**Diversifying Food and Diets** Jessica Fanzo 2013-06-26 Currently 868 million people are undernourished and 195 million children under five years of age are stunted. At the same time, over 1 billion people are overweight and obese in both the developed and developing world. Diseases previously associated with affluence, such as cancer, diabetes and cardio-vascular disease, are on the rise. Food system-based approaches to addressing these problems that could enhance food availability and diet quality through local production and agricultural biodiversity often fall outside the traditional scope of nutrition, and have been under-researched. As a consequence, there remains insufficient evidence to support well-defined, scalable agricultural biodiversity interventions that can be linked to improvements in nutrition outcomes. Agricultural biodiversity is important for food and nutritional security, as a safeguard against hunger, a source of nutrients for improved dietary diversity and quality, and strengthening local food systems and environmental sustainability. This book explores the current state of knowledge on the role of agricultural biodiversity in improving diets, nutrition and food security. Using examples and case studies from around the globe, the book explores current strategies for improving nutrition and diets and identifies key research and implementation gaps that need to be addressed to successfully promote the better use of agricultural biodiversity for rural and urban populations and societies in transition.

**Tourists and Tourism** Simone Abram 2021-04-27 The fact that tourism is a major global industry forecast to continue its dramatic growth well into the twenty-first century is often cited as a rationale for its analysis. However, while the connection between individual locations and the world's global markets is an obvious product of tourism, the heart of the tourist experience is the construction of identity: the relation of the traveller to resident populations; the participants' views of themselves and others; tourists' search for authenticity and their testing of boundaries. This book significantly furthers current debates on tourism by

asking important and vexing questions about the nature of the tourist experience: 'folk museums' that forget many of the 'folk' who live in the areas represented; the environments and events that are shaped to meet the 'imagined dreams' of tourist spectators; the categorization of visitors and returnees who take up residence and participate in the construction of 'local' identities; the evolving meanings associated with indigenous culture, tradition, heritage, representation, reality and authenticity. In renegotiating the definitions of tourism for the new millennium, this book represents a major contribution to an emerging and highly topical area of study.

**Biodiversity Change and Human Health** Osvaldo E. Sala 2012-09-26 Biodiversity Change and Human Health brings together leading experts from the natural science and social science realms as well as the medical community to explore the explicit linkages between human-driven alterations of biodiversity and documented impacts of those changes on human health. The book utilizes multidisciplinary approaches to explore and address the complex interplay between natural biodiversity and human health and well-being. The five parts examine health trade-offs between competing uses of biodiversity (highlighting synergistic situations in which conservation of natural biodiversity actually promotes human health and well-being); relationships between biodiversity and quality of life that have developed over ecological and evolutionary time; the effects of changing biodiversity on provisioning of ecosystem services, and how they have affected human health; the role of biodiversity in the spread of infectious disease; native biodiversity as a resource for traditional and modern medicine Biodiversity Change and Human Health synthesizes our current understanding and identifies major gaps in knowledge as it places all aspects of biodiversity and health interactions within a common framework. Contributors explore potential points of crossover among disciplines (both in ways of thinking and of specific methodologies) that could ultimately expand opportunities for humans to both live sustainably and enjoy a desirable quality of life.

**So Long, and Thanks for All the Fish** Douglas Adams 2008-12-30 Now celebrating the 42nd anniversary of The Hitchhiker's Guide to the Galaxy, soon to be a Hulu original series! "A madcap adventure . . . Adams's writing teeters on the fringe of inspired lunacy."—United Press International Back on Earth with nothing more to show for his long, strange trip through time and space than a ratty towel and a plastic shopping bag, Arthur Dent is ready to believe that the past eight years were all just a figment of his stressed-out imagination. But a gift-wrapped fishbowl with a cryptic inscription, the mysterious disappearance of Earth's dolphins, and the discovery of his battered copy of The Hitchhiker's Guide to the Galaxy all conspire to give Arthur the sneaking suspicion that something otherworldly is indeed going on. God only knows what it all means. Fortunately, He left behind a Final Message of explanation. But since it's light-years away from Earth, on a star surrounded by souvenir booths, finding out what it is will mean hitching a ride to the far reaches of space aboard a UFO with a giant robot. What else is new? "The most ridiculously exaggerated situation comedy known to created beings . . . Adams is irresistible."—The Boston Globe

**Morphological Autonomy** Maria Goldbach 2011-08-25 This book is about the nature of morphology and its place in the structure of grammar. Drawing on a wide range of aspects of Romance inflectional morphology, leading scholars present detailed arguments for the autonomy of morphology, ie morphology has phenomena and mechanisms of its own that are not reducible to syntax or phonology. But which principles and rules govern this independent component and which phenomena can be described or explicated by the mechanisms of the morphemic level? In shedding light on these questions, this volume constitutes a major contribution to Romance historical morphology in particular, and to our understanding of the nature and importance of morphomic structure in language change in general.

