The French Revolution in Global Perspective Suzanne Desan 2013-03-19 Situating the French Revolution in the context of early modern globalization for the first time, this book offers a new approach to understanding its international origins and worldwide effects. A distinguished group of contributors shows that the political culture of the Revolution emerged out of a long history of global commerce, imperial competition, and the movement of people and ideas in places as far flung as India, Egypt, Guiana, and the Caribbean. This international approach helps to explain how the Revolution fused immense idealism with territorial ambition and combined the drive for human rights with various forms of exclusion. The essays examine topics including the role of smuggling and free trade in the origins of the French Revolution, the entwined nature of feminism and abolitionism, and the influence of the French revolutionary wars on the shape of American empire. The French Revolution in Global Perspective illuminates the dense connections among the cultural, social, and economic aspects of the French Revolution, revealing how new political forms-at once democratic and imperial, anticolonial and centralizing-were generated in and through continual transnational exchanges and dialogues. At the Strangers' Gate Adam Gopnik 2017-09-05 From The New York Times best-selling author of *Paris to the Moon* and beloved New Yorker writer, a memoir that captures the romance of New York City in the 1980s. When Adam Gopnik and his soon-to-be-wife, Martha, first arrived in 1980, New York City was a pilgrimage site for the young, the arty, and the ambitious. But it was also becoming a place where both life's consolations and its necessities were increasingly going to the highest bidder. *At the Strangers' Gate* is a vivid portrait of this time, told through the story of one couple's journey—from their excited arrival as aspiring artists to their eventual growth into a New York family. Through a series of comic mini-anthropologies that capture the fashion, publishing, and art worlds of the era, Adam Gopnik transports us from his tiny basement room on the Upper East Side to a SoHo loft, from his time as a graduate student-cum-library-clerk to the galleries of MoMA. Filled with tender and humorous reminiscences—including affectionate reflections on Richard Avedon, Robert Hughes, and Jeff Koons, among many others—*At the Strangers' Gate* is an ode to New York striving.

Critique of Black Reason Achille Mbembe 2017-02-17 In *Critique of Black Reason* eminent critic Achille Mbembe offers a capacious genealogy of the category of Blackness—from the Atlantic slave trade to the present—to critically reevaluate history, racism, and the future of humanity. Mbembe teases out the intellectual consequences of the reality that Europe is no longer the world's center of gravity while mapping the relations among colonialism, slavery, and contemporary financial and extractive capital. Tracing the conjunction of Blackness with the biological fiction of race, he theorizes Black reason as the collection of discourses and practices that equated Blackness with the nonhuman in order to uphold forms of oppression. Mbembe powerfully argues that this equation of Blackness with the nonhuman will serve as the template for all new forms of exclusion. With *Critique of Black Reason*, Mbembe offers nothing less than a map of the world as it has been constituted through colonialism and racial thinking while providing the first glimpses of a more just future.

with other specialties in psychology, especially social and health psychology, together with other disciplines such as geography, architecture, sociology, anthropology, urbanism and engineering. Faced with the problems of society which involve the quality of life of individuals and communities, it is fundamental to consider the relationships an individual has with his different living spaces. This issue of the links between quality of life and environment is becoming increasingly significant with, at a local level, problems resulting from different types of annoyances, such as pollution and noise, while, at a global level, there is the central question of climate change with its harmful consequences for humans and the planet. How can the impact on well-being of environmental nuisances and threats (for example, natural risks, pollution, and noise) be reduced? How can the quality of life within daily living spaces (home, cities, work environments) be improved? Why is it important to understand the psychological issues of our relationship with the global environment (climatic warming, ecological behaviours)? This Handbook is intended not only for students of various disciplines (geography, architecture, psychology, town planning, etc.) but also for social decision-makers and players who will find in it both theoretical and methodological perspectives, so that psychological and environmental dimensions can be better taken into account in their working practices.

Practices of Comparing Angelika Epple 2020-06-30 Practices of comparing shape how we perceive, organize, and change the world. Supposedly innocent, practices of comparing play a decisive role in forming categories, boundaries, and hierarchies; but they can also give an impetus to question and change such structures. Like almost no other human practice, comparing pervades all social, political, economic, and cultural spheres. This volume outlines the program of a new research agenda that places comparative practices at the center of an interdisciplinary exploration. Its contributions combine case studies with overarching systematic considerations. They show what insights can be gained and which further questions arise when one makes a seemingly trivial practice - comparing - the subject of in-depth research.

