Reproductive Tract Infections Adrienne Germain 2013-06-29 Reproductive tract infections (RTIs) have become a silent epidemic that is devastating women's lives. Each year, thousands of women die needlessly from the consequences of these infections, including cervical cancer, ectopic pregnancy, acute and chronic infections of the uterus and the fallopian tubes, and puerperal infections. For many women, this happens because they receive medical attention too late, if at all. The terrible irony of this tragedy is that early diagnosis and treatment for many RTIs do not require high-technology health care. For the hundreds of millions of women with chronic RTIs acquired from their sexual partners, life can become a living hell. Infection is a major cause of infertility, and it leads to scorn and rejection in many countries. These women may experience constant pain, have festering lesions of the genital tract, be at enhanced risk of secondary diseases, and endure social ostracism. The problems associated with RTIs have grown even greater in the past decade with the emergence of human immunodeficiency virus (HIV) and AIDS. Preexisting sexually transmitted disease, particularly when associated with genital tract ulcers, raises women's vulnerability to the transmission of HIV 3-5 fold.

The explanatory feedback material following answers to the test questions is excellent. Now the student has a resource that actually guides them towards success. Circulatory, Digestive & Reproductive Systems: The Reproductive System Gr. 5-8
Susan Lang 2015-09-01 **This is the chapter slice "The Reproductive System" from the full lesson plan "Circulatory, Digestive & Reproductive Systems"** How can you tell the difference between an artery and a vein? Our resource tells you how! Learn the major organs of four body systems and how they work to keep us alive and healthy. We begin with blood, blood vessels and the heart. Next, we follow the path food takes from the mouth to the large intestine, and find out how food is turned into fuel. Then it's on to how the liver, lungs and skin all help rid our body of toxins. We look inside the kidneys and intestines, and finish with how a tiny sperm and egg cell can grow into a baby. Reading passages, student activities, test prep, and color mini posters all included. All of our content is aligned to your State Standards and are written to Bloom's Taxonomy and STEM initiatives.
