**Which Contract?** Sarah Lupton 2019-06-27 Which Contract? is an invaluable desktop companion to be turned to at the start of every new project and is recommended to any professional whose clients expect him or her to know the contemporary procurement landscape inside out. Providing clear guidance on how to identify the most appropriate procurement strategy and contract for a given set of circumstances, it has been brought fully up to date to take account of the latest editions of all the recognised forms from JCT 2011 to FIDIC.

**An Employer's and Engineer's Guide to the FIDIC Conditions of Contract** Michael D. Robinson 2013-02-05 When all parties involved in the construction process fully understand their roles and are able to anticipate potential points of conflict, disputes and delays will be minimised. The Employer's and Engineer's Guide to the FIDIC Conditions of Contract sets out the essential administrative requirements of a FIDIC based contract by reference to the FIDIC 1999 Red Book. The obligations and duties of the Employer and the Engineer are identified and discussed. Potential pitfalls are highlighted and likely consequences pointed out. The importance of the Employer's role in the preparation of tenders, which fully reflect his requirements and duties and obligations arising in the execution of the works, is emphasised. The key role of the Engineer in the effective administration of contracts after award is examined and commentary provided. Included in the guide are a number of appendices, including model letters which will be of value to less experienced staff (particularly those whose mother-tongue is not the English language). Engineers, quantity surveyors and project managers engaged in the contractual administration of international projects using FIDIC forms of contract will find the concise guidance in simple and jargon-free language provided here invaluable. This, together with the author's earlier book, Contractor's Guide to the FIDIC Conditions of Contract - which describes the duties, rights and responsibilities of the Contractor - represents the totality of supervision, design and execution of construction projects executed under the FIDIC Conditions of Contract. This book's companion website offers invaluable resources to freely download, adapt and use: Model letters for use by the Employer Model letters for use by the Contractor Sample Interim Payment Certificate Model Form for Submissions to the Engineer Model

*The FIDIC Forms of Contract* Nael G. Bunni 2013-02-05 In September 1999, FIDIC introduced its new Suite of Contracts, which included a "new" Red, Yellow, Silver and Green forms of contract. The "new" Red Book was intended to replace the 1992 fourth edition of the Red Book, with the ambition that its use would cease with time. This ambition has not materialised and is unlikely to do so in the future. Despite the importance of the 1999 Forms, there has been very little published on the new concepts adopted in them and how they interact with the previous forms. This important work considers these aspects together with the many developments affecting the fourth edition of the Red Book that have taken place since 1997, when the second edition of this book was published, and relates them to key contracting issues. It is written by a chartered engineer, conciliator and international arbitrator with wide experience in the use of the FIDIC Forms and in the various dispute resolution mechanisms specified in them. Important features of this book include:

- background and concepts of the various forms of contract;
- a detailed comparison of the wording of the 1999 three main forms, which although similar in nature; it nevertheless significantly differs in certain areas where the three forms diverge due to their intended purpose;
- analysis of the rights and obligations of the parties involved in the contract and the allocation of risks concerned;
- a range of 'decision tree' charts, analysing the main features of the 1992 Red Book, including risks, indemnities and insurances, claims and counterclaims, variations, procedure for claims, programme and delay, suspension, payments and certificates, dispute resolution mechanisms, and dispute boards;
- a much enlarged discussion of the meaning of "claim" and "dispute" and the types of claim with a discussion of the Notice provision in the 1999 forms of contract for the submission of claims by a contractor and by an employer;
- the FIDIC scheme of indemnities and insurance requirements; and the methods of dispute resolution provided by the various forms of contract; and
- five new chapters in this third edition, the first four chapters deal with each of the 1999 forms and the fifth chapter is confined to the topic of Dispute Boards.