Peripheries at the Centre Machteld Venken 2021-03-01 Following the Treaty of Versailles, European nation-states were faced with the challenge of instilling national loyalty in their new borderlands, in which fellow citizens often differed dramatically from one another along religious, linguistic, cultural, or ethnic lines. *Peripheries at the Centre* compares the experiences of schooling in Upper Silesia in Poland and Eupen, Sankt Vith, and Malmedy in Belgium — border regions detached from the German Empire after the First World War. It demonstrates how newly configured countries envisioned borderland schools and language learning as tools for realizing the imagined peaceful Europe that underscored the political geography of the interwar period.

Showcaller 2019 *Showcaller* is the first book exploring the work of emerging artist Talia Chetrit. It brings together a broad range of her work made between 1994 and 2018 and is linked to a retrospective museum exhibition at the Kölnischer Kunstverein in early 2018. The title 'Showcaller' is a theatrical term which references the performative aspects of Chetrit's work, the power dynamic

between subject and photographer, and, ultimately, between the photographer and her audience. The earliest works included were made when Chetrit was a teenager and she adroitly collapses and shuffles images from across 24 years and neutralizes the space between family portraits, teenage friends, intimate sex pictures, self-portraits, staged murder pictures, still-lives, and street photographs, to name just a few of the subjects and genres her work adopts. Regardless of the subject matter or the technique with which the image is made, her focus lies on researching and unveiling the basic social, conceptual, and technical conditions of the genre of photography. Her work is imbued with a desire to control the physical and historical limitations of the camera, to trace its manipulative potential, and to question the relationship between photographer and subject. Exhibition: Kölnischer Kunstverein, Köln, Germany (12.02.-25.03.2018)

Capital in the Twenty-First Century Thomas Piketty 2017-08-14 What are the grand dynamics that drive the accumulation and distribution of capital? Questions about the long-term evolution of inequality, the concentration of wealth, and the prospects for economic growth lie at the heart of political economy. But satisfactory answers have been hard to find for lack of adequate data and clear guiding theories. In this work the author analyzes a unique collection of data from twenty countries, ranging as far back as the eighteenth century, to uncover key economic and social patterns. His findings transform debate and set the agenda for the next generation of thought about wealth and inequality. He shows that modern economic growth and the diffusion of knowledge have allowed us to avoid inequalities on the apocalyptic scale predicted by Karl Marx. But we have not modified the deep structures of capital and inequality as much as we thought in the optimistic decades following World War II. The main driver of inequality--the tendency of returns on capital to exceed the rate of economic growth--today threatens to generate extreme inequalities that stir discontent and undermine democratic values if political action is not taken. But economic trends are not acts of God. Political action has curbed dangerous inequalities in the past, the author says, and may do so again. This original work reorients our understanding of economic history and confronts us with sobering lessons for today.

The Emergence of National Food Atsuko Ichijo 2019-02-21 What do deep fried mars bars, cod, and Bulgarian yoghurt have in common? Each have become symbolic foods with specific connotations, located to a very specific place and country. This book explores the role of food in society as a means of interrogating the concept of the nation-state and its sub-units, and reveals how the nation-state in its various disguises has been and is changing in response to accelerated globalisation. The chapters investigate various stages of national food: its birth, emergence, and decline, and why sometimes no national food emerges. By collecting and analysing a wide range of case studies from countries including Portugal, Mexico, the USA, Bulgaria, Scotland, and Israel, the book illustrates ways in which various social forces work together to shape social and political realities concerning food. The contributors, hailing from anthropology, history, sociology and political science, investigate the significance of specific food cultures, cuisines, dishes, and ingredients, and their association with national identity. In so doing, it becomes clearer how these two things interact, and demonstrates the scope and direction of the current study of food and nationalism.

Fabien Baron Fabien Baron 2008 Liquid Light 19832003 is a single-volume monograph assembled from the personal work of Fabien Baron. Spanning twenty years and two continents, the collection draws from over 2,000 photographs taken on the coasts of Eastern America, Western Europe, and the Mediterranean. As the title suggests, the book chronicles Barons transformation of concrete, geographical sites into abstract tableaux. Utilizing long exposure for each image, Baron reveals the most essential aspect of his subject matter: light. Returning year after year to each location, Baron achieves a meditative rhythm that is readily apparent when the work is viewed sequentially. While each image varies infinitely in detailweather, hour, and light change, as do lenses and film stockthey all maintain a fundamental composition: water and sky bisected by horizon. The horizon line, a crucial element in the photograph, defines color planes free of a visual hierarchy. The viewer is released from conventional, figurative ways of seeing. Subtle gradations in color and tone offset the repetition of form, creating abstract vistas where sea and sky are one and the same. The images are deceptively still: chromatic abstractions gleaned from a sea and a sky that are never stationary and never entirely empty. Above all, the photographs reflect the state in which they were producedone of internal calm and meditationand the books structure echoes this.

