Annual Reports John Stittle 2003 This book concentrates on ensuring that the 'corporate message' is communicated to stakeholders in a way that maximises the value of the annual report and outlines how this might best be achieved. It explains the importance not only of the quantitative (accounting) information but also the qualitative content such as the chairman's statement, directors' report, operating and financial review, explanatory notes and so on. Particular recognition is given to the legal, stock exchange and professional accounting requirements as well as to the increasingly important but more discretionary areas of content such as social, environmental and ethical reporting issues. Crucially, the book discusses the importance of electronic communication now that legislation allows companies to deliver information over the internet. On a practical level, the book takes the reader through the procedures and processes in actually managing the preparation and production of the report. Both the practical and theoretical aspects of the book are placed in context by the use of relevant extracts taken from 'real-life' annual reports of major organisations. By using these authentic examples the book clearly highlights what works and what doesn't. Ensure that your company's annual reports conform to the highest standards of best practice. Don't waste the opportunity to deliver your message.

Financial Reporting under IFRS Wolfgang Dick 2010-10-11 The International Financial Reporting Standards are quite different from other sets of accounting standards, and are fundamentally different from US-GAAP, in that they are based on principles, and not on detailed rules. *Financial Reporting under IFRS: A topic-based approach* offers a global perspective on IFRS by presenting the prescribed rationale and principles and illustrating them through numerous examples from large international companies. It aims to develop the fundamental

skills necessary to read and use the information contained in all types of financial statements, through examples, activities, questions and answers. The book is broadly divided into three sections. Section one examines the structure of the Balance Sheet and the Income Statement, their links and the accounting mechanisms used to prepare them. Section two deals with the identification, evaluation and reporting of Balance Sheet items. Section three covers the use of financial statements to analyze a firm's performance and its risks. Throughout the book special topics are covered, including Derivatives and Hedge accounting (IAS 39), Business Combination (IFRS 3) and Operating Segments (IFRS 8). Financial Reporting under IFRS is ideally suited to the needs of students of accounting and financial reporting, but all users of financial statements, from creditors and investors to suppliers, customers, employees and governments will benefit from its concise, topic-based approach.

Dual Reporting for Equity and Other Comprehensive Income under IFRSs and U.S. GAAP Francesco Bellandi 2012-05-21 Under IFRS, U.S. GAAP, and the SEC rules and regulations, business enterprises must recognise measure and disclose information regarding equity items on the face of the statement of financial position, other specific statements, or in the notes to the financial statements. However, under both IFRS and U.S. GAAP there is no all-inclusive general standard on stockholders' equity. This book clarifies the process of reporting stockholders' equity in a manner which can be reconciled under all the relevant standards. "Not only has the author addressed the informational needs of the players in the accounting industry, he has also drawn, based on his vast experience, practical implications of reporting under both standards."
-Noraini Mohd Nasir, *Journal of Financial Reporting and Accounting*
