worksheets to guide development of interactives, and ensure varied levels of visitor participation. • Focus on affordable software to help with exhibit planning and design, as well as low- cost technologies that can vary and deepen the visitor experience. • Brand-new chapters on exhibit design, production, and installation, written by the experienced team responsible for in-house exhibits at a thriving, mid-size museum. Following the same pattern as the 2008 original, the revised Exhibit Makeovers guides users through step-by-step processes of a single-case makeover, development of a new exhibit, and renovation/renewal of an entire gallery or museum.

Exhibits in Libraries Mary E. Brown 2014-12-09 Library exhibits are more than entertainment for patrons. They can inspire and educate, stimulate an interest that can be explored in a book, or attract visitors who otherwise wouldn't stop

by. Displays are also an opportunity for a library to put its creative foot forward or help patrons navigate the facility itself. This comprehensive “how-to” includes everything a librarian or staff member needs to know to put on an exhibit, from hatching ideas to evaluating the end result. Illustrations and photographs show practical methods of planning, labeling and displaying. An introduction discusses the history and rationale of exhibits, and what librarians need to know to be responsible for them. Most of the book’s pages, however, are dedicated to the hands-on process of creating an exhibit. The first part is a ten-step process for beginners. The second part includes everything a librarian or staff member might want to consider when creating an exhibit: the beginning idea (theme, goals, location); the development and design (layout, labeling and related concerns); the fabrication (materials and installation); and the exhibit from installation to removal (maintenance, care of volunteers, evaluation). Related issues include safety, administration, funding, contracts, public relations and other practical topics. Another section looks at special projects such as traveling displays and hands-on exhibits. Finally, the authors provide syllabi for continued study in a workshop or college course, along with a self-study guide.

Museum Exhibition Planning and Design Elizabeth Bogle 2013-09-20 Great exhibits are never an accident. Planning effective exhibits is a demanding process that requires the designer to consider many different aspects and navigate numerous pitfalls while moving a project from concept to reality. In *Museum Exhibition Planning and Design*, Elizabeth Bogle offers a comprehensive introduction and reference to exhibition planning and design. This book focuses on both the procedural elements of successful planning, like the phases of exhibit design and all associated tasks and issues, and on the design elements that make up the realized exhibit itself, such as color, light, shape, form, space, and building materials. This helpful guide includes: Breakdown of the design and development project phases used by professional planner/designers Principles of good design as they pertain to: color, light, shape, form, space, line, balance, accent, rhythm, proportion, and scale Criteria to evaluate an exhibit and measure its success Discussion of construction contracts and procedures Discussion of building materials and their advantages and disadvantages Glossary of museum and design terms for easy reference Bogle has translated her years of experience as an exhibition planner into a guide for practitioners of all sizes and levels of experience. For the solo practitioner, perhaps working with limited or no staff in a small institution, Bogle walks through every task that will be faced as the project develops. For the staff member of a larger

institution or firm, this book serves as a checklist, reinforcing the instruction that comes from peers and previous experience. *Museum Exhibition Planning and Design* is a useful tool for anyone interested in or involved in bringing their exhibits to life.

Museums in Motion Edward P. Alexander 2017-02-23 Here is a complete introduction to the history of museums, types of museums, and the key roles that museums play in the twenty-first century. Throughout, emphasis is on museums in the United States, although attention is paid to the historical framing of museums within the European context. The new edition includes discussions of technology, access, and inclusivity woven into each chapter, a list of challenges and opportunities in each chapter, and "Museums in Motion Today," vignettes spread throughout the volume in which museum professionals provide their perspectives on where museums are now and where they are going. Museum Learning Jill Hohenstein 2017-10-16 As museums are increasingly asked to demonstrate not only their cultural, but also their educational and social significance, the means to understand how museum visitors learn becomes ever more important. And yet, learning can be conceptualised and investigated in many ways. Coming to terms with how theories about learning interact with one another and how they relate to 'evidence-based learning' can be confusing at best. *Museum Learning* attempts to make sense of multiple learning theories whilst focusing on a set of core learning topics in museums. Importantly, learning is considered not just as a cognitive characteristic, as some perspectives propose, but also as affective, taking into consideration interests, attitudes, and emotions; and as a social practice situated in cultural contexts. This book draws attention to the development of theory and its practical applications in museum situations such as aquariums, zoos, botanical gardens and historical re-enactment sites, among others. This volume will be of interest to museum studies students, practitioners and researchers working in informal learning contexts, and will help them to reflect on what it means to learn in museums and create more effective environments for learning.