Zack Carr George Carr 2002 As the creative director of Calvin Klein, where he worked for nearly three decades, Zack Carr helped develop the house into one of the premier forces in fashion worldwide. His premature death from cancer in 2000 cut short a life and career that indelibly altered the status of American fashion, and in the process more than any other helped stamp it "The Look" and "Lifestyle" to which so many across the globe aspire. As a tribute to Carr's life and legacy, his brother George Carr and famed designer Sam Shahid have compiled an exquisite collection of photographs, sketches, and selected writings that makeZack Carran indispensable reference volume for aestheticians and people of taste, whether town or country. Born and raised in Kerrville, Texas, Carr began his career working for B. Altman & Co. and manufacturer Donald Brooks before joining Calvin Klein in the early 70s. He left Klein in 1984 to launch his own company, the Zack Carr Collection, but returned in 1988 where he worked until being diagnosed with POEMS Syndrome, a rare paralyzing blood cancer. Despite the illness, Carr continued to create, and, as the paralysis spread through his body, had to reteach himself how to draw. In his sketchbooks, Carr would paste cut-outs of his sketches, his "dolls" as he called them, alongside his inspirations—a Horst postcard here, a paparazzi snap of Carolyn Bessette there. Carr considered his sketchbooks to be "what I consider a true expression of myself...my being...what interests me, what excites me, what is me...and what is my true being."Zack Carris a splendid journey to that somewhere, taking us on a tour of his world inhabited by many muses (Balenciaga, Chanel, Audrey Hepburn, Jackie Kennedy), friends (Marina Schiano, Gwyneth Paltrow), and inspiration found in the form of art itself.

Paris to the Moon Adam Gopnik 2001-12-18 Paris. The name alone conjures images of chestnut-lined boulevards, sidewalk cafés, breathtaking façades around every corner--in short, an exquisite romanticism that has captured the American imagination for as long as there have been Americans. In 1995, Adam Gopnik, his wife, and their infant son left the familiar comforts and hassles of New York City for the urbane glamour of the City of Light. Gopnik is a longtime *New Yorker* writer, and the magazine has sent its writers to Paris for decades--but his was above all a personal pilgrimage to the place that had for so long been the undisputed capital of everything cultural and beautiful. It was also the opportunity to raise a child who would know what it was to romp in the Luxembourg Gardens, to enjoy a croque monsieur in a Left Bank café--a child (and perhaps a father, too) who would have a grasp of that Parisian sense of style we Americans find so elusive. So, in the grand tradition of the American abroad, Gopnik walked the paths of the Tuileries, enjoyed philosophical discussions at his local bistro,

wrote as violet twilight fell on the arrondissements. Of course, as readers of Gopnik's beloved and award-winning "Paris Journals" in The New Yorker know, there was also the matter of raising a child and carrying on with day-to-day, not-so-fabled life. Evenings with French intellectuals preceded middle-of-the-night baby feedings; afternoons were filled with trips to the Musée d'Orsay and pinball games; weekday leftovers were eaten while three-star chefs debated a "culinary crisis." As Gopnik describes in this funny and tender book, the dual processes of navigating a foreign city and becoming a parent are not completely dissimilar journeys--both hold new routines, new languages, a new set of rules by which everyday life is lived. With singular wit and insight, Gopnik weaves the magical with the mundane in a wholly delightful, often hilarious look at what it was to be an American family man in Paris at the end of the twentieth century. "We went to Paris for a sentimental reeducation-I did anyway-even though the sentiments we were instructed in were not the ones we were expecting to learn, which I believe is why they call it an education."

A. F. Vandevorst Alix Browne 2018-01-16 A fascinating insight into the stimulating universe of Belgium's cult fashion designer duo A.F. Vandevorst. A universe of fetishes, fur, leather, sensual folds and tight straitjackets... That is what Belgian fashion designers A.F. Vandevorst stand for. This publication celebrates their twentieth anniversary. 0An Vandevorst and Filip Arickx met in 1987, on their first day of school at the Royal Academy of Fine Arts in Antwerp. Ten years later, they set up their company Blixa and presented their first collection as A.F. Vandevorst in Paris. They have collaborated

with such people as the flamboyant hat designer Stephen Jones and have grown to become one of Belgium's most edgy cult designers, closely connected to the Antwerp Six (Dries Van Noten, Ann Demeulemeester, Walter Van Beirendonck). With fashion shows and flagship stores in Paris, New York and London, they are much respected internationally and hugely admired in Japan. A.F. Vandevorst's aesthetics are the result of their strong love for the visual arts, music and literature and of their great interest in cultural archetypes. This book focuses on their diverse inspirations, including Joseph Beuys, the military and the medical scene, and is a collaboration with artists to whom An and Filip feel strongly connected. Among them is Blixa Bargeld (Nick Cave & the Bad Seeds/Einsturzende Neubauten), who was the source of their first company's name and has been a big inspiration ever since.
