Designing and Building Traditional Cabinets - Kurzhaus

Weban eye-soothing horizontal line. Base cabinets are a different story. I vary the heights and depths of base cabinets to suit the application. I also bump out my stove and sink bases by as much as 6 inches. That way I have plenty of room for mounting fixtures behind the sink, and the homeowner has a place to put cooking condiments behind the stove.

EVOSTONE TECHNICAL MANUAL

WebCUT-OUTS Common internal cut-out such as sinks, cooktops and tap holes are to be a minimum of 75mm from any joint, 45mm from the front edge for cooktops and 65mm for sinks. See Design and Production. Internal cut-outs require a minimum of 10mm radius corners and have a 3mm radius on the top and bottom edge. Cut-outs should be free
