This Special Issue includes contributions addressing new results on these topics, both from a theoretical and an applied point of view.

Inflammation, Infection, and Microbiome in Cancers Jun Sun 2021-04-20 This book offers a summary and discussion of the advances of inflammation and infection in various cancers. The authors cover the classically known virus infections in cancer, novel roles of other pathogens (e.g. bacteria and fungi), as well as biomarkers for diagnosis and therapy. Further, the chapters highlight the progress of immune therapy, stem cells and the role of the microbiome in the pathophysiology of cancers. Readers will gain insights into complex microbial communities, that inhabit most external human surfaces and play a key role in health and disease. Perturbations of host-microbe interactions often lead to altered host responses that can promote cancer development. Thus, this book highlights emerging roles of the microbiome in pathogenesis of cancers and outcome of therapy. The focus is on mechanistic concepts that underlie the complex relationships between host and microbes. Approaches that can inhibit infection, suppress chronic inflammation and reverse the dysbiosis are discussed, as a means for restoring the balance between host and microbes. This comprehensive work will be beneficial to researchers and students interested in infectious diseases, microbiome, and cancer as well as clinicians and general physiologists.

The China-Pakistan Economic Corridor of the Belt and Road Initiative Siegfried O. Wolf 2019-06-20 This book focuses on the implementation of the China-Pakistan Economic Corridor (CPEC), a multi-billion-dollar infrastructure development project intended to connect Asia with

Europe, the Middle East and Africa. By introducing a new analytical approach to the study of economic corridors, it gauges the anticipated economic and geopolitical impacts on the region and discusses whether the CPEC will serve as a pioneer project for future regional cooperation between and integration of sub-national regions such as Balochistan, Khyber Pakhtunkhwa, the Federally Administered Tribal Areas, and Gilgit-Baltistan. Further, it explores the interests, expectations and policy approaches of both Chinese and Pakistani local and central governments with regard to the CPEC's implementation. Given its scope, the book will appeal to regional and spatial sciences scholars, as well as social scientists interested in the regional impacts of economic corridors. It also offers valuable information for policymakers in countries participating in the Belt-and-Road Initiative or other Chinese-supported development projects.

Gender Violence in Peace and War Victoria Sanford 2016-09-16 Reports from war zones often note the obscene victimization of women, who are frequently raped, tortured, beaten, and pressed into sexual servitude. Yet this reign of terror against women not only occurs during exceptional moments of social collapse, but during peacetime too. As this powerful book argues, violence against women should be understood as a systemic problem—one for which the state must be held accountable. The twelve essays in *Gender Violence in Peace and War* present a continuum of cases where the state enables violence against women—from state-sponsored torture to lax prosecution of sexual assault. Some contributors uncover buried histories of state violence against women throughout the twentieth century, in locations as diverse as Ireland, Indonesia, and Guatemala. Others spotlight ongoing struggles to define the state's role in preventing gendered violence, from domestic abuse policies in the Russian Federation to anti-trafficking laws in the United States. Bringing together cutting-edge research from political science, history, gender studies, anthropology, and legal studies, this collection offers a comparative analysis of how the state facilitates, legitimates, and perpetuates gender violence worldwide. The contributors also offer vital insights into how states might adequately protect women's rights in peacetime, as well as how to intervene when a state declares war on its female citizens.

Financial Management from an Emerging Market Perspective Soner Gokten 2018-01-17 One of the main reasons to name this book as Financial Management from an Emerging Market Perspective is to show the main differences of financial theory and practice in emerging markets other than the developed ones. Our many years of learning, teaching, and consulting experience have taught us that the theory of finance differs in developed and emerging markets. It is a well-known fact that emerging markets do not always share the same financial management problems with the developed ones. This book intends to show these differences, which could be traced to several characteristics unique to emerging markets, and these unique characteristics could generate a different view of finance theory in a different manner. As a consequence, different financial decisions, arrangements, institutions, and practices may evolve in emerging markets over time. The purpose of this book is to provide practitioners and academicians with a working knowledge of the different financial management applications and their use in an emerging market setting. Six main topics regarding the financial management applications in emerging markets are covered, and the context of these topics are "Capital Structure," "Market Efficiency and Market Models," "Merger and Acquisitions and Corporate Governance," "Working Capital Management," "Financial Economics and Digital Currency," and "Real Estate and Health Finance."