*The State of European Integration* Yannis A. Stivachtis 2016-03-03 The State of European Integration provides scholars, practitioners, experts and students with a comprehensive account of the state of the European Union today. **Judges** Andrea Camillieri 2015-10-06 Incorporating distinct traditions and styles of crime writing, the three

novellas in *Judges* are united by a theme of idealistic judges in an often futile struggle against crime and corruption. Andrea Camilleri's novella recounts the charming Judge Surra. Leaving his family behind, Surra arrives in the 19th-century Sicilian town of Montelusa from Turin and is given quirky gifts from the locals, but is oblivious to the veiled threats accompanying them. Finally forced to contend with a hostile community and an imminent attempt on his life, Surra proves he is relentless in his quest for justice. Carlo Lucarelli's novella presents a darkly hued Bologna in the 1980s, where judges are frequent targets of assassination attempts. The protagonist, Judge Valentina Lorenzi--"La Bambina"--stumbles upon an extensive money laundering operation involving prominent public officials. Determined to nip Valentina's investigations in the bud, the criminals attack the judge and leave her clinging to life. Ultimately, Valentina is faced with a troubling question: will she break her vow to uphold the letter of the law in order to bring those responsible to justice? The final novella, *The Triple Dream of the Prosecutor*, by judge and novelist Giancarlo De Cataldo, teeters between dream and reality. Prosecutor Mandati is engaged in a life-long feud with the corrupt mayor of Novere, and his efforts finally pay off on the night before the trial of his life. Kafkaesque, tumultuous, and thoroughly gripping.

**Children of the Mother Goddess. History of Mediterranean Neonates** Vassilios Fanos 2020-12-11 The leading elements in this volume are the cultural representation of birth and the forms through which its narration and representation develop in the figurative arts, through historical references, mythological tales and legends, traditions, customs and habits. The influence of myth, language and artistic expression on our cultural representation of procreation is manifest, and this way of "narrating" birth resists even today, although it comes into conflict with a more scientific vision of pregnancy and childbirth. With this book we believe we have contributed to an in-depth examination of illness narratives, thus favouring the search for a convergence between medical language in the sector and the language of cultural experience so that evidence-based medicine does not clash with narrative-based medicine, but that the two languages come together towards a reciprocity that will strengthen the alliance between physician and patient.

Peasant Women and Politics in Facist Italy Perry Willson 2014-02-04 Peasant women were the largest female occupational group in Italy between the wars. They led lives characterised by great poverty and heavy workloads, but Fascist propaganda extolled them as the mothers of the nation and the guardians of the rural worlds, the most praiseworthy of Italian women. This study is the first published history of the *Massaie Rurali*, the Fascist Party's section for peasant women, which, with three million members by 1943, became one of the largest of the regime's mass mobilizing organizations. The section played a key role in such core fascist campaigns as nation-building and ruralization. Perry Willson draws on a wide range of archival and contemporary press sources to investigate the nature of the *Massaie Rurali* and the dynamics of class and gender that lay at its heart. She explores the organization's political message, its propaganda and the reasons why so many women joined it.

**Colour and colour naming: crosslinguistic approaches** João Paulo Silvestre 2016-09-01 The Colour and Colour Naming conference, held in 2015 at the University of Lisbon, offered a chance to explore colour naming processes from a cross-linguistic approach. The conference was an initiative of the working group Lexicography And Lexicology from a Pan-European Perspective, itself part of the COST action European Network of Lexicography. The working group investigates the various ways by which vocabularies of European languages can be represented in dictionaries and how existing information from single language

dictionaries can be displayed and interlinked to better communicate their common European heritage. The proceedings gather together a selection of studies originally presented at the conference. The first section of the volume outlines a Pan-European perspective of colour names; the second section is devoted to the categorisation and lexicographic description of colour terms.

**Competition in Inflection and Word-Formation** Franz Rainer 2019-09-17 This is the first volume specifically dedicated to competition in inflection and word-formation, a topic that has increasingly attracted attention. Semantic categories, such as concepts, classes, and feature bundles, can be expressed by more than one form or formal pattern. This departure from the ideal principle "one form – one meaning" is particularly frequent in morphology, where it has been treated under diverse headings, such as blocking, Elsewhere Condition, Pāṇini's Principle, rivalry, synonymy, doublets, overabundance, suppletion and other terms. Since these research traditions, despite the heterogeneous terminology, essentially refer to the same underlying problems, this volume unites the phenomena studied in this field of linguistic morphology under the more general heading of competition. The volume features an extensive state of the art report on the subject and 11 research papers, which represent various theoretical approaches to morphology and address a wide range of aspects of competition, including morphophonology, lexicology, diachrony, language contact, psycholinguistics, sociolinguistics and language acquisition.

The Jews in Sicily Shlomo Simonsohn 1997 This volume of the "Documentary History of the Jews in Italy" is the ninth of the second series, illustrating the history of the Jews in Sicily based on notarial and court records. It is the sequel to the eight volumes of the first series. Notarial deeds drawn up by public notaries in Palermo and elsewhere and cases brought before the Pretorian Court in Palermo present a kaleidoscopic picture of the private lives of the Jews of Sicily during the last three centuries of their presence on the island. They illustrate the economic, social and religious history of the Jewish minority and the relations with the Christian majority. Much information is provided on trade and commerce, crafts and professions, religious and family life. Some light is thrown also on the internal life of the communities, particularly the larger ones, including organization and institutions, the synagogue, education, customs and traditions. Although the surviving legal deeds present only a fraction of the total drawn up in those years, they are copious and abundant. Over 30,000 documents of this group were selected for publication, most appearing here for the first time. While some documents are discussed at length, the majority are only presented in summary form. The volume is provided with additional bibliography and indexes, while the introduction will appear at the end of the series.