**Understanding FIDIC** Kelvin Hughes 2020-12-21 Understanding FIDIC explains in simple and practical terms what is often seen as a very complex range of international engineering and construction contracts. Covering the FIDIC 2017 Red, Yellow and Silver Books (referred to as "The Rainbow Suite"), the book gives an overview of all three contracts, including coverage of changes between the 1999 contracts and the present 2017 suite. FIDIC contracts are widely used as far afield as Europe, the Middle East, Asia and Australia, and this book provides a practical yet thorough guide to the key elements that practitioners preparing and administering these contracts would need to be aware of. In his approachable and readable style, Kelvin Hughes covers: The obligations and responsibilities of the Employer, the Employer's Representative, the Engineer and the Contractor Quality and Defects Liability Design Responsibility and Liability Variations, Measurement and Payment Procedures Progress, Delays, Extensions of Time and Completion Suspension and Termination Insurances Employer's and Contractor's Claims The Dispute Avoidance/Adjudication Board and the Resolution of Disputes Tendering Anyone working with FIDIC contracts whether as the Employer, Employer's Representative, Engineer or Contractor will benefit greatly from this easy-to-read guide to the Rainbow Suite. Students on professional courses or researching the contracts for project work will also find this book extremely useful.

The International Application of FIDIC Contracts Donald Charrett 2019-10-22 FIDIC contracts are the most widely used contracts for international construction around the world and are used in many different jurisdictions, both common law and civil law. For any construction project, the General Conditions of Contract published by FIDIC need to be supplemented by Particular Conditions that specify the specific requirements of that project. The International Application of FIDIC Contracts: A Practical Guide provides readers with detailed guidance and resources for the preparation of the Particular Conditions that will comply with the requirements of the applicable laws that apply to the site where the work is carried out, and for the governing law of the contract, for a number of the jurisdictions in which FIDIC contracts are used. This book is essential reading for construction professionals, lawyers and students of construction law.

FIDIC Contracts: Law and Practice Ellis Baker 2013-07-31 FIDIC Contracts: Law and Practice is sure to become the leading industry standard guide to using the FIDIC forms, and is the only book to date which deals with the whole suites of contracts, including the new gold book for Design, Build and Operate projects. The White & Case work is outstanding in its detailed consideration and treatment of the legal aspects of the interpretation and application of the Conditions, touching on many points that most people would not have encountered. **Contracts for Construction and Engineering Projects** Donald Charrett 2021-12-23 Contracts for Construction and Engineering Projects provides unique and invaluable guidance on the role of contracts in construction and engineering projects. The work explores various aspects of the intersection of contracts and construction projects involving the work of engineers and other professionals engaged in construction, whether as project managers, designers, constructors, contract administrators, schedulers, claims consultants, forensic engineers or expert witnesses. Compiling papers written and edited by the author, refined and expanded with additional chapters in this new edition, this book draws together a lifetime of lessons learned in these fields and covers the topics a practising professional might encounter in construction and engineering projects, developed in bite-sized chunks. The chapters are divided into five key parts: 1. The engineer and the contract 2. The project and the contract 3. Avoidance and resolution of disputes 4. Forensic engineers and expert witnesses, and 5. International construction contracts. The inclusion of numerous case studies to illustrate the importance of getting the contract right before it is entered into – and the consequences that may ensue if this is not done – makes this book essential reading for professionals practising in any area of design, construction, contract administration, preparation of claims or expert evidence, as well as construction lawyers who interact with construction professionals.

A Contractor's Guide to the FIDIC Conditions of Contract Michael D. Robinson 2011-02-16 This guide will help the contractor's staff overcome some of the difficulties encountered on a typical international contract using FIDIC forms. The majority of FIDIC-based contracts use the Red Book (Conditions of Contract for Construction), so this book concentrates on the use of those particular forms. Supplementary comments are included in Appendix C for the Yellow Book (Plant & Design-Build) recommended for use where the contractor has a design responsibility. The Contractor is represented on site by the Contractor's Representative who carries the overall responsibility for all the Contractor's on-site activities. In order to provide guidance to the Contractor's Representative and his staff, this book is divided into five sections: A summarized general review of the Red Book from the Contractor's perspective. review of the activities and duties of the Contractor's Representative in the same clause sequencing as they appear in the Red Book. A summary of these activities and duties but arranged in order of their likely time sequence on site. This has the added intention of providing the Contractor's Representative with a means of ensuring that documents are not only properly provided to the Employer and Engineer, but most importantly that they are provided within the time limits specified in the Contract. A selection of model letters is provided which make reference to the various clauses of the contract requiring the Contractor to make submissions to the Employer or Engineer. Various appendices. The guide is not intended to be a review of the legal aspects of FIDIC-based contracts; legal advice should be obtained as and when necessary, particularly if the Contractor has little or no knowledge of the local law. Armed on site with a copy of The Contractor and the FIDIC Contract, the Contractor's Representative will be more able to avoid contractual problems rather than spend considerable time and energy resolving those problems once they have arisen.