Identity and the Museum Visitor Experience John H Falk 2016-06-16 Understanding the visitor experience provides essential insights into how museums can affect people's lives. Personal drives, group identity, decision-making and meaning-making strategies, memory, and leisure preferences, all enter into the visitor experience, which extends far beyond the walls of the institution both in time and space. Drawing upon a career in studying museum visitors, renowned

researcher John Falk attempts to create a predictive model of visitor experience, one that can help museum professionals better meet those visitors' needs. He identifies five key types of visitors who attend museums and then defines the internal processes that drive them there over and over again. Through an understanding of how museums shape and reflect their personal and group identity, Falk is able to show not only how museums can increase their attendance and revenue, but also their meaningfulness to their constituents.

Museum Texts Louise Ravelli 2007-01-24 Answering key questions in the study of how museums communicate, Louise Ravelli provides a set of frameworks to investigate the complexities of communication in museums: * What is an appropriate level of complexity for a written label? * Why do some choice in language make a more direct relation to visitors? * Is there a correct way of presenting a particular view of content? * How do design practices contribute to the overall meanings being made? The frameworks enhance the way we critically analyze and understand museums text, both in the sense of conventional – written texts in museums – and in an expanded sense of the museum as a whole operating as a communicative text. Using a wide range of examples Ravelli argues that communication contributes fundamentally to what a museum is, who it relates to and what it stands for. Not only museum studies and communications studies students, but also professionals in the field will find *Museum Texts* an indispensable guide on communication frameworks.

Manual of Museum Exhibitions Barry Lord 2014-04-07 All museum activities converge in the public forum of the exhibition – regardless of whether the exhibit is held in the physical museum or is on the Web. Since the first edition of this book in 2002, there has been a world-wide explosion of new galleries and exhibition halls, and new ideas about how exhibitions should look and communicate. The definition of what an exhibition is has changed as exhibitions can now be virtual; non-traditional migratory and pop-up spaces play host to temporary displays; social media has created amazing opportunities for participatory engagement and shifted authority away from experts to the public; and as time-constrained audiences demand more dynamic, interactive, and mobile applications, museum leadership, managers, staff, and designers are rising to these challenges in innovative ways. Drawing on years of experience and top-flight expertise, Barry Lord and Maria Piacente detail the exhibition process in a straightforward way that can be easily adapted by institutions of any size. They explore the exhibition development process in greater detail, providing the technical and practical methodologies museum professionals need today. They've added new features and expanded chapters on project management, financial planning and interactive multimedia while retaining the essential content related to interpretive planning, curatorship, and roles and responsibilities. This second edition of the standby *Manual of Museum Exhibitions* is arranged in four parts: Why – Covering the purpose of exhibits, where exhibit ideas come from, and how to measure success Where – Covering facilities and spaces, going into details including security, and interactive spaces What – A look at both permanent collection displays, and non-collection displays, as well as virtual, participatory, temporary, travelling displays, and retail sales How – Who is involved, planning, curatorship, and content development, design, multimedia, fabrication and installation, financial planning, and project management Over 130 figures and photographs illustrate every step of the exhibit process. No museum can be without this critical, detailed guide to an essential function.

The Oxford Handbook of Public History James B. Gardner 2017-09-20 *The Oxford Handbook of Public History* introduces the major debates within public history; the methods and sources that comprise a public historian's tool kit; and exemplary examples of practice. It views public history as a dynamic process combining historical research and a wide range of work with and for the public,

informed by a conceptual context. The editors acknowledge the imprecision bedeviling attempts to define public history, and use this book as an opportunity to shape the field by taking a deliberately broad view. They include professional historians who work outside the academy in a range of institutions and sites, and those who are politically committed to communicating history to the wide range of audiences. This volume provides the information and inspiration needed by a practitioner to succeed in the wide range of workplaces that characterizes public history today, for university teachers of public history to assist their students, and for working public historians to keep up to date with recent research. This handbook locates public history as a professional practice within an intellectual framework that is increasingly transnational, technological, and democratic. While the nation state remains the primary means of identification, increased mobility and the digital revolution have occasioned a much broader outlook and awareness of the world beyond national borders. It addresses squarely the tech-savvy, media-literate citizens of the world, the "digital natives" of the twenty-first century, in a way that recognizes the revolution in shared authority that has swept museum work, oral history, and much of public history practice. This volume also provides both currently practicing historians and those entering the field a map for understanding the historical landscape of the future: not just to the historiographical debates of the academy but also the boom in commemoration and history outside the academy evident in many countries since the 1990s, which now constitutes the historical culture in each country. Public historians need to understand both contexts, and to negotiate their implications for questions of historical authority and the public historian's work. The boom in popular history is characterized by a significant increase in both making and consuming history in a range of historical activities such as genealogy, family history, and popular collecting; cultural tourism, historic sites, and memorial museums; increased memorialization, both formal and informal, from roadside memorials to state funded shrines and memorial Internet sites; increased publication of historical novels, biographies, and movies and TV series set in the past. Much of this, as well as a vast array of new community cultural projects, has been facilitated by the digital technologies that have increased the accessibility of historical information, the democratization of practice, and the demand for sharing authority.

