**Robert Ballard** Christine M. Hill 1999 A biography which covers the life and professional work of the man whose numerous missions to study the ocean floor led to the discovery of the wreck of the Titanic.

One Hundred and Sixty Minutes William Hazelgrove 2021-09-01 One hundred and sixty minutes. That is all the time rescuers would have before the largest ship in the world slipped beneath the icy Atlantic. There was amazing heroism and astounding incompetence against the backdrop of the most advanced ship in history sinking by inches with luminaries from all over the world. It is a story of a network of wireless operators on land and sea who desperately sent messages back and forth across the dark frozen North Atlantic to mount a rescue mission. More than twenty-eight ships would be involved in the rescue of Titanic survivors along with four different countries. At the heart of the rescue are two young Marconi operators, Jack Phillips 25 and Harold Bride 22, tapping furiously and sending electromagnetic waves into the black night as the room they sat in slanted toward the icy depths and not stopping until the bone numbing water was around their ankles. Then they plunged into the water after coordinating the largest rescue operation the maritime world had ever seen and thereby saving 710 people by their efforts. The race to save the largest ship in the world from certain death would reveal both heroes and villains. It would begin at 11:40 PM on April 14, when the iceberg was struck and would end at 2:20 AM April 15, when her lights blinked out and left 1500 people thrashing in 25-degree water. Although the race to save Titanic survivors would stretch on beyond this, most people in the water would die, but the amazing thing is that of the 2229 people, 710 did not and this was the success of the Titanic rescue effort. We see the Titanic as a great tragedy but a third of the people were rescued and the only reason every man, woman, and child did not succumb to the cold depths is due to Jack Phillips and Harold McBride in an insulated

telegraph room known as the Silent Room. These two men tapping out CQD and SOS distress codes while the ship took on water at the rate of 400 tons per minute from a three-hundred-foot gash would inaugurate the most extensive rescue operation in maritime history using the cutting-edge technology of the time, wireless.

**Titanic's Last Secrets** Brad Matsen 2008-10-01 After rewriting history with their discovery of a Nazi U-boat off the coast of New Jersey, legendary divers John Chatterton and Richie Kohler decided to investigate the great enduring mystery of history's most notorious shipwreck: Why did Titanic sink as quickly as it did? To answer the question, Chatterton and Kohler assemble a team of experts to explore Titanic, study its engineering, and dive to the wreck of its sister ship, Britannic, where Titanic's last secrets may be revealed. Titanic's Last Secrets is a rollercoaster ride through the shipbuilding history, the transatlantic luxury liner business, and shipwreck forensics. Chatterton and Kohler weave their way through a labyrinth of clues to discover that Titanic

was not the strong, heroic ship the world thought she was and that the men who built her covered up her flaws when disaster struck. If Titanic had remained afloat for just two hours longer than she did, more than two thousand people would have lived instead of died, and the myth of the great ship would be one of rescue instead of tragedy. Titanic's Last Secrets is the never-before-told story of the Ship of Dreams, a contemporary adventure that solves a historical mystery.

*A Night to Remember* Walter Lord 1997 An absorbing, minute-by-minute account of the demise of the "unsinkable" Titanic, the massive luxury liner that housed a French "sidewalk cafe" and a grand staircase, among other extravagances, but failed to provide enough lifeboats for the 2,207 passengers on board. Reissue.

**The Sinking of the Titanic** Jim Whiting 2007-03 The sinking of the ocean liner Titanic in 1912 was one of the most famous events of the twentieth century. The ship was the largest and most luxurious passenger liner of the age. While she was being built, Titanic was described as "practically unsinkable." Yet she went down on her maiden voyage after striking an iceberg. More than 1,500 passengers and crew members perished in the frigid waters of the North Atlantic. Nearly all died because the ship didn't carry enough lifeboats. Yet according to the shipping regulations at the time, Titanic actually carried more lifeboats than she was legally required to. Many people also believe that the ship was traveling too fast. Yet her captain wasn't doing anything different than nearly every other liner at that time. The sinking attracted

worldwide media interest. This interest has never lessened. The loss of the Titanic is just as fascinating today as it was on the day it occurred.

*German Propaganda and U.S. Neutrality in World War I* Chad R. Fulwider  
2017-07-31 In the fading evening light of August 4, 1914, Great Britain's H.M.S. *Telconia* set off on a mission to sever the five transatlantic cables linking Germany and the United States. Thus Britain launched its first attack of World War I and simultaneously commenced what became the war's most decisive battle: the battle for American public opinion. In this revealing study, Chad Fulwider analyzes the efforts undertaken by German organizations, including the German Foreign Ministry, to keep the United States out of the war. Utilizing archival records, newspapers, and "official" propaganda, the book also assesses the cultural impact of Germany's political mission within the United States and comments upon the perception of American life in Europe during the early twentieth century.

**The Rescue of the Third Class on the Titanic** David Gleicher 2017-10-18 This work seeks to understand why a disproportionately large number of third class passengers, particularly women and children, died during the sinking of the *Titanic* in relation to the first and second classes. It examines the gender, class, social, and cultural factors that influenced this disparity. It aims to uncover both why and how five hundred and thirty one third class passengers died on the night of April 14th 1912. A key area of focus is the difficult relationship between the ship's authorities and the men of the third class, and the extent to which this determined the fate of passengers during the rescue efforts. The introduction asks 'Who were the third class passengers?' and uses ethnic and economic backgrounds to suggest the third class belonged to the 'Old Immigration' wave of migrants, rather than the contemporary 'New Immigration' of the first and second. The first chapter concerns the exclusion of third class narratives in the 'popular story' of the *Titanic*. Chapters two through seven determine the whereabouts of the third class during every stage of evacuation, and flags the discrepancies in testimonies from both the British and American inquiries. Chapter eight provides a conclusion, which claims the 'popular story' includes a great many falsehoods with regard to the third class - including their treatment by crew, their behaviours, and their survival rates. The first appendix tables nationalities into regions; the second outlines the twenty routes to the lifeboats, as testified by one of the *Titanic* design architects; and the third provides deck plans for every level of the ship.

*Finding the Titanic* Robert D. Ballard 2007-01-01 The great ship Titanic sank in April 1912, and for almost seventy-five years lay unfound on the ocean floor. Scientist Robert Ballard dreamt of finding the lost ship, and this is the thrilling account of how he made this dream come true. Interspersed in the narrative is the story of the sinking itself, as told through the eyes of a twelve-year-old girl, one of the fortunate survivors. The you-are-there narrative, photos, and drawings add to the excitement, and help readers to understand the magnitude of this great tragedy.

*Titanic Captain* Gary Cooper 2011-10-31 Commander Edward John Smith's career had been a remarkable example of how a man from a humble background could get far in the world. Born to a working-class family in the landlocked Staffordshire Potteries, he went to sea at the age of 17 and rose rapidly through the ranks of the merchant navy, serving first in sailing vessels and later in the new steamships of the White Star Line. By 1912, he as White Star's senior commander and regarded by many in the shipping world as the 'millionaire's captain'. In 1912, Smith was given command of the new RMS Titanic for her maiden voyage, but what should have been among the crowning moments of his long career at sea turned rapidly into a nightmare following Titanic's collision with an iceberg. In a matter of hours the supposedly unsinkable ship sank, taking over 1,500 people with her, including Captain Smith.