Persian Prose Bo Utas 2021-07-01 Volume V of A History of Persian Literature presents a broad survey of Persian prose: from biographical, historiographical, and didactic prose, to scientific manuals and works of popular prose fiction. It analyzes the rhetorical devices employed by writers in different periods in their philosophical and political discourse; or when their aim is primarily to entertain rather than to instruct, the chapters describe different techniques used to transform old stories and familiar tales into novel versions to entice their audience. Many of the texts in prose cited in the volume share a wealth of common lore and literary allusions with Persian poetry. Prose and poetry frequently appear on the same page in tandem. In different ways, therefore, this creative interplay demonstrates the perennial significance of intertextuality, from the earliest times to the present; and help us in the process to further our understanding and enhance our enjoyment of Persian literature in its different manifestations throughout history

History of Civilizations of Central Asia: Development in contrast : from the sixteenth to the mid-nineteenth century Ahmad Hasan Dani 2003-01-01 The period treated in this volume is highlighted by the slow retreat of nomadism and the progressive increase of sedentary polities owing to a fundamental change in military technology: Furthermore, this period certainly saw a growing contrast in the pace of economic and cultural progress between Central Asia and Europe. The internal growth of the European economies and the influx of silver from the New World gave Atlantic Europe an increasingly important position in world trade and caused a major shift in inland Asian trade. Thus, 1850 marks the end of the total sway of pre-modern culture as the extension of colonial dominance was accompanied by the influx of modern ideas.

The Hanging of Afzal Guru and the Strange Case of the Attack on the Indian Parliament Arundhati Roy 2016-07-27 On 13 December 2001, the Indian Parliament was attacked by a few heavily armed men. Eleven years later, we still do not know who was behind the attack, nor the identity of the attackers. Both the Delhi high court and the Supreme Court of India have noted that the police violated legal safeguards, fabricated evidence and extracted false confessions. Yet, on 9 February 2013, one man, Mohammad Afzal Guru, was hanged to 'satisfy' the 'collective conscience' of society. This updated reader brings together essays by lawyers, academics, journalists and writers who have looked closely at the available facts and who have raised serious questions about the investigations and the trial. This new version examines the implications of Mohammad Afzal Guru's hanging and what it says about the Indian government's relationship with Kashmir.

Good Video Games and Good Learning James Paul Gee 2013 <math>\> Good Video Games and Good Learning presents the most important essays by James Paul Gee devoted to the ways in which good video games create good learning. The chapters in this book argue that good games teach through well-designed problem-solving experiences. They also prove that game-based learning must involve more than software and technology and engage with the design of passionate-affinity spaces where people mentor each other's learning and engagement. In the end, the book offers a model of collaborative, interactive, and embodied learning centered on problem solving, a model that can be enhanced by games, but which can be accomplished in many different ways with or without games.

Innovation in Information Systems and Technologies to Support Learning Research Mohammed Serrhini 2019-11-30 This book provides glimpses into contemporary research in information systems & technology, learning, artificial intelligence (AI), machine learning, and security and how it applies to the real world, but the ideas presented also span the domains of telehealth, computer vision, the role and use of mobile devices, brain-computer interfaces, virtual reality, language and image processing and big data analytics and applications. Great research arises from asking pertinent research questions. This book reveals some of the authors' "beautiful questions" and how they develop the subsequent "what if" and "how" questions, offering readers food for thought and whetting their appetite for further research by the same authors.