*Chern on Dispute Boards* Cyril Chern 2008-04-30 Dispute boards were first introduced almost 20 years ago. Since then close to \$100 billion US dollars worldwide has been spent on construction projects that have used dispute boards. Of these, 98% were constructed without any court battles and of the remaining 2%, the dispute board decisions were upheld by either arbitration and/or the court: a truly impressive record. Yet very little is known about what dispute boards are and how they operate. This book provides the knowledge necessary for those actively involved in dispute board work as well as for those who need to learn the process. Important features of the book include: analysis of the differences between dispute adjudication boards, dispute resolution boards and combined dispute boards in-depth discussion of both the existing and historical international case law on dispute boards, including its history under the British common law, European civil law and Muslim Shari'ah law analysis of the differences between the various major standard forms of dispute board rules – FIDIC, International Chamber of Commerce and DBFederation - along with sample wording to add to or modify these forms as needed. analysis of how referrals are made to dispute boards and sample forms. an in-depth discussion of the ethical requirements relating to dispute board members comparison of board selection techniques with guidelines for implementation and recommendations for the parties sample forms for use in establishing a dispute board discussion of site visits, how they should be conducted and sample forms general forms for use in operating a dispute board, form agendas, form reports and their use how to use a dispute board as a sounding board for grievances in depth discussion of how to write a decision or recommendation with examples of actual dispute board decisions and recommendations disclosure forms, questionnaires for potential board members, and comparison of board member agreements and sample forms a discussion of how to effectively use witnesses and the preparation and presentation of witness statements in dispute board hearings forms of notice and procedural rules governing the operation of dispute boards international case studies with claims, responses and decisions analysis of situations requiring the removal of dispute board members and form

agreements for their removal discussion of the use of dispute boards in areas other than construction.

*FIDIC Contracts in Asia Pacific* Donald Charrett 2021-11-30 FIDIC contracts are the most widely used contracts for international construction around the world and are used in many different jurisdictions, both common law and civil law. For any construction project, the General Conditions of Contract published by FIDIC need to be supplemented by Particular Conditions that specify the specific requirements of that project subject to the relevant laws. *FIDIC Contracts in Asia Pacific* provides readers with detailed guidance and resources for the preparation of the Particular Conditions that will comply with the requirements of the applicable laws for a number of the jurisdictions in which FIDIC contracts are used. The laws that apply to the governing law of the contract, construction works and dispute resolution in each jurisdiction are identified. This book offers chapters on the FIDIC Conditions of Contract for Underground Works, and the perspective of a bilateral aid agency on the use of FIDIC contracts. Each jurisdiction features an outline of its construction industry and information on the impact of Covid-19 on both the execution of construction projects and the operation of construction contracts. This book is essential reading for construction professionals, lawyers and students of construction law using FIDIC contracts.

International Federation of Consulting Engineers 2008

**FIDIC** Wilfred Abraham 2005-01-01 In this unique guide to the suite of contracts published by FIDIC (The International Federation of Consulting Engineers) - the contract forms most widely used for international construction undertakings - twenty-two outstanding authorities in construction law from a wide variety of countries, describe relevant likely pitfalls (and special opportunities) for foreign lawyers in each of their jurisdictions. This very useful book will be extremely welcome to in-house counsel who must evaluate the legal disposition of a proposed or pending construction contract subject to the laws of a foreign jurisdiction. It will continue to be of service as long as the project proceeds and beyond, particularly for the optimal resolution of disputes.

*FIDIC Yellow Book: A Commentary* Ben Beaumont 2018-12-19 The book analyses every aspect of the ease or otherwise of implementing the FIDIC Yellow Book Conditions of Contract. On a clause-by-clause basis, it highlights important structural features and suggests alternative text to avoid problems with the contract. Written in a user-friendly manner by an expert user of the FIDIC Suite of Contracts, who is a Member of the FIDIC President's List of Adjudicators, this book will be a vital reference point for contractors, lawyers, engineers, arbitrators and all others concerned with the FIDIC contracts.

