Choreo-Graphic Figures Nikolaus Gansterer 2017-04-24 Choreo-graphic Figures: Deviations from the Line stages a beyond-disciplinary, inter-subjective encounter between the lines of choreography, drawing and writing, for exploring those forms of thinking-feeling-knowing produced through collaborative exchange, in the slippage and deviation, as different modes of practice enter into dialogue, overlap, collide. The publication is conceived as a studio-laboratory in itself, drawing together critical reflections and experimental practices that focus on the how-ness -- the qualitative-procedural, aesthetic-epistemological and ethical-empathetic dynamics -- within shared artistic exploration, directing attention to an affective realm of forces and intensities existing before, between and beneath the more readable gestures of artistic practice.

Twelve Years a Slave Solomon Northup 2021-01-01 "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State--and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a

bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Data-Enabled Analytics Joe Zhu 2021 This book brings Data Envelopment Analysis (DEA) based techniques and big data together to explore the novel uses and potentials of DEA under big data. These areas are of widespread interest to researchers and practitioners alike. Considering the vast literature on DEA, one could say that DEA has been and continues to be, a widely used technique both in performance and productivity measurement, having covered a plethora of challenges and debates within the modelling framework. Over the past four decades, DEA models have been applied in almost every major field of study. However, DEA has not been used to its fullest extent. As the inter- and intra-disciplinary research grows, DEA could be used in potentially many other ways; for instance, DEA could be viewed as a data mining tool for data-enabled analytics. One opportunity is brought by the existence of big data. Although big data has existed for a while now, gaining popularity among insight seekers, we are still in incipient stages when it comes to taking full advantage of its potential. Generally, researchers have either been interested in examining its origin or in developing and using big data technology. As the amount of (big) data is growing every day in an exponential manner, so does its complexity; in this sense, various types of data are surfacing, whose study and examination could shed new light on phenomena of interest. A quick review of existing literature shows that big data is a new entrant within the DEA framework. Recently, there has been an increasing interest in bringing the two concepts together, with research studies aiming to integrate DEA and big data concepts within a single framework. But, more work is needed to fully explore the value of their intersection -- it is time to view DEA in light of its potential usage in new fields or new usage within the existing fields, under the big data umbrella. It is time to view DEA models beyond their present scope and mine new insights for better data-driven decision-making.

Biomass Valorization to Bioenergy R. Praveen Kumar 2019-10-11 This book covers topics related to bioenergy production from various biomass sources, including agricultural residues and waste biomass from both domestic and industrial use. It includes useful data, illustrations, and case studies of bioenergy production facilities. The contents of this book will be of interest to readers looking to scale up production and evaluate the selection and optimization of resources in order to overcome the current limitations of biomass to bioenergy conversions. The book will be of interest to researchers and industry professional alike.

Overcoming School Refusal Joanne Garfi 2018-01-31 School refusal affects up to 5% of children and is a complex and stressful issue for the child, their family and school. The more time a child is away from school, the more difficult it is for the child to resume normal school life. If school refusal becomes an ongoing issue it can negatively impact the child's social and educational development. Psychologist Joanne Garfi spends most of her working life assisting parents, teachers, school counsellors, caseworkers, and community policing officers on how best to deal with school refusal. Now her experiences and expertise are available in this easy-to-read practical book. *Overcoming School Refusal* helps readers understand this complex issue by explaining exactly what school refusal is and provides them with a range of strategies they can use to assist children in returning to school. Areas covered include:

- types of school refusers
- why children refuse to go to school
- symptoms
- short term and long term consequences
- accurate assessment
- treatment options
- what parents can do
- what schools can do
- dealing with anxious high achievers
- how to help children on the autism spectrum with school refusal

Divorce Sucks Mary Jo Eustace 2009-09-18 Hock the platinum. Take down the vacation photos. Cancel the joint checking account. There's no question . . . Divorce Sucks. And perhaps no one knows that better than author Mary Jo Eustace, whose ex-husband Dean McDermott married Tori Spelling a mere thirty days after their divorce was finalized. One part tell-all and one part guide to get readers on their feet after a bitter breakup, this hilarious addition to the bestselling Sucks series tells everything readers don't want to know about divorce - from what a phone call with a lawyer will cost; to how to handle your newer, younger replacement; to what Hollywood divorcees are actually thinking when they watch their ex walk the red carpet with a millionairess. Sometimes horrifying, sometimes gratifying, and never merciful, this book will give readers an inside look at one of today's most public divorces while reminding them - hey, it could always be worse.

The StONED Age Mark Andor 2013 Based on the seminal paper of Farrell (1957), researchers have developed several methods for measuring efficiency. Nowadays, the most prominent representatives are nonparametric data envelopment analysis (DEA) and parametric stochastic frontier analysis (SFA), both introduced in the late 1970s. Researchers have been attempting to develop a method which combines the virtues - both nonparametric and stochastic - of these "oldies". The recently introduced Stochastic non-smooth envelopment of data (StONED) by Kuosmanen and Kortelainen (2010) is such a promising method. This paper compares the StONED method with the two "oldies" DEA and SFA and extends the initial Monte Carlo simulation of Kuosmanen and Kortelainen (2010) in several directions. We show, among others, that, in scenarios without noise, the rivalry is still between the "oldies", while in noisy scenarios, the nonparametric StONED PL now constitutes a promising alternative to the SFA ML.