Engaging Communities Through Civic Engagement in Art Museum Education Bobick, Bryna 2020-12-25 As art museum educators become more involved in curatorial decisions and creating opportunities for community voices to be represented in the galleries of the museum, museum education is shifting from responding to works of art to developing authentic opportunities for engagement with their communities. Current research focuses on museum education experiences and the wide-reaching benefits of including these experiences into art education

courses. As more universities add art museum education to their curricula, there is a need for a text to support the topic and offer examples of real-world museum education experiences. *Engaging Communities Through Civic Engagement in Art Museum Education* deepens knowledge on museum and art education and civic engagement and bridges the gap from theory to practice. The chapters focus on various sectors of this research, including diversity and inclusion in museum experiences, engaging communities through new techniques, and museum and university partnerships. As such, it includes coverage on timely topics that include programs and audience engagement with the LGBTQ+, refugee, disability, and senior communities; socially responsive museum pedagogy; and the use of student workers. This book is ideal for museum educators, museum directors, curators, professionals, practitioners, researchers, academicians, and students who are interested in updated knowledge and research in art education, curriculum development, and civic engagement.

Manual of Museum Exhibitions Maria Piacente 2022-01-20 Drawing on years of experience, Maria Piacente details the exhibition process in a straightforward way that can be easily adapted by institutions of any size. She and her contributing authors explore the exhibition development process in greater detail, providing the technical and practical methodologies museum professionals need today.

These Mysterious People, Second Edition Susan Roy 2016-05-01 Archaeologists studying human remains and burial sites of North America's Indigenous peoples have discovered more than information about the beliefs and practices of cultures - they have also found controversy. *These Mysterious People* shows how Western ideas and attitudes about Indigenous peoples have transformed one culture's ancestors, burial grounds, and possessions into another culture's "specimens," "archaeological sites," and "ethnographic artifacts," in the process disassociating Natives from their own histories. Focusing on the Musqueam people and a contentious archaeological site in Vancouver, *These Mysterious People* details the relationship between the Musqueam and researchers from the late-nineteenth century to the present. Susan Roy traces the historical development of competing understandings of the past and reveals how the Musqueam First Nation used information derived from archaeological finds to assist the larger recognition of territorial rights. She also details the ways in which Musqueam legal and cultural expressions of their own history - such as land claim submissions, petitions, cultural displays, and testimonies - have challenged public accounts of Aboriginal occupation and helped to define Aboriginal rights in Canada. An important and engaging examination of methods of historical representation, *These Mysterious People* analyzes the ways historical evidence, material culture, and places themselves have acquired legal and community authority.

Biogenic Amines and Neuromodulation of Animal Behavior, 2nd Edition Irina T. Sinakevitch 2018-11-30 Since Erspamer and Boretti, 1951 first described the biogenic amine octopamine in the octopus salivary gland as a molecule with "adrenaline-like" action, decades of extensive studies demonstrated the

important role octopamine and its precursor tyramine play in invertebrate physiology and behavior. This book contains the latest original research papers on tyramine/octopamine and their receptors in different neuronal and non-neuronal circuits of insects. Additionally, this book elucidates in detail the latest research on the function of other biogenic amines and their receptors, such as dopamine and serotonin in insects and mice. The reviews in this book summarize the most recent research on the role of biogenic amines in insect antennae, synaptic development, and behavioral modulation by spontaneous dopamine release in *Drosophila*. Finally, one perspective paper discusses the evolution of social behavior and biogenic amines. We recommend this book for all scholars interested in the latest advanced research on the role of biogenic amines in animal behavior. ITS dedicates the topic to her teacher, Plotnikova Svetlana Ivanovna (1922-2013).