**FIDIC Users' Guide** Brian W. Totterdill 2006 The FIDIC Conditions of Contract for Construction and the Conditions of Contract for Plant and Design-Build (known as the 1999 Red Book and the 1999 Yellow Book) were first published in 1999 and have been used for a large number of contracts around the world. During 2005, FIDIC and the multilateral development banks cooperated to publish the MDB Harmonised Conditions of Contract for Construction. This book is a revised and extended edition of the authors earlier guides.

**The FIDIC Contracts** Andy Hewitt 2014-04-25 'It is clear that there is less chance of failure to observe contract compliance using [this] book, than reliance on reading through the appropriate clauses in the contract... A big plus is that those using the book will find answers to queries relating to contractual issues arising from the FIDIC contracts conditions in a fraction of the time it would take if it were necessary to study the full text... For those using the FIDIC forms for the first time, or infrequently, this book is a must, whilst experienced users will find it a valuable memory jogger. Whichever category the reader falls into, using this book should improve performance... The book is ideal for engineers, quantity surveyors, contract managers and any person whose job it is to understand the workings of a FIDIC contract.' From the book's Foreword by Roger Knowles The most important part of any contract is the obligations of the parties, the time frames in which the parties must perform these obligations, and the consequences of failing to meet them. Failure to carry out obligations correctly is a serious risk and common source of contention or claims. This practical ready-reference on the contractual obligations of the various parties for a FIDIC construction contract promotes efficient administration of construction projects, prevents contention and aids an easier understanding of their obligations. The FIDIC Contracts: obligations of the parties is presented in an easily-referenced format, with the obligations set out in tabular form and clear summaries for each type of contract given in separate sections for the Employer, the Contractor and the Engineer. This guide's ready-reference style will enable the project manager, quantity surveyor or contract manager to quickly check that his company is performing the required obligations correctly - and also to ensure the other parties are doing the same.

**FIDIC Plant and Design-Build Form of Contract Illustrated** Raveed Khanlari 2017-05-05 The Conditions of Contract prepared by FIDIC are used extensively as the standard contract of choice in international construction and civil engineering projects. Engineers working on these projects need to be aware of these contracts, but as the forms are complex it can be difficult to draw together all the sub-clauses relating to a particular issue. The FIDIC Plant and Design-Build Forms of Contract Illustrated crystallizes the requirements of the FIDIC P&DB contract into a range of simple to follow flow charts, providing

a clear and concise way to rapidly assimilate the requirements of each clause. The relationship between the various clauses in the contract, the concepts, process methods and actors involved in each sub-clause are all easily seen, and key issues around each topic (such as periods allowed, notices, etc) are all documented. In addition, related sub-clauses and/or important additional documents are linked so that the reader has a full understanding of the wider implications of each clause.

**Guide to the FIDIC Conditions of Contract for Construction** Michael D. Robinson  
2022-11-07 Brought fully up to date to focus on the FIDIC 2017 edition of the Red Book (Conditions of Contract for Construction), this new edition reviews the contract from the contractor's perspective, summarizing the activities and duties of the contractor's representative in order of their likely time sequence on site. The book is divided into five sections: A summarized general review of the Red Book from the Contractor's perspective. A review of the activities and duties of the Contractor's Representative in the same clause sequencing as they appear in the Red Book. A summary of these activities and duties but arranged in order of their likely time sequence on site. This assists the Contractor's Representative in providing relevant documentation to the Employer and Engineer within the time limits specified in the Contract. A selection of model letters is provided which refer to the various clauses of the contract requiring the Contractor to make submissions to the Employer or Engineer. It is not intended to be a review of the legal aspects of FIDIC-based contracts, but is designed to be highly practical, helping the contractor's staff avoid or overcome some of the difficulties encountered on a typical international contract using the 2017 FIDIC forms.