The Choreographic Jenn Joy 2014-10-10 An investigation of dance and choreography that views them not only as artistic strategies but also as intrinsically theoretical and critical practices. The choreographic stages a conversation in which artwork is not only looked at but looks back; it is about contact that touches even across distance. The choreographic moves between the corporeal and cerebral to tell the stories of these encounters as dance trespasses into the discourse and disciplines of visual art and philosophy through a series of stutters, steps, trembles, and spasms. In *The Choreographic*, Jenn Joy examines dance and choreography not only as artistic strategies and disciplines but also as intrinsically theoretical and critical practices. She investigates artists in dialogue with philosophy, describing a movement of conceptual choreography that flourishes in New York and on the festival circuit. Joy offers close readings of a series of experimental works, arguing for the choreographic as an alternative model of aesthetics. She explores constellations of works, artists, writers, philosophers, and dancers, in conversation with theories of gesture, language, desire, and history. She choreographs a revelatory narrative in which Walter Benjamin, Pina Bausch, Francis Alÿs, and Cormac McCarthy dance together; she traces the feminist and

queer force toward desire through the choreography of DD Dorvillier, Heather Kravas, Meg Stuart, La Ribot, Miguel Gutierrez, Luciana Achugar, and others; she maps new forms of communicability and pedagogy; and she casts science fiction writers Samuel R. Delany and Kim Stanley Robinson as perceptual avatars and dance partners for Ralph Lemon, Marianne Vitali, James Foster, and Janet Cardiff and George Bures Miller. Constructing an expanded notion of the choreographic, Joy explores how choreography as critical concept and practice attunes us to a more productively uncertain, precarious, and ecstatic understanding of aesthetics and art making.

Network Data Envelopment Analysis Chiang Kao 2016-08-23 This book presents the underlying theory, model development, and applications of network Data Envelopment Analysis (DEA) in a systematic way. The field of network DEA extends and complements conventional DEA by considering not only inputs and outputs when measuring system efficiency, but also the internal structure of the system being analyzed. By analyzing the efficiency of individual internal components, and more particularly by studying the effects of relationships among components which are modeled and implemented by means of various network structures, the "network DEA" approach is able to help identify and manage the specific components that contribute inefficiencies into the overall systems. This relatively new approach comprises an important analytical tool based on mathematical programming techniques, with valuable implications to production and operations management. The existing models for measuring the efficiency of systems of specific network structures are also discussed, and the relationships between the system and component efficiencies are explored. This book should be able to inspire new research and new applications based on the current state of the art. Performance evaluation is an important task in management, and is needed to (i) better understand the past accomplishments of an organization and (ii) plan for its future development. However, this task becomes rather challenging when multiple performance metrics are involved. DEA is a powerful tool to cope with such issues. For systems or operations composed of interrelated processes, managers need to know how the performances of the various processes evaluated and how they are aggregated to form the overall performance of the system. This book provides an advanced exposition on performance evaluation of systems with network structures. It explores the network nature of most production and operation systems, and explains why network analyses are necessary.

Being in Contact: Encountering a Bare Body Mariella Greil 2021-03-22 This choreographed book is dedicated to the phenomenon of the bare body in contemporary performance. This work of artistic research draws on philosophical, biopolitical, and ethical discourses relevant to the appearance of bare bodies in choreography, setting a framework for a reflexive movement between affect and ethics, sensuous address and response. Acts of exposure and concealment are culturally situated and anchored, and are examined for their methodological and nanopolitical significance. The concepts of anarchic responsibility and choreo-ethics lead to a reevaluation of contact, relationship, and solidarity. Choreography is thus understood as a complex field of revelatory experiences based on ecologies of aesthetic perception and ethico-political agency.

Public Space In Urban Asia William Siew Wai Lim 2013-12-16 Over the past few decades, rapid urbanisation has threatened to erode public space, especially in emerging economies. Market forces that prioritise profit generation are allowed to construct venues of consumption in its place. Though their physical

appearance may resemble traditional public space, in reality, they are greatly restrictive and diminished in affordability, accessibility and social meaning. It is in this context that William SW Lim, chairman of Asian Urban Lab, has brought together architects, designers, historians, sociologists and urbanists from the region to discuss public space in selected Asian cities. Part One contains essays from participants from Chongqing, Hong Kong, Jakarta, Kuala Lumpur, Singapore and Taipei and observations from commentators. Several essays by William SW Lim on the subject round off the discussion in Part Two. The thoughtful essays in *Public Space in Urban Asia* emphasise how engaging with the present actuality of cities and public awareness of spatial justice in cities are crucial – for it is the achievement of spatial justice that will help create a greater level of happiness across societies in our increasingly urbanised world.