The Care and Display of Historic Clothing Karen M. DePauw 2017-07-18 Wearable textiles hold their own stories of trade, manufacture and regionalism, just to name a few; they also tell a personal tale of the individuals who created our history. When we look at a piece of clothing, a coat, a dress, an undergarment, we see an item that is more personal, more closely related to the human body than nearly anything else it comes in contact with throughout the day. Garments can do far more for exhibitions and interpretation than merely providing a bit of color and beauty. Clothing is both artistic and utilitarian and is capable of adding so much to the story of who we are and where we came from. *The Care and Display of Historic Clothing* aims to assist with the full integration of costume collections into the interpretation of the past. Often relied on for their ability to add beauty and color to exhibitions, these collection items provide a very personal side to any story at a given moment in history. The topics explored in this publication range from the care and identification of items in a costume collection to discussions about both physical display and how they can be used to engage audiences. The book's focus is on costume collections and discussion topics will include information in regards to costume collection storage, display techniques, basic identification, and ideas on how to incorporate costumes into exhibitions and programming. A list of further resources at the back of the book helps provide supplemental, in-depth information on individual areas. The layout of this work will aim to provide information that slowly leads from understanding your costume collection and obtaining physical control to incorporating it in a significant and informative way into the work of the organization. Providing all of these resources in one place will make the incorporation of costumes a more obtainable goal for small to mid-sized museums and historical societies.

It addresses effective research-supported ways to differentiate instruction, as well as how curriculum can be extended, accelerated, and enriched for the C3 framework. Packed with various teaching

The Participatory Museum Nina Simon 2010 Visitor participation is a hot topic in the contemporary world of museums, art galleries, science centers, libraries and cultural organizations. How can your institution do it and do it well? The Participatory Museum is a practical guide to working with community members and visitors to make cultural institutions more dynamic, relevant, essential places. Museum consultant and exhibit designer Nina Simon weaves together innovative design techniques and case studies to make a powerful case for participatory practice. "Nina Simon's new book is essential for museum directors interested in experimenting with audience participation on the one hand and cautious about upending the tradition museum model on the other. In concentrating on the practical, this book makes implementation possible in most museums. More importantly, in describing the philosophy and rationale behind participatory activity, it makes clear that action does not always require new technology or machinery. Museums need to change, are changing, and will change further in the future. This book is a helpful and thoughtful road map for speeding such transformation." -Elaine Heumann Gurian, international museum consultant and author of *Civilizing the Museum* "This book is an extraordinary resource. Nina has assembled the collective wisdom of the field, and has given it her own brilliant spin. She shows us all how to walk the talk. Her book will make you want to go right out and start experimenting with participatory projects." -Kathleen McLean, participatory museum designer and author of *Planning for People in Museum Exhibitions* "I predict that in the future this book will be a classic work of museology." --Elizabeth Merritt, founding director of the Center for the Future of Museums

Broader Impacts of Science on Society Bruce J. MacFadden 2019-10-31 Invaluable guidance on how scientists can communicate the societal benefits of their work to the public and funding agencies. This will help scientists submit proposals to the US National Science Foundation and other funding agencies with a 'Broader Impacts' section, as well as helping to develop successful wider outreach activities.

Academic Libraries and Public Engagement With Science and Technology Eileen Harrington 2019-04-15 Libraries have historically played a role as a community builder, providing resources and spaces where knowledge can be archived, shared and created. They can also play a pivotal role in fostering the public's understanding of science and scientific processes. From makerspaces to data visualization labs to exhibits, many libraries already delve into scientific explorations and many more could join them. Scientists often need to include "broader impacts" goals in grant proposals, but they might not know where to begin or feel that they do not have the time to devote to public engagement. This is where libraries and librarians can help. Research in science communication also supports tapping into libraries for public engagement with science. Studies show that it is important for scientists to present findings in an apolitical way-not aligning with one solution or one way of thinking and not being seen as an activist (Druckman, 2015; Jamieson & Hardy, 2014). One of the core tenets of librarians and libraries is to present information in a neutral way. Research also shows that Informal conversations about science can have a greater effect on people than reading about it online or hearing about it on the news (Eveland & Cooper, 2013). Again, libraries can play a role in fostering these types of conversations. Given this landscape, this book will demonstrate concrete ways that libraries and librarians can play a role in fostering public engagement with science. In addition to background information on the current landscape of public knowledge and understanding of science, it will also include best practices and case studies of different types of programming and services that libraries can offer. Often libraries do not jump to mind when people think about science education or science literacy, and many librarians do not come from a science background. Literature on science programming and sharing science is largely absent from the library field. This book will help give confidence to librarians that they can participate in engaging the public with science. At the same time, it will provide a conduit to bring informal science educators, communication officers from universities or research organizations who share scientific discoveries with the public, and librarians together to explore ways to align their work to promote scientific literacy for all.