**Conditions of Contract for Design-build and Turnkey** Fédération internationale des ingénieurs-conseils 1995 The terms of the Conditions of Contract for Design - Build and Turnkey have been prepared by the Federation Internationale des Ingenieurs Conseils (FIDIC) and are recommended for general use for the purpose of the design and construction of works where tenders are invited on an international basis; with minor modifications, the Conditions are also suitable for use on domestic contracts.

of Contract for Civil Engineering Works (the "General Conditions"), which the Hong Kong Government uses for all its civil engineering contracts. The book describes 46 out of 90 clauses in the General Conditions and their practical application, with explanations in plain and simple language under such headings as Commentary, Analysis and Application. The listing of equivalent clauses of the more user-friendly English ICE Conditions and the international FIDIC Conditions together enables the readers to understand the meaning of the General Conditions from a different context. For those readers who find it easier to read in Chinese, the translation will help them to compare with and understand the original English text. The book is therefore useful to students, consulting engineers, surveyors and lawyers who want to understand more about the Hong Kong construction practice.

**A Contractor's Guide to the FIDIC Conditions of Contract** Michael D. Robinson (Consulting engineer) 2011

The 2017 FIDIC Contracts William Godwin 2020-02-19 Provides a clear and comprehensive guide to the 2017 FIDIC contracts—written by a member of the FIDIC Updates Task Group FIDIC contracts are the most widely used engineering standard form contracts internationally but until 2017 the three main forms (the Red, Yellow and Silver Books) had not been amended or updated for nearly two decades, since the first editions were published in 1999. Written by a specialist lawyer who was member of the FIDIC Updates Task Group responsible for writing the new contracts, this book examines in detail the many substantial changes they have introduced. After providing an overview the contracts are examined clause by clause with the aim of showing how each compares and contrasts with the others and how the second editions compare and contrast with the first. The first chapter describes how the Red, Yellow and Silver Books evolved from earlier contract forms and the distinctive characteristics of each, before providing an overview of the updates, including new potential risks for both Employer and Contractor, and then examining, in the second chapter, key general provisions such as the new rules on notices and limitation of liability. Chapter 3 examines the enhanced role of the Engineer in the Red and Yellow Books/Employer's Representative's function in the Silver including the new procedure for determinations as well as the Employer's obligations and contract administration. The Contractor's obligations are considered in chapter 4 while chapter 5 examines his responsibility for design in the Yellow and Silver Books. Chapters 6 to 14 deal respectively with plant, materials and workmanship and staff and labour; time-related provisions in the three contracts including extensions of time, and the Employer's right to suspend the works; testing on and after completion and the Employer's taking over of the works; defects after taking over, acceptance of the works and unfulfilled obligations; measurement (in the Red Book), the Contract Price and

payment; the new variations regime and adjustments to the Price; termination and suspension; care of the works and indemnities and Exceptional Events (previously, Force Majeure). An important feature of the new contracts is their increased emphasis on clarity in the claims process and on dispute avoidance. These topics are examined in the final two chapters, 15 and 16, which deal respectively with the new claims and dispute resolution provisions of the 2017 forms. FIDIC contracts are the most widely used standard forms of contract for international engineering and construction projects Provides a clear and comprehensive guide to the 2017 FIDIC Red, Yellow and Silver Books Written by a senior specialist lawyer and member of the FIDIC 2017 Updates Task Group responsible for writing the new contracts Accessible to those with little or no familiarity with FIDIC contracts The 2017 FIDIC Contracts is an important guide for anyone engaged in international projects, including employers, contractors, engineers, lawyers, suppliers and project financiers/sponsors.

**Multi-Party and Multi-Contract Arbitration in the Construction Industry** Dimitar Kondev 2017-01-23 Multi-Party and Multi-Contract Arbitration in the Construction Industry provides the first detailed review of multi-party arbitration in the international construction sector. Highly practical in approach, the detailed interpretation and assessment of the arbitration of multi-party disputes will facilitate understanding and decision making by arbitrators, clients and construction contractors.

**Understanding Construction Contracts** Akhtar Surahyo 2017-10-18 This book provides an overall understanding of construction contracts, explaining a range of topics with in-depth examples, allowing engineers, site managers, architects, contractors, and other construction professionals in search of information on construction contracts to find it in one place. The volume further serves as a learning tool and a reference guide for students and instructors. Adopting a primarily Canadian perspective, the book provides references from two Standard Contract Documents CCDC (Canadian Construction Document Committee) and FIDIC (International Federation of Consulting Engineers) and briefly describes other major contract documents used within USA and UK construction industries.
